

SB2209-Opposed

85 percent threshold is absurd and basically creates a situation encouraging "hold outs" so those informed on the matter can position themselves to get rich quick. Looks like another example of greed to me. PSC permits were designed to cover projects that extend across numerous Counties. Leave that Authority there, the PSC has an obligation to do the right thing. Don't add layers of Bureaucracy. I was a County Commissioner for 16 years. I like local control but some things need to be done by the State and trust that they do their job with integrity.
