

I appeal to the Secretary of the Interior and the Director of the National Park Service (NPS) to allow this herd their traditional freedom. What harm are these beloved and iconic American creatures creating? Why, why, why is everyone set on traumatizing, killing and slaughtering all wild horses and burros? Why must humans destroy every other living being on this earth?

This particular herd has historic value. They are healthy, and they are the only herd existing in North Dakota. Americans love wild horses. Please do the bidding of the American people and allow them to thrive.
