

SUPPORT HB 1628

Hello there!

My name is Julianna Blanton, I am a resident in Denison, Texas and I support House Bill 1628. Although I am not a resident of North Dakota, kratom has changed my life and many others.

I have found great benefits from kratom, especially as a chronically ill person with joint pain, and someone who needs the mood and energy support as well. Kratom has improved my quality of life and has allowed me to do things that I wasn't able to do before. My pain levels will go from an 8 to an almost near 0, because of the benefits kratom has provided me for my chronic joint pain.

I live in Texas, and the KCPA is active in our state, but it saddens me every time I see a state that is coming up to be banned. I support this House Bill, and I strongly urge you to follow through with this bill and allow kratom to become more regulated, so that natural leaf kratom consumers can still have access to it.

Thank you so much for your time.

Best,

Julianna Blanton from Denison, Texas
