

Hello,

I am a 62-year-old woman living with severe chronic fatigue and anxiety. Since 2018, I have relied on natural Kratom, which has been the only remedy that restored my quality of life. Unlike pharmaceuticals—which proved ineffective and unsafe for me—natural leaf Kratom has provided both safety and relief.

Individuals with various conditions like mine benefit from regulation such as the Kratom Consumer Protection Act (KCPA), rather than unwarranted bans that would severely impact our well-being.

Thank you for your attention,

Cheryl Scher
