

I support SB 2408 I agree synthetics have no place in this and have never supported them. However, I want to make sure Natural leaf Kratom stays safe and available because it is completely different than the synthetics they have made the last few years, they are almost pure chemicals and have no part of natural leaf Kratom and I would never advocate for the chemical synthetics. Please look at how fast the synthetics run out in stores and that will show you how completely different they are from natural leaf Kratom. So, I am asking to ban the synthetic but to please keep natural leaf safe. Thank you for your time,

Sincerely, Dawn Avellis
