

2025 ND Legislative Session

Bill HB 1131

HB1131 should be an easy “yes” vote for any lawmaker that believes in freedom. This bill clearly re-instates freedom to sellers and buyers alike from a decades long ban. The fact of the matter is that the suits that occupy the seats at the capital have no business restricting freedom in any-way, shape, or form. Additionally, it is also not the job of our elected officials to “protect” the citizens from one thing or another. It doesn’t matter what your personal views are on these expanded milk products, freedom of choice is freedom of choice, whether you are buying or selling. This bill is about “freedom.”

I am obviously in favor of this bill. My family raises dairy cows, milks the cows twice daily, bottles and sells the milk. We have also been selling milk products for months. Regardless of the outcome of this bill, we will keep selling milk products. We have built a relationship with our customers and have educated them on the process. It has led our customers to a better understanding of Agriculture.
