

The TRNP wild horses deserve federal protection. Please pass SCR 4006.

It is our and your responsibility to Protect our countrys Sacred Animals. First we must take care of our lands and animals in order for humans to be able to survive. As we know wiping out any native species will have significant effects for our future.

These Beautiful Majestic Innocent Horses are not able to protect themselves from humans wanting to destroy them. You must Be Their Voice and Protectors. This is what the American Public wants!! Honor our wishes to protect and preserve our heritage. Wild Horses bring Joy Happiness and Awe Inspiring Emotions . And I assure you our country needs the Mental Health benefits these Gorgeous animals provide to us.

Please stand up with The American Public and Honor our Countrys Wild Horses by protecting them with Federal Regulations.

This is So Cruel and Hélicopter Rounds ups are so Inhumane and Devastating to our horse families. These horses end up at slaughter horses which if you have not watched those videos, I promise you will be sick to your stomach.

Please stop the madness.

Annie
