

In Support of the SCR 4006

Please Pass SCR 4006 !!!!!

We must obtain Federal Protections for the Wild Horses of TRNP!

If you can't have Wild Horses in a National Park, where can you have them???

These horses are a unique strain dating back to their Spanish heritage, a beautiful group with thousands of followers from all over the World! They have already been thinned out, and given birth control.

These horses are a huge attraction to your state, and tourism bringing visitors Just to See the Wild Horses! I humbly request these collars be removed as well, as who wants pictures of collared horses? I hope to see them this summer, and am always spreading the word.

This attraction will only grow, as they are being removed from so many other places sadly.

Thank you for your vote to PASS SCR 4006 TODAY.
