

I support HB1475 because I've been a child of a single mother who struggled to put food on the table. I personally know countless families with children who struggle to make ends meet every day. North Dakotans overwhelmingly support free school lunches, that is a fact. Keep in mind, we are your constituents. A child who goes hungry is not in the right frame of mind to learn and be present in their school day. I can see no reason for this bill to not be passed. You all claim to care about children, now is your time to truly prove it.
