

I am in support of HB 1474.

Kids go to school and are in the care of the state. Part of that care should be ensuring that they have proper nutrition. It is the morally right thing to do.

It directly benefits the children who are in need of subsidized lunch and everyone around them. Kids aren't going to be performing as well as they could if they're hungry. I imagine they're more likely to be disruptive as well if they're hungry.

It benefits the state as a whole if we provide the children of North Dakota with what is needed to succeed. I don't have children, but that doesn't mean I wouldn't benefit from this as well. We're all better off if this bill becomes law.
