

HB 1586

House Finance and Taxation

I am in support of HB 1586

Chairman Headland and Committee Members

This bill provides significant protections for primary residential owners of North Dakota. It raises the primary residence property tax credit to \$5000.00, which is a good thing. It will give the people of North Dakota more disposable income to spend on anything they like. This will be very good for North Dakota's economy. This bill also expands the definition of "primary residence." This bill ensures that counties can still pursue delinquent taxes through personal debt collection rather than property seizure. This bill is designed to protect the North Dakota homeowner. We also need more reforms pertaining to property taxes and the North Dakota tax code. But, most of all the state of North Dakota needs to drastically cut its spending.

I Strongly urge a Do Pass on HB 1586

Thank You, Gordon Greenstein
