

**Testimony of Doug Goehring
Agriculture Commissioner
House Finance and Taxation Committee
Room 327E
March 10, 2025**

Chairman Headland members of the House Finance and Taxation Committee, I am Agriculture Commissioner Doug Goehring. I am here today in support of SB 2333 which relates to the low carbon fuel program

The proposed funding for ethanol production facilities would be used to help offset the cost of equipment and technologies to capture carbon dioxide and decrease the carbon intensity score of the process. The low carbon fuel incentives will be limited to fifty percent of the cost of each project and no more than three million dollars per facility per biennium. This is a step toward making eligible products for sustainable aviation fuels.

Chairman Headland and committee members, thank you for your consideration of SB 2333. I would be happy to answer any questions you may have.
