Requesting a DO PASS on House Bill 1467

Chairman Ruby and committee members, my name is Lanny Kenner and I am requesting a yes vote on House Bill 1467. We need to make VAERS reporting a requirement in order to learn about any adverse effects of a vaccine. We all saw during covid how a very small percentage of vaccination problems were reported to VAERS.

What good does a reporting system if problems aren't being reported and just ignored? Many people lost trust in our medical establishment during covid because of the many lies that were told about the vaccines. This has to stop so we can once again trust our doctors and government officials in the medical field.

For safety and transparency please please vote YES on House Bill 1467.

Thank you, Lanny Kenner
