

Testimony in support of HB 1210

Ann Bernhardt  
Linton ND  
January 28, 2025

I fully support HB1210.

As I am affected by the proposed CO2 pipeline I am in support of this bill and I would encourage you to support this bill as well. Economic development projects/ Green new scams . . . keep getting forced down our throat by the ND Legislators all in the name of revenue for our state and the health of our citizens.

All these projects are not always good for us and sometimes they are forced on us using eminent domain. With that being said we, property owners and people living in the affected area need protection. You need to approve this bill and make sure these large companies are held liable for any damage done because of their projects. We have done our research and our farm insurance would not protect us should the CO2 pipeline leak/burst.

Please use some common sense, do what is in the interest of the people of ND, the people who elect you - not the lobbyists and your pocket book.

Do Pass HB 1210
