

Support of HB 1325

Chairman Porter and members of House Energy and Natural Resource Committee

My name is Christopher Jorde and I am a lifelong resident and sportsman of North Dakota. I believe that CWD is a real disease and that the North Dakota Game & Fish Department as a form of accountability shall for every CWD detection by test, a microscopic slide of the causative agent (prion) and necropsy, must be provided and kept on file. I believe that this would be an easy practice to achieve and would show better accountability and professionalism from the North Dakota Game & Fish.

For these reasons, I would appreciate a DO PASS vote on HB 1325
