RE: HB 1325 Necropsy

Members of the House Energy & Natural Resource Committee.

My Name is Jeff Jacob and live in Minot. Please vote in favor of this bill. What this bill will do is confirm what the wildlife agencies have been saying for the last 50 years. This is a prion disease, with holes in the brain. There is nothing wrong with double checking your work and showing us there are no false positives. We then will have a Necropsy report with a side of the prion.

In closing, this should be a win for both sides. Please say yes on HB 1325.

Sincerely,

Jeff Jacob
