

Steele Ozone & Kidder County Press

I am writing in opposition of SB 2069

Living in a rural community, we know we can count on our local newspaper to deliver the area news, tell us about what our kids are doing in school, how our local teams are doing, and what our local governments are doing or plan to do. Most local newspapers have been doing this for over a hundred years. In those years, where were the public notices and legals? They were in the local newspaper. Where are they now? They are still in the local newspapers and on the paper's websites. To keep up with the times, they are even posted to ndpublicnotices.com, a venture sponsored by the North Dakota Newspaper Association and its papers. When something is not broken, it doesn't need fixing.

Please keep things as they are, and vote no
