January 15, 2025

## EXECUTIVE COMMITTEE

Supt. Leslie Bieber  
President  
Alexander PSD

Lyn James  
Vice President  
City of Bowman

Vawnita Best  
City of Watford City

Steve Holen  
McKenzie Co. PSD

Supt. Tim Holte  
Stanley PSD

Shannon Holter  
Burke County

Nick Klemisch  
Garrison PSD  
Coal Conversion  
Counties

Howard Klug  
City of Williston

Craig Pelton  
Dunn County

John Phillips  
Coal Conversion  
Counties

Trudy Ruland  
Mountrail County

Testimony of:

Geoff Simon, Lobbyist #144  
in support of HB 2020 – Budgets of UGPTI and NDAWN  
Senate Appropriations Committee

Chairman Wanzek and members of the Government Operations Division:

On behalf of the city, county and school district members of the Western Dakota Energy Association (WDEA), we wish to express our strong support for the appropriations requests of the Upper Great Plains Transportation Institute (UGPTI) and the North Dakota Agricultural Weather Network (NDAWN) found in Senate Bill 2020.

WDEA has a longstanding working relationship with UGPTI's Local Technical Assistance Program (LTAP), and the training and education it provides to our members. Counties in western North Dakota receive tremendous benefit from the Geographic Roadway Inventory Tool, as well as the information found in UGPTI's local road and bridge needs study. UGPTI and NDAWN have also been active partners in WDEA's development of the Wise Roads project ([www.wiseroadsnd.com](http://www.wiseroadsnd.com)), which is aimed at minimizing weather-related disruptions to heavy oilfield truck traffic.

LTAP staff have worked closely with county road superintendents to maximize the value of data collected through the Wise Roads network of weather stations. We engaged with LTAP in a research project which involved placing moisture and temperature sensors in gravel roads to better determine when frost or load weight restrictions need to be placed on roads, and when those restrictions can be lifted. NDAWN has provided the technical expertise to help WDEA launch the Wise Roads project, and continues to work closely with us to maximize the value of the huge volume of weather data we collect. WDEA has completed the project with installation of 50 additional weather stations in western North Dakota, but we continue to work with NDAWN for ongoing maintenance and repair of the stations.

Both UGPTI and NDAWN are delivering valuable services to our agriculture and energy sectors, and are also engaged in cutting-edge research, aimed at supporting the state's major industries through innovation and development of better management tools to improve productivity and move commerce more efficiently. UGPTI's addition of a western liaison position, in cooperation with the ND Department of Transportation, has brought additional benefits to county, township and tribal governments in western North Dakota.

As always, we appreciate the opportunity to offer testimony and would be happy to provide additional details upon request.

Thank you for your consideration.
