Why baiting should be allowed.

- Baiting should be allowed to be deer gathering no matter what. I don't believe baiting is the main cause of CWD.
- The hunting sport is dying because of the fact that the youth are not able to harvest a deer that you can't bait. If the sport keeps dying the deer will eventually overpopulate and then we will have bigger problems on our hands.
- If the game and fish would lift the baiting law there would be more deer shot. Therefore we could try and eliminate the CWD being that more will be harvested. It also gives people a better chance to harvest a deer which then will grow the sport.
