

To Senate finance committee

I am writing this in favor of the closest bill HB 1168 resembling real reform. While I am disappointed in lower of the mills from the original it is a step in the right direction. I believe HB 1176 is a band aid just wasteful spending and allowing the cities and counties to raise property taxes even more like a blank check for them. We need real reform if not I believe from the feel I get from people they are either disappointed or wish they would have supported measure number 4 and I truly feel a measure will pass next election cycle if legislature fails to do real reform.
