

Testimony in Support of SB 2320

Bruce & Stephanie Doolittle
Hazelton, ND
January 28, 2025

Carbon dioxide pipelines that gather waste from other states and transport it to ND for storage should not receive the same tax benefits as in-state companies.

Why should the ND taxpayers be responsible for paying their tax liability? For 10 years, the State is required to reimburse the counties (with our money). No private, out-of-state companies in the business of transporting waste and using our state as a dumping ground, should benefit from tax exemptions.

We ask for a DO PASS on SB 2320.
