

Representatives of the House, House Judiciary Committee

I would encourage a DO PASS on HB1361

Working in the addiction, mental health and medical fields I have has some experience fighting the chaos created by human trafficking. The trauma by the victims is always life long and changes that person. Many times the perpetrator, knows how to skirt the law and with a bill like HB1361 they will face significant retribution for the evil choices they make when harming another person.

Sincerely,

Mike (Michael) Connelly
