

Dear ND Lawmakers-

I am writing to encourage you to strike down SB2208. It basically strips away any rights or power of our counties and wants to strong arm our small towns into complying with large private companies for so called energy projects or they will loose state funding! Each county and small town should have a voice in local projects as we pay taxes and are citizens of this state! This bill is communism and blackmail! Anytime you strip away peoples voices that is what it is! The sponsors of this bill should be ashamed of themselves and go live in a communist country where they have no voices or rights!

Blackmail is illegall I thought?! Please vote no on disastrous 2208!
