

SCR 4006

I wanted to write today to give testimony for the horse's of Theodore Roosevelt National Park. In following the history of the park around these horses, I've learned a lot. The time has come to finally get Federal protections for these horses once and for all. It's the will of the majority of visitors, the City of Medora, and the Elected officials in the State of North Dakota.

This park is unique in the fact that it was named after a US President. The park is also unique in that inside the park it has a non commercial aspect and the fact that you can see wild horses is truly amazing.

I enjoyed them on my visit along with other visitors I talk to.

I urge you to get this bill passed.

Thank you,
Diane Tutas
