

Please pass SCR 4006. The wild horses in Theodore Roosevelt National Park need Federal protection. The Wild Horse Working Group will help ensure we have a well-managed herd forever in the park. The State of North Dakota has many resources to ensure We keep a viable herd in the park. But we need Federal protection to prevent the National Park Service and BLM from removing them or sterilizing them so they die off. I visit TRNP yearly to see the wild horses. I want the next generation to enjoy these animals as much as I do.
