

## To whom this concerns:

I am writing you as a US concerned citizen, there are more appropriate ways to maintain and handle, not just this herd, but ALL in the US! This national park was created as a place to reflect, ponder possibilities, be thankful for all that is supposed to be America! Please, please set a precedent now. The government spends more money on the brutal capture, feed, and "RELOCATION" of these incredible creatures! DO NOT BE BLIND to the fact that they ARE SOLD to kill pins, shipped brutally across our borders and sold for meat, chicken feed, fertilizers!! We have the answers through science and technology, please get this done! It the right thing!!
