

I am saddened by hearing that State funding for Prairie Public may be cut. I have contributed to this public station for about 50 years with no interest whatsoever in political coverage. Prairie Public has never influenced me to be pro-abortion. I find much TV and radio programming that tends to be free of the profanity, sex, and violence as is commonplace on cable TV. I consider myself to be politically conservative but find almost no politician who actually represents my interests. It also shocks me that politicians on both sides want to punish or destroy what was once considered "good." Please do what is right for common people.
