

SB 2133
Testimony in favor.

Mr. Chairman and members of the Senate Transportation Committee.

I am writing to you to respectfully request a Do Pass recommendation from this committee on Senate Bill 2133.

As the proud owner of a beautiful black Dodge Challenger, I would love the option of having black plates which match the general theme of a sleek muscle car. I have considered getting customized plates, but as yet have not justified the added expense. Should this bill pass, I would gladly get a personalized blackout plate, as the added value would make it worth it to me, as I am sure it would also for many other auto enthusiasts. According to edmunds.com, vehicles that are black account for 21% of vehicles on the road in North Dakota, I am sure many of those owners would also like the opportunity to have a matching plate on their vehicle.

Sincerely,

Andrew Bornemann
Kintyre, ND
