Minutes:

Chairman R. Kelsch, Vice-Chair T. Brusegaard, Rep. Bellew, Rep. Grumbo, Rep. Haas, Rep. Hanson, Rep. Hawken, Rep. Hunskor, Rep. Johnson, Rep. Meier, Rep. Mueller, Rep. Nelson, Rep. Nottestad, Rep. Solberg, Rep. Thoreson

Chairman Kelsch: We will now open the hearing on HB1145.

Celeste Kubasta: (OMB) *Please refer to written testimony*

Chairman Kelsch: Anyone wishing to appear in opposition to HB1145?

Patty Lewis: (ND Farm Bureau) Our opposition is based upon the fact that it seems to more negatively impact rural school districts than it does in the higher populated districts.

Larry Klundt: (ND Council of Educational Leaders) We're neutral. For years, we've been working with the weighted factors. There has been a change in the cost and sometimes they don't necessarily reflect the category that they're with at the current time, but what we've seen since we've started adjusting these trying to get to the five year average is a continual decrease in the

number of weighted pupil units that results in less money for schools. Reducing the units reduces the money to those schools that are losing those units. It's kind of a catch 22, because on a five year average cost, if you don't get enough money in the first place, obviously you're going to spend less, and as that happens, the average cost goes down and the weighted pupil units go down, and I don't really have a solution, but what I'd like to see is a total revamping of the system, and we never seem to get that done during the interim, especially, it seems to me that one student ought to be worth at least one weighted unit, and we have many that are weighted less. What we would favor is freezing the weighted units where they're at now, and the factors where they're at and taking a good look at it in the future.

Rep. Hunsakor: Why would an increase from a 75 to an 85, why would school districts receive less money?

Kludt: The reason it goes down is that the difference in what they're spending goes down, and even though the percentage goes up to 85% of the difference, the actual number for the weighted factor gets lower. So, in some cases, if you spend less in a broad category than you did the year before, the weighted factor may go down from 1.0 to .95, and as a result of that, when you multiply it times your enrollment or ADM, you wind up with fewer weighted units.

Chairman Kelsch: We will now close the hearing on HB1145.

Minutes: Chairman Kelsch called the committee to order on HB 1145.

Rep Haas: explains the amendments. Page one on lines 20 and 21. It replaces the factor is not adjusted for the second year of the biennium with Beginning July 1, 2002, the factor is that which represents the five year average cost of education per student for this category, as determined by the superintendent of public instruction. The printout that was given to us, shows the effect of this in two columns. And then we would make the same changes, in each one of those categories. He goes over each change in the bill, line by line. I would move the amendments.

Rep Hawken: Second.

DISCUSSION

Chairman Kelsch: Any discussion on the amendment, hearing none, a voice vote was taken, the motion carries. What are the wishes of the committee.

Rep Meler: I move a DO PASS as amended.

Rep Haas: Second.

COMMITTEE DISCUSSION

Chairman Kelsch: We have a DO PASS as amended motion, the clerk will take the roll. The motion passes with 8 YES, 6 NO and 1 ABSENT. Carrier Rep Haas.

FISCAL NOTE

Requested by Legislative Council
12/26/2000

Bill/Resolution No.: HB 1145

Amendment to:

1A. State fiscal effect: *Identify the state fiscal effect and the fiscal effect on agency appropriations compared to funding levels and appropriations anticipated under current law.*

	1999-2001 Biennium		2001-2003 Biennium		2003-2005 Biennium	
	General Fund	Other Funds	General Fund	Other Funds	General Fund	Other Funds
Revenues	\$0	\$0	\$0	\$0	\$0	\$0
Expenditures	\$0	\$0	\$0	\$0	\$0	\$0
Appropriations	\$0	\$0	\$0	\$0	\$0	\$0

1B. County, city, and school district fiscal effect: *Identify the fiscal effect on the appropriate political subdivision.*

1999-2001 Biennium			2001-2003 Biennium			2003-2005 Biennium		
Counties	Cities	School Districts	Counties	Cities	School Districts	Counties	Cities	School Districts
\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0	\$0

2. Narrative: *Identify the aspects of the measure which cause fiscal impact and include any comments relevant to your analysis.*

This bill changes the adjustment percentages used in the calculation of weighting factors in the foundation aid program. The change will not affect the total funding appropriated for the program.

3. State fiscal effect detail: *For information shown under state fiscal effect in 1A, please:*

A. Revenues: *Explain the revenue amounts. Provide detail, when appropriate, for each revenue type and fund affected and any amounts included in the executive budget.*

B. Expenditures: *Explain the expenditure amounts. Provide detail, when appropriate, for each agency, line item, and fund affected and the number of FTE positions affected.*

C. Appropriations: *Explain the appropriation amounts. Provide detail, when appropriate, of the effect on the biennial appropriation for each agency and fund affected and any amounts included in the executive budget. Indicate the relationship between the amounts shown for expenditures and appropriations.*

Committee Clerk Signature <i>Sandra Johnson</i>			

Minutes: CHAIRMAN FREBORG called the hearing on HB 1145 which relates to the adjustment of weighting factors for per student state aid payments to school districts.

Testimony in support of HB 1145:

CELESTE KUBASTA, ND Office of Management and Budget, presented testimony. (see attached). This bill changes the weighting factors from 75% of the actual cost of education to 85% of the actual cost of education in 2001-2002 and would change it to 100% (5 year average cost factor) in 2002 - 2003.

JERRY COLEMAN, School Finance and Organization, DPI, explained the weighting factors to the committee and how it works. (see attached testimony and charts). Factors for the foundation aid program are set at a percentage of the difference between an established statutory factor and the five-year average cost factor.

Testimony in opposition to HB 1145:

Page 2

Senate Education Committee

Bill/Resolution Number HB 1145

Hearing Date 03-13-01

PATTY LEWIS, ND Farm Bureau, feels that small rural school districts will be the losers if this bill passes and that will raise local taxes.

SENATOR O'CONNELL moved a DO NOT PASS. Seconded by SENATOR KELSH.

Discussion continued. This does not affect the foundation aid payment, but will increase the per pupil amount.

Roll Call Vote: 4 YES. 3 NO. 0 Absent. Motion Carried.

Carrier: SENATOR KELSH

REPORT OF STANDING COMMITTEE

HB 1145, as engrossed: Education Committee (Sen. Freborg, Chairman) recommends
DO NOT PASS (4 YEAS, 3 NAYS, 0 ABSENT AND NOT VOTING). Engrossed
HB 1145 was placed on the Fourteenth order on the calendar.

2001 TESTIMONY

HB 1145

Testimony on House Bill 1145
By Celeste Kubasta, Chief Assistant Executive Budget Analyst
North Dakota Office of Management and Budget
February 5, 2001

My name is Celeste Kubasta from the Office of Management and Budget and I am here today to introduce House Bill 1145. This bill is included in both the Schafer and Hoeven budgets.

This bill adjusts the weighting factors for per student state aid payments to school districts to 85% of the actual cost of education in 2001-2002 and 100% in 2002-2003. As you are aware, the weighting factors were passed many years ago and reflected a cost of education, by grade category and school size, at that time. The costs of education have shifted since then. Minor adjustments have been made to the weighting factors in previous bienniums. To accurately reflect the costs, by grade and school size, we need to adjust those factors to reflect the five year average cost of education, which this bill does.

This change reflects a reduction of 711 WPU in the biennium. Using the existing factors, WPU for the biennium are estimated at 223,944. This bill would change this number of 223,233.

To ensure that student payments are reflecting actual costs of the future, we need this change in statute. I'd be happy to answer any questions.

Re: HB 1145 - District Level Impact of Changing Weighting Factors

I have prepared an analysis of the impact of adjusting weighting factors toward the five year average. The following assumptions are used in the analysis:

1. Projected enrollment for fall 2001 and a base per student payment of \$2,324 (calculated based on \$485 million Schafer executive budget reflecting 75% adjusted factors).
2. Weighted pupil units were calculated using the weighting factors adjusted 75%, 85% and 100% towards the five-year average educational cost per student.
3. The wpu variance represents the change in weighted pupil units holding the rate constant. The rate variance represents the change in the rate as a result of the change in weighted pupil units. As a result, the same funding is distributed any scenario.

Under this analysis, 145 districts would receive more and 82 districts would receive less when comparing by moving the weighting factor calculation towards the five year average

Feel free to contact me at (701) 328-4051 if you have any questions.

School weighting factors

Weighting factors are set at a percentage of the difference between an established statutory factor and the five-year average cost factor. The five year average cost factor is the ratio of the average cost for each category divided by the statewide average. Districts are divided into the following categories for purposes of applying weighting factors to enrollment and average daily membership. The table below shows the eleven categories of weighting factors calculations for the 1999-2001 biennium. The second table is simply the weighting factors multiplied by the \$2230 base payment rate.

Based on financial data through June 30, 1999.

	Current Year Base Payment Rate \$ 2,230

**TESTIMONY ON HB 1145
SENATE EDUCATION COMMITTEE**

March 13, 2001

by Jerry Coleman, School Finance and Organization

328-4051

Department of Public Instruction

Mr. Chairman and members of the committee:

My name is Jerry Coleman and I am the Assistant Director of School Finance and Organization for the Department of Public Instruction. I am here to speak in favor of HB 1145 relating to the adjustment of weighting factors used for the per student payments state aid payments to school districts.

The use of inaccurate cost weightings was on the list of "constitutionally objectionable" features of the school-financing program identified in the equity lawsuit about 10 years ago. The factors were set in statute but had never been updated to reflect recent cost history. Since that time, there has been a sustained effort to move the factors to a rolling five-year historical cost basis. The weighting factors were adjusted 25%, 50%, 65% and currently 75% of the difference between the statutory factor and the five-year average cost factor. This bill provides for the final step to put the weighting factor calculation a rolling five-year historical cost basis.

Weighting factors are used to equalize for cost differences over eleven categories of district size and grade levels. They are calculated by dividing educational expenditures by average daily membership to arrive at an average cost per student for that category. Dividing the category average cost per student for the category by the state average cost per student gives us the weighting factor the category.

Factors for foundation aid program are set at a percentage of the difference between an established statutory factor and the five-year average cost factor. The current adjustment factor is set at 75%. This bill proposes to move the adjustment factor to 85% the first year and to the five-year average cost factor the second year.

The argument for moving to the five-year average is that it is an objective basis. The statutory factors are inaccurate compared to actual cost history. The argument against change is that changing has financial consequences (winners and losers in terms of net foundation aid payments).

I have prepared an analysis of the impact of adjusting weighting factors toward the five-year average. The following assumptions are used in the analysis:

1. Projected enrollment for fall 2001 and a base per student payment of \$2,324 (calculated based on \$485 million Schafer executive budget reflecting 75% adjusted factors).
2. Weighted pupil units were calculated using the weighting factors adjusted 75%, 85% and 100% towards the five-year average educational cost per student.
3. The wpu variance represents the change in weighted pupil units holding the rate constant. The rate variance represents the change in the rate as a result of the change in weighted pupil units. As a result, the same funding is distributed under any scenario.

One last point I want to make is that the weighting factor adjustment percentage has an impact on total weighted pupil units and therefore the per student payment rate. The per student payment rate set in HB 1344 were established using 85-100% factors.

	2001-2002	2002-2003
At 75% factors		
Weighted pupil units	107,625	105,385
Per Student Rate	2,251	2,268
At 85% first year, 100% factors		
HB 1344 Per Student Rate	2,255	2,278
Difference	(4)	(10)

Mr. Chairman, that concludes my testimony and will try to answer questions you may have.

School weighting factors

Weighting factors are set at a percentage of the difference between an established statutory factor and the five-year average cost factor. The five year average cost factor is the ratio of the average cost for each category divided by the statewide average. Districts are divided into the following categories for purposes of applying weighting factors to enrollment and average daily membership. The table below shows the eleven categories of weighting factors calculations for the 1999-2001 biennium. The second table is simply the weighting factors multiplied by the \$2230 base payment rate.

Based on financial data through June 30, 1999.

	Current Year Base Payment Rate						Factors (5-Year)
	Factors (Statutory)	25% adjust. 5-Year AVG	50% adjust. 5-Year AVG	65% adjust. 5-Year AVG	75% adjust. 5-Year AVG	85% adjust. 5-Year AVG
