Minutes: Chairman Klein: opened the hearing on HB 1339. All committee members were present.

Mike Brandenburg, Edgeley: There is \$85,000,000 worth of wind development going up in our area by a number of developers. 3 or 4 years ago I thought wind didn't have any value what so ever, so I'm here today on a matter of education. There is value to all of us in wind and coal because we are a coal state, coal has been very good for N.D. But the trouble we have right now is getting the coal out of the state as well as the wind. And transmission is the key. The load centers is what I want to talk about. There is a lot of environmentalists in the city. Coal and wind have to work together to get this done, so N.D. can grow together. When the wind doesn't blow we need the wind. We can get transmission 50 miles out of the city.

The Governor is looking at working together with a multi state entity working on transmission.

The wind resource in Minnesota is 13-15 miles per hour, and North Dakota is 22-25 miles per hour which is great but we don't have transmission. We need major transmission so we can carry

500 mega watts. We are working out a deal that we are buying the power from, whether it be coal or wind.

Representative Kempenich: testified in favor of HB 1339 also a sponsor of the bill. A couple pieces of amendments to change this basically what we are trying to do is get some constraint within the transmission address and find out where this is going to to and I guess the main purpose of what this bill is trying to do is promote that. You can consider the amendment, and I think the amendment addresses it and and it shows the state is in support of what they are doing.

John Dwyer, President of the Lignite Energy Council: I support this bill as amended by Representative Kempenich. We do not support the original bill as drafted, lack of accountability your creating another board, and I don't really know if that is the right approach. There is already activities under way within the industrial commission that is looking at the export constraint. The Industrial Commission is looking at a coalition of wind and coal interests to talk about this very thing. I have some testimony here, basically what the testimony does is try to identify the most cost effective routes for coal and wind projects. **(SEE ATTACHED TESTIMONY)**.

Bob Harms, Governors Office: I'm here in support of HB 1339, the Governor, and the Industrial Commission, recognize that transmission is a key impediment to developing energy supplies whether it is wind or coal. So we have been involved with activities at the time.

Governors Office believes raising public awareness of transmission and expressing a public policy stating transmission is an important issue is a good idea.

Illona Jeffcoat-Sacco, Director, Public Utilities Division, PSC: appeared neutral in testimony on HB 1339 and provided a written statement. **(SEE ATTACHED TESTIMONY)**.

The micrographic images on this film are accurate reproductions of records delivered to Modern Information Systems for microfilming and were filmed in the regular course of business. Committee Clerk Signature

Minutes:

Senator Urlacher opened the hearing on HB1339. All committee members are present. This bill is a resolution of electricity transmission export constraints.

Representative Keith Kempenich (mtr #2915) - Introduced the bill and explained the intent. The bill is a statement of purpose.

Senator Syverson (mtr #3126) - Question regarding the use of the term "assist" in the bill. What does assist involve.

Representative Kempenich (mtr #3155) - Can be as broad as it can. Assistance could be in development. Legislature could assist but would not be obligated.

Senator Nichols (mtr #3275) - Does this bill go into the code?

Representative Kempenich (mtr #3290) - Not sure of the answer.

John Dwyer, President, Lignite Energy Council (mtr #3372) - Testified in support of HB1339.

To answer an earlier question by Senator Nichols, yes, it would go into code, not amending but

adding to. Further written testimony is attached. To answer Senator Syverson's question, not obligated but gives the Industrial Commission the ability to assist. Went over the difficulties of building new transmission lines. Those difficulties include physical and regulatory constraints. Building of new transmission capabilities is perceived as risky. This bill makes it a matter of record that the legislature views this as a key issue to future development and that the Industrial Commission is supposed to make this a priority of theirs. Urges a do pass.

Senator Syverson (mtr #4040) - Experiment at this time with a new type of transmission cable. If it works, what kind of impact would that have on current transmission capabilities.

Mr. Dwyer (mtr #4090) - Would have a significant impact. Would be an upgrade. The technology has not been proved yet.

Senator Syverson (mtr #4152) - Has the Industrial Commission participated in the concept.

Mr. Dwyer (mtr #4175) - They have not participated directly. Although, did look at different technologies.

Senator Syverson (mtr #4258) - If technology is viable and effective, and we replace current lines, how many years would that give us before another upgrade?

Mr. Dwyer (mtr #4316) - We export 75% of energy produced. Not able to give a timeline. We have an immediate need. Can't finance a project without solving the transmission problem.

Senator Urlacher (mtr #4465) - The proposed new technology, with that addressed, question about the relationship to the western part of the state.

Mr. Dwyer (mtr #4493) - We have looked at routes to tie the east and west. Mostly east because that is where the market is.

The micrographic images on this film are accurate reproductions of records delivered to Modern Information Systems for microfilming and were filmed in the regular course of business. Bill/Resolution Number HB1339

Hearing Date March 3, 2003

Bob Harms, Governor's Counsel (mtr #4582) - Testified in support of HB1339. Written testimony is attached.

Senator Urlacher (mtr #4843) - Given no further testimony or opposition to the bill, the hearing is closed.

Senator Wardner (mtr #4914) - Motion for a Do Pass. Second by Senator Tollefson.

Senator Syverson (mtr #4970) - For discussion purpose, still have a question about the term "assist" How broad is that. Would it be fiscal?

Senator Urlacher (mtr #5043) - The issue is to open to decide if it would be financial.

Senator Wardner (mtr #5084) - This bill authorizes no spending. If dollars are involved, it would be a separate issue.

Senator Syverson (mtr #5140) - An additional question regarding the responsibility of the Industrial Commission.

Senator Tollefson (mtr #5200) - Understands that this bill is a prioritizing tool.

Senator Wardner (mtr #5308) - Demands for energy has increased. Need to upgrade transmission lines and welcome new technology. Would help the economy of our state.

Senator Syverson (mtr #5504) - Observation, if transmission issue is fixed, should there be a sunset date in this bill?

Senator Urlacher (mtr #5613) - New technology is part of the overall development.

Senator Syverson (mtr #5650) - Reviewed the wording in the bill. More questions on wording.

Senator Seymour (mtr #5758) - I don't see a problem with priority.

Senator Wardner (mtr #5792) - Agree, don't think it would bind the Industrial Commission.

Senator Urlacher (mtr #5915) - Next session could make changes.

## New Transmission

- Adding new transmission is difficult
    - Physical constraints
    - Regulatory constraints & uncertainties
- ⇒ *Financial risk!*

2/6/2003

3

## Physical Constraints

- Problem: Long distances, complex system
  - Stability, overloads, and voltage limitations
- Solutions
  - Add equipment to maximize use of existing lines
  - Upgrade existing lines
  - Build new lines

⇒ *Physical constraints are complex but manageable (though costly).*

2/6/2003

**Date:** 6 February 2003

### TESTIMONY

Mr. Chairman and committee members, I am Illona Jeffcoat-Sacco, director of the Public Service Commission's Public Utilities Division. The Public Utilities Division administers the Commission's jurisdiction over telephone, gas and electric public utilities in North Dakota. The Commission is neutral on this bill.

There are currently a number of groups in the state that are concerned about transmission constraints and are studying this issue. The Commission is represented on some of these groups, and is not a member of others, but all are working to solve the electric transmission constraints faced by our state. Generally, these groups have maintained good communication with each other and other stakeholders, and work to keep each other informed of developments.

- The ND Lignite Research Council has hired a staff member to find solutions to electric transmission issues.
- The Upper Midwest Legislative Forum formed a task group to explore ways to encourage solutions to the electric transmission constraints in the upper Midwest. Representative Ole Aarsvold and Senator Tom Fischer are members of the

Upper Midwest Legislative Forum. Their transmission constraint task group consists of people from Minnesota, Manitoba, North Dakota and South Dakota.

- The **Governor's Office** has an informal task group working on electric transmission issues facing North Dakota.
- The **North Dakota Public Service Commission** has held frequent meetings with stakeholders on electric transmission issues facing North Dakota, is monitoring regional and national developments, and has submitted comments to the Federal Energy Regulatory Commission on these very important issues.
- **Wind on the Wires** is an energy group advocating wind development and is studying electric transmission issues in our region.
- **Powering the Plains** is a group of people from 4 states and Manitoba which have been meeting for the past year to discuss energy issues, including electric transmission constraints in the upper Midwest.
- The legislature's interim **Electric Industry Competition Committee** received information and updates regarding electric transmission issues.

This completes my testimony. I will be happy to answer any questions that you may have.

## Testimony of John Dwyer

President, Lignite Energy Council

March 3, 2003

HB 1339

3/3/2003

1

## NDIC Export Constraint Studies

- NDIC has conducted several studies to address ND export constraints
  - Alternative routes identified
  - Cost estimates provided
  - Potential solutions identified
- NDIC in process of identifying most cost effective routes for coal / wind projects

## New Transmission

- Adding new transmission is difficult
    - Physical constraints
    - Regulatory constraints & uncertainties
- ⇒ *Financial risk!*

3/3/2003

3

## Physical Constraints

- Problem: Long distances, complex system
  - Stability, overloads, and voltage limitations
- Solutions
  - Add equipment to maximize use of existing lines
  - Upgrade existing lines
  - Build new lines

⇒ *Physical constraints are complex but manageable (though costly).*

## Regulatory Climate in flux

### Federal Energy Regulatory Commission (FERC)

- Regulates jurisdictional utilities directly, others indirectly
- Restructuring initiatives:
  - *Regional Transmission Operators (RTOs)*
  - *Transmission Tariffs (Standard Market Design)*
  - *Generator Interconnection Standards*

### States

- Transmission Line planning, permitting, & siting
- Eminent Domain authority
- Rate recovery

3/3/2003

5

## Regulatory Climate in flux

- Great uncertainty about:
  - Ability to get transmission permitted & built
  - Long term costs
    - to generating project
    - to transmission provider
    - to customers

⇒ *Transmission investments are perceived to be extremely risky.*

## Transmission Strategies

- NDIC Involved in establishing Upper Great Plains Transmission Constraint Coalition
- Coalition objectives:
  - Advocate designation of ND export constraint as national interest transmission bottleneck by DOE
  - Advocate development of long-term solutions through regional planning processes (MISO, Multi-State Entities or Regional State Advisory Committees)
  - Develop consensus positions on federal and regional issues

Testimony: HB 1339  
Robert W. Harms  
Governor's Counsel

March 3, 2003

Mr. Chairman, members of the Committee, my name is Robert W. Harms, I am counsel to Governor Hoeven and appear in support of HB 1339. The bill simply expresses a state policy that transmission constraints to our electrical industry is an important public policy issue and directs the North Dakota Industrial Commission to give priority to those projects that will help alleviate those constraints.

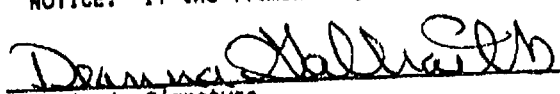

As a matter of information for the Committee, the State is doing a number of things to help resolve the constraints that impact both our lignite industry and the wind energy that is beginning to develop in North Dakota.

Those activities include:

- Industrial Commission identified transmission as a key challenge in the Lignite Vision 21 program and is working vigorously to resolve this issue.
- Efforts are coordinated with the PSC
- Comments were submitted on the FERC recent rule proposal on SMD
- North Dakota is represented on National Governor's Electrical Infrastructure Task Force and has helped formulate that policy
- Participation with the National Wind Coordinating Committee
- Assembling a coalition of wind and lignite representatives to work together in formulating solutions to transmission constraints
- Contacts to Dept. of Energy for its assistance in establishing a NITB
- And funding detailed studies through Lignite Vision 21 to identify potential transmission constraints and potential solutions.

In short, transmission constraint is recognized by the Governor and the Industrial Commission as a significant public policy issue. They are dedicating significant state resources towards resolving the same. HB 1339 would affirm that policy priority. On behalf of the Governor, I urge a "DO PASS" on HB 1339.
