Date of meeting/discussion: January 9, 2009

Recorder Job Number: 6730

Committee Clerk Signature Holly N. Sand

Minutes:

Chm. Svedjan called the meeting to order. Clerk, Holly Sand, called the roll and a quorum was declared.

Carol Olson, Executive Director, North Dakota Department of Human Services took the podium and distributed written testimony (Exhibit A). Ms. Olson reviewed her written testimony.

Chm. Svedjan: What do you consider being "at capacity?" (Referring to Ms. Olson's testimony on p. 2, Exhibit A). (4:45)

Ms. Olson: To draw that conclusion, when we're at 100 percent capacity, that's full. We have been at 103 percent for months and months at a time at the state hospital for our traditional in-patient.

Chm. Svedjan: What does that translate into in terms of beds?

Ms. Olson: 132 beds. And many times we are over that amount. Not only has it been putting a crunch on the capacity of the State Hospital but also our private providers in the communities have felt the same capacity issues.

Ms. Olson continued. (6:12)

Chm. Svedjan: Another issue that relates to this, is that the Human Service Center psychiatrists are unwilling to take a call for patients who are admitted into the private provider's institution which is creating a problem up there and is posing the question of whether or not the private provider will continue to take those patients. This could put even greater pressure on the state hospital. I think somebody needs to look into that. (7:05)

Ms. Olson: Nancy McKenzie will have additional information on that in her testimony and we are working with the hospitals on those issues.

Rep. Nelson: Can you go into detail on why the Dickinson unit was closed? Was it staffing? Was it reimbursement? (8:11)

Ms. Olson: It was a decision made for financial reasons.

Rep. Nelson: Reimbursement?

Ms. Olson: Financial reasons. I don't believe reimbursement had anything to do with it. I don't know for sure. If you were to go back in history of St. Joe's the restructuring they did was based on financial reasons.

Rep. Wald: As I understood it, that place lost money from the day it opened. (9:05)

No comment from Ms. Olson.

Ms. Olson continued her testimony. She explained that in short, the budget allows the Department of Human Services to address capacity concerns and to provide behavioral health services in a variety of settings to meet individual needs. (9:21)

Ms. Olson moved on to the Impact of Aging Population (p. 4, Exhibit A).

Chm. Svedjan: In prior biennia we've had instances where we've over appropriated for SPED and Expanded SPED. Are you confident that these projections are solid? (12:52)

Ms. Olson: Yes I am confident that they are solid. You are accurate in your memory on that. We did see a biennium where the appropriation didn't match the numbers that came onto SPED. We feel there were probably a number of reasons for that. One is that we had gone through a period of time where we had to reduce program eligibility levels and cut back a little bit on the program because of budget constraints. I think that because of that we dropped off some of the population that normally would have come on to SPED. I think there were other factors that came into play. We have seen the growth in this program come back on so we have put what we feel is the accurate data to support the additional numbers.

Rep. Delzer: You are changing the eligibility criteria, are you not? (14:27)

Ms. Olson: We have tweaked the program some, yes.

Rep. Delzer: I'd like to know how much you've changed that.

Chm. Svedjan: Can you give us a brief description of how eligibility levels are changing? Where are they now? Where are they going to?

Ms. Olson deferred to Brenda Weisz.

Brenda Weisz, Chief Financial Officer, Department of Human Services: The change we're making is just with the sliding fee scale. The sliding fee scale was put into

place in 2003 for the SPED program that would be contingent on individuals' income levels and how much they would contribute to their care. That's the only change to the eligibility. (15:06)

Chm. Svedjan: Does that mean that people can qualify with higher incomes? (15:38)

Ms. Weisz: It means people will contribute less to their cost of care with the change of the sliding fee scale. We will add 22 more people. It doesn't greatly impact as far as how many will come on. It will impact how much they'll pay. What the increase is more attributed to (with SPED) is an increase in the caseload itself before the sliding fee scale change. The utilization is actually driving the increase in the SPED program itself more so than the eligibility change.

Ms. Olson continued her testimony, (p. 4, Exhibit A, last paragraph). (16:33)

Chm. Svedjan: As we go through this I would like you to identify what is new. I think the ADRC that you referenced is new. (17:37)

Ms. Olson: The ADRC (Aging and Disability Resource Center) is new. The Executive Budget does have $600,000 appropriation for the DHS to put out a pilot project. The ADRC is a central place for families to find out about choices for long-term care support and care services for people who are older or disabled. We have found that there isn't a single point of entry to go to in the state that allows access to this information.

Rep. Kempenich: Are you thinking of one center? Internet? A call center? What are you envisioning? (19:12)

Ms. Olson: We haven't come up with a proposal yet. We don't know if it will be web-based, an 800 number. There are details that we haven't worked out yet but we have enough information that we've put together to put the outline out there to get started

immediately. We would like to try this in a rural area and an urban area to see what works best.

Rep. Kempenich: I know there's a need for this. It is a problem because there is an array of programs and to have any knowledge of them. . .

Rep. Ekstrom: Would this be similar to the single point of entry Washington state has implemented? (21:01)

Ms. Olson: Yes.

Chm. Svedjan: There are FTEs attached to the ADRC? (21:31)

Ms. Olson: No. This would be an RFP so that it would be a proposal, a contract that would be issued.

Ms. Olson continued. (P. 5, Exhibit A) (21:49)

Chm. Svedjan: What percentage are we at today? (Relating to the medically needy income level) (23:14)

Ms. Olson: We're at 100 percent of the federal poverty level for the household -- $867 per month. Eighty-three percent of that is $720.

Chm. Svedjan: You're going to 83 percent. Where are we now?

Ms. Weisz: We are at 58 percent of poverty; household size of two is at 44 percent.

Ms. Olson: I didn't know that.

Ms. Olson continued her testimony and moved on to "Services for Children" (p. 5, Exhibit A). (24:00)

Rep. Kempenich: On SCHIP, the 6,021 children (referred to on the top of p. 6, Exhibit A) how many more is that going to add? Where are we at today? (26:04)

Ms. Weisz: That budget plans to add 1,158 kids.

Rep. Skarphol: There are states that have done something similar to this and it has resulted in people dropping their insurance and transferring over to this program. Are you making any effort to follow to track that? The people who drop their personal insurance that covers their children in order to take on this because of the change in the income level? (26:45)

Ms. Olson: That has been a concern ever since the SCHIP program came into existence. I believe there are safeguards in the SCHIP program for that but I don't know the specifics for those safeguards.

Maggie Anderson, Medical Services Division, Department of Human Services: We have something called the crowd out provision. In North Dakota we have a policy that says that a child cannot come on the SCHIP program for six months if the family drops coverage. That tends to be a disincentive for a family because that child would go without coverage for those six months.

Rep. Skarphol: Do you track that to see whether or not that is happening?

Ms. Anderson: We have a mechanism to track the six months. We don't have a formalized system to capture that and report that but we could do that.

Ms. Olson continued and moved on to "Efficiency and Effectiveness." (Page 7, Exhibit A) (28:27)

Rep. Wald: At what point would some of these kids be candidates for Home on the Range or Dakota Boys Ranch, etc.? (33:05)

Ms. Olson: Those would be some of the children that come into our foster care system and would have behavioral problems or substance abuse problems.

Rep. Wald: So are you saying that would not be the proper setting for these kids?

Ms. Olson: I am. Definitely. You mean when they transition out? When they age out of the foster care system, there's no real transitioning place for them. They become of age and after that period of time they are sent out into the world and some simply are not equipped. They may have lost all connections with family. They aren't trained for a job. They need additional case management or counseling. It's a weaning off process to help them move forward in life.

Rep. Wald: What age spread are we talking about?

Ms. Olson: Twenty-one and over.

Rep. Kaldor: I thought it was 18. They can stay in the foster home until age 21? (35:17)

Ms. Olson: It is 21. Yes.

Ms. Olson continued with the "Overview of Department Budget Changes" (Page 8, Exhibit A) and concluded her testimony. (35:45)

Rep. Kaldor: Regarding Temporary Assistance for Needy Families (TANF), during the interim we had discussions about the educational provision – the 12-month eligibility requirement or allowance. Did the department discuss or debate or consider extending that to 24 months from 12 as was suggested during the interim? (38:06)

Ms. Olson: I believe those are federal regulations that prohibit us from doing that. Yes. That's true. TANF is highly regulated from the feds and it doesn't have the flexibility we were originally told it would have.

Rep. Kaldor: During the interim, I got the impression that states either seek waivers or make other provisions because the testimony we had indicated there were other states that were going beyond the twelve months.

Carol Cartledge, Director of Public Assistance, Department of Human Services: Under federal rules someone can receive 12 months of education as a work activity. However, we could instead of a waiver we could try to make it work within the structure of the other work activities. For example, someone could go to school part-time and meet the other work activities in another core activity, where we could allow them to go on for two years potentially even three years, but they would have to meet the requirement in another work activity. (39:42)

Rep. Kaldor: So right now within the rules we have if you work with employers they can develop a plan or find a way to make that provision possible so that they can get a higher level of education?

Ms. Cartledge: Yes.

Rep. Pollert: Why is DHS having to fund compulsive gambling when the Attorney General has the lottery and the funding from the lottery and I think there's $400,000 that comes out of the Attorney General's budget and I see where we're going to have an increase of $300,000 General Fund, $700,000 total for compulsive gambling. I feel if there's gambling going on it should be taken care of where the lottery's coming from. (41:17)

Rep. Delzer: I don't think I can remember that.

Chm. Svedjan: I would also like to pose this question and the Section can deal with this when they get into it. One thing I wonder about often is that your department serves 1 out of 5 North Dakotans. It would seem to me that our goal ought to be to raise that to 1 in 6 or 1 in 7 and so on. How does the Department know that what you are doing is working? Do you do any kind of outcome analyses by program that suggest to you that

we're not just growing programs but these programs are in fact working and that we're actually helping people become more productive citizens? I'm not expecting an answer right now. I know within the TANF program we measure how many are coming in and how many are getting off and that's good. But what else are we doing in the department to help demonstrate that we're not just appropriating more money to satisfy more emerging needs and to help these people be more comfortable and be more productive in their lives. But are we actually getting people off the caseloads and is it working for us? It can't keep growing as it is at an exponential rate.

Rep. Kaldor: That's exactly why I asked the question about TANF. The NCSL did an analysis that was reported to our interim committee on the value of providing TANF recipients with a higher level of education so that they could migrate up rather than stay at a level income and hopefully get off sooner and be taxpaying citizens sooner. I'm interested in how that's perceived by the department and how it's managed so employers understand and recipients understand that there are options. (44:21)

Rep. Kempenich: So far North Dakota has been isolated, but nationally the use of TANF and food stamps is rising. Have you built anything in on this? How would you adjust that if there was a rise in that? (45:09)

Chm. Svedjan: Do you mean federal government bailout?

Rep. Kempenich: Yes. How would you ask for that? Emergency Commission?

Ms. Olson: It would depend on what program and the circumstances you are talking about. I would be hesitant to say we would go to the Emergency Commission. (46:00)

Chm. Svedjan: That's an important issue. We don't know what the feds are going to do. The prospect of something happening after we're out of session is pretty good. There could be an infusion of cash that we're not expecting at this point. (46:55)

Ms. Olson: We will be giving examples of outcomes of the Department. The current biennium in our budget was $1.1 billion of the $1.9 billion was Medicaid. If you think about that in conjunction with our budget that puts into perspective how much is going into healthcare. Healthcare is really what we do. Our challenge in the department is how do we get our arms around the healthcare issue. We know we shouldn't just be coming back every biennium just asking for more money to fund programs that we have no idea if it's doing any good. We're looking at the data and we will be delivering that information to the Sections. (47:42)

Brenda Weisz, Chief Financial Officer, Department of Human Services took the podium and distributed her written testimony (Exhibit B). Ms. Weisz presented an overview of the Department's 2009-2011 budget request included in HB 1012 along with related fiscal information. (50:16)

Rep. Delzer: What was your underfunding on the salary line in 07-09? (54:14)

Ms. Weisz: I'll have to get that for you.

Rep. Pollert: Last session there were amendments to the bill at the end of the session about the DD providers and the need to borrow money and could we get a loan from the Bank of North Dakota. I'm assuming that's not going to happen, if you've got turn back.

Ms. Weisz: That's correct.

Ms. Weisz continued on p. 2 of Exhibit B. Ms. Weisz moved to the "Major Policy Changes in Developing 2009-2011 Budget on p. 4, Exhibit B (54:58).

Ms. Weisz reviewed the chart on p. 5 which compares the 2009-2011 Executive Budget request to the 2007-2009 budget.

Chm. Svedjan: Some of the analyses we received from Legislative Council have that General Fund increase at $135 million. I don't know that it's the $10 million FMAP. (62:44)

Ms. Weisz: I have not seen any of Legislative Council's documents so I can't explain any difference.

Allen Knudson, Legislative Council: If you just look at the ongoing spending, the one--time items . . .

Ms. Weisz continued. (63:22)

Chm. Svedjan: What's the current status of the Intergovernmental Transfer (IGT)? (64:06)

Ms. Weisz: IGTs are no longer being processed. There's $1.375 million left in that fund.

Chm. Svedjan: So what does that mean?

Ms. Weisz: That means from a fiscal standpoint is that there's not a lot of money left and we will not be regenerating that money.

Rep. Kreidt: There are dollars that go into that fund every biennium with repayments of loans from facilities so there's about $1 million that goes into there every year. There was $4.5 million in it and $3 million was taken out for the Medicaid budget this time. We have a $1.3 million budget, why are we robbing that fund for $3 million when we have a lot of cash on hand? (64:41)

Rep. Svedjan: You might think we have a lot of cash on hand.

Ms. Weisz: I had forgotten about the loan rate payments. What's bigger in my mind is the fact that we don't generate the revenue we used to with the IGT process. We work very closely with OMB and the Governor's office as to how we fund our budget. Those funds are generated from the nursing facilities and looking at it from that perspective that's where the funding should go back in. And from that perspective, that's why the funding was put there. (65:24)

Rep. Kreidt: I guess I didn't mean there's a lot of money but then the Governor's budget he said we weren't going to increase taxes or take money out of Special Funds to do the budget for this time so that was the way I wanted to state my question.

Ms. Weisz continued her review at the bottom of p. 5. She reviewed the "Explanation of Major Budget Changes."

Chm. Svedjan: How much lag time is there in basing these FMAP percentages? (Referring to the FMAP percentages on the top of p. 7, Exhibit B) (70:43)

Ms. Weisz: It's a three-year lag.

Chm. Svedjan: So chances are it's apt to get worse instead of better.

Ms. Weisz: That would be my assumption as well.

Ms. Weisz continued with her testimony on p 7, Exhibit B. (71:11)

Rep. Delzer: The $4 million for IT costs, how much of that is related to the time lag MMIS is taking? And how much more is that MMIS going to cost us as a state? (72:34)

Ms. Weisz: None of it is attributed to the lag. We do have built in our built in our budget in 09-11 the costs to run our old system for ten months. The delay at this point is ten months. Completion of that project, right now we are estimating to stay within our

budget for that project. The costs that we have reflected in our budget are the costs that were identified to us when we were making the decision to go with a new MMIS. The only change in that is a license fee that we weren't aware of with the MMIS.

Ms. Weisz directed the Committee to Attachment A of Exhibit B, the "Department of Human Services 2009-2011 Budget to House Detail of Specific Increases." (73:44).

Chm. Svedjan: So does this relate then to some kind of formula that relates to federal funds? Why a third of it in General Funds and two thirds in Special Funds? (Ms. Weisz had just discussed the 'Hospice for Children Waiver"). (76:40)

Ms. Weisz: Yes. It is paid on the FMAP.

Ms. Weisz continued her review of Attachment A, Exhibit B. (76:55)

Chm. Svedjan: Are most of these expansions based on increased utilization or increased cost? (This question followed Ms. Weisz's conclusion of the discussion on "Home and Community Based Services Changes" on Attachment A, Exhibit B. (79:19)

Ms. Weisz: It's both. It depends on the service and they type of area we are talking about. These numbers are separate from the cost changes I mentioned earlier and the utilization separated these out as specific program changes.

Ms. Weisz continued her review of Attachment A, Exhibit B. (80:08)

Rep. Skarphol: I notice the drug funding for drug courts in the southeast and I would like Legislative Council to provide us with some kind of document that indicates where the funding is for drug courts because I know there is some in the Courts' Budget and there's probably some in the Attorney General's Budget. We need a spreadsheet that delineates where it is. (83:01)

Ms. Weisz continued with her discussion of the "DD Grant Changes" at the bottom of Attachment A, Exhibit B. (83:30)

Chm. Svedjan: So in one case you are standardizing it and in one case you are not. (Question follows Ms. Weisz's discussion of the "Increase Personal Needs Allowance for ICF/MR -- $50 to $60").

Ms. Weisz: I'm not sure what you are asking. We're standardizing an SSI so that all the nursing facilities are the same which is what I think you are referring to and then we're taking this one and increasing it, keeping it less than consistent with the nursing homes.

Chm. Svedjan: Yes.

Ms. Weisz: We are making it consistent with basic care which is by statute at $60 per month.

Ms. Weisz directed the committee back to her testimony on p. 8, Exhibit B. (85:05)

Rep. Kempenich: That addiction case manager, will it be associated with the hospital too? (Referring to the addiction case manager in the Jamestown region that Ms. Weisz discussed). (87:13)

Ms. Weisz: It will actually be located and associated with the Human Service Center and assist the Addiction Counselors for those coming in through the community for treatment.

Rep. Kempenich: So that person is basically going to manage the counselors?

Ms. Weisz: There are various things that need to be documented, various roles that need to happen when we're working with the addiction counselor. We have many things that need to occur when working with our addiction clients. There's actual treatment then there's follow-up and the documentation of the treatment plans. Instead of hiring

the addiction counselor we're having the addiction counselor provide the actual service and the addiction counseling and with some of the other requirements of their job we'll have the case manager assist with that.

Ms. Weisz continued with p. 8 then moved to p. 9 to review the FTE Changes. There is a net increase of 14 FTEs. (88:32)

Rep. Nelson: The childcare provider background checks will be done in-house? (92:29)

Ms. Weisz: No. We don't actually handle the background check itself. We handle the managing of the paperwork. There will be money in the Attorney General's budget for the actual payment to FBI for the checks.

Rep. Nelson: So that will be handled with law enforcement. We had an issue last year with nurses background checks and that got to be a blown up situation. This isn't going to be nearly as cumbersome as that.

Ms. Weisz: We do not believe so.

Rep. Delzer: Have we requested a vacant FTE list? (93:26)

Chm. Svedjan: Yes.

Rep. Delzer: When will we have that do you think?

Chm. Svedjan: It takes a while.

Allen Knudson, Legislative Council: It will be ready at the end of the month.

Ms. Weisz continued at the top of p. 10, Exhibit B, "Key Points in Developing the Budget." (93:48)

Rep. Pollert: With the budget that's being submitted with the increase in rebasing, to hospitals, to basically everybody, shouldn't we see health insurance premiums drop before giving this kind of money to the healthcare industry? I know that's a loaded

question but maybe that's something we'll have to answer in the session, but yet I think it's a legitimate question. (94:47)

Ms. Weisz: I can't answer that. Are you talking about SCHIP premium?

Rep. Pollert: I'm talking everything. That's a generalization question but it's going to be asked in the Section so you might as well be ready for it.

Ms. Weisz: O.K. We can't set the premiums though. We get those passed on to us.

Rep. Pollert: I understand that but insurance premiums are raised because of costs from the industry. So if we increase the rebasing that should drop the cost from Blue Cross Blue Shield or whoever and that should lower premiums. I'm just wondering if there's a correlation.

Chm. Svedjan: Brenda is looking at me as though I should answer this. And if I'm not mistaken, you and I talked about this yesterday.

Rep. Pollert: We'll further the discussion later I suspect.

Chm. Svedjan: Your question has some legitimacy in that the assumption would be that that if someone is going to pay more, then someone else should pay less. But you have a situation here where healthcare facilities are eating a lot of costs that currently is not being reimbursed. I'd like to know how many industries in this state would stay in business if they were getting paid at 22 percent below their costs. Is there an expectation that other premiums could be reduced? Maybe, but I would say probably not. (96:08)

Ms. Weisz directed the Committee to and explained Attachments B and C of Exhibit B, "Department of Human Services 2009-2011 Budget to House, Where Does the Money Go? Long-Term Care Continuum." (97:13)

Ms. Weisz directed the Committee back to p. 10, Exhibit B and picked up her testimony with "Institutions." (99:18)

Chm. Svedjan: Are you seeing any reductions at the Developmental Center?

Ms. Weisz: Yes. Alex Schweitzer will be discussing this.

Ms. Weisz directed the Committee to Attachment D and explained "Where Does the Money Go? Department-Wide Total Funds $2,262,086,961." (100:45) $.83 of every dollar goes out to providers or grant recipients.

Ms. Weisz concluded her remarks.

Rep. Kaldor: I want to applaud this presentation. This is one of the best budget presentations I have seen in a long time in terms of detailing how things changed, where they were, where they are going and programmatic dollars. (102:29)

Ms. Weisz pointed out an error on the Fiscal note and explained that she would be providing a revised Fiscal Note.

Chm. Svedjan adjourned the meeting. The Full Committee will not meet next week. The sections will be meeting.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/12/09

Recorder Job Number: 6781

Committee Clerk Signature

Minutes:

Chairman Pollert: Opened Hearing for overview of Department of Human Services

Brenda Weisz: Handed out testimony (Attachment A).

Chairman Pollert: Asked about tabs for the budget book.

Brenda Weisz: They will be here and I will get them at break. Read testimony.

Chairman Pollert: Are you saying that is the 5&5?

Brenda Weisz: That is the 5&5 and the health insurance coverage. Throughout everybody's testimony I believe the very first bullet for everybody will identify for you the Governor's salary package which will be that 5&5 and health insurance.

Chairman Pollert: Will you have a list of what the equity distributions will be in each department?

Brenda Weisz: That is my next bullet on my testimony. Continued with testimony.

Chairman Pollert: So when you write grants does each separate division in your department write grants by themselves? Do you just have one office or how do you go about that?

Brenda Weisz: What we are looking at doing is that we have a point person in our executive office that works with the public information officer and works closely with fiscal for the budget piece of it. Then works very closely with a specific division in which the program resides. What

we are finding is pressures to get grant awards in and the timeline to do it. We don't have the resources to dedicate towards the grant writing. It is pretty intense for a period of time until you get the grant application in. The other problem is that you aren't notified of the grant award or application. There is not a lot of time given to apply for that grant so your window is short. This additional resource will help us and actually focus in that area and become more of an expert.

Chairman Pollert: Have you ever been short on grant writing? Missed the time lines?

Brenda Weisz: There are grants that we didn't apply for because we didn't have resources to do the work.

Chairman Pollert: If you have that information you should bring that forward later.

Representative Ekstrom: Would this individual also work on the waiver processes that we are continuing?

Brenda Weisz: Specifically working on the waiver, that would be no. We would keep that to the experts in the Medicaid division. It would help us when we do see a Medicaid competitive grant out there. This person can do a lot of the formulating and pulling together relying on that expertise in the Medicaid division. They could supply it but not be charged with the actually writing. That sort of works so it should help in that regard.

Brenda Weisz: Continued testimony.

Representative Nelson: Are we going to be seeing this 31% increase in the Attorney General's budget or in the cost analysis of all areas?

Brenda Weisz: Those were in the budget instructions for us that Office of Management and Budget issued. You should see them in every agency because we were told what rate to budget at.

Brenda Weisz: Continued testimony.

Chairman Pollert: When my son got his Blackberry they promised us that our telephone bill would go down which it did. Once he leaves the plan, his blackberry is $100 or so a month for internet access. Are you saying that the department is paying the extra increase because of the Blackberry's for internet access?

Brenda Weisz: We have not budgeted for any Blackberries. They are just tied to cabinet members to be in touch. Some have actually purchased their own phone but the only thing they are paying is the $17 a month. Some have chosen to just do that. Some have chosen to just do the data mechanism in order to just access email. A lot of times you can't and it's getting more difficult to haul a computer through an airport. For the part you are talking about there are some that specifically use the phone, voice, and data and they would have the full cost. Some have elected to not go that route and just pay for their own data and voice. We have a combination. Continued testimony.

Chairman Pollert: Any questions from the committee? You and I had talked last week and just for the committee's knowledge, when we get the spend downs, at first the Governor requested a hold even budget. That increase was in one column. After that, the Executive Budget came out and there was another increase. What we had talked about last week is to put all the changes in one column. Then you will see all the changes that would have been done from the hold even plus the changes in the other column for the Executive Budget. We just threw them all in one. When we had the spend downs they would be segregated out. Then if you have to ask if this is from the hold even or the Executive Budget then you can find that out . Am I correct?

Brenda Weisz: Yes. We did leave out one column that was the salary package. We left the Governor's salary package because that is the sizeable increase in the salaries. We left the

Governor's salary package, the 5&5, and the insurance in their own column. We combined every other change into the single column so it's easier for you to follow.

Chairman Pollert: The changes will be segregated out so you will be able to find out which changes are what. Otherwise you would have been adding and so we thought it was better.

Chairman Pollert: We are going to go through the sections of the overview then we will split out in about three days with the spend downs and detailing. I just want to say one more thing before you start. If you ask for any other information when going through this testimony, ask for it before detail. Will the OAR's be in a separate slip somewhere? Will you have a listing of what the OAR's were?

Brenda Weisz: We can make copies so you will have those and bring them down.

Chairman Pollert: We will need those at some time, especially when we get into the Medical Assistance part and the Long Term Care.

Jennifer Witham: Testimony attached (Attachment B).

Representative Nelson: Would you explain that?

Jennifer Witham: Last legislative session had requested that we take a 10% across the board decrease in our salary and benefit area. In the ITD that was supposed to be attrition or the capability to reduce our costs in that area. Our division was not able to meet that reduction because we actually had an increase in demands in our division .We didn't have a great deal of turnover. It represents our ability to meet that decrease.

Representative Nelson: I thought we added some staff for MMIS to do some of the manual work as far as the charges for Medicaid services.

Brenda Weisz: We didn't add any staff for MMIS at all. We are doing it with current and existing staff.

Representative Nelson: There wasn't any temps added?

Brenda Weisz: Not within the budget. We didn't have specific temps added. We had contracted staff that we added to the budget process. We split it out between divisions in proportion to their general fund. Some areas of the budget have more turnover than others. When we had the attrition going on often times the newer people are hired at a lower level than the ones that are left. We had a couple retirements. I had the easy part within my budget because I didn't have to explain the need to put the general funds back into fund my salary plan. You will notice that in another division or two that they weren't able, with the attrition, to accommodate the underfunding in those areas.

Representative Nelson: You anticipate a lower salary person coming on when there is turnover. When it doesn't happen is when you ask for this?

Brenda Weisz: That is correct.

Chairman Pollert: That was a total of $1 million for DHS?

Brenda Weisz: It's just over a million.

Chairman Pollert: I noticed that the $40 million, that must deal with MMIS? Was that under one time funding? Can we get a list of all the one time funding?

Brenda Weisz: That is on page one of your appropriation bill.

Chairman Pollert: Is there a detail broke down if it is a total dollar number.

Brenda Weisz: The bill only has it by general funds. I'll take that same schedule and just put total.

Jennifer Witham: Continued testimony.

Chairman Pollert : When is the implementation date for MMIS? Has all the money that has been incurred going to be incurred?

Jennifer Witham: The goal is set for May of 2010. This week we are closing down and finalizing the design sessions which have been going on for a year. Then we will move into the

construction phase where ACS, our primary vendor that's building our MMIS, will modify their system to incorporate all the changes for ND specific processing. That has begun and will continue until they are ready to begin testing the system. They are going to be starting system integration tests in June. That is a large part of the process, to make sure that all of the customizations that we have requested are incorporated into the new system. In the fall we will be going through user acceptance testing. We are expecting the provider enrollment which will be a live provider enrollment that will be happening in January 2010. Then the full system be implemented the following May 2010. Continued testimony.

Chairman Pollert: Will there be increases in every ITD department in the DHS budget? Is ITD charging you more money for the services they will provide you.

Jennifer Witham: In some of their areas they are. The next bullet talks about their rate increase for their labor or senior developer staff.

Chairman Pollert: I was going to ask if we could have what that number is for every department. So we can talk to the Government Operations people who are doing the IT budget.

Jennifer Witham: Continued testimony.

Chairman Pollert: Any questions for Jennifer. Any information you want her to bring forward when we go to detailing?

Tove Mandigo: Testimony attached (Attachment C)

Representative Nelson: These last two programs, are they both new?

Tove Mandigo: The diversion was new this biennium. With the changes in the DRA which became effective in October of this past year, the requirements were far more strict. So we moved to Pay after Performance.

Representative Nelson: We have been doing that in a different area?

Tove Mandigo: The TANF diversion we have been doing along, the Pay after Performance is a new program. Continued testimony.

Chairman Pollert: The $100 million increase in food stamps is all federal. What happens in our current environment if that money drops? If the federal government drops that money what will happen?

Tove Mandigo: The money is already appropriated. We have that money already for the 09-11 budgets. It can't change because it's open ended funding.

Chairman Pollert : What do you mean by open ended funding?

Brenda Weisz: There are certain grants that are open ended funding for the department meaning whoever is eligible they will provide funding. That is Medicaid, Food Stamps, Child Support, as well as Foster Care IV-E. No matter what they will give us that money.

Chairman Pollert: When we get to the detail I take it we will get our listing of what the grants all were and how much is federal and general. Can I get an explanation on the PRIDE?

Tove Mandigo: It's a continuation of the same program, just extending it state wide.

Chairman Pollert: Can you tell me what PRIDE is?

Tove Mandigo: Currently it is serving Bismarck, Dickinson, Fargo, Grand Forks, and Minot. We will be adding Devils Lake and Jamestown. PRIDE is a program that will take individuals in the child support area clients that will normally face jail sentencing and bring them into wrap around services in order to find them jobs. Hopefully they can be closer to their children. So far this program has won national awards. People are coming to ND to see what we are doing and seeing if they can duplicate it.

Chairman Pollert: Is there overlap in programs? We started Healthy Families with a $300,000 appropriation to that program. There seems that there are so many programs in the DHS

arena. Do any of them overlap and is it possible to get a listing of all those programs. Two sessions ago we got a listing of all the programs that DHS has. It was a color graph matrix of everything DHS does.

Brenda Weisz: I'll look at my stuff from two sessions ago. Many of the programs in our agency do overlap and do coordinate. A lot of our programs should and better collaborate or else we shouldn't be operating. To take your example of the Healthy Families, it does coordinate with our Child Welfare Services and it should. We should be working Child Support with our other agencies because it is public assistance. Child support collections do impact what we draw down from our federal grants for TANF. The more support we can get and retain, the lower our grant costs are going to be in our draw from the Federal Government.

Chairman Pollert: The SNAP has given us information on the Great Plains Food Bank. Are those interrelated or do they have nothing to do with each other. I know there is no general funds in the Great Foods Food Bank.

Tove Mandigo: There isn't but we do have someone who goes to the meetings.

Chairman Pollert: It's indirectly related?

Tove Mandigo: It's indirectly because it's a concern for people who are in need of food. There is a move to try and make sure there is a duplication of coverage and so we know what they are doing. We have somebody who sits at the table to let us know. I think the Great Plains is more food banks and places in the communities where people can go and get food. It is more of a sharing of information than any other sort of interaction.

Chairman Pollert: At that time nobody from the food banks would be asking if they are on assistance or not. Would they have to qualify to get food from that food bank?

Tove Mandigo: I don't think they would be allowed to be asking that question.

Chairman Pollert: The committee wants information on these programs and how they are related or indirectly related. Is there any easy way to do that without making it long.

Brenda Weisz: I will look at what I have from two sessions ago.

Chairman Pollert: I'm going to want to have a graph of what we got two sessions ago. I should have asked for that information. We weren't going to use it last session but I think it's important for the committee to have all that information of the programs. This other information I'm asking about is if we want to know as a committee, all the programs that DHS is offering. Or should we go through detail and just wait to see what they are.

Brenda Weisz: Chart handout (Attachment D). I will tell you a little about what this chart means.

Chairman Pollert: Representative Ekstrom has a list of what abbreviations means. Can the committee get that listing again?

Brenda Weisz: I will bring copies down.

Chairman Pollert: Any questions on the OAR chart? We will then move to child support.

Mike Schwindt: Handout Testimony (Attachment E)

Chairman Pollert: Of the FTE's it shows you decreased 7.5%, is that including all of the regional supports? Are those classified as state employees now?

Mike Schwindt: Yes they are state employees. Some are at the state office and some are at the regional office.

Chairman Pollert: When SB 2205 passed it was going to be a cost savings of $7-9 million. Are you saying it is $3.2 million?

Mike Schwindt: The fiscal note for 2205 included a whole bunch of stuff besides child support. The stuff you are seeing here pertains to only the child support budget.

Chairman Pollert: Has the mail levy's dropped to $3.2 million in the counties? So the $7-9 million, do you remember what the other $4-5 million was?

Mike Schwindt: Part pertained to foster care. There were a couple of pieces on admin costs. I'd have to dig out the fiscal note in order to answer that.

Chairman Pollert: I'd like you to bring that to us when we get into the detail.

Mike Schwindt: Sure.

Chairman Pollert: We will stand in recess until 2:30.

Hearing Date: 1/12/09

Recorder Job Number: 6853,6854,6855

Committee Clerk Signature

Minutes:

Maggie Anderson: Testimony Handout (Attachment A)

Chairman Pollert: Is this the section where we get into continuous eligibility?

Maggie Anderson: Yes, I will cover that in testimony and be happy to answer any questions.

Chairman Pollert: Are we going to get to numbers like 150 net compared to 200.

Maggie Anderson: This is actual enrollment. Continued testimony.

Chairman Pollert: Are you saying that people don't want to enroll in healthy steps because it's easier just to do continuous eligibility in Medicaid?

Maggie Anderson: When we process an application for health care coverage. An application comes into our office or into the county office, we test for Medicaid first. It's not that the family doesn't necessarily want it, but if they are eligible for Medicaid they will be on Medicaid. If they fail Medicaid we will test them for Health Steps. If they fail Health Steps we send a file to Blue Cross blue Shield for their Caring for Children program. We really test for all three programs and send that information if appropriate. Healthy Steps has a 12 month continuous eligibility. As the families come off of Healthy Steps and apply for coverage, if their incomes have decreased they are now going to show up in Medicaid enrollment because they will test eligible for Medicaid because we test that first. Along with that we had expected an enrollment

increase with continuous eligibility because one of the reasons the legislature wanted continuous eligibility and one of the purposes of that is for families who failed to report and their children would lose coverage. It's a combination of applications coming due, the family being tested, and now qualifying for Medicaid instead of Healthy Steps. Plus, the intended purpose of continuous eligibility taking place.

Chairman Pollert: Didn't we tweak the Medicaid coverage last session?

Maggie Anderson: In 2007, HB 1463 proposed to increase the income level from 6-19 year olds to 133% of poverty instead of 100% of poverty. We were unable to make that change because the federal law did not change. That bill had several contingencies in it. One was contingent on congress making a change to the 1997 statute on SCHIP that would allow that expansion. That fix was in the SCHIP reauthorization bill. That bill was never finalized between Congress and the President.

Chairman Pollert: Was there a dollar appropriation on that SB tweaking?

Maggie Anderson: There was.

Brenda Weisz: It was in the bill. We got the increase for Healthy Steps and then we got the reduction going to 133 . Actually by moving to 150% net and expanding to 133% of the poverty, we should have seen people shifting from SCHIP over to the Medicaid program. That didn't happen but our budget was reduced for that impact.

Chairman Pollert: So the dollars for 1463 were given back and not used? We would have had a separate appropriation from going to 150 net on Healthy Steps.

Brenda Weisz: Our budget was reduced but we didn't see the reduction in the expenditures because it did not happen.

Maggie Anderson: The SCHIP reauthorization is a hot topic in Congress. They expect a vote on that this week and the details of that are that it is intended to look a lot like the bills that

went through during 2007. They may or may not be able to extend that to five years. That is a bit uncertain at this time.

Chairman Pollert: Did we get a final cost of what continuous eligibility would cost us for this session. There was this argument amongst a few of us on what the cost was going to be. Do you have that figure or will you present it?

Maggie Anderson: I will provide that.

Chairman Pollert: Did we only fund it for the 07-09 biennium and we are going to have to reauthorize it, or is it in the budget for 09-11 already?

Maggie Anderson: When it was funded it was not funded for the entire 24 months. The hold even of bringing that forward to fund it for the entire 24 months

Chairman Pollert: Did we have to make up any dollars from the 07-09 in there? Did we appropriate $1.9 million?

Maggie Anderson: I don't have that on the top of my head. We can put a sheet together for you for the detail and get you all that information.

Chairman Pollert: So they have to reauthorize for continuous eligibility once every twelve months.

Maggie Anderson: The families need to apply for Medicaid coverage once every twelve months. They have no reporting during that time with very few exceptions. It's like the family says to dis-enroll the child. They move out of state or there is a death. Other than that it's a no ask don't report policy. They receive coverage for twelve months. At the end of those twelve months, just like with Healthy Steps, the family receives a notice and they will need to reapply.

Roxanne Woeste: Just so you know that the 2007 legislative assembly appropriated $4.4 million for continuous eligibility . $1.5 of that was from the general fund.

Chairman Pollert: Can you let us know if you needed the $1.5 million? That was for the beginning of January 2008.

Maggie Anderson: Continued Testimony

Chairman Pollert: If it doesn't get authorized we just ate 150 net, is that correct?

Maggie Anderson: Yes.

Chairman Pollert: I will want numbers for 165, 175, 185, and 200 net too.

Representative Nelson: You point out that we went to 150% in October of this past year. When you anticipate the 6,021 children increase was that based on the previous eligibility of where we are at after October of 2008. How did you come to that number?

Maggie Anderson: We built what we would call the base budget based on a 150% of poverty. We had an approved state plan for the Centers of Medicaid and Medicare Services. We had implemented that October 1. We assumed carrying forward 150.That budget was built at 150 and an OAR was submitted for 200%. The Governor funded that program at 200%. The 6,021 is a combination of that base budget plus the number of additional children that we would expect to serve at 200% of poverty.

Representative Nelson: When you went to 150% what kind of numbers did the program increase as far as eligibility as of October 1. Did you track that ?

Maggie Anderson; We estimated an additional 800 children would be eligible based on going from 140-150 net. Some of that fluctuation is captured in that increases and decreases in attachment D. We are tracking that and should have some final reports yet this week and we will be able to provide that. The numbers are around 800. Continued testimony.

Chairman Pollert: For healthy steps, is the income level for a family of 4 about $42,000? If not, can you get us that number?

Maggie Anderson: For a family of 4 at 200% net, it is $42,400 per year.

Chairman Pollert: But at net, what do you add back in?

Maggie Anderson: We have a list of all the deductions and disregards that we have for both Medicaid and SCHIP. It's quite lengthy.

Chairman Pollert: The $42,400 is kind of deceiving if you really add in what everyone is gross.

Maggie Anderson: Continued testimony.

Representative Nelson: Are you aware of states that pay at costs?

Maggie Anderson : I'm aware of people telling me that there are other states that pay at cost. I have not personally investigated that. It has come up multiple times with CMS. The general counsel from CMS has indicated that they fall back and say the Social Security Act prohibits it. If they find out other states are doing it they will make them stop.

Representative Nelson: I have heard from the grapevine that there are states that are paying at cost. It gets brought to our attention as to why we aren't able to follow along with that. I'm sure you have made your position apparent to those people who are asking those questions.

Brenda Weisz: We had direction from CMS that they would not entertain any change for us to be able to pay those services at cost because those acts prohibited it. It didn't seem to be needed.

Representative Nelson: So in the case of lab, you are paying the lab at Medicare rates?

Maggie Anderson: At the Medicare fee schedule.

Chairman Pollert: So you are saying for critical access, some of what we appropriated to use at hospitals was used and some wasn't.

Maggie Anderson: I don't think we would get down to the exact appropriation. There was an understanding that all services of the critical access hospital would reimburse that cost. There wasn't a lot of discussion about that where the opportunity presented itself for us to be able to

talk about the items that weren't prohibited. The third item is the swing bed services. We are continuing to work with CMS on trying to identify what we can and can't do in that area. No one has really asked them that question before. The regulations are pretty specific about how we pay for swing bed services. It is roughly $800,000 general funds.

Chairman Pollert: Was it all appropriated and used up?

Maggie Anderson: It was all appropriated. We would have to run a schedule as to what the cost of critical access has been compared to the appropriation. Keeping in mind when that was appropriated that it was based on the number of critical access hospitals that were approved at that time. There have been additional ones that have switched from the general acute PPS hospitals to critical access. It may also turn out where we have spent more than that on the particular area.

Representative Nelson: As I remember as the fiscal note was prepared for this, I believe I did the analysis for that. To the best of my recollection they did include 100% costs and analysis in there. Where was the balance of that fiscal note last session and where we were now?

Maggie Anderson: Continued testimony.

Chairman Pollert: We increase the level to 150 net and tweak with the Medicaid at 133 at poverty. With continuous eligibility we increase 4,500 people to which program?

Maggie Anderson: Between both of them. Looking at attachment D will be the easiest way to look at it. You can go back to November of 2007 when we had 4,019 children enrolled in SCHIP. We had 27,438 children in Medicaid. That totals 31,457 children. Then in November of 2008 we had seen a decline in enrollment in Healthy Steps down to 3,568. However, Medicaid increased to 32,479 for a total of 36,047. We did see growth in the early part of the biennium for Healthy Steps and then somewhat of a plateau. Then we saw a little bit more of a growth until June. Then they declined relating to the continuous eligibility. When you look at the

numbers between the programs on how many children are receiving health care coverage it is a net increase of 4,590 children.

Chairman Pollert: That is where my question is coming at. Aren't the services under Healthy Steps better than the services under Medicaid? Are they the same or doesn't it matter?

Maggie Anderson: The benefit package under Medicaid is more comprehensive than the benefit package under Healthy Steps. The benefit package under Healthy Steps mirrors the state employee package with the addition of vision and dental benefits. Medicaid is a much more comprehensive package. Continued testimony.

Chairman Pollert: What would be the percentage increase of re-basing?

Maggie Anderson: It's a 14.05 % increase for hospitals.

Chairman Pollert: It is based off of the rebasing and is 7% the second year?

Maggie Anderson: Continued testimony.

Chairman Pollert: It rebases to January 1, 2009?

Maggie Anderson: The optional adjustment request that were submitted would rebase anything for costs as of July 1, 2009. The OAR sheets that were handed out in my testimony you will see where some of the items were funded at levels different at 100% of cost. It would be cost at July 1, 2009. They were inflated forwards so when we start the biennium they would be rebased to cost.

Chairman Pollert: When was the last time we rebased hospitals?

Maggie Anderson: It was in 1994 using 1992 data. For the other services there hasn't been a rebasing to my knowledge. It is something that is more common with your institutional type services. Continued testimony.

Chairman Pollert: What do you mean by the rebase of 25%?

Maggie Anderson: When the rebasing report came in with the total amount the department was requested to send in information on Office of Management and Budget. It was 25% of the number so it was around $53 million.

Chairman Pollert: So hospitals are being projected for July 1, 2009. So you could say that Physicians aren't being rebased.

Maggie Anderson: Physicians are receiving an increase of 25% of their rebase amount that was calculated. This number reflects rebasing at cost in hospitals.\

Chairman Pollert: Two biennium's ago we had inflationary increase of 2.65%. Last year we had 4 and 5%. Now this year it is 7 and 7. When you do your budget, doe the 2.65 and the 4 and 5 added on to the top or is it eliminated out and we start from 7 and 7?

Maggie Anderson: The 2.65 and 2.65 from the prior biennium was included in the cost to continue as we built our budget for the current biennium. As we built the budget for 09-11 we knew that we already had the dates of service that included the 4% from the first year of the biennium as we were building. When we project what that cost person service is we have to put the 5% on that. As we get into going through the detail and you look at our spend down reports, the cost was only showing this in April. You may ask why it is 5% higher. It is because the fee schedule goes up July 1, 2008 with an additional 5%. We have to build that 5% increase on their This budge t would hold the 4 and the 5 in place and add an additional 7 and 7 each year of the biennium noting the exceptions for the 7%. Continued testimony.

Chairman Pollert: I take it hospitals aren't going to be rebased to the Medicare levels. If I looked at hospitals where does it put them at compared to Medicare?

Maggie Anderson: We would have to put out a map to that. It's not a distinct comparison. It has to do with a lot of factors that we pay. We pay off different groupers and we weigh things differently. Medicare doesn't pay for a lot of births where Medicaid does. We group and weigh

things differently between the two programs. The directive of the study was not to pay at Medicare. It was to figure out what it costs to rebase them and that is what the rebasing study was about. An ambulance service goes out on a call and delivers a service and bills a code to the department. It's an A code for transportation that is billed to Medicare. Those are easy to see. There is not that distinct of a comparison for hospital services. In the rebasing study that the consultant did, they provided what it would cost to rebase at cost. They put it as the last page of their report. Should that not be selected, here is an alternate step.

Representative Nelson: Why are the dentists the only ones who are in the 7 and 7 inflator category?

Maggie Anderson: During the course of the actual rebasing study we weren't able to actually complete the study for the dentists. There was quite a bit of difficulty with completing the cost reports and those being able to provide the information in the way that the consultants needed to do a study. An OAR was submitted at 65% of average bill charges. You will notice on the OAR sheet that it is one of those that were funded at a different level. It was funded at 75% and the 7 and 7 inflation was included on that.

Representative Nelson: So when the inflator is added to the 75% they won't be at charge rate but certainly a lot closer than the 75% in some cases?

Maggie Anderson: That is correct because it is a minimum of 75% is where the fee schedule would be established. There are some above that. The 7% would be added on to that.

Representative Nelson: Could we also see if that 75% of average bill charges was taken out and what that number would look like rather if they would just follow along with the rest of the reimbursement?

Maggie Anderson: So you would like to see what the 7&7 inflation would be on the Medical Services budget without the increase of 75%?

Representative Nelson: Correct. Wasn't the language in last session to rebase hospitals and inpatient services at Medicaid rates? There was an amendment to the Human Service bill that raised that for critical access hospitals.

Maggie Anderson: It was to pay them at 100% of cost, not the Medicare costs.

Representative Nelson: That is bringing the big hospitals up to 100% of costs.

Chairman Pollert: That is a better way of saying what I was trying to say. So the rebasing is 100% of costs, is that what you are saying?

Maggie Anderson: Yes for the hospitals it is. A comparison to bill charges/costs or what comparison would you like to make. This study would certainly be the exception to that.

Chairman Pollert : If I would compare the dentist reimbursement schedule to hospital reimbursement schedule, who is getting a better percentage and how big of a difference is it?

Maggie Anderson: What comparison would you like to make?

Chairman Pollert: My guess is that we are treating dentist reimbursements better than we are treating hospitals. I am trying to find out what is that correlation? Is it drastically better? Why would we do that as compared to hospitals? Is it 125% of costs, is it 133% of costs if you would try to base it to hospitals?

Maggie Anderson: We don't have cost information for the dentist. We were unable to complete that because of the difficulty that the dental providers were having in completing the cost collection tool. The only comparison we would be able to make is a comparison to build charges. As we have talked about in previous bienniums there is always a concern of making that comparison. Bill charges for a dental practice to a hospital to an ambulance provider and what is in that difference are very different things.

Chairman Pollert: But bill charges will have a percentage of profit in?

Maggie Anderson: Certainly and for each provider that is a different percentage. They also have overhead costs and things that may not be allowed to be counted as costs per federal guidelines on what can be included in costs.

Chairman Pollert: So what is 100% of costs to hospitals? Is it just bill costs?

Maggie Anderson: No. Currently they bill us bill charges. What will happen on July 1, 2009 with this rebasing is each hospital receives what is called a base rate that is hospital specific to their costs. That base rate is included in the formula that determines their final cost. They are still going to bill us. Based on our new base rate plugged into our funding formula, they will receive a payment that will be less than our bill charges. Same goes with dentists.

Chairman Pollert: Could it be said that critical access hospitals do not have the revenue stream that urban hospitals have because of heart surgeries and stuff. If you say that, do urban hospitals have a better chance of revenue gathering than critical access hospitals?

Maggie Anderson: I would be uncomfortable answering that question. Continued testimony.

Chairman Pollert: The current budget for inpatient hospital was $106 million. Are you saying we are going to go up over 100%. Are we adding them together?

Maggie Anderson : No. Our budget request is $142.3. It's the difference. Continued testimony.

Representative Nelson: In this area, did you give any consideration to the debate regarding the pharmacy ownership law. I've seen some numbers that will say the department will save some money if it passes. Was that considered in part of your budget?

Maggie Anderson: That would be part of a fiscal note that the agency would prepare. If and when the bill was introduced we would provide the fiscal note. We have done a fiscal impact projection at the request of individuals who are sponsoring that legislation. It was not included in this budget because it would need to be handled through that separate legislative process.

Representative Nelson: So it is prepared at this time?

Maggie Anderson: The estimate is prepared. It is not in any of my budget information for these materials because it would need to be handled through that bill. Should that bill not pass and we would have made a change in our budget, then we would have been short those dollars. Continued Testimony.

Chairman Pollert: The Executive Budget requests $74.3 million for Physician services. What was that from last biennium?

Maggie Anderson: It is attachment G in my testimony. It would be $64.1 million. That will show you the 07-09 budget, the projected need, and the 09-11 budget to the house. Then we did a bit of an add on due to the rebasing to show you how much of that 09-11 was related to rebasing. Continued testimony.

Chairman Pollert: When you get to ambulance services, our current budget is $3.7?

Maggie Anderson: It is $2,964,019.

Chairman Pollert: So you are telling me that the ambulance services have a $2.7 million increase total?

Maggie Anderson: Correct.

Recorder stopped working so started new job.

Representative Nelson: Are all the ambulance services given the same rate? Whether it is rural, urban, air? Is that formula the same for all of them?

Maggie Anderson: We have base rates and there are base rates for air ambulance, both rotary and fixed wing ambulances. Then there are mileage codes.

Recorder stopped working so started new job.

Maggie Anderson: So what you would like to see on rotary wing ambulance.

Representative Nelson: Is Medicaid paid on each of those categories you just explained? Is there another way to be able to delineate those differences in the payment schedules?

Maggie Anderson: I'm not sure I understand the question.

Chairman Pollert: I would like to know if a fixed wing or rotary, when they bill you is it by bill charges. You pay them off the bill schedule right?

Maggie Anderson: Absolutely.

Representative Pollert: So that percentage of bill charges versus what you pay versus basic life support and what they are paid off a bill schedule. I would be interested in comparing the different types of ambulances and where the dept pays in those categories.

Maggie Anderson: So what you would like to see is rotary wing air ambulance, we pay 42% of bill charges. ELS, ground ambulance we are paying 65%. Continued testimony on bottom of page 15.

Chairman Pollert: Go back to chiropractic serves. The total request is $987.5. You are telling me that their base budget before we started this was $573,000?

Maggie Anderson: The rebasing for chiropractic services was 91.4%. The 2007-2009 appropriation for chiropractic services was $455,167.

Chairman Pollert: So you are telling me that Chiropractic's base was $455 but they are requesting $987 for an increase of $532,000.It is a 117% increase.

Maggie Anderson: That includes the rebasing of the 7% the second year as well as cost and utilization changes. Continued testimony.

Chairman Pollert: Are there any questions for Maggie? Our meeting is adjourned until tomorrow morning.

Minutes:

Chairman Pollert: Called the meeting to order and took roll. Every member was present.

Maggie Anderson: Testimony handout. (Attachment A)

Representative Metcalf: Concerning Hospice, I see you have a special chart. Is there a special reason. Are you trying to show that there is a correlation there or that there are more costs involved in that particular operation? What is the purpose of this particular information?

Maggie Anderson: No specific reason. It is a service that we pay the room and board component. Individuals receiving Hospice, they are likely Medicaid and Medicare eligible so they receive Hospice benefits through those two programs. What we are paying for in the nursing home is the room and board component. It's just information purposes.

Representative Ekstrom: In terms of the bed shifting that is going on throughout the state. As we get into detail I would like to see geographically how the shifts are occurring. I'm increasingly concerned that we are pooling more and more of those to the urban centers. But that isn't necessarily the best long term solution for the folks that are living in rural areas because of them distancing themselves from relatives.

Maggie Anderson: We will pull something together. Continued testimony.

Representative Ekstrom: As we get into detail on this subject, I'll assume we'll have that schedule. I'd like to see how it is applied across the board.

Maggie Anderson: We have the sliding fee schedule the way that it exists today where there is a 0% share all the way up to a 90% share, then all the way up. Is that what you are seeking?

Brenda Weisz: The sliding fee scale back in 2003 was established at that time. It wasn't a new methodology but rather duplicated something that already existed.

Maggie Anderson: Continued testimony.

Representative Ekstrom: 24:30 Do we have a sense of the population census?

Maggie Anderson: We have estimated about 27 slots. Individuals that we have identified that may currently be at a max and need that extra care.

Representative Wieland: Define a slot

Maggie Anderson: It's how we build a budget. We estimate a number of people who may utilize the service and an average cost of care. We wouldn't be limited to 27. We are estimated about 27 people may use the service. It could be 24, it could be 32.

Maggie Anderson: Continued testimony.

Representative Ekstrom $30.58 In terms of personal need allowance. How much are they each allowed to hang on to? If they don't use the entire

Representative Kreidt: Going back to page 4, is there any follow up on the training received by the nurse? After the training is done are they able to do the service or procedure that is asked?

Maggie Anderson: The nurse has to certify that they have been trained to do what they indicated should be done. They need to review the client's needs every six months. They can review more often than that but they need to review every six months.

Karen Tescher:

Representative Kreidt: How did you determine that the 30 slots for the Autism. This is becoming a big problem for children under 5.

Maggie Anderson: It was through identification of children. Continued testimony, talked about Handout B

Representative Ekstrom: Could we also get a breakdown geographically?

Started new job (6912). Recorder stopped working.

Representative Ekstrom: Do you see where I'm going with my line of questioning? I'm trying to see how we can keep more folks in the rural communities if it's less expensive for us to do so.

Maggie Anderson: You would like to see by facility the lowest and highest rate because they will be by the classifications? Continued testimony.

Representative Wieland: We are paying for 62 people who live out of state?

Maggie Anderson: Yes that is correct. We have a reciprocity agreement with MN. For the first two years they live in MN they remain on ND Medicaid and vice versa. That is just because of the proximity of our border. You have people who may want to go to Wahpeton and Breckenridge. Their family may live in one town but they want to be with their family in the other town. We also have other individuals who are further in to the border of MN. After two years they avert to that state's Medicaid.

Representative Wieland: Is the costs similar for the out of state people as it is for in state?

Maggie Anderson: It is comparable. It is not the exact same payment methodology. For example we pay an all inclusive rate in ND including therapies. In MN we pay for the therapies separate from that rate. MN agrees to our payment methodology when they have a client here.

Maggie Anderson: Continued testimony

Started new job because recorder quit working.

Chairman Pollert: On the 22 addition, is that for people that fall between the cracks? Are there people who fall between the cracks?

Maggie Anderson: Those 22 additional individuals could be one of two things. Because it is a sliding fee schedule they may be at the point where they are beyond the 90/10 split where we pay 10% of their care and they pay 90%. They are revising the schedule where they may move it up enough where they now fall into one of the areas where we will pay for a portion of their care. The other thing is that we have heard from the county case managers who work with clients and authorize these services that when a client has to pay a portion of their care whether that be 10% or 80% that they may not seek that care because they are unable to afford that care. We expect some of those individuals who may otherwise have had to pay a portion of their care or pay a higher portion that they were unable to pay to come on who are not currently receiving any services. Continued testimony.

Representative Wieland: When we talk about the 7% inflationary increase throughout the budget is there any portion that is required or dedicated to salaries specifically, or is it discretionary for the provider?

Maggie Anderson: There is nothing mandated for that. With the program often times it is QSP's doing that so that 7% directly goes to increase the fee schedule. Within a nursing home or basic care facility they are provided a 7% inflationary increase and then it is within the nursing facility or the facility for the developmentally disabled to determine how to apportion that increase that they need to cover all of their costs that are inflating.

Chairman Pollert: What is targeted case management?

Maggie Anderson: Case management is assisting individual's access services and coordinate those services and make the right connections in order to assure that whatever is in their particular care plan. That they can access those services that they can get the transportation,

that there is follow up with what is recommended. Targeted case management is targeted at a population like individuals in need of long term care services. Within the traditional Medicaid grants yesterday I talked about targeted case management for pregnant women. Pregnant women would be a target group. They are a very specific group. We don't provide case management for the Medicaid population as a whole. We have targeted groups who have been identified as needing that specific additional service. We have targeted case management that you will hear about in the CFS area.

Chairman Pollert: Are you saying that this targeted case management might be for clientele that doesn't fit into home community based. Does this fit to a certain group of people or for those who have a special need so that they are taken care of?

Maggie Anderson: It does have a specific purpose. For example we do not provide targeted case management for individuals in a nursing facility. Again that is included in that daily rate that they receive. They are supposed to do the case management for the individuals living in the nursing facility. They would not provide targeted case management for individuals receiving SPED or expanded SPED specifically for their services. If they are Medicaid eligible and they need personal care, they need to receive that care through the Medicaid state plan not through SPED because we receive the federal match. Specifically the people who are receiving this service are receiving Medicaid state plan personal care and the targeted case management. The individuals in the waiver also receive case management through the waiver.

Started new job because recorder stopped working.

Maggie Anderson: Continued testimony.

Chairman Pollert: What is a technology dependant waiver?

Maggie Anderson: The criteria for this waiver is an individual is ventilator dependent for more than 20 hours a day. They are medically stable and they or their family members is capable of directing their own care. That is the criteria.

Representative Wieland: Can we get a chart that would show us where these PACE people are coming from? You said it's a shifting so I assume these people are coming off of a program so that we can find out where they are coming from.

Maggie Anderson: We can do two things. One of them is building a budget. These people so to speak who are in PACE aren't in PACE yet. We built a growth in there. What we can show you is where we move the dollars from. For example we had to reduce nursing facility costs. Then we can tell you in general the nine individuals who are currently enrolled in the PACE program where they were previously receiving service.

Representative Ekstrom: I'd like a broad overview of particularly nursing care and all types of senior care. Where we are today in terms of population is some of the information I would like. We all know the demographics are shifting towards to the older. I'd like to see a five year projection as to how many folks could be reasonably expected to be coming into the system and accessing all types of care.

Maggie Anderson: I will certainly visit with our Aging Services division, the Medical Services division. They are working on a report. Between all of us we should be able to provide some information for you on that.

Chairman Pollert: Program for all inclusive care. Do these individuals not really fit into other areas so you started the PACE program?

Maggie Anderson: The purpose of the PACE program is to offer an alternative service for individuals in home and community based care. It is really a single point of entry where they can go into the PACE program. If they are living in a home, apartment, or community setting

now the PACE program will provide them any services they need to remain in their home for as long as they need. If they do need to go into a nursing home the PACE program is also responsible for paying the costs of the nursing home care. It is truly a home and community based care. It is an option for people who choose to remain in the community versus choosing to go to an institutional setting. It's not that they didn't fit somewhere else because very likely these people receiving PACE are receiving home delivered meals. They are receiving personal care services. They are receiving home makers services. All of that has to be provided by the PACE program through this comprehensive capitated program that they have to provide all the Medicare and Medicaid services. Nationwide it has proven to be a very effective program for allowing individuals to remain in their home and community.

Chairman Pollert: I would like to have a further explanation of this so I have an idea.

Maggie Anderson: We can put something together that would be basic information. I'm sure someone who is running the local PACE program would be willing to provide information through the subcommittee or the public testimony.

Brenda Weisz: Would it help if we said it is managed care. It is a managed care program rather than individual services. You have health insurance or managed care.

Representative Bellew: What is the difference between PACE and SPED

Maggie Anderson: If someone has to be Medicaid eligible in order to qualify for PACE. Medicare pays a portion of the fee and Medicaid pays a portion of the fee. With SPED someone may be SPED and not be Medicaid eligible.

Representative Bellew: Do they provide the same services?

Maggie Anderson: No. The services in SPED are home and community based services. Where within the PACE program they are responsible for all Medicaid services. So if that person falls and breaks their arm they need to get them to the Dr. and pay for all the bills. In

SPED we pay just for home and community based services and typically those are from an agency or an individual QSP.

Representative Kerzman: How does PACE really differ when the counties were doing most of this?

Maggie Anderson: I can honestly say I don't have the answer.

Brenda Weisz: Pre-Swap was that basically the counties paid for a portion of the grants. PACE actually is providing the services. It is an actual facility that is going to take them to the doctor. PACE will bring all those costs together as one.

Representative Kerzman: How is that going to affect the counties?

Brenda Weisz: I don't believe there is an impact to the counties eligibilities with Northland. They handle the managed care program. They will still determine the eligibility as they do today. As far as the administration, that is all handled by Northland.

Maggie Anderson: Because PACE is required to provide all Medicaid and Medicare services, that is a Medicaid service so they have to provide that. They sometimes are contracting with the county to provide that service. In some ways the counties are actually assisting in that service.

Representative Kreidt: The PACE program is something that private pay can participate in correct?

Maggie Anderson: That is the design of the program. Right now the PACE program in ND has a waiver from that. It has to do with the amount of reserves that they need to be able to document in order to insure because it is a managed care. They have a waiver on that right now. I am uncertain as to how they are going to move forward with that.

Representative Nelson: When we think of managed care, often times they get the tag that there are some deficiencies. I am wondering from a client base. Is there a slower movement

when there are more services required? Is your department involved in that process. What are you hearing from the clients and clients' families? Is it successful?

Maggie Anderson: I believe that we do have the safeguards in place. Not only if you are written appeals or people calling our office. Every one of the care plans for the individuals is reviewed by a nurse on our staff as well as our medical doctor who is under contract with us to make sure the appropriate cares are provided. I believe it all goes through our screening process too. These individuals need to meet nursing facility level of care. So based on what is identified in that we make sure that the care plan is following through with those needs. What I can tell you from the family members as well as the recipients to date is that they are very excited about the program. We have had a couple of little issues in regard to eligibility. Where we needed to work them out with recipient liability and some of those things with clients and the clients want to get in and don't want delays. They want immediate decisions.

Chairman Pollert: So PACE is a person on SPED but who is requiring Medicaid services to be enrolled in the PACE program. They are still accessing SPED?

Maggie Anderson: They are Medicaid eligible. They are at the point where they enroll in PACE. They become eligible for all the Medicaid and Medicare services. Those services look a lot like the SPED services. Only the people who are on SPED don't necessarily quality for Medicaid. It is more about individuals over the age of 55 who are Medicaid eligible and meet nursing home level of care.

Chairman Pollert: They are getting SPED equivalent services but because of the Medicaid wise it is further enhanced.

Maggie Anderson: They are receiving quite a bit more than what they would from SPED

Representative Metcalf: Northland PACE is basically limited to two communities, Bismarck and Dickinson. When will that be expanded across the state or will it not be?

Maggie Anderson: We have had no conversations. It is certainly a new thing that we implemented in August of 2008. They have discussed looking at the Garrison area. I know that when the PACE program has been discussed that the Medicaid medical advisory committee that there is a great interest. There is no additional areas of the state or expansions into other regions of the state that are included in our budget.

Representative Metcalf: What is the cost of PACE in comparison to the average cost of individual services. Is the cost higher or lower?

Maggie Anderson: When we do that breakdown for the detail of where we took the pace money from the different areas of the budget. This is the monthly amount that we are paying and how we pulled that from the other areas based on the dollars of services we were paying.

Representative Metcalf: If you would show me a comparison saying this would be higher or lower.

Maggie Anderson: We don't have enough claims data to show that pace is lower or higher because we implemented it in August and it takes awhile for the claims to get through the system but we will be able to tell you how we built the budget based on our current expenditures in those areas.

Chairman Pollert: On something like PACE, did we authorize a PACE creation program the last biennium?

Maggie Anderson: Not specifically. There was language in the 2005 HB 1459 that directed the department to review and consider and explore managed care. So this is not new money. It is the shifting of money to the other services and we have been working on a variety of conversations in the managed care area based on that 2005 HB 1459.

Chairman Pollert: So you have the authority to start new programs or whatever you want to say.

Maggie Anderson: Based on that we will continue to look at these managed care situations.

Representative Wieland: So who or what is Northland Pace?

Maggie Anderson: Northland is Northland Healthcare Alliance. They are an alliance of a variety of medical facilities across the state. It is a healthcare organization.

Representative Bellew: Would it be possible to get a copy of their budget? I would like to know how they are planning on spending it. I see what you guys are projecting but what are they projecting? You built a budget in conjunction with them I assume?

Maggie Anderson: We built the budget based on the actuary rates that we got back from our actuary contractor for the services. We certainly have the information from Northland about their projected expenditures on costs. Continued testimony.

Representative Kreidt: The attachment D in your testimony, if you would go back 50 years or so when I got into the business. My first job was a nursing home administrator. Our daily rate was $5 a day compared to $205 now. I began working and my first appointment was we needed an increase in our daily rate. It was a tough decision and we decided to go up 50 cents a day. I had to go around and see the residents and I thought the earth was going to come to an end because 50 cents a day was a lot.

Andrea Pena: Handout testimony (Attachment B)

Started a new job.

Linda Wright: Testimony handout (Attachment C)

Representative Ekstrom: I would like to see the service areas broken down into urban and rural. In other words how are we doing in getting these services out to the rural parts of the world and what kind of trend line there has been in terms of 2003-present. How has that trend changed and are we seeing a migration to the urban centers.

Linda Wright: We will be happy to provide that information. Continued testimony.

Representative Bellew: What would be the difference between the ADRC and the resource link?

Linda Wright: The resource link is manned by one person in our office that is certified. She answers the phone Monday through Friday office hours. She also provides basic information to folks when they call and ask for information. An ADRC would be additionally able to provide benefits counseling, assess eligibility for various programs, be able to link people to services one on one in a more direct way by meeting with individuals and families if possible. The resource link is kind of a little bit of a gateway but a small part.

Representative Nelson: What do you envision the need for ADRC? What kind of FTE or facility do you think will be needed to man that type of center?

Linda Wright: We envision that this would involve existing agencies by getting them together to agree to share information. It really has varied from state to state. I talked to by counterpart in Montana and he said that one of their most successful ADRC's was located in the shopping mall right across from a pharmacy. They had a lot of visibility in the mall and then various agencies would be accessible in that ADRC at various times. If you had a legal problem you would have a legal person there. If you wanted to know if you qualified for a county social service program you would have an eligibility person there at the ADRC. It's a way for people to go to one spot instead of having to go to many different agencies and organizations to determine what kind of services they might be eligible for.

Representative Nelson: So you are envisioning a contracting service with legal matters. It would be someone that would be accessible but wouldn't necessarily be spending the entire day at the center. Are you looking at location like Bismarck?

Linda Wright: What we are envisioning to begin with is a pilot site to see how well it works. It would have to be a site that has both an urban center and rural areas to serve. We want to see

that we are able to provide services to rural individuals as well as those who might live in an urban center.

Chairman Pollert: I struggle with the one stop center. The reason why I do is because you have social services out there providing services. Are you saying that eventually the one stop centers, if that's what is adopted, would you say the heck with services offered by Social Services. If we are going to put money into one place it should be taken from somewhere else otherwise you will continue to have the same overlap for the same information. How is that going to solve all the problems if we have a lack of information?

Linda Wright: I know the vision of the assistance secretary for aging is that there be an ADRC in every community. As I said, different states have implemented this in different ways. An ADRC is meant to serve all individuals that might need some information and need some type of long term care. County Social Services do a great job but in most cases they are serving a limited portion of the population. An ADRC is meant to serve not only individuals that would qualify for public assistance, but also individuals that are private pay. There would be a fee for those individuals to access the ADRC.

Representative Wieland: I was a County Commissioner for 20 years so I have a little background on what the services that they provide are. I am sorry to hear that anyone would feel that they would not be comfortable calling Social Services to get that information. They don't only serve people that feel they can't afford something but they serve anybody. You would have the same thing with an ADRC. At the ADRC they aren't going to be able to qualify an individual. They are going to have to make a referral. If you can refer it from one agency why not the other agency? I think we already have this type of thing in place.

Linda Wright: There are some counties that do serve other individuals but there are some that don't. There are some Social Service offices that only serve individuals that qualify for SPED

or expanded SPED. That is a choice they have made because of their limited resources. Probably more in some of the rural areas. The purpose of this is to get those folks together and then to be able to do the eligibility to be able to share an assessment documents. An individual that qualifies for services doesn't have to get the same information to five different agencies at five different times. Instead they can give their information once. From there they can determine if they are eligible for SPED or waivers. A variety of entities to come together. In 45 states this has been found to be a good model. It really assists people. An example would be when Maggie was up here providing testimony. The system is very complicated. The number of funding sources are very complicated. It really takes a lot for people to try to find out what services they can get that they need. We are trying to simplify that process.

Chairman Pollert: That is fully understandable but as far as legislators go, I look at it as there has to be a drop in FTE's somewhere else.

Linda Wright: That certainly has been true in other states. They found greater efficiencies and effectiveness. Instead of 5 people taking down information and determining of people are eligible for services there is one stop to do this. Eventually it resolves to greater efficiencies.

Chairman Pollert: Would you be able to forward us of what they've done to see if there has been savings?

Linda Wright: Yes. Continued testimony.

Chairman Pollert: Has every section of DHS seen rent increases?

Brenda Weisz: Actually for Facilities Management where we pay rent for the Judicial Wing, that is a slight decrease. I will have that in my detail. However, at Prairie Hills Plaza that was a 54 cent increase. Century Center there was no increase there.

Representative Nelson: Will you be giving us the cost per square foot for that rent?

Brenda Weisz: Yes when we present our detail. Do you want one that pulls it all together?

Linda Wright: Continued testimony.

Representative Nelson: Is this only for the training that takes place at Lake Region State College?

Linda Wright: They have trained 64 nurses statewide. If someone wants to be trained they can access a very local person to get the training and to have the documentation signed off.

Representative Nelson: So the Lake Region program trains the nurses and they train people in their local communities?

Linda Wright: That is correct. Continued testimony.

Chairman Pollert: When you say direct service providers, who are you talking about?

Linda Wright: The entities that we contract with that provide the services.

Chairman Pollert: So will the 7&7 go to the QSP's as well?

Linda Wright: Yes that is in the Medical Services budget. Continued testimony.

Representative Wieland: How many center would you be able to open with $600,000?

Linda Wright: We would start with one center as a pilot and see who that works and expand from there. It would be a request for proposals and it would depend on the interest that there is statewide. I understand that there are some rural counties that are interested in getting together to present a proposal if this is funded.

Chairman Pollert: You will set the criteria? Is this center depending on the population as to where it goes? Is it going to be three people there? So in essence you really aren't asking for FTE's but you are asking for FTE's.

Linda Wright: There would need to be someone to administer the program. There are no additional FTE's built into the $600,000.

Chairman Pollert: So that $600,000 will do what?

Linda Wright: It will provide the funding to establish the ADRC's to increase the licenses that we need for the data base and the assessment to fund some of the technology that would be required to do some of the assessments. I would be happy to provide the grant budget that was submitted that would give you a breakdown what was envisioned.

Chairman Pollert: At some point you are going to hire FTE's but it's not in this budget?

Linda Wright: That would be part of the RFP. So whatever agency would submit a proposal would most likely have staff.

Chairman Pollert: Are you looking at it as a private contractor is going to offer the RDC's?

Linda Wright: County Social Services could apply as well as a number of non profits.

Chairman Pollert: So you are saying that no state employee's would be hired for this.

Linda Wright: There are no FTE's included in the $600,000.

Representative Nelson: So the 600,000 that's in the general fund money in this budget, is it for a one year period in next biennium. How does it work in the scheme of 24 months?

Linda Wright: We would propose to roll out the request for proposals as soon as possible after the beginning of the new biennium.

Representative Nelson: In that regard, that $600,000 you would envision that they would have to operate on a $300,000 yearly budget at that point?

Linda Wright: I believe that would be correct. Continued testimony.

Started new job because recorder quit working.

Chairman Pollert:

Tara Lea Muhlhauser: Testimony Handout (Attachment D) 1:00-5:24

Representative Wieland: Out of the 4,011 assessments, how many of those resulted in some sort of arrest or removal of a child?

Tara Lea Muhlhauser: I don't have that number off the top of my hand. We just had some recent data that was published last week. It's hard for us to track criminal prosecutions because we are in between two systems of data that we keep and data that is kept between the State's Attorney's offices. I can tell you the number of situations that have emerged in a child removal and placement. Continued testimony.

Representative Wieland: Are these mostly being resettled in Fargo and Bismarck areas as before?

Tara Lea Muhlhauser: Bismarck has some, Fargo has the majority. I believe there is some resettlement in Grand Forks. It was high and had gone done but are starting it more. Continued testimony.

Chairman Pollert: How do most states qualify for the first time around when you have to have a model of someone? The program was set up by the federal government and no states. It seems incomprehensible that something like that could happen.

Tara Lea Muhlhauser: It's been a bit of a national trend. Child welfare leaders across the country have said to listen. It's important to know where the bar is and to have a high set of standards. If you set a bar that no one can reach, does that really help us maintain good quality in our service delivery programs? In the last review after 2001 we went around saying we are the best of the worst. We are at the top of the country but we failed like everyone else. This year we have some inkling that we aren't at the top. In other words we feel like we have a good child welfare system but we aren't meeting the bar that the federal government has set for the measurement of child welfare programs.

Chairman Pollert: I take it the program is not set up with input from the state governments and that someone in federal government is saying where we need to be without any input?

Tara Lea Muhlhauser: For the most part that is correct. We did have some input in a federal process. They did take comments from states and from lots of providers throughout the country. We did provide comment from ND. They considered our comments and took some of them but rejected many others. Continued testimony.

Representative Bellew: What is Title IV-E?

Tara Lea Muhlhauser: A portion of the Social Security Administration Act. It is used to name a large federal source of funding for children who are in foster care and many of our child welfare programs. It's our largest federal stream of funding for child welfare.

Continued testimony.

Chairman Pollert: The .5 FTE is that one position or is it temporary?

Tara Lea Muhlhauser: They are both permanent positions. We anticipate that we will need them after this additional bubble of providers flows through. The administrative assistance position will be to coordinate the passing of paper and some of the duties that go with that. The .5 program administrator position will be to supervise the work of our background check staff. One of the things that we learned in the last two years is that it takes us a fair bit of time by professional personal to sort through the number of hits or the negative feedback we get from the FBI checks. It takes a lot of discretion for this person to sort through the hits and determine whether they are offenses that should keep someone out of the category or whether we can look to indications of rehabilitation. There is lots of sorting and discretionary work to see if they have met the standards of rehabilitation. Continued testimony.

Representative Kerzman: Why would therapeutic foster care be cheaper than regular foster care? It seems like it would be the opposite to me.

Tara Lea Muhlhauser: When I was working with our fiscal analyst I asked the same thing because I didn't understand how they separated these rates. That is actually a partial rate.

That is only a portion of the rate. As I understand it, the $553 would be added to that for providing therapies. That is only a portion of the rate that you see here under $1,011 a month. It's actually a higher cost than family foster care would be. If you want us to break that down in another way for you I can do that.

JoeAnne Hoesel: Testimony Handout (Attachment E).

Chairman Pollert: The $300,000 for gambling, has anybody ever talked about why it doesn't come out of the Attorney General's revenues for the lottery? There is $400,000 that comes from the Attorney General's office. I don't know if that was part of the deal structure when it was all done. I know we were asked last session by a group to fund the compulsive gambling. I told them politely to get it out of the Attorney General's budget. Now I see it is coming back to here again. Has there been discussions about this in this biennium?

Brenda Weisz: When the lottery was put into place, there was designated in the ND Century Code that there is $400,000 that goes for addiction services each biennium. That $400,000 remains and stays in statute. Whatever is not used for the lottery fund that is not designated for a specific service goes to the state's general fund and used to fund budgets? This additional $300,000 to help with treatment services is from the general fund. So indirectly it's the same thing. You either change statute or you just take it out of the general fund. There are $700,000 of addiction treatment services here for that gambling addiction. That is why the addiction is in our budget. This way there is not a statute change but there is an increase in services.

Representative Nelson: Wasn't there some gambling addiction money that was part of the gaming compact with the tribes as well? Is that ongoing or what is the status of that?

Roxanne Woeste: It does seem to me that the Budget and Finance committee this interim did receive some information testimony from the ND Mental Health Association regarding some

money that the tribes are putting forth. I will see if I can locate that testimony and give it to the committee.

JoeAnne Hoesel: Continued testimony.

Chairman Pollert: Back on page 6, if I look at that budget and see the increase of $255,000 over your previous budget which is a 2% increase, I just figured I'd say that. The total DHS budget is 21.5% and this is 2%. It is a 4.4% increase in general funds. Another other questions for JoeAnne? We will be adjourned until 2:30.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. 1012

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/13/09

Recorder Job Number: 6940

Committee Clerk Signature

Minutes:

Chairman Pollert: Called the meeting to order. Before we get started on disability services we have some info from legislative council on compulsive gambling.

Roxanne Woeste: Handouts from L.C pertaining to Compulsive Gambling Treatment (Attachment A)

JoeAnne Hoesel: Testimony Handout (Attachment B)

Representative Kerzman: Going back to page 3 when you talk about the portion of our population that we serve per capita based against the national numbers. Do we have more people with problems than the national average? Or are we just taking care of them better?

JoeAnne Hoesel: I'm certainly not going to say that ND has a higher incidence. I do know that how we license certainly has an impact on how the numbers play out. An example is in the first bullet they are talking about residential settings. Residential settings are considered RCFMR's. We have many RCFMR's in ND compared to other surrounding states. Our RCMFR's are small numbers so they are counted as institutions. You really couldn't tell. If you and I were to go tour an RCFMR or a waiver group home, we probably couldn't tell the difference. They are licensed differently and are counted as institutions. So much of it has to do with how the system evolved over time.

Representative Kerzman: If our population ratio is basically the same as the national, how are other states addressing that population? How are they caring for them? Is most of it done in home?

JoeAnne Hoesel: Certainly there is a national trend to serve people in their homes. The self directed supports, in which we have two waivers, is certainly becoming increasingly popular, as are individual service specialized living arrangements (ISLA), which is where individuals can live in their own apartment. So it's really trying to normalize as much as possible. It is certainly prompting our transition initiative from these developmental centers as well.

Representative Wieland: You make reference on page 6 to $87,000 total funds to fund the governor's salary package. The general fund portion is about 50%. The next line, the cost to continue the 4% salary is $49,827, which all most all of it is general fund. Is there a change in policy regarding the amount of federal funds that is coming into that portion?

Brenda Weisz: What that is interpreted to is when we build our budget there is only so much federal fund available for the funding. Block grants are closed end funding sources. We use as much as we can from the federal funds when those run out than any other part of the increases have to go straight to general fund.

Representative Wieland: The other question I have is on page 8. Maybe it's the same answer. The grants resulted in a net decrease of $352,000 in which $95,000 is an increase in general funds. Is that the same thing?

Brenda Weisz: It's close to the same. Depending on what the services are, they are covered by different granting sources. The $95,000 increase that you are seeing on the grant side is attributed primarily to the last bullet on page 9. Those services are 100% general fund so we have an increase of $97,000 for that 100% general funded service. So when you pull it into the

big change in grants they contribute to 95%. If we would have not had that increase in the last bullet then we would have had a reduction in our general fund actually.

Chairman Pollert : The developmental center transition, is Alex going to talk about what was budgeted last biennium?

JoeAnne Hoesel: Yes, he is the chairperson of that committee.

Nancy McKenzie: Testimony Handout (Attachment C)

Chairman Pollert: What do you mean by that?

Nancy McKenzie: One of the things we have that I will be able to show you in detail is a number of positions. In DDS we had a number that the federal government asked to be reclassified so that adds some costs. It's the ups and downs of salary changes.

Chairman Pollert: Are we going to be getting a vacant FTE listing.

Nancy McKenzie: Yes. Continued testimony

Chairman Pollert: When you did your budget for this biennium were you figuring gasoline in $4.25 a gallon where it was a year ago, or were you figuring where we are at today. They could fluctuate greatly. Or is it a state fleet number that you are using?

Brenda Weisz: When we use motor pool for the state fleet, we use what motor pool has told us to budget at. Specifically now, when we budget for our travel and there is instances where there is times that we pay, where there is not a state fleet that is able to be used, we would go with what the Century Code would dictate and build what is at the Century Code at that time. If there were changes in the Century Code they wouldn't get in our budget until next cycle. We travel predominately through motor pool.

Nancy McKenzie: Because this particular travel relates mostly to required federal meetings reflects the increase we are seeing in airline rates as well as hotels, food, those kinds of things as well.

Chairman Pollert: How much of your time is spent on federal regulations and not getting actually service to the clients?

Nancy McKenzie: That is going to vary by programs and so forth. I don't think it's been looked at that way.

Brenda Weisz: Predominantly the reason that central office does exist is to carry out and enforce policy.

Chairman Pollert: If anything that is very frustrating for me when I was on the board at the hospital at Carrington. They must have had four or five different audits a year. They had staff hired just to take care of their internal audits. Then you would have the federal people come in.

Brenda Weisz: We have an increasing amount of audits done by CMS or other entities. On top of that we have the state auditors in all the time. We actually have to set up a room specifically for the state auditors because they are there so often.

Nancy McKenzie: Continued testimony

Chairman Pollert: Of the $800,000 increase that relates to the governor's budget increase for independent living services, then you go in to remain living in their homes. I thought that is why we had home and community based services?

Nancy McKenzie: We have both. They are providing different types of services. The folks in the centers for independent living who have testified before you are actively working on the transition.

Chairman Pollert: This is more with what you are working with?

Nancy McKenzie: This allows them to go further into the state than they have been able to date and to rural areas. That concludes my testimony.

Nancy McKenzie: Testimony Handout (Attachment D) 40:46-43:07

Representative Ekstrom: During the last biennium when we reviewed this budget, there was tremendous number of these individuals who had previously been incarcerated or coming in and out of incarceration. Is that trend still true? Are the vast majority of these folk's people who have been in the prison system.

Nancy McKenzie: That has stayed pretty steady to maybe slightly increasing. We continue to collaborate with the department of corrections to be sure that individuals living in the community on probation and parole are getting substance abuse services that will hopefully help prevent reoffending behaviors.

Nancy McKenzie: Continued testimony.

Representative Bellew: Do the Human Service centers go into the schools? Are these kids referred to you?

Nancy McKenzie: We do both. There are therapists and addiction counselors that sometimes work with an in school program that might be in place and actually go to the school. Kids are referred from the schools to our clinics. We see a lot of youth in our outreach rural communities for services. Continued testimony.

Representative Nelson: On the previous bullet point the salary changes to meet critical market shortages, is that in addition to the equity pool?

Nancy McKenzie: Yes it would be in addition to the equity pool.

Representative Nelson: You have intentions of accessing the equity pool in your division as well for Human Service centers?

Nancy McKenzie: Yes. This would refer primarily to some of those individual situations in which we might need to do a group salary increase for retention of people in positions.

Brenda Weisz: What that relates to is that we did have some issues with addition counselors in the past or psychologists. So what we will do is take a look at our ability to recruit and what we would be able to do to retain like bumping up salaries.

Representative Nelson: Would there be a situation where this same group might have to access the equity pool to get them to where you want them to be.

Brenda Weisz: That is what has been happening over the years. The equity pool will give agencies more flexibility with the way they appropriated the money this time. It took a look at where everybody sat in their pay range and how many years of service they had and where they fell within the quartile. What we have trouble with is competing with the private vendors. Although they might have been entitled to a $50 a month equity increase based on the quartile evaluation, we still cannot retain them in light of the competition with the private. That is where you would have a situation where they might have been entitled to equity of $50-100 a month. However, they could still go to the next provider in order to retain and serve our clients.

Representative Nelson: Would this be mostly like the situations where there are less ten year employees or is that not an issue?

Brenda Weisz: Not necessarily. We have got it all the way across the board.

Chairman Pollert: The increase in FTE's in Fargo at the Cooper House, is that part of the global health initiative that Alex is going to explain?

Nancy McKenzie: I should have explained that, yes. Of the 11 FTE increase in this package, five are part of that global health initiative. The other six are the bullet that talks about six FTE's mainly for capacity issues. Continued Testimony.

Chairman Pollert: When I'm looking under the bullet point that provides for young adult transitional and residential services, isn't there a bill laying out there about youth transitional programs? I take it that is a double up of this or is it separate?

Nancy McKenzie: This is strictly to provide eight beds in the Fargo region and eight beds in the Bismarck region for transitional youth and is separate from that particular bill.

Chairman Pollert: Do you know what bill that is?

Brenda Weisz: HB 1044 that deals with youth at risk.

Chairman Pollert: So youth at large is different than youth in transitional residential services. There is eight in Fargo and eight in Bismarck?

Nancy McKenzie: Yes

Chairman Pollert: When you talked about the psychology and psychiatry, are you privately contracting costing you more money?

Nancy McKenzie: We do whatever we have to do to make ends meet in that we have some private contracts that typically cost more than having our own employees. We have utilized some of our own staff who have retired but are willing to work part time on an hourly basis that will do some of that stuff for us. That doesn't allow us to necessarily provide the full range of psychology services but we do contract services where we need to.

Alex Schweitzer: Testimony handout (Attachment E)

Chairman Pollert: So when you are saying 307 beds you are talking the 90 beds for TRCC and 132 beds for inpatient residential and is that also included in the 85 beds for sex offenders?

Alex Schweitzer: That is correct. Testimony continued.

Representative Nelson: Your nursing staff is only 85%? How do deal with that problem?

Alex Schweitzer: The 85% worked well when we had lower occupancy. It's one of the reasons why we are asking for additional staff in this current budget, because we see an increase of occupancy. When we were down at lower levels we could manage it.

Representative Nelson: So the situation where you are at now then, where you are at the higher occupancy and you don't have the staff, are you doing it with contracted services? How do you meet the demands of the requirements?

Alex Schweitzer: We meet the requirements by staff pitching in from other departments and assisting with patients as needed. Overtime is used. We utilize a variety of creative ways to deal with patients where other departments can assist. The real issue is 85% nursing because our occupancy is a lot higher than that. Continued testimony.

Chairman Pollert: With the 85 beds, and you are currently using 60, do you see the other 25 beds getting occupied. Do you have the 17 FTE's for the additional beds on hand right now?

Alex Schweitzer: Yes we do. It's hard to tell what is going to happen in terms of occupancy. Another thing about the fourth unit is when we only had three units we were over crowded. Part of the issue with dealing with the sexually dangerous population is that there is a core group of patients that have created some real problems with us in terms of violent behavior and creating issues. To mix them with the people who are actively engaged in treatment can create some real problems. Two things about having a fourth unit is it prevents the overcrowding and helped us manage the population. Secondly we believe we have enough beds for new admissions.

Chairman Pollert: If you don't fill the 85 beds in the sex offender unit, but yet you are filled to capacity on the residential beds. If you have the FTE's for the 20 but you aren't using them, why couldn't they be used for the FTE's you need for the global health?

Alex Schweitzer: It's always a possibility in terms of looking at staffing. We certainly could not house traditional people in the sex offending unit but we could certainly look at staffing.

Representative Kreidt: Going back to the one bullet of transferring 16 seriously mentally ill to the Cheyenne Care Center, is that a special unit or do they fall under a case mix?

Alex Schweitzer: Yes. They have about 32 people there in the special unit and they have a special rate. It has been established by state law that it is a general psych unit. They require admissions to the unit have to be approved by the state hospital. Take into consideration that they have some issues along with ADL efficiencies and medical issues. Continued testimony.

Representative Wieland: That was approximately $3 million. The other part of the question is that we expect that as a turn back?

Alex: Yes, it is part of the turn back and $3.1 million.

Chairman Pollert: Didn't we use some of the money to fund the electrical phase in?

Alex Schweitzer: Yes that is correct. They approved some of the dollars for our capital needs. Some of it went back in the turn back. Continued testimony.

Chairman Pollert: Is that $3.2 million general funds?

Alex Schweitzer: Yes it is. Continued testimony.

Chairman Pollert: What we really should be doing is taking what you got from secure services which is decreases and doing them to the traditional services to find out what your total budget is as far as an increase.

Alex Schweitzer: We can provide that for you in detail. You are looking for an overall decrease for the state hospital?

Chairman Pollert: If that's what it is because your decrease in general funds is $3.96 in secured services and your general fund increase on traditional service is $3.6 because it is a net drop in general funds for the state hospital.

Alex Schweitzer: There is also a decrease overall if you combine the two budgets. Continued testimony.

Chairman Pollert: Your goal is to be 115, and your goal by 2011 is 67? I see you have 445 FTE's, are you going to need 445 coming if you get to 80 people?

Alex Schweitzer: Certainly the FTE"s would drop if we started reaching some of these milestones. Continued testimony.

Representative Nelson: You said that the executive recommendation was for bed count of 115.

Alex Schweitzer: That is correct.

Representative Nelson: If you get to 67 by the end of the biennium what happens?

Alex Schweitzer: We are looking at the end of the 2011 biennium. We will need the two year period to do that transition.

Representative Nelson: But by the end of the 09-11 biennium you will be at a lower number than 115 in all likelihood.

Alex Schweitzer: Yes. The goal is 67 it may fall in a little higher. It is a goal and we have to look at certain things. We are certainly trying to transition to that number.

Representative Nelson: As the population ramps down the 115 number is built in with staffing?

Alex Schweitzer: That is correct.

Chairman Pollert: My personal opinion is that there is no way you are going to get down until 0.

Alex Schweitzer: There are individuals that would not agree with that but there is a certain number of individuals that agree you need the center.

Chairman Pollert: As far as in the current budget, if you are looking at discharging and going down from the 115, is that in the current budget or in the 09-11 budget that we are looking at now?

Brenda Weisz: Yes in our DD grants program, even with our utilization being where it is, we are half built in our budget to move nine clients in the first year and eight in the second year for a total of 17. That is included in the executive budget.

Alex Schweitzer: Continued testimony.

Chairman Pollert: Any questions for Alex on the developmental center? Since we finished this section we will not be meeting tomorrow morning. We will be in at 2:30 unless I call an earlier time from the floor. If not we are adjourned.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. 1012

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/15/09

Recorder Job Number: 7077

Committee Clerk Signature

Minutes:

Chairman Pollert: Opened meeting. Took roll call and every member present.

Brenda Weisz: First of all you had asked for a few things that are more overview in nature not specific to administration and support and I will hand those out (Handout A). What the quarterly budget is, is a snapshot in time. It's just to tell you where we are at as of that date. It's the basis on how we build our budget and that is how it will be helpful to you. We are using this data to go forward to build 09-11 budget. It's a snapshot not a projection tool. It has some of the major grant programs. We covered this during the interim Human Services committee to take a look at where we are at with grants in various areas. As we go through the divisions the areas are covered during this. You had also asked for a breakdown of salary underfunding (Attachment B) and one time funding (Attachment C) with both general and federal funds. The first one I will go through is the salary underfunding. The areas where there was under funding on the salary line was in the management area of our bill which includes administration and support. It also includes program and policy. $200,000 for management that was split between administration support and ITS and program and policy that was split among economic assistance, child support, Medicaid, Aging, Mental Health, Vocational Rehab, and Developmental Disability. Then in the State Hospital and Developmental Center, they came in

with a budget that included the salary underfund already. Those numbers are also before you.

Continued testimony.

Chairman Pollert: That was an amendment put on the bill right?

Brenda Weisz: That is correct. Continued testimony.

Chairman Pollert: Does this further our discussion from yesterday?

Roxanne Woeste: I don't think this complicated that any.

Brenda Weisz: I did a worksheet of the cost to continue for the second year. (Attachment D). Continued on one time funding testimony.

Chairman Pollert: All this one time funding was achieved in the 07-09 biennium?

Brenda Weisz: MMIS, we will have a delay in that project. What we foresee happening is at the end of the biennium the ND Century Code allows that to be carried over what is unspent there. Sex offender treatment, Addition will not be carried over. We are going to spend $1.75 million and turn back the rest. We are right on schedule with everything else and we will expand the vast majority of it. Whatever will not be expanded will be returned. We will start the cost to continue. (Attachment D testimony)

Representative Wieland: What you have is fully understandable. The problem that I have is that the second year increase should be for 24 months. Why is that?

Brenda Weisz: Maybe we need to say is that the salary you are going to pay with 4 & 4 has to be paid for 24 months. If you look at the attachment I only paid my employee $1,082 for 12 months last biennium. I'm not going to drop their pay. I'm going to continue to pay them at the ending amount which includes both 4%. That is why you have a cost to continue.

Representative Wieland: You are already starting with that amount in there. When you add the second increase in there you already have it built in to the cost for the previous 12 months.

You are starting with the salary where you have the first and second 4%. It's already in there and now you are going to add another 4% before you add the next years.

Brenda Weisz: What you see in the shaded blocks is what you appropriated me. When you look at what it is actually going to cost to pay that second year salary for 24 months is what it costs me. Starting out in 09-11, I don't start out with those funds. It's the same with the provider increase when you give them the same. That is why there is always a concern of sustainability.

Representative Ekstrom: The first year you are paid $1,040 a month because you got the first 4%. You didn't get 8%, you got 4%. The second year you get the second 4% that raises your base. To fully fund that for 2 years which is a total of an 8%% increase, you've got to have a cost to continue. You have to have that first year. Now you are in a new biennium for 24 months at the full rate at $1,082. They take the $42 difference between $1,040 and $1,082 and apply it to two years.

Representative Wieland: If it is what it is we are going to have to live with it. I'm a math major in college. We are doubling up. We are talking about an appropriation as oppose to what the actual cost is. I understand that it is a difference. I don't understand why you wouldn't have appropriated. If there is going to be raises the following biennium would already be in there.

Lori Laschkewitsch: When you build in the 5&5 you are going to put the July 1, 2009 5% in for the full 24 months. You aren't going to appropriate enough for a full 2 years for that second 5% because then the agency would have all that extra money left over in the current biennium. In 2010 you only have 10 months to pay that 5%. Which in fact now that person's salary has gone up 5% twice. Their salary that they are going to start this next biennium with has to be sustained for 24 months. Because of the fact that you didn't give them the second increase until halfway through the biennium, you only had to appropriate half of the money. They didn't

have that second 5% that they have next biennium for 24 months. They only had it for 12 months so you are still short 12 months of salary money for just that 5% piece. I think that is what Brenda is showing on here. You really only need 24 months for one 5%. If you think of a biennium in the context of maybe 4 years,

Representative Wieland: Did we do this in the last biennium as well. Did we show it that way.

Lori Laschkewitsch: We have come in and tried to provide all this information to you for several bienniums. It is very confusing. If we don't give the agencies cost to continue, they have to try to absorb 12 months of salary increase for their staff. Agencies don't have that kind of extra money in their budget. So we have to give them the cost to continue or they'd have to go back and cut everybody's salaries back 5% for one year.

Representative Wieland: So you are saying that if we were to add into their appropriation this difference, the agency would have extra money and they would feel they would have to spend this somewhere else.

Lori Laschkewitsch : Well if you gave that to them at the beginning to eh biennium and funded them for two years on that second 5% increase, they would have 12 months of extra salary increase. There would be money that you have appropriated out there that would just be sitting in agency budgets and wouldn't have any purpose.

Representative Wieland: But they are going to spend it.

Lori Laschkewitsch: Not until the following biennium. You have given them enough money for this current biennium. The salary increase that agencies got on July 1 of 2008, they are only paying out of their budget for one year. Then the new biennium starts. That is when we come back and say they need to sustain that increase. We have to give them extra money in their budget because you only have that funded for half of a biennium.

Representative Nelson: Rather than doing a 4&4, but if we would give an increase between 6&7, would that eliminate the need for this process?

Lori Laschkewitsch: If you gave them a 7% on July 1 at the beginning of the biennium. There would be no cost to continue.

Representative Nelson: Why don't we do that instead?

Lori Laschkewitsch: That is up to you.

Chairman Pollert: I can see both sides of this argument, I really can. When it spelled out like this it does make a lot more sense. I

Brenda Weisz: Handout testimony (Attachment E) 25:01-27:14

Representative Bellew: Would you tell us what general funds are?

Brenda Weisz: It is on page 2 of my overview testimony, its $3,455,888 million. Every bullet breaks out how much is the Governor's salary package of 5&5 and how much is general funds. Continued testimony.

Chairman Pollert: The equity in the Governor's budget is based off of merit? Has the DHS decided how they are doing that? Is it agency wide? Have those decisions been made yet?

Lori Laschkewitsch: The equity is put in the budget so they need to look at merit as well as longevity and where their employees are falling in their years of service. It wasn't done as an across the board thing because they have other things to take into consideration.

Chairman Pollert: When we heard P&A and they had the 5&5 in there, when they did the equity it came out to just a hair under $3,200 for every employee. Besides the 5&5 and fringe benefits. That sounded a little high to me but I don't know how the formula is going to work.

Lori Laschkewitsch: There were some agencies that we found have not had much turnover in the past years. They have a significant amount of long term employees. They have not had any money to give increases so they have people who have been there 20 years and they

haven't made it to the midpoint. You will see some agencies that have long term employees. If you do the math across the board it may look like a significant increase.

Chairman Pollert: I see where P&A's budget had some longevity in theirs and their turnover was high.

Representative Bellew: On our green sheet it says our equity funding and general fund is $3458. Your testimony says your general funding is $3445. There is a $14,000 difference there.

Brenda Weisz: You will have to ask Roxanne. We provide information but we don't get it back to compare.

Chairman Pollert: So the salary budget adjustment on your detail is a 4.77. The salary increase down below is a 5&5. So the equity you are seeing is the salary budget adjustment. The 5&5 would be the salary adjustment.

Lori Laschkewitsch: The salary budget adjustment, the 5&5 is down in the salary benefit increase. The equity increase is up at the salary budget adjustment.

Brenda Weisz: The equity is 4755. The health insurance increase is going to be covered in the fringe benefit. That 755, 535 number includes the 5&5 plus the second year 5&5 in the equity money. They also provided the 5&5 on the equity. Your benefit increase is the FICA and retirement associated with the increases to employee salaries. The insurance is in one spot and benefit increase is your FICA and retirement on that salary increase.

Chairman Pollert: As an example, if we would look at the $287,264, does that equate out?

Representative Bellew: If my figures are right that is about a 13.8% increase for fringe benefits.

Chairman Pollert: That would actually be a little lower.

Lori Laschkewitsch: Part of the percentage that might not come out perfectly is the fact that workers comp benefits rates increase for some positions and decreased for some positions. In the Human Services budget it was a net decrease for the workers comp rates. That netted out of there as well. FICA increased the actual limits. You can't just do the whole percentage.

Chairman Pollert: I'm just trying to get it so we know this is how every salary and wage is going to be lined up and in there.

Brenda Weisz: The budgeting system actually is calculated by each individual agency. They provide the number to us through bars and that is how we get the number and know where it goes. Continued testimony.

Representative Wieland: Is that position funded?

Brenda Weisz: No it's not. The only thing about that position is when it is in the BARS System the increase does get thrown into that FTE because it is an FTE that exists out there. The increase of the fringe and stuff does get thrown onto that which we don't use. That is just the way the system works. Continued testimony.

Chairman Pollert: When we get the vacant FTE report can you go through that section wise?

Brenda: Yes. Continued testimony 39:49-40:32

Representative Kerzman: Can you explain the need for all the attorneys and the Attorney General increase? Are we doubling up here?

Brenda Weisz: The need for the three attorneys is because of the magnitude of programs and amount of administrative rules and appeals that come in. The work that we need to do from a legal standpoint is what the attorney work is fore. Also we have to administer the risk management component for our department. Legal advisory handles that piece of the component as well. They also take on handling the workers comp reporting. They also oversee our contracts and the approving of our contracts. With the change in the law, it has added quite

a bit of time to our service for reviewing request for proposals or RFP's. There is a huge amount of legal work. The individuals in the legal advisory unit cannot offer advice on things in the department. That is where the AG's office comes in. They are the attorney for us for opinion expressing and working with the actual advice. We do need to work hand in hand with them.

Representative Kerzman: Do you have an HR person that works with the attorneys on that or do they handle that themselves?

Brenda Weisz: Your incident reporting and all that gets handled down in the legal advisory unit and we work with them and the risk management pool of Office of Management and Budget.

Chairman Pollert: How many attorneys' are in the P&A FTE listing?

Brenda: Continued testimony.

Chairman Pollert: So I take it that they have a point to coming somewhere else?

Brenda Weisz: No they are just staffed.

Chairman Pollert: When is the breakdown just for my knowledge as far as benefits goes?

Brenda Weisz: .5

Lori Laschkewitsch: P&A has 4 attorneys.

Representative Kerzman: What do those numbers correlate to at the top?

Brenda Weisz: They are an internal tracking mechanism. The far right is pay grade. One is the class and location. I don't know what the middle one is.

Chairman Pollert: I would think we are going to want a detail on P&A and their four attorneys's compared to the size of DHS three attorneys. I'm just asking for the comparison. The reason I'm asking is that the DHS is a little bigger then P&A. I still want to see something on that.

Brenda Weisz: On your left is your class code. The middle is your position number and how we track it on our internal system, and then the People Soft number which is tracked in BARS. Our People Soft system is our other payroll number. Continued testimony.

Representative Wieland: Can we get a list of pay grades and what the pay grade ranges are and what the classifications are?

Brenda Weisz: HRMS actually has it in a page 4 document. Do you want full copies for the whole committee? Continued testimony.

Representative Kerzman: Can you give us a ball park figure on how many grants were late because you don't have the personnel to finish them.

Brenda Weisz: I don't know. I don't even have the time to go look myself to find out what we are missing. Continued testimony.

Chairman Pollert: We talked about attorneys; do you have auditors in your division?

Brenda Weisz: We do have one individual who works on the contracts. When we pass money out the door we are required to do. We do have an individual devoted to that ask. What has happened is the statement of auditing has been issued. I think you are going to see it across agencies where there is a requirement for state agencies to step up their review and analysis of internal control. We do a fair chunk of that right now based on the auditing standards require.

Chairman Pollert: How often on the biennium do you have the state auditor's office in your office?

Brenda Weisz: We have an office that is designated for them. They are there very often. Out of the 12 month period they are there 2-3 months.

Chairman Pollert: You are saying on a biennium they are there 75-80% of the time going over your agency.

Brenda Weisz: Correct. They do three kinds of audits. They do what is known as an agency audit every two years. They look at internal controls and processes. Every year they do what's called a * audit. The state issues financial statements every year. They are in evaluating and reviewing the larger transactions. Every two years they complete a single audit of all the federal programs.

Chairman Pollert: And these are all requirements by either federal or state law?

Brenda Weisz: That is correct. If they so choose we might be subject to a performance audit depending on the wishes of the committee which would be additional auditing that would occur.

Chairman Pollert: How many people do you have FTE wise that you have employed to deal with audits?

Brenda Weisz: We don't have the ability to add staff. Deb McDermott spends a great deal of time with them. A lot of our accountants will work with them when they have transaction questions and they spend quite a bit of time with our program individuals as well. They utilize or need to access all sorts of our staff. Then there are federal audits that occur as well.

Brenda Weisz: Continued testimony.

Chairman Pollert: On travel if you are at $175,000 and that is one year of the biennium so are you saying that the travel comes to $350,000. You are going to have an additional $100,000 in the second year of the biennium of the 07-09 budget. You are doing that and asking for another $70,000 increase?

Brenda Weisz: Some of the travel that we had budgeted in some of the areas didn't occur because of staff turnover. This is the first time we are fully staffed. Some of our employees that travel for some of their federal programs or oversight actually end up being on the board. Their

travel would then be covered at times by the board. For those reasons, that is why our travel is down.

Representative Ekstrom: If it is possible, as you are referring to line items on our spreadsheet, if you would refer back to the page number of your general testimony. That would help us keep up.

Brenda Weisz: The travel bullet is on page 4. It is the third bullet from the last. Continued testimony.

Representative Ekstrom: How did they arrive at the 9&9 as far as an increase?

Lori Laschkewitsch: What they looked at is what they were told by suppliers and what they accumulated all of that into that.

Brenda Weisz: Continued testimony.

Representative Wieland: You said that you have one accountant that is in an office building by themselves?

Brenda Weisz: We rent space at Prairie Hills Plaza. I also locate one accountant within all of that space. Continued testimony.

Representative Bellew: You have indirect costs reimbursement of operating. Are they federal or what are those funds? Are they federal or what are they?

Brenda Weisz: What they would be is federal funds. They are all federal open ended funding services we are able to access to pull down federal funds for the cost. For other funds if they would include other funding sources that would be allocated that would be available. An example would be the collection money or incentive money.

Brenda Weisz: Continued testimony.

Chairman Pollert: Can you give me a general overview why in 05-07 we would have been $135,000 and we budgeted $192,000. That is almost an 80-90% increase. I know you are going through that. Is there a general reason why everyone wants to raise their fees?

Brenda Weisz: No. A part of that would be due to an increase in administrative reviews that we need to do that are required by federal regulations. Also, I added additional staff last biennium. We centralized those billings clerks so I have some expenses operating services that exist because of that. It would also be the timing. If you look at the total for this request, the indirect cost reimbursement is the majority. That increase didn't exist in 05-07. That would explain the major increase.

Chairman Pollert: From the Attorney General's Office? I will be talking to Government Ops as far as the total general.

Brenda Weisz: Continued testimony.

Chairman Pollert: Office of the State Auditor, can you go over that again?

Brenda Weisz: You had asked previously how often the State Auditor's are in. We do get billed for their services. We do consult with them as far as what additional and how much they think they will be working with us. That equates to time billed. They did give us an estimate. We estimated that there would be an increase in their fees of another $55,752.

Chairman Pollert: That is $55,000 over the last biennium? What is that percentage? Is it a $55,000 increase?

Representative Ekstrom: Was the equity pool also included when you were building this budget? In other words, Auditor's office is also going to get an equity pool?

Brenda Weisz: I would imagine the rates that the built. When they set out their rates they do take in account the increases their staff have received. They would not have been able to anticipate the equity pool though. They set their rates earlier than June. They put out on the

web what rates to include in y our budget in April. They would not have any indication of the equity pool. I'm not sure if they do any sort of estimates. They take into account their actual expenses and the increases they received during the current biennium.

Brenda Weisz: Continued testimony 14:36-15:03

Representative Bellew: Last biennium we budgeted $1.82 million to our agency, but when you gave us your current budget it is $1.9. Could you refresh my memory on those? It's like a $15 million dollar difference.

Brenda Weisz: When we came out of the session it wasn't $1.9 million. Added to that, we had all the other bills in it. When you add that you add the equity that Office of Management and Budget added in a separate bill and you also add the construction carry over. That is how you get to your $1.9 million.

Carol Olson: I have a comment on the grant writer for the department. We don't have a grant writer in this agency. There are a number of state agencies that do have not only one but two or three grant writers. What we currently do right is have a process within the agency that when a grant becomes available, we actually meet to review whether or not this is something we want to go forward with and whether or not it takes emergency commission action. That is a determining factor of whether or not we apply for that grant or not. Then we look to see if it needs technology involvement and so on. We weigh whether or not we have the internal resources to put in place to apply for this grant. They are very time consuming and take a lot of effort and energy. You have to have a lot of passion when you decide to go after a grant. The ones that we do apply for, we have to be very committed. As you know in the ones that Brenda mentioned this morning, the ones we have let pass us by, have been grants that would have been very beneficial to the agency and the state because of the federal funds that now are becoming tighter. We can enhance some of our services and programs to the people without

drawing down federal funds. There is a benefit in going after grants. What we do know when we decide to go after grants is we use our existing staff. One in particular that has been involved in the grants we have gone after has been Heather Steffle (sp) who is our public information specialist. She has a full time job. She has become kind of a focal point for our grant writing. She does this over and above her full time job. There are other employees and staff in our department that do so. What it requires is a great deal of extra effort and hours past 5. I kind of would like to emphasize the importance of having a grant writer for the department. It will pay for itself and then some. We have never asked for one before. We have thought about it but have never come forward to put one in our budget. This is kind of enough is enough. We really do need one. It's time that we do take advantage of some of the grants that are out there that would help in so many areas. DHS deals with the services that deal with the amount of numbers, the population that is coming out of the state penitentiary, coming into the population. They do anything that helps with providing services and treatment for that population. That alone would be very helpful. There are many other areas that we could benefit from going after some of the grants. I just wanted to give a little extra push.

Chairman Pollert: So noted. Roxanne, under our green sheets we have the request for that FTE. Where is that bullet at? Is it part of Management I?

Roxanne Woeste: I don't show a new .5 FTE in this area. All I saw in the budget documents was that one position for the other. Perhaps it is an existing .5 position that is vacant and un-funded so they need this funding added to the budget for this intended purpose. I would have to ask the Department for a little clarification.

Brenda Weisz: What it is a current FTE that exists in the department that is realigned with the executive office to perform that function? Andrea Pena was before you to talk to you about the fact that she operates under one FTE. In her area last legislative session she had 1.4 FTE. We

combined that. The individual that was doing service was doing service for the VR area and the DD Counsel area. That .4 FTE is devoting all their time. VR had a .5 retirement. We realigned that .5 to the executive office. We'd rather dedicate that instead of the administrative work in VR. So it's not highlighted on the green sheet.

Chairman Pollert: You do have the 1 FTE for the statement of audit standards. That is one FTE. For some reason I was thinking it was .5 for the grant writer and .5 for the standard audits.

Brenda Weisz: No, and they are two separate bullets in the testimony.

Representative Wieland: Are we going to be asking for a list of vacant FTE's and those that are funded and not funded?

Brenda Weisz: A vacancy FTE report will have what funding is associated with that FTE that is correct.

Representative Kreidt; Going back to the grant writing, have you ever sat down and calculated out dollars lost by not being able to go about and pursue these grants?

Brenda Weisz: I don't have time. Nobody has. We are so busy doing everything else.

Representative Kreidt: It would be interesting to see the dollars lost by the state of ND.

Chairman Pollert: Any other questions? We will stand in recess for 10 minutes.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. 1012 – Information Technology Detail

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/15/09

Recorder Job Number: 7078

Committee Clerk Signature Morgan Peirce

Minutes:

Chairman Pollert: Called meeting to order

Jennifer Witham: Testimony Handout (Attachment A) 2:04-4:52

Representative Ekstrom: I would think there are a number of laptop computers that are utilized by your division. What sort of securities are in place? As those laptops move around, we have heard some horror stories about data being accessed off of laptops.

Jennifer Witham: We don't store information locally on our laptops. The hard drive is just there to hold programs. We request that people keep pictures and stuff off the servers. They are allowed to keep them on their hard drive temporarily. There is nothing that is DHS confidential on that laptop. They have to log in to the state network through a virtual private network which is a very secure connection to the state. It is password protected. Someone who got the laptop would not be able to do that if they didn't have those security gateways known to them. All the information related to all of our systems and all of our data is stored in house at ITD and is not mobile.

Jennifer Witham: Continued testimony.

Chairman Pollert: Is the ongoing support going to be something of this dollar magnitude we will see from biennium to biennium?

Jennifer Witham: There is a component that I believe that Brenda had spoken to in the overall testimony for the department of a licensing fee that we had not anticipated but is in the budget. When we first were looking at the Medicaid systems project a couple of biennium's ago, there has been a movement for these Medicaid systems projects to be licensed like a commercial off the shelf product. Rather than being one off in every state, the vendors are trying to standardize on the processes. What is included in this $9 million is $3 million in licensing fees that will be paid to ACS our primary contractor. The majority of the rest of the increase. It's what we would have expected in this first biennium after go live, which incorporates knowledge transfer, how to operate the system from ACS to ITD. As you know this is going to be operated by the state. That falls into about 5 different areas in which we will be contracting with ACS on a dispersed transition period. In future biennium's that would stabilize.

Chairman Pollert: Where is the $3 million increase for the licensing?

Jennifer Witham: It is in the $9.2 in contracts on the second page of attachment A. The very first budget code that the current biennium is $40 million. You are seeing an overall reduction of $28, which is primarily the reduction of the contract that we have in place to build the system. That's why this is a little bit hard to see. It is approximately $37 million that we are contracting then the net is the $28.

Chairman Pollert: When you are saying the licensing of the $3 million. Is it like a copyright type of thing?

Jennifer Witham: This concept is new to CMS as well. It also reflects where they are going with the Medicaid Information Technology or Architecture, or MITA. That is the movement that the feds are pushing to have them standardize these Medicaid programs. At least how they are constructed for the information systems. The vendors are saying that the majority of their funds came from customizing these systems for the state. The more those get more generalized, like

an accounting package, would be that there is not going to be as much customization needed. It's going to be more configurable than customized. They are looking at a way to say how they roll out enhancements to the product and how they roll out federal changes that are sweeping across all state Medicaid programs. Regardless of what your state law is, like ITD 10, all Medicaid agencies will have to accommodate that. From a vendors perspective they are saying that if you sign up for this license fee with us, those federal changes will be incorporated into the base product and you will not have to pay extra for that. You yourself wouldn't have to customize it.

Chairman Pollert: Are we going to recoup the $3 million back in copyright royalties?

Jennifer Witham: No. This product is going to be owned by ACS by some extent. The licensing fee is like a software maintenance licensing fee, which is very similar to what we pay for the People Soft system. The base product which can be configured, we will be licensing for and primarily what we are licensing for is for the federal changes so that our ITD staff doesn't have to make those changes in the future.

Chairman Pollert: It seems like ND was on the forefront of this thing, they shouldn't charge us the $3 million licensing. We are still being charged a user fee when basically DHS and the computer company did this thing together. The $3 million wasn't part of any costs. Now we have to pay for the heartache that you went through even though you were on the forefront.

Jennifer Witham: We have paid them to customize their system to what ND needs while we are building this system. We thought we would purchase and transfer a system from another state and customize it. When we did that RFP and the way the feds were going, the feds wanted us to invest in something that could be reused from state to state. There is a lot of work that goes into understanding how to configure this system to work like the way that we want ND to work. The state is not required to purchase this license fee. It is in our best interest

because there are two known moving large federal changes that will probably happen shortly after we go live. We will share the cost of those changes that will be future changes to the Medicaid system that all states have to implement. We will be able to share the cost of making those changes to the system with all the states that are using that same base product.

Chairman Pollert: Basically they are going to hold you ransom and say if you don't pay the $3 million we are going to ding you for $6 or 8 million down the road when we do the other changing when the other programs come on board.

Jennifer Witham: If we didn't feel we could make those changes ourselves. We own the code, not the product that is running in our hosted environment. If we see the federal changes coming, and we want to make the changes ourselves, we have the rights to do that. We could do that.

Chairman Pollert: You are saying the $3 million is going to save us money in the long run.

Representative Wieland: The $9 million in support, how much, if any is in federal funds?

Jennifer Witham: The majority of that is going to be at a 75/25 match. So 75 cents on the dollar is in federal funds.

Representative Nelson: When ACS completes our project, does the contracts and supports system have their own and then the other companies that are putting forward MMIS systems have their own? Is this a standardized contract or support system?

Jennifer Witham: That is a very good question. At this point it is not standardized across the nation. Since Medicaid is a state run program, the feds are not packaging up a standard Medicaid and shipping it out. That is not the scenario. What is true is because it is a relatively minimal, there are only 3-5 really viable vendors that sell and customize MMIS's for states. What we are moving towards is having the main system be configurable and not hard coded, and then they can spend more time actually providing more value add components. Those two

would be optional components but would be looking more at disease management. These vendors are in for the long haul. They have to be profitable. We want them to be profitable because we need them to be around. The share of the funding or money that they are receiving as a corporation to actually stand up a Medicaid in a state is trying to get that more stabilized and bring down the costs for that in the long run. There is not one standard but evolving standards are interesting. Outside of Medicaid, just information technology standards and the pressure that they are putting on all software development for making things more web based and there is just a real evolution going on in the entire information technology. More of what Maggie had said is more of a plug and play for different components and functionality. You can take it and configure it to what you need and you are ready to go. There is not an intense hard coding that is known to be done in the past.

Representative Wieland: There have been a couple of comments about the system and the delays and who we are doing business with. Just for a point of reference, how many states is ACS developing the system for in comparison to the few other companies that are out there?

Jennifer Witham: I would want to double check. I think ACS has about a third or more of the Medicaid market overall. For this new generation product they have three states that they are working with right now that are NH, ND, and Alaska. I do know that because they have existing systems in other states like Texas, they will be migrating if they are successful from their legacy systems to their new systems over time. This is their newest generation system. Three states are working with them right now on their newest generation systems. I anticipate that they will be bidding on for the replacement of new MMIS's as they come up in the future.

Representative Kreidt: Going back to the $3 million license fees, in retrospect this type of a service agreement also included with that right? You mentioned that there are going to be a

couple of major updates in Medicaid, how far out will this $3 million get us?

Jennifer Witham: It is $1.5 annually for three years.

Chairman Pollert: Would the committee like a breakdown of the IT contractual services? Do you want that breakdown as to where the $28.5 comes from? We start at $40 and go down to $12, and what comprises that. I'd like to see it. It also goes over to IT data processing. If you could give us how you got to those numbers, just so we can go through that. We have talked a lot of different numbers and taken some pretty good size decreases but added some increases in because of the licensing fees. Is it possible to say that $3 million will save us money in the future? Could you put that in hard copy?

Jennifer Witham: Sure

Chairman Pollert: If we pay the $3 million up front in one time funding basically is what we are doing, but somewhere you are telling me there is a payback?

Jennifer: I don't want to lead you down that road. It is not a onetime funding.

Chairman Pollert: The $3 million license fee is a one time.

Jennifer: No. It's $1.5 million every year. They have the right to renegotiate if. You contract for the number of years and they have the right to negotiate it. I know another area of the budget that sees a lot of these are going to be ITD. They do this type of licensing, usually it's not application software. The only other large application software that is like this is People Soft or the Connect ND system.

Chairman Pollert: When the license fee came across, did DHS have discussion with ITD to ask if it is appropriated or not.

Jennifer: Yes. It is common practice in ITD. If you bought a piece of software for 2007 and you have the option of not buying it in 2008. Or they will say that they can ship updates and it is covered. These vendors are building these for Medicaid. Part of the reason CMS is pushing for

this is because they are saying that Medicaid isn't that different from an insurance company. How many of these concepts are really repeatable. There are things that are unique for state programs and the way the funding is controlled. The actual work processes of paying a claim like any other insurance payer are very similar. The upside of us having this license fee is that I believe we will be working in the future with the states that are also using this license fee that are ACS customers. We will have a users group and be able to collectively request enhancements. That will be covered under the license fee. Shared enhancements and additional requirements that we would all have to comply with changes that the feds might make. It's a little bit of an insurance policy of itself. It's saying let's just pay the annual license fee and then we are covered for all the large system changes that every state is going to have to make.

Representative Wieland: I'm assuming that this $1.5 million per year for the first two years is subject to an arbitrary inflation rate for years after.

Jennifer Witham: Yes. That is true. Once this session is done and we are allowed to execute a contract of this sort, we will negotiate with them for how long is the fixed price. How many years will we be able to confirm that price without an escalator? We have done that with some sense of another contract that is in here which I haven't talked about which is our decision support system. We worked with CMS when we first went out for the decision support system with a part of the Medicaid systems project. CMS encouraged us to lengthen the commitment on the contract with the right to terminate the contract based on non appropriation. What we did was a five year fixed with three year optional inclusion which is all in this biennium budget but in future ones. We were able to lock those prices in when we first negotiated that contract. I think this license fee will be somewhat similar. What we have done to date is what we were estimating to be required.

Chairman Pollert: If you could, could we get a breakdown of how we get those numbers with IT date processing?

Jennifer Witham: I do have a schedule for IT Data processing that I will be walking through this morning. You may get most of your questions answered in that area. Continued testimony

Chairman Pollert: So we have the $3 million license fee under IT contractual services and then the $3.5 from ND's ITD that is under IT Data processing.

Jennifer Witham: That is correct. That $3.5 is not all associated with MMIS. The reason that there is an increase is that the current system runs on the main frame. Because it is an older system it is actually utilization. It's moving into a server environment. It is moving off a shared environment and into a dedicated server environment. Everything that is needed to run that environment is included in this increase cost of that makes sense.

Chairman Pollert: It's a big department. You are looking at a lot of money to run the systems and we are probably not done. This is going to be incurring. ITD is charging you a fee. That is how they show it as income in their department to pay for it, but it shows an expense in ours.

Jennifer Witham: If we go back to overview I'm saying that I have a $4 million increase. If you go back to the very first page of my handout and track it back to the object code of $60,100. The overall budget for ITD data processing is $27 million. This is an increase of $4 million with a total of $27 million.

Chairman Pollert: Yes Correct. It's a $2 million increase from 05-07 but a decrease from 07-09. Then you will give us a break down of where the decreases happen.

Jennifer: Taking this large product out and putting in the incremental increases of the new system make this a little bit hard to track. That is really what is going on. You are seeing a big decrease because of the work you are doing.

Chairman Pollert: Basically the next biennium, odds are is that we will see an increase to the budget instead of the decreases and it will be easier to trace too.

Jennifer Witham: It will be easier to trace but I do want to say that I believe in the area of IT contracting. That won't be as large in 11-13 because a lot of the funding that we are looking for 09-11 is for knowledge transfer, transition, and stabilization. Continued testimony.

Representative Ekstrom: In your overview testimony we have a $4.5 in million total funds. The general fund allocation is that $1.3. The rest is coming from the feds?

Jennifer Witham: Correct. Continued testimony.

Representative Metcalf: If you go to an auto dealer and they are going to charge you fees for a mechanic to work on the car. However they only get a portion of that. Is this the same kind of situation?

Jennifer Witham: It is but I do not believe that ITD is making a lot of money on this. There is the cost, the benefits, overhead charges that cover their administration. They can't be allowed more than 60 days of reserve. They are audited heavily. Even though it seems like it is a high hourly rate every piece is accountable for. Continued testimony.

Chairman Pollert: When you talk about the technology fee, did you say that is a one- time thing? Or is that a charge every biennium?

Jennifer Witham: The numbers that are going from $30-$45 is a monthly fee. We pay that for the number of FTE's that we are paying for, for 24 months.

Representative Nelson: That is two of them which are added on to the hosting fee?

Jennifer Witham: If you were familiar with ITD's budget that falls into major categories, this supports their networking.

Representative Nelson: In areas like this when they change from a port fee to an FTE and the number we see is the $320,000. How does that relate back to the 05-07. What was the net increase?

Jennifer Witham: The device count that we had in this biennium is 22,065 devices. At a cost of $30.75 each, it was a total amount of $1.6 million roughly. That moved to an employee count of 1,908. That's not the number of employees the department has. We were able to negotiate down by saying why should be pay for employees that work in the institution. At $43.5 each that comes to $1,992,296. With the net of those two being the $320,313.

Representative Nelson: what I'm looking for is the different between 05-07 and the 07-09. Is that something you could tell us?

Jennifer Witham: I don't think they increased their device fee between those years.

Representative Nelson: So this is a new increase?

Jennifer Witham: It's a new increase because of how they want to charge for this connectivity.

Representative Nelson: As the system is becoming operational and we are looking at the implementation cost but now all the support staff. Are states that are considering changes in MMIS that are suffering through recession areas, are they delaying that implementation? Do you know that in your conversations with surrounding states, this must be a deal breaker?

Jennifer Witham: First of all I wanted to clarify that this technology fee is for the entire department. The majority of the states, 40 of the 50, would consider themselves fiscal agents. They contract for the hosting and the maintenance of these MMIS to the vender as well. We have chosen to do a term key where we host it in the state and we are going to learn how to manage the system ourselves. We are going to reduce cost over time by doing it ourselves. For all the states that just contract it out are required by the feds. They can't go longer than 8 years without replacing or contracting their MMIS. They are obligated to refresh. The reason

for that is not always in that eight year time frame do they replace their MMIS. I think what it is that it gives them and their partner in the feds who pays for a portion of this to say that this contract shouldn't be locked in for 30 years. You need to be looking at whether or not this is still a good relationship and whether or not you still feel you are meeting their needs. They have to come back to the table and earn their business. For looking at what is going on in other states, the option to delay doesn't happen because of that reason. Minnesota is a big state run place, SD is also looking to run their own MMIS. They could choose to put it off but it's almost like pay now or pay later. There are some large changes that are coming down from the feds. Implementing those large changes into an older system is not only going to be difficult but you are going to run the risk of not being able to modify a legacy system to incorporate those changes. Once you have replaced your MMIS, the majority of those changes will have to be made to things that will affect our business rules that we will still be able to modify without having to go into the code. I do not believe states are pushing it back. I actually think they are being more aggressive. Continued testimony.

Representative Bellew: Southcentral Human Service Center, $26,000, do you have more than one person there? Do you have a whole staff there? Is that the state hospital?

Brenda Weisz: It's because we have more people there. I have 2 application support people who are in the Jamestown area. They are housed at the southeast human service center.

Chairman Pollert: So they charge you that lease space in that building by the Ann Carlsen center.

Brenda Weisz: I do have people at the state hospital but that is a different building. The people that are in the south central building are people that report to me on application support and one that is doing desktop support.

Chairman Pollert: That is a question we can ask the Southcentral people. Even though you are all part of one big happy family you are going to pay rent at the Southcentral human service center? Is it that building owned by someone else?

Brenda Weisz: When we have a rent payment for a human service center, we write the rent check. We have an accounting system where you can charge what funding stream should pay for it. They predominately are staffed and occupied by people who do the services out of Southcentral so that budget is directly charged. Jenny has three staff that are there and has a different funding stream. We can only charge the federal government of the appropriate expenditures tied for that program. Using the accounting system that all state agencies use, we just designate a part of the bill to be billed to Jenny's area. When Southcentral writes the check they just write one check. Behind the scenes the accounting system says to charge it to where it goes. We don't pay them it just gets charged to us.

Jennifer Witham: Continued testimony.

Chairman Pollert: What was the $6 million? Reduction? The reason why I ask is I just looked back to 05-07 and go to 09-11 and your talk about transmitting electronically will save you money over all. That is what you are kind of saying right?

Jennifer Witham: It is the contingency funds that we had put in to our MMIS budget. There was contingency and it wasn't contracted for you.

Representative Nelson: When MMIS is fully operational will this service be necessary?

Jennifer Witham: We put it in the budget because we weren't sure. It probably won't be in 11-13. Because we are going to be going up live with the MMIS partway through the biennium, there will be this whole transition for the providers to better understand what they can do with the new MMIS system and some transition involved. We felt that it was prudent to just leave it at the rate that we see today and hope that during those last 14 months of the biennium that

we can get those providers offices to use the Medicaid systems portal which they can submit their claims electronically. Even if they have that as an option, some may choose to still do it the way they do it today because they can. We will have to encourage them to move to our new portal. That is changing their operations. Right now we are thinking that for the time period of transition they may want to submit them as a batch where they can send their BCBS and their Medicare/Medicaid all in the same. The benefit to them for using the new MMIS is that portal doesn't do any specific Medicaid validations or edits. If they were to submit them through the new Medicaid portal, which we will have up, then it will validate them for them and they will be able to see if they need to make an adjustment. For their internal staff to get comfortable we just left that at the projected of what we are using today.

Representative Nelson: What I was getting at was in concept the MMIS will do this. I can understand the reason for having that in the budget. In your opinion from the provider standpoint, is it worth it for them to do that. Is it going to create a lot of heartburn? You can kind of get ownership in if you recognize the system you are working with. Is it a big transition to switch over to MMIS?

Jennifer Witham: I believe that the shares of these large electronic submissions are coming from our more sophisticated institutions. I believe that the providers are going to be more likely to transition to upgrading and having their Medicaid transmission go right to Medicaid. We still have providers that submit directly to us as well. I guess I would be reluctant. We are going to make a big emphasis to provide information and encourage them to have their claims submitted directly to us.

Representative Nelson: Does that include support staff and going to the facilities?

Jennifer Witham: We have a full transition and training within our current MMIS project.

Chairman Pollert: When you say contractual services you mean a breakdown of the IT data processing right?

Jennifer Witham: Correct, I will do that in both of those areas.

Representative Bellew: I see part of your funding sources are county funds, what does the county pay for and where does the authority come for you guys to charge them that?

Brenda Weisz: That is a result of swop legislation. That is different from swop funds. What happens is that they still incur the expenditures out there for the economic assistance programs. They still do the work and we can still draw those funds down. We just don't pay them back out. We keep them in our budget and use them to fund as retained funds. We don't have those types of expenditures in our area. Because of the legislation we trade it out. The counties operate and work on servers and systems from ITD as well. They do our eligibility so those system costs are tied to county work. We said that we won't pass those costs on to them until we hit a ceiling that is inflated by an inflationary factor each year. Once we cover all the technology costs, and the data processing costs of them using those eligibility systems, until it hits a ceiling that was laid out in Swop legislation. After it hits that we bill the counties for their share. It's the other way around. They pay until they hit a ceiling. Once they hit a ceiling of cost they are limited and held harmless. Swop was a balancing act.

Representative Bellew: That was way before my time.

Brenda Weisz: Basically, they were held harmless to that level. Once the costs for the operation of the systems hit that level then we pay the rest of that no matter what it costs.

Representative Bellew: Would it be hard to get a copy of all the county funds that are in your budget and where they are charged to?

Brenda Weisz: No that will be very easy.

Jennifer Witham: Continued testimony 2:11-5:21

Representative Wieland: Are we at the point yet with MMIS that we are saving money with IT yet that it doesn't cost us anymore?

Jennifer Witham: One of the things that is always hard with an IT budget is that it usually offsets someplace else to improve efficiencies of operations. I believe that my budget is continuing to reflect the increasing demands with more efficient operations. It looks like IT is growing. I can promise you that I believe the DHS does a good job with maintaining and working with IT with trying to keep costs down. I believe we are very aware of standards and replacement cycles. We do the best we can to manage it efficiently.

Representative Wieland: I don't want to be critical of IT here or anywhere else. It's just that over the years as I've watched IT evolve, every time we are told that it is going to save us money. The IT budget is something like $220 million total for the state. That's a lot of money. We haven't increased in population in the state. I'm just wondering with all of the things we are doing, when do we reach a plateau? When will it appear that we aren't spending money on one side and maybe not saving all that money? I'm not being critical of you or any department. We have all gotten caught up in this thing and we can't stop it. It is frustrating.

Chairman Pollert: We will continually see the $1.5 annual fee forever with inflationary increases. We will continually see the $3.5-$4 million of ITD fees for running their programs for the DHS. This is going to be an ongoing expense that we are always going to see. What I would be interested in seeing is if we were back to the old system with the amount of money we are going at, when we ask for all this information and you will give me a more detailed on contractual services. If we would ask for that information without this information, I'm sure we'd have it within five minutes. I can't imagine what it would be like with the amount of information that we are gathering from you if we were doing paper trails.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. 1012 – IT detail/ Economic Assistance Detail

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/15/09

Recorder Job Number: 7114

Committee Clerk Signature Morgan Pennell

Minutes:

Jennifer Witham: If you go back to the handout I gave you this morning the two front pages were detail by object code. The handout I just you're you right now is going to be information on two of those object codes. The top sheet is on the contractual services. In my detailed handout it is actually on page 2 is the very first object code on page 2. To walk you through this, the first number the $40,757,206 ties back to what is in the column of the current budget for 2007-2009. The Medicaid systems project reduction in that object code is $37,399,893. The additional or what is added back into some cases in a continued smaller reduction is that the largest number is the $9,256,512 in IT contracts that are in that. A piece of that is the $3 million licensing fee.

Chairman Pollert: The other part is the ITD charges you for?

Jennifer Witham: That would be correct. Brenda already knew that you needed additional information on that 9,000. She asked me at the bottom to take a break down of what is in that IT contracts. When we go through the second schedule I will talk the ITD piece. Part of that is the Thompson writer's contract which is our decision support system. The health information designs works with the Medicaid systems project. It does work with the pharmacy group. It's a contract that we have now so it is really a continuation of that contract. $8 million with ACS

health care which $3 million is the license fee in which we discussed this morning. The remainder is for that transitional services to help us do knowledge transfer and to bring ITD more up to speed with how to manage the system. Like you pointed out this morning that is unusually high. We will not see it at that level in subsequent bienniums. This is a transition biennium. Synergy software technology's is our aging systems providers. I don't need to necessarily go through the other ones unless you have questions.

Representative Wieland: Can you tell us where we are at with MMIS?

Jennifer Witham: This week we concluded the final design session. That was a big part of the project. We went through requirements and the gap analysis between the base product and what the ND requirements are. We detailed out how to design their system around our needs. We handed off to start coding or construction. Now we are in the construction phase of the project where they are actually building the code for us. That doesn't get all done in one big block. It happens the same way design did. We handed off the first segment of design. We just finished our first segment. They already started their technical design for the construction of the first iteration. They do this phased process of design. We are going to be going through construction and system testing operational readiness in training are the big components that we have left with the goal life date of May 2010. As they start completing the development then we start testing it and making sure there are no defects and it meets our requirements. Once we have signed off on that we start moving into training. What I mean by operational readiness is changing over the desktop processes to the new system and getting ready to manage the system once it goes live to medical services.

Representative Wieland: May of 2010 is the target date?

Jennifer Witham: Yes. That is true. We will have one small component come up earlier which is the provider re-enrollment. The providers that will be certified by Medicaid to submit bills and

claims which they are today. We are asking them to re-enroll into the new system because we are collecting different information. It allows us to refresh our enrollment. That is going to start in November of 2009 so six months earlier.

Representative Kreidt: When we go online for facilities, will the facilities be compatible? Are they already set up? Will it be continuous flow?

Jennifer Witham: For the facilities it is really to access our system. They will get a password to access our system.

Representative Kreidt: So whatever they are using right now will work?

Jennifer Witham: Yes. In 99% of the cases that will be true. I'm not sure if you have any more questions on this first schedule.

Chairman Pollert: What is Thompson Reuters? And what is the remaining of the $5 million of ACS for?

Jennifer Witham: Thompson Reuters is our decision support system. What that is, is our executive decision support system. It's a data warehouse which houses all the claims information. It is primarily focused on utilization review and trend analysis. It is an after the fact research component for the Medicaid system that allows them to do those more analytic studies on the data they are receiving.

Representative Nelson: The ACS health care, in addition to the $3 million that seem to rub a lot of people the wrong way, now there is an additional $5 million. Is that an ongoing expenditure with ACS as far as developing the system or can you explain that remainder?

Jennifer Witham: First of all it is not going to be an ongoing cost.

Representative Nelson: Has it been that way in the past? Or are we just seeing it in the next biennium?

Jennifer Witham: It has not been in the past. The reason for medical services or MMIS. It was first implemented in 1978. We have managed it 100% with ITD developers. This system is very complex. For the ITD development staff and the systems administration staff and actually the medical services staff to be ready to know how to modify the system. This has nothing to do with how it works on day 1. It has to do with when you guys are completed with the session. You will have changes to Medicaid. You may have changes in service limits. We have to know how to modify that system to meet the changing requirements of Medicaid. That is done in different ways and one is through configuration components which will be a combination of medical services staff doing that as well as ITD staff. The other piece of that is the software development staff. If we have to make enhancements to the system they have to know how the whole system hangs together. They will have to understand how the data construction is, how each of the functional areas are constructed. It's time spent with ACS. We are at a point where we aren't going to make too many changes because we have to be certified in the first months after go live. ACS comes in six months after operation to make sure things are going as supposed to and you get a certified MMIS system. As we start to make changes we want to make sure we are not doing that in a manner in which we aren't familiar with and how the product is composed. We've begun talking about how we transition that from ACS's responsibility to our responsibility.

Chairman Pollert: So you are saying that $5.1 million is needed for that transition? As well as other changes that we may make?

Jennifer Witham: Correct. The second schedule supports the budget line for $61,000 which is on the bottom of the first page of the detail for IT data processing. This is very similar to some respects to the one I have already handed out to you but you didn't have the plus and minuses like you had asked. This gives the full breakdown. The first number is $33,074,400. The

Medicaid services project has a reduction of $9.5 million. The next 5 items were items that we went through this morning. The total of those five items was the $4 million which was in my overview testimony. When you net that against the $9.5 million reduction you have a $5.496,920 reduction overall. When applied against the $33,074,400 which is at the top of the page, it nets to the $27,577,480 which is what our request is that is in the last column.

Representative Kerzman: Did you say what that TANF longitudinal study is?

Jennifer Witham: I will have to defer to someone else.

Carol Cartley: What the TANF is doing is a 10 year study of TANF clients. We want to attract some of the trends within the TANF clients to see about generational poverty or generational folks that are on TANF to see if we need to change some policies to make some adjustments that you could do something differently.

Representative Kerzman: How can you do a 10 year study when it is a 5 year program?

Carol Cartley: Certain aspects of TANF individuals can remain on TANF. If the unemployment rate is greater than 50%, that 60 month lifetime limit does not apply. For example, Rolette county , Benson county, and Sioux County, their unemployment rate is greater than 50%. Many of those have been on ever since TANF began. As long as they are living on Indian land they can remain on TANF. It would be including that generational study as well.

Brenda Weisz: Handout Testimony (Attachment A)

Representative Bellew: You said IT was capped? There budget shows a change of like $213,000.

Brenda Weisz: In other funds. It is indexed by CPI and swop legislation. The cap is always changed based on those two.

Tove Mandigo: Testimony Handout (Attachment B)

Representative Bellew: In your earlier testimony you state that there is $110,000 in a combination of increases/decreases. What does that mean?

Tove Mandigo: Basically it is how you manage the FTE's that you have. Some people have left the department, some people have been hired on. When new people are hired on you often have to increase the salary level because you don't come on at that level. There was also an equity issue in the food stamps FTE's so that was adjusted there. It is basically how you manage the staff that you have with people coming and going.

Chairman Pollert: When I look and notice travel. The current budget is about 200 and some thousand. Year 1 is $50,000. I see where you are going to reduce it by $46,000. If you double 50 it is 100. It seems you are projecting $98,969. It seems to be overstated a little but that's just my opinion.

Tove Mandigo: When we had the EBT procurement we thought there would be more travel involved. That is one of the reasons that the travel costs are less this time for this biennium. Does that answer the question?

Representative Wieland: It shows year one at $50,262. That means that out of the $203,000 budget the second year is going to be $150,000 or a bit more than that. There is a substantial difference.

Tove Mandigo: Part of the reason for that too is that part of the travel that has been planned during this budget didn't take place. Especially in our areas of the regional reps and the quality control. However, those expenditures and travel is expected to continue. It just didn't happen in the first year of the biennium. Some of it is just planning the travel and whether or not they are able to meet the obligations that they need to do. Continued testimony.

Representative Kerzman: The alternatives for abortion, 2 on 1 how many hits are you getting on that? Is it being utilized? Did you get the material out?

Tove Mandigo: I'm not sure whether we track the hits. We can get you that information though. Continued testimony.

Chairman Pollert: It seemed to me that we had a discussion on the payment system error last biennium as well. Is it mandated?

Tove Mandigo: It is a federally mandated program that covers childcare assistance, the childcare piece, the TANF piece, and Medicaid. It's on a three year cycle. You only hit it one of the years.

Representative Kerzman: In the past we have had TANF dollars that we haven't used. Is that the case now?

Tove Mandigo: We are bringing $11 million to this biennium. At the end of this we will only have about $1 million to carry over into the following biennium.

Chairman Pollert: During the interim of human services can we get a breakdown of where we are going to be at? Did we switch some TANF to general funds this biennium or not?

Brenda Weisz: We will bring a TANF schedule that you are familiar with forward. We can bring that during the interim committee. As we kind of guessed that during the interim we funded everything as it was funded before. We did not do any shifting from general funds. We continued to fund the foster care cost that we are previously funded with those. That leaves us with a balance coming in as Tove mentioned of over $11 million. At the end of this biennium we will only have carry forward of just over $1 million.

Chairman Pollert: Didn't we have some of the childcare bill?

Brenda Weisz: That was a transfer of $500,000. The majority of the expenditures are used in the foster care system.

Chairman Pollert: that is really when we got into that discussion. When it got to the Senate side we had a discussion as far as that. We are going to be deficit spending.

Brenda Weisz: I think we anticipated that we would have the trouble coming up the 09-11 biennium. Due to the changes with those on TANF and a reduction in our foster care with the smaller case loads, the problem did push itself out from the 2011-2013.

Tove Mandigo: Continued testimony.

Representative Wieland: Grants and other funds under childcare, are those county funds?

Tove Mandigo: No these are the swop dollars.

Chairman Pollert: And the jobs program is related to TANF?

Tove Mandigo: Yes. That is where we have contracts and options for Job Service.

Chairman Pollert: I think we had quite a bit of discussion on that.

Tove Mandigo: Continued testimony.

Chairman Pollert: When we look at food stamps, and I brought this up during the overview, there is no way in the current economic environment that they are ever going to back off on that. It is something that we don't have to worry about?

Tove Mandigo: They are a bit different on how they are done. One is a grant from the states. If we run out of money we would have to access other money. Food stamps is different. It is continuous. Continued testimony.

Chairman Pollert: You show a reduction in TANF's. Is the amount of clients on that dropping or where is that coming from?

Tove Mandigo: Our TANF clients did drop down in some areas. In other areas they came up. TANF is comprised of 3. As a population there is diversion, transitional, and the regular TANF clients. When we first built our budget last time we didn't know what would happen with transitional and we probably built it a little high.

Representative Bellew: TANF is a pretty large shift in your increase of general funds, can you explain? The total general fund increase is $1.2 million.

Brenda Weisz: Those are child support retained funds. When TANF clients down we don't collect as much money in child support. We have to fill that back up with general funds. I'm just going to take you back to my overview testimony on last Friday. I had talked about some funding changes with you. It was in my attachment A and it was one of my items on there, the very last one of the funding changes. What has happened during the course of the last biennium is that our child support collections in total are up. I talked about the fact that our child support collections and what Tove is referring to, the child support collections that we actually keep within the department to offset other costs are down. That is because our foster care case load is down. Our child support collection that we retain is down. We still have to meet our MOE. Child supports used to meet that MOE but if the child support collections aren't there then you need a general fund, another alternative source to meet your MOE. That was one of the funding changes and $1.1 million of the general funds added to that budget to offset the decrease in child support collections.

Chairman Pollert: The $1.1 million is the drop in what?

Brenda Weisz: Overall when we looked at what was needed to fund MOE, when we look at all areas that was the drop of $1.1 million which were the additional general funds that were added because of the child support reduction.

Chairman Pollert: Do we ever ask for a breakdown of TANF on this?

Brenda Weisz: This sheet shows you the breakdown. Tove has a sheet that she will go through with you.

Tove Mandigo: Continued Testimony.

Chairman Pollert: As an example on SNAP, you had a cost for 07-09 increased cost per case in 09-11. I understand food costs have come up. Is that a formula or is that just something?

Tove Mandigo: Some of the SNAP costs are involved in the farm bill. The farm bill removed the cap on deductions and also increased the minimum benefit from $10-$13 and increased the minimum standard reduction from $134-144 and indexed it from inflation.

Representative Wieland: What dose SNAP stand for?

Tove Mandigo: Supplemental Nutrition Assistance Program

Representative Wieland: I know what it is, just not what it meant. That is 100% federal?

Tove Mandigo: Yes.

Chairman Pollert: How much of yours is general funds? The big majority is all federal. There are few general funds in economic assistance I would believe. I would have to go back to the spend down to find that out?

Tove Mandigo: Correct.

Representative Kerzman: I seem to recall that power companies seem to pay the assessment for fuel assistance. Is that discontinued? Was that a different program all together?

Tove Mandigo: I'm not familiar with that but I can find out for you.

Chairman Pollert: On the $2 million increase in general funds, $1.1 is from the memorandum is from what is required under the TANF program.

Tove Mandigo: Yes.

Representative Bellew: Since I don't remember swop can you explain it to me?

Tove Mandigo: I understand it but not enough to explain it to anybody.

Deb McDermott: What that really was, was the counties would spend dollars. If they would spend $100 at a county level, they submit those bills to us and we would submit them to the

federal government. Most of the programs were a 50/50 match. We would then give them the 50 portion of federal money. On the other side with grant costs, we would bill the counties a share of the Medicaid cost, part of the DD grant costs, the childcare costs, part of the TANF and those programs. What swop did was the counties were no longer responsible for paying a portion of the grant costs that I listed. In turn, what they would do is still submit that $100 to us in admin costs. We would then in turn submit it to the feds. That $50 that we would get back, we would keep those costs or dollars as retained costs and use that to offset the grant costs that we were no longer billings the counties for.

Representative Kerzman: Are the TANF dollars still a block grant?

Tove Mandigo: Yes.

Representative Kerzman: Have those amounts been reduced? Utilization is up?

Tove Mandigo: We get a set amount. We get $52.8 million a biennium total. We get $26.4 million a year. It's up for reauthorization in 2010.

Representative Bellew: What is the statutory funding formula for Indian counties? If there is a $451,000.

Tove Mandigo: What I know is the test is 100% of the costs. Deb knows a lot about this as well.

Deb McDermott: The statutory law was changed basically at the same time that swop legislation was so the Indian counties weren't negatively impacted. What it is, is that you take all of the economic assistance costs for the counties. It's all the economic assistance counties. The counties that qualify for Indian county money have to have 20% of their case load living on a reservation. They have to be in excess of that average mills of those counties that do not qualify for the Indian money. You have to meet those three criteria. You have to take that excess of the average mills and basically that is how the Indian counties are calculated.

Chairman Pollert: What is the $274,000 increase in childcare?

Tove Mandigo: It increases the fees to the child care providers and the people who provide the childcare for systems. It increases the maximum for the ages of 0-2 to $20 and from 3-5 to $10.

Chairman Pollert: What are the fees for?

Tove Mandigo: To pay for the person who takes care of the children.

Chairman Pollert: Basically a subsidy?

Tove Mandigo: Correct. It is paid on a sliding fee schedule.

Representative Kerzman: On a TANF you have $9,700,000 federal funds in the block grant brings in about $26 a year. Yet we are losing money. We have to pull in about $10 million out of the roll up dollars? There must be something else included in there that I am missing.

Tove Mandigo: The reason for that is when Brenda brings down that TANF schedule it will become more clear. A lot of the funds are actually used in the child welfare area and not just the TANF benefit. They are also used in other areas of our budget such as admin, IT costs. The majority of them are basically used within the child welfare arena too and you will see that on the TANF schedule when you bring that down.

Chairman Pollert: Does anyone else need anything from Brenda today? If not we will be in adjournment until tomorrow at 8:30

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/15/09

Recorder Job Number: 7567

Committee Clerk Signature

Minutes:

Larry Bernhardt: Handout Testimony (Attachment A) and (Attachment B)

Chairman Pollert: How many total employees or FTE's are in county social services statewide? Do you have a number?

Larry Bernhardt: I did but I'm drawing a blank. I will get that to you.

Representative Bellew: Do you have a breakdown of costs per county in total dollars? Would all these services be better served if the state took over them?

Larry Bernhardt: Each of the programs and services we offer through county social services has a different reimbursement process.

Representative Bellew: What does the cost per county of each?

Larry Bernhardt: The cost of food stamps itself is all federal money, there is no county or state money in the cost of the food stamps. The cost to administer the food stamp program is 100% paid by the county.

Representative Bellew: Do you have an amount? Your social service workers have to spend a certain amount of time on this. I would imagine it is salary and wages. If there is a specific amount and if it can be found I would like to see it.

Larry Bernhardt: We do a breakout by county and a state compilation of those costs. We can tell you what it costs for economic assistance programs and for social service programs. Within that we can breakdown what the costs are for child welfare or adult services. I don't' believe we have that information isolated so that I can tell you statewide the administrative costs for the food stamp program. All of our eligibility workers out there, I have 14 of them, they all do some food stamp cases, Medicaid cases, childcare assistance, fuel assistance and so forth. Our workers are generic. We could work up something to give you a rough idea. Secondly, I think your question is whether or not your programs would be better served and administered if they were state administered. The answer is no. I truly believe in a county delivered system. We are closer to the client, we have our presence in all 53 counties. We are a whole lot closer to the clients. We have a history of providing very good services in county social service agencies.

Chairman Pollert: That begs the argument of the dividing line between when should state take over costs of certain divisions of DHS and foster care. When do you do that and when do we say ok since social services aren't going to do these services then you don't need the job and you are done. Those are lines that we have to discuss.

Larry Bernhardt: You have to look at how the service is best delivered. At the same time the other half is that we all have a cost. We all have a share in this. We have to make sure that the share is done appropriately between a mix of federal, state, and county dollars. Sometimes that mix is not correct.

Representative Nelson: I agree with your answer on the job that you do. The people know the individuals. It's a center that people are familiar with. By raising the medically needy income level 83% that is obviously going to increase the workload. How does that compute in relationship to additional FTE's or employees?

Larry Bernhardt: I'm not sure that it will increase our workload. Those people that we have today are on medical assistance. The difference is that someone who has $750 a month today per monthly income, they get to keep $500 and pay $250 towards their medical costs before Medicaid will pay anything. When the medically needy income level changes they will get to keep $700 and pay the other amount to medical. We already have those people on medical assistance.

Representative Nelson: You don't think there will be any additional people that will qualify with that change?

Larry Bernhardt: There will be a few but it won't be remarkable simply because if people have that medical need they are on medical today. It's just that we are limiting the amount that they have to pay their other needs.

Representative Nelson: I'm becoming more and more sensitive to requests that have money in them that haven't gone through the department or the OAR system. There is no money left to spend. I don't know where we are going to start manufacturing these dollars from. There are legitimate and good requests but it is going to have to come out of someone else's budget.

Larry Bernhardt: I think the dilemma is that when the department of human services got their instructions for building a budget they were instructed to present a budget at 100% of what their budget was at a prior biennium. In order for them to live within that, even though they are wonderful ideas and make sense, they didn't have the capacity to add them in because of their budget. Somehow we need to get those needs before the legislator to see that these are definite needs that we have to try to address. I believe that if the department didn't have a limit of what they could present their budget, these things would have been in their budget. Just like there would have been money to build a new computer system. I think the OAR's would have

been funded but they have limits of what they can put in their budgets. We then as advocates for counties and clients we serve have an obligation to bring those needs before you.

Chairman Pollert: Why didn't we go to the SSI level instead of jumping 2 Tier and going to the 83% poverty for medically needy? The SSI level gets you within $9-10 for a family of 2.

Larry Bernhardt: I don't know the rational for why it went to 83%.

Chairman Pollert: Besides that it leaves more money in their pockets. That is an easy answer and I'm looking for the hard answer.

Larry Bernhardt: I think that people in the department that built that OAR would be able to tell you how they arrived at 83% of poverty level. I'm not sure.

Representative Wieland: I'm not very computer literate but when you talk about the new eligibility system computer program you mentioned that they have to enter data into four different computer systems. Is that for every client or just for some clients?

Larry Bernhardt: It depends on the client and the programs that they request. If we have a client that comes in and is looking for fuel assistance, child care assistance, food stamps, and Medicaid, they have to go into three different systems. As of may they have to go into 4. If they also have a child in foster care then we have to use the other system because that is all there. If they just want food stamps we can do that in one computer system.

Chairman Pollert: I was going to ask Legislative Council about where the ranking was for Cytec. I see it was written down as #5 on the ranking priority list. Then again I understand why they wouldn't when they are working and trying to get MMIS done. It was ranked #5 on the list.

Representative Kerzman: In regards to the Indian County Funds, I haven't seen the bill yet so I have to apologize. Could you expand on that a little bit? Now it's basically on Mills and property tax? Is it going to what they get for food stamps or do you know anything about it?

Larry Bernhardt: Currently the counties in the state that have Indian reservation land and Indian trust lands are over 20% of their current economic assistance case load is native American. They qualify to be considered to receive reimbursement for some of their economic assistance administrative costs .The way they do that is take the average of the mills that are spent in all of the counties for economic assistance and everything over the average of the mills then that county is eligible for reimbursement in county dollars. The problem is that the formula doesn't work very well because of the differences that we have in the makeup of the Indian counties across the state. I believe it is HB 1540 that is being introduced to change that so that we would then use the current food stamp program and whatever percentage of the food stamp program clients or any clients that are residing on reservation or trust land, that percentage would be the amount of the economic assistance costs for that county that they would be eligible to receive reimbursement at 100% of that percentage. It would make a considerable difference. It would be more fair for the distribution and would fix some of the disparities that are happening now with some of our Indian counties. I believe there is a fiscal note of about $1.5 million for that.

Chairman Pollert: Any other questions?

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. 1012 Child Support detail

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/16/09

Recorder Job Number: 7114, 7115

Committee Clerk Signature Morgan Peterson

Minutes:

Debra McDermott: Handout (Attachment A) 6:25

Chairman Pollert: So like Benson would be the 20.97 times $13,794?

Debra McDermott: Correct

Representative Nelson: The value of the $1.5 million has never been paid out has it?

Debra McDermott: Yes the $1.5 million has been paid out.

Representative Nelson: It doesn't add up as far as the appropriation in your testimony.

Debra McDermott: This is an excerpt of the testimony given in 2007.

Representative Nelson: The chart is in the same biennium. The testimony said to appropriate $440,000. The legislator added another $600,000. That is roughly a $1.1 million.

Debra McDermott: It was 1997 and 1998. That was way back in the SWAP legislation.

Representative Kerzman: The counties that are blank like Billings, Mclean, Mercer, Sheridan, Slope, do they not receive any economic assistance?

Debra McDermott: Those are actually counties that have been combine. Billings and Slope are combined. That is why on the bottom of column F it says number of counties 42. They are county entities.

Mike Schwindt: Testimony Handout (Attachment B)

Representative Bellew: When you have these people staffed, where do you rent space from?

Mike Schwindt: Our space situation is the same as it was when we started out when the counties were running the shops. We have made several changes in the interim. Fargo, for example, we now moved out of the region in Fargo. In Devils Lake the landlord wanted to put his building up for sale so we are in the process of moving out of there. A couple of months ago Williams County said they want us out of there so we are in the process of locating real estate. The central office is located in the WSI building on the first floor. Continued testimony.

Chairman Pollert: How many in Grand Forks?

Mike Schwindt: 16 plus 6.

Representative Bellew: When we get into the detail a little bit I have noticed on the organizational chart, there are an awful lot of attorneys. Can you explain that a bit better.

Mike Schwindt: That is part of the baggage that come with the program, we have to have attorneys. Continued testimony.

Representative Ekstrom: In terms of the attorneys I have been looking at the pay grades on the various folks. They are generally at a level 13. I think if you look at parody in terms of private sector and even county states attorneys they are probably making a bit more.

Mike Schwindt: Most of the attorneys that we brought in from counties, there were some that were over the pay grade and were frozen at that level. The Attorney I was grade 13. The Attorney II which are the lead attorney's are grade 14.

Representative Ekstrom: If you turn to parody and look towards private and public sector they aren't making anything like they would in a private sector.

Representative Nelson: Williston and Minot, what were the numbers for FTE's there?

Mike Schwindt: Williston was 8, Minot was 16, and Bismarck was 26.5 including the 4 for the high intensity enforcement unit.

Representative Nelson: You mentioned earlier that the Governor has a 7 FTE decrease in your office. In this chart you show 5 vacant positions. Can you explain how you are going to get to that or where the FTE's will come from or what the criteria was for that decrease?

Mike Schwindt: I can talk on how we intend to get to that if that is the final resolution of the legislator. Simply we have to get there. Part of what we have to do with this whole conversion is take a look at how we are doing business. Where the case loads are changing and what services are changing.

Representative Nelson: Are you going to take them from the regional offices or the tower?

Mike Schwindt: When it comes time to deduct we will take whatever is vacate and do the adjustments as we go along.

Representative Nelson: So there is no strategy?

Mike Schwindt: I have a lot of work to do before I know exactly where I want to make these changes yet. Some will come from the central office and some will come from the regional office. It depends on what the program changes need and require. The performance auditors recommended a trainer. Where do I put a trainer? I can put them in the regional or central office it doesn't make a difference I still need one.

Representative Wieland: Are all those positions going to be funded? Even though you are going to have a reduction?

Mike Schwindt: We are following the Governor's budget.

Chairman Pollert: So we will see that in the detail?

Mike Schwindt: It was in the overview that I presented the other day. We will cover that when I get to that in the next part as well in the budget overview.

Chairman Pollert: How many in Dickinson?

Mike Schwindt: A grand total of 7. That's the same level they had when they were transferred in. Continued testimony.

Chairman Pollert: So that total change is $142,623. That is the combination of everything from your bullets on the top of page 6 and 7.

Mike Schwindt: Yes. Continued testimony.

Chairman Pollert: On fringe benefits above, the reduction of health benefits, the $420,000, would come from the reduction of the people?

Mike Schwindt: It is the economic standard put in to the current accounting system. Part should have been up in the salary lines instead of the fringe benefit line. It's just a correction.

Chairman Pollert: What do you mean?

Mike Schwindt: When the budget was loaded up for the 07-09 biennium, instead of putting in the salary object code that 5,11,000 line some of it ended up in the 516 line. If you look on the third column of the very left side. You see salaries permanent and that 511 is to the left of that.

Chairman Pollert: Ok

Mike Schwindt: Down below you see the fringe benefits of the 516. For operating program it doesn't make any difference because it is in the salary line.

Brenda Weisz: When the bill was passed, 2205, we got the money in a lump sum. Then we had to put it to the correct budget object codes in the PeopleSoft system. Based on my fiscal staff, we put it in the wrong place. We should have put more up in salaries and less in fringe. Of course it didn't come to our attention. It just got put in the wrong place when we added 2205 to our appropriation.

Representative Ekstrom: On page 7 when you talk about a receivable study for $200,000. When is that going to start and what is the hope in terms of what you are going to achieve with that. Has the contract been let?

Mike Schwindt: It's itemized on the next item down.

Representative Bellew: I see you have other funds in here. Could you tell us where they come from?

Mike Schwindt: In prior bienniums other funds have consisted of county money or federal incentive money. Going into the future biennium there is $263,000 of fees. The rest is federal incentive money. There is no longer any county money included in this budget. This is the first biennium when we have fees included as revenue in this budget.

Representative Bellew: When we get to that point I would like an explanation on the fees.

Mike Schwindt: Continued testimony.

Chairman Pollert: When I look at travel and I see the current budget for 07-09 at 173. Year one you have went through $30,000. If you double that and take it times two, yes you did drop your budget but it still seems as if it's inflated to other years.

Mike Schwindt: We have pretty much grounded everyone because we have had work to do. No one has been doing any traveling. To get to the regional office seems impossible because I'm stuck at my desk. There is a $20,000 piece associated to nonemployee travel associated with a federal grant we had which is designed to figure out how we can provide better services to families when the kids are in foster care. We are paying for our travel associated with county people coming in to get advice. That is the big thing here. Without that 1115 grant we would drop that another $20,000. It's between those two things. Keeping people at their desk and that $20,000. Continued testimony.

Representative Wieland: I did want to talk about the rentals and the leases. Did we have some kind of a schedule. Do you pay for rent in the court houses?

Mike Schwindt: Yes the blue schedule will show you. Continued testimony.

Chairman Pollert: Where is that at? I caught the $13,000 on page two and then where did you go on this?

Mike Schwindt: Right below it to $200,000. That is the federal access and visitation money. If you go to the far left hand of that line you see $2,071,000. The biggest part back then is if you transferred incentive money out to the counties. Under state administration you can keep that. If you go to page three at the very top you will see the budget. Continued Testimony.

Representative Bellew: You charge people a fee to pay child support?

Mike Schwindt: No we don't charge a fee to pay child support. Go back to last session where there was a bill that talked about fees. We must put charge fees according to the federal rules. As soon as you get $500 collected and pass it on to the family. If we don't get $500 they still have to pay $25. That is part of the federal rules that were put in rule. Who do we charge the fee to? State general fund? The person who pays or the person who gets the money? When you charge it all through with administration. The fee is charged to the person who gets the money not to the person who pays the money. There are lots of nasty consequences. It is charged and generally it is to the mother because most of the people that receive the money are the mothers.

NEW JOB

Representative Bellew: So there is a $2 monthly fee taken out of the child support? IS there a subsequent raise to that fee?

Mike Schwindt: No there is not.

Chairman Pollert: The $578,000 of general funds on page 3 is the same as the salary general funds on page 1? I don't know if that is coincidence.

Mike Schwindt: It should be. That is all that is in the column. That is the overview of the child support budget. If you would like to go to the next handout which would be the blue one which deals with rent. Continued testimony.

Chairman Pollert: You are thinking the one in Williston will be about $12 a square foot?

Mike Schwindt: That is what we are budgeting. The numbers we are getting from the first year, it would essentially be the same price total dollar value as we are paying now.

Chairman Pollert: Lori I would like to know the square footage for P&A.

Mike Schwindt: Continued testimony.

Representative Wieland: Under the Century Center, the square foot costs $5 for storage. What do you use the storage space for?

Mike Schwindt: To keep case records. We have 130,000 or so case files we are trying to get rid of. As we work our way through those things and make sure everything is as it should be. We are trying to get those things out of there and shred them. It is literally shelve and shelves.

Representative Wieland: Is that a secured area?

Mike Schwindt: Yes. Continued testimony.

Representative Ekstrom: I'm business manager for a small business. We have had some turnover of people and brought some new hires in. Now we have those forms that go back out that say these are the new hires. It is supposed to cross match with child support. Where does that occur in your budget?

Mike Schwindt: That is part of the data processing match. We are trying to find people and assets. Continued testimony.

Representative Wieland: How would you perceive that study would be made. By a consultant or exactly how is It going to be done?

Mike Schwindt: Several years ago I talked to a couple of consulting firms that are more than willing to do it. Their price was considerably higher. We are going to be looking for somebody that has the skills. It could be a CPA in town that can help us or some sort of management consulting that can do that. We are going to be looking to get a much better grip on the front end between now and the end of the year and then doing a report on where we are going.

Representative Wieland: About how many people are involved? People that owe? Do you have any idea of the numbers?

Mike Schwindt: The last time we looked was a couple years ago and it was 23,000.

Representative Ekstrom: How does this $280 million give or take relate to states like SD or MT? The states to the west and south of us? In terms of another state that is similar to us in size and ethnic makeup.

Mike Schwindt: The last time we compared these numbers to SD we were running about 6-7 million ahead of them. We are unique that we have all child support payments coming through us. The thing you have to keep in mind when comparing us to other states is that half the states charge interest and half do not. We charge interest. Interest alone adds to about $275,000 in outstanding receivables each month. Continued testimony.

Representative Wieland: I was just going to ask about those two items. Do you do any billing back for those items or does the state pay all of it?

Mike Schwindt: The state pays all of it. You could bill it back. There is a fee associated with genetic testing. We pay the fee to the Sheriff's. Those are not billed back.

Representative Kerzman: A few sessions ago we did some work with establish paternity at the hospitals at the time of birth.

Mike Schwindt: That is one of the most useful tools we have for getting paternity in place. About 80% of our births out of wedlock are assessed because of that. You don't have to have a lot of fussing. People acknowledge their paternity. The hospitals have been most cooperative. That is a very effective tool.

Representative Kerzman: Another question I have is going back to receivables. Do they allow you to, like most business write off bad debt, can you do that?

Mike Schwindt: The court order is a court order. It does not go away unless someone does something with it. We can't do it. They are uncollectable.

Representative Kerzman: How about working with the courts to get some of the adjustments. Do you do any of that work? Do you make an assessment on how much an individual is able to pay? Every once in awhile I hear people say that child support has strapped them and they can't do anything.

Mike Schwindt: Again the amount a person owes for child support is set up in our rules, guidelines, calculation that comes into play. That is a big part of what those attorney's do. They take those calculations into court. The parents can't say that this is a fair amount. The court makes a decision on what is fair and puts it into court order. It is also included in the guidelines about 18 different deviations. If you look at the original chart for what a parent owes for a child under certain income, essentially that hasn't changed. We put a few more deviations in place and extended that out. Those reviews happen every 4 years. They involve the guidelines community. We hear the same thing from time to time but that is what the deviations are for.

Representative Metcalf: Suppose an employee or working would have an accident and two legs are cut off and they are unemployable. If he owes $1,000 in child support, is that continued on? Does he owe this? What do we do in cases like that?

Mike Schwindt: That is what is called circumstances. Until that court order is changed we are stuck with that. The best person to do that would be the person involved. If we know about it, we can accommodate that. If we don't know about that we go along in a happy little world thinking everything is fine then reality sets in.

Representative Metcalf: How long would this process take to get back to normal? This isn't his first concern considering he just got his legs chopped off. Will it take another 6 months or year to get him off child support?

Mike Schwindt: The judges have flexibility to that. They want to change that even before the stuff is worked out through the paperwork process. They can still make it effective at time of filing. Continued testimony.

Representative Metcalf: I see you have an attorney bar license. Do you pay the total license for the attorney involved?

Mike Schwindt: Yes they are working exclusively for us.

Representative Metcalf: How about an individual who has occasional work with you?

Mike Schwindt: No we wouldn't, only the ones who work exclusively for us. Continued testimony.

Representative Ekstrom: I didn't hear a lot of heartburn from the folks of Cass as they transitioned from county to state. I'd be curious to know if you experience a lot of loss of personnel to those who found the transition troublesome to the point of where they wanted to leave state service.

Mike Schwindt: Of all the people that have left, the best that I could concentrate on would be the regional administrators. Three of the 8 left. The gentleman in Minot and Devils Lake and Jamestown retired. They were ready for retirement. I told them if they had something they had to do to do it for the right reason. That was essentially it. Past that I know of no one else that

left outside of the normal course of people coming and going in the program. We have turnover but there is 172 people so you are going to have turnover.

Representative Bellew: Did you hire any of the retired people yourself? Are there some double dippers in there?

Mike Schwindt: Nope.

Representative Bellew: The case I'm thinking of is the states attorney in Minot who just retired from the county and got hired by the city of Minot full time. He is getting a pension from the county and a salary from the city of Minot. The other question I have is on the county foster care reimbursement to counties. That is the amount of money that child support used to pay counties. There were no federal dollars or any money like that.

Mike Schwindt: What it is, is the child support that has been there. When someone goes on foster care the amount that is due for child support is assigned to the state. As we go through the normal collection process we get the money and then figure out what has to happen to it. It was never used to send back to the counties. Instead it was used as a deduct on the revenue line. If you had $20 million for foster care and we are collecting $1 million of collections from child support that would be taken off the top of the money. That would be split between the state, county, and federal government.

Representative Ekstrom: The $25 fee per year for the obliges, that wasn't charged by the counties?

Mike Schwindt: We just started that. That $9.1 million is what we projected to the counties in terms of net savings. The green sheet is kind of a crib sheet for your use. Continued testimony.

Carol Olson: I would like to make a comment of the transition that occurred with moving the regional office into the state. As you well know those were county employees. When you make a transition like this it is a big deal. There was a lot of concern and nervousness amongst the

county staff about what is going to happen now. There always was some tension between county and state. With the help of Mike and his staff, we took a team out to each regional office that included Mike, Tove Mandigo, and myself. We met with all the regions and county staff. We took HR and immediately went out and met with all the staff to address their concern and answer their questions. We had follow up meetings with human resources because there is a transition that occurs with the annual leave, sick leave, and everything else that goes along with the HR. I just wanted to mention that. With the work of the whole department and fiscal as well, because of all the funding and book keeping that occur it was a transition that went very smooth because of the communication and outreach from the central office. Your question about whether there was a lot of people who resigned, one of the reasons we didn't lose employees was because of the way it was handled. A lot of these things don't get mentioned but I know it really helped in moving the county staff into being state employees. It took away the fear that they had with this kind of a change in their lives. Some of them had been there 10, 15, 20 years and now they are state employees. The whole department pitched in on that one.

Representative Bellew: Back to the fiscal note, your budget was $4 million less.

Mike Schwindt: We are trying to do the best we can with the taxpayers and take our best guess in fiscal notes. If I can add a bit to what Carol said. I was here when the department was created back in 1981. There was a lot of fussing going on. We didn't have it because of the leadership we got from the executive office. We had a couple people who didn't get the right paycheck for the first time but they all got the paycheck. One other thing I'd like to brag about is in 2000 we had 154 effective FTE's that means people actually working. We always have vacancies so we try to take out of the equation. We collected on average $287,398 for each one of those FTE's. In 2008 we had 155.6 FTE's and collected $530,387 per FTE. That is an

85% increase in that short of a period of time with essentially the same staff. There is a lot of good work being done there.

Representative Nelson: I'd like to commend the administration when there was an issue in the interim with the Devils Lake Region. I can personally tell you that it was handled very speedy and I was very impressed.

Representative Bellew: Any more questions? If not we will be in recess until Monday morning.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/19/09

Recorder Job Number: 7247

Committee Clerk Signature Meghan Pennell

Minutes:

Chairman Pollert: We will continue on our detailing. We will start with Medical Services today. Before we get started with Medical Service I know there have been some questions with the FMAP, 4.9 5% increase with the economic stimulus package. What does the 1% increase in the FMAP amount to general funds and what does the 4.5%. I know it hasn't been acted on but there have been a lot of people asking me that this morning. We will probably need that.

Deb McDermott: We were working on what that 1% would be as far as the Governor's budget. We will try to put together what that stimulus package too.

Maggie Anderson: Testimony handout (Attachment A). The first thing we have is the organizational chart. If you want to go way over to the left hand side we have three general areas within the division, long term care, services, budget and operations and program and policy. She went over the names and duties on the first page of attachment A. 2:40-25:50

Chairman Pollert: So the SCHIP rates don't matter if it's at $150 or $250 net because you are going to spend the same amount of money because you just keep advertising for it?

Maggie Anderson: We would not see that contract as contingent on a net dollar amount for the income eligibility guidelines that the effort would be the same. We would have the same type of requirements and criteria for the vendor to hit those target times a year where it is really

Best copy

important to reach parents about coverage for children. It is possible that we may ask them to tweak an activity or two if the eligibility goes to 200 and it is effective July 1. We may want them to do something specific to target that increase and get the new message out. We wouldn't see that dollar amount contingent on what level the SCHIP is at.

Chairman Pollert: You realize that you will probably going to the policy Human Services committee to explain the one stop call centers and the funeral set aside and SCHIP? Were you aware of that?

Maggie Anderson: I wasn't but I'm sure with the other areas that affect Medicaid and with the appropriate staff we will do that.

Chairman Pollert: Those motions were done in the full appropriations committee this morning. It wasn't only the DHS budget there were quite a few of them. We think that is quite a policy change and we think it should be heard in the policy committees as well as when it comes into here.

Maggie Anderson: Continued testimony.

Chairman Pollert: To refresh my memory do we have any say as far as what the Medicare claw back is?

Maggie Anderson: Correct.

Representative Bellew: I know you probably explained this before but why is this all general fund dollars?

Maggie Anderson: The reason it is all general fund dollars is because when the Federal Government took over providing prescription drug coverage to the dual eligible's this is really a portion of the dual eligibles. Those individuals who are Medicare and Medicaid only took that coverage over in January of 2006. Prior to that time those individuals would have been receiving their drug coverage through the Medicaid program because Medicare didn't cover

prescription drugs. At the time where they were covered through the Medicaid program a portion of that was paid by the federal government and a portion through FMAP. The federal government is now saying that we are covering that federal portion but we are still requiring the states to participate through this claw back or phase down contribution. It's supposed to reflect what the state's share would have been. They inflated this year with the health expenditures . They decrease it 1 2/3% each year to a point where we will be at 75% of what we should have been. It started at 90% of what we should have been but decreasing each year by 1 and 2/3. At the same time it is inflating by inflation. When we hit the 75% we will be exposed to the inflation and we will likely see it go up. That is why it is all general funds. They see it as our responsibility.

Representative Bellew: Do you have estimated numbers of the number of people that this covers?

Maggie Anderson: Yes. We are estimated 9.450 individuals a month and the monthly amount is $85.61.

Representative Bellew: That is the Medicaid and Medicare eligible clients?

Maggie Anderson: Yes that is the estimate of those dual eligibles.

Chairman Pollert: I made a copy of all the information that was provided to us last session.

Maggie Anderson: We do have the one for traditional Medicaid ready for you today if we get to that. We will have the long term care and DD one as well.

Representative Kreidt: The dual eligible's, now they qualify for part D now right, the prescription drugs?

Maggie Anderson: That is correct. This represents what they think our share of pay should be. Continued testimony.

Best copy

Representative Wieland: Do you have 1 person at Prairie Hills Plaza and one at South Central? One person for an office is not a lot. How many square feet do they have?

Maggie Anderson: At Prairie Hills Plaza, that person has the same size office as the other places. That is also where the staff for Aging Services, DD, and for VR are located. All of those areas are located. It just so happens that they have one person who is located there because it makes sense for them to be close to the DD staff.

Representative Wieland: So there are other people in the office that is just your share?

Maggie Anderson: Correct. Continued testimony 35:49-36:43

Chairman Pollert: Just to remind myself from last week. Fringe benefits were the health insurance increase, the salary increases, the 5&5, and the benefit increase is like FICA taxes?

Brenda Weisz: Your fringe benefits were the insurance. Your salary was the 5&5. The benefit increase was retirement and FICA.

Maggie Anderson: Continued testimony.

Chairman Pollert: You are saying that you need an increase in the FTE's if we go to 200% net? What would be the difference between the 150 and 200? I'm not talking the dollar amount. Is the workload that much different?

Maggie Anderson: Between 150-200 we estimated 1,158 children would come on the program. We further estimated that the majority of those applications would come to our office instead of the County office. Currently if families apply for benefits they may also apply for food stamps or the nutrition program. As you move up to 200% of poverty we believe that there are fewer families that would also be applying for those benefits. We estimated that a greater proportion of those applications would come to the central office. When we went to 150 we estimated an additional 800 children in the first year of the program. Our staff who were processing applications in our office are quite busy at the volume that they were at before. We

expected that we may need additional help for that. Rather than look at another FTE we decided to handle that with overtime and see what happened with the future. That's how we built the 09-11 budget because we had built some overtime in. When we built the budget going to 200% of poverty we knew that we would need additional staff for that, the dollars that were involved for that staffing were actually offset to what we had already built into that overtime line for 09-11.

Representative Bellew: You did ask the Department for a 160-175%.

Chairman Pollert: I did and I have a feeling that we will get those figures. I will ask for it here. The bill is going to come back to here anyways.

Maggie Anderson: We do have that prepared for you if we get to that point. Continued testimony.

Representative Bellew: Can you explain the Medicaid Autism Waiver? You are requesting an additional 1 FTE for that.

Maggie Anderson: The Medicaid autism waiver would serve children 0-5 who are diagnosed with autism spectrum disorder. It would provide an array of services. This came out of our stakeholder meetings where people identified this as a need for services. We did prepare a workgroup to look at this and develop services that would be offered for individuals who had an autism disorder. Then we would write a Medicaid waiver for that to allow those children to receive the necessary services. If you want a lot more detail in terms of the services we certainly can give you that.

JoeAnne Hoesel: This waiver is planned to be provided in the same process as the current self directed supports waiver is provider. The intent of a self directed supports waiver is to put the controls to identify what is needed for a family with a child that has a disorder on the autism spectrum because there is a wide variety that fall into that category. Of what we need to help

that child be as independent as possibly and participate in activities in school and community as would other children their age. We have designed this waiver to have three levels of service. This is also a unique waiver in that it would not require a child to have a developmental disability or as well, our current DD waiver requires that. The advantage of approaching that in this respect is because of the age it is not always known. Secondly, this will really reach the child population we are wanting to reach with this kind of waiver. There are three levels involved with the functioning of the child and the family would be identifying the continuum of services within each level. It can range from having supervision and someone coming to the home and providing on sight work and helping the child through cuing and the environment they are living in. It also ranges from speech therapists to physical therapists to a whole list of other professionals depending on the child. This waiver would look at serving 30 individuals. We made our best guesstimate based on our early intervention program and infant development program and the children that would most likely fall into that category.

Chairman Pollert: When you say a waiver, what do you mean by a waiver?

JoeAnne Hoesel: A Medicaid waiver is the permission that is granted from the centers from Medicare and Medicaid services to pay for things that they would not normally pay through the traditional Medicaid program. They are waiving the normal rules and allowing us to do something differently. Every time a state wants to move forward and pay for something that a CMS would not normally pay for through their state plan and state plan amendment we have to write a waiver.

Chairman Pollert: Could it be said that you would be giving away oversight or regulation for something like that. You are just trying to enhance the services for a group of people without having to go through federal government oversight.

JoeAnne Hoesel: It has actually come to the point where that happens. It is actually just a different set of rules that CMS uses. I would not want to give you the impression that there is less oversight because that is not the case. In the early days when waivers were available I'm told that it was a very short application and not a lot of oversight. I would have to tell you that since we have just written our waiver renewals for the DD program that were submitted January 1. That is what we consider our traditional waiver.

Chairman Pollert: Do waivers take a long time to get approved?

JoeAnne Hoesel: They have 90 days on the clock that they are supposed to provide us information. There are certain activities or if they have asked for a lot of information the clock stops. Generally 90 days to provide state information and a decision on that.

Chairman Pollert: Is the Medicaid Autism waiver going to be put in place? Has that been applied for now or will it be applied for July 1 of 2009 and the budgets, will it hopefully be in effect 3-6 months later.

JoeAnne Hoesel: If this would be approved through the legislative body we would anticipate that this would go into effect in 2010. It would take us a year to determine and talk with our stakeholders to determine the details and also apply for the waiver and receive comments from CMS and work through that process.

Chairman Pollert: You are guess is 30 individuals?

JoeAnne Hoesel: Yes. These are individuals that would not normally be served in our traditional DD waiver. That is really what we are attempting to achieve with this waiver to not only provide the services but also provide specialized services for this group of children that are very challenging, not only for families but for the systems that they touch. Minot State received a federal grant for school aged children that have autism spectrum disorders. We have been working with them and it will work nicely. It's Minot State and Ann Carlson Center

that are working on that one. This would be 0-5. They would also meet the criteria for the school aged one through that federal grant then they can continue to have services. Our plan is to work over the next two years to identify what we do with the transition age and also the adult population.

Chairman Pollert: So is every waiver an opportunity to enhance services to a special group of people. Is that an idea of any kind of waiver?

JoeAnne Hoesel: It tends to be. While there are exceptions, they do need to be cost neutral. You are really taking the same pot of money, unless it's a new service and you are doing it differently. You are receiving the ability and authority from CMS to use that same funding in a way that has been shown to be more effective than traditional services. CMS is very traditional medical model of what we would call that. They tend to be very comfortable paying for institutional care and hospital care. We are saying that we don't need to have those individuals receive services in an institution or in a hospital. We can serve them in our community. It is better for them. They often have better ability to transition because they are in the community with family and friends and their support systems. In order for us to use the money to do that we have to get permission to do that, and to get that permission we have to jump through the hoops and get that waiver approved through CMS.

Representative Nelson: What is the age spectrum in Medicaid Autism Waiver program?

JoeAnne Hoesel: It is 0-5 and they would be eligible for up to 3 years within that. A parent could choose when they would like that. It depends on the tests and how the child is doing. They may choose to do that at birth or shortly after. They may choose to do that at age 2, prior to the child going into the education system.

Representative Nelson: I'm interested in how they can diagnose autism at age 0?

JoeAnne Hoesel: Often times it connects with our early intervention program. What they look for is developmental delays. If you look at the normal developmental stages that a child goes through, what they do is assess the child. If there are delays in any of those areas then they can identify. What they are trying to do is remediate that soon versus letting it go until it becomes more pronounced and then it is more difficult to turn that around. There is a lot of different opinions about autism. Research continues and the department stays up to track on that. It is a continually changing field with the intent of really helping that child. It's an impact on the brain. What we are attempting to do is help when you can during a period of time that the brain is developing. We want to make an impact and intervene so that changes can happen in the brain and long term delays and developmental problems don't continue.

Representative Nelson: You aren't changing the spectrum of age in the waiver are you? How are you picking up the additional 30 people? Just in testing and developing criteria for the delays? There is no change in age requirements?

JoeAnne Hoesel: We don't have this waiver right now. If these children would show a delay they would have to be served through our traditional waiver or through infant development. Those services are not specific to Autism spectrum. This would take the children that meet that criteria and provide specific specialized services for that condition.

Representative Nelson: So there would be something that would trip a wire that there is a delay prior to this so these 30 individuals then in the autism waiver program should be offset through another program? Would you agree?

JoeAnne Hoesel: I think there is a likelihood that it might happen. I can give you an example. Even in our current mental health system and DD system and also we know we have young adults and adolescents that have autism spectrum disorder. They are served currently in our mental health system in our developmental disability system if they have an intellectual

disability. They are served in the school system. However, the school system only uses individuals who have an autism. It is only one diagnosis. It is very stringent. What we lack in the state overall across the age span is specific specialized services. That is what is frustrating for families and certainly those who work with these children as well. You need to know what you are doing with these individuals so that you have good outcomes. Because the research is new and changing on a daily basis, it's important to target your interventions. That is what this waiver does. It targets what we feel at a point in time when we can have the most impact. These are babies and infants that are developing. If we can get in there early research does say that there is a likelihood of turning it around.

Representative Kreidt: Are there other states that have already put in for these waivers and received them that we can look at and follow?

JoeAnne Hoesel: We did an analysis and we have copies of those waivers from other states. We used that in developing this waiver. There are a number of states that do have these waivers but not all at this age but some do. We have looked at those and certainly can make those available to you as well.

Chairman Pollert: So when you say revenue neutral are you saying that it is a way of providing services to an increased number of clients for the same amount of dollar that we would get from the federal government?

JoeAnne Hoesel: My understanding is that with a new service it would need to be at the average cost that is currently covered in the Medicaid waiver.

Maggie Anderson: Cost neutral waivers mean that in the aggregate the waiver needs to be cost neutral to what the institutional service would cost like our home and community based services waiver. We look at nursing facility costs and say that in the aggregate it is cost neutral to serve individuals in a nursing facility. Each waiver is compared to institutional services and

looked at in the aggregate to ensure that we have cost neutrality. That is an area that CMS requires significant reporting on.

Chairman Pollert: So the cost for the department could go up because of the added case load. The average cost of a nursing facility versus a less restrictive environment would be less. It is kind of a loaded statement.

JoeAnne Hoesel: One requirement for all waivers is that individuals have to be screened to an ICFMR level of care. One could make the case that whether we have this waiver or not, they are going to be functioning at that level that they need assistance. We prefer not to serve them at an institution. We are saying that we think that we can do it better and better for a family with this waiver. They do have to meet the functioning level of an ICFMR just like it has to be a nursing facility ICFMR in this case.

Chairman Pollert: Basically what you are hoping is to serve more clients. You could say that for the same amount of dollars you could serve more clients through a less restrictive setting than through an ICFMR.

JoeAnne Hoesel: Exactly. I would add that we feel more appropriately because that is what the research is saying. It is really bringing the research and the funding mechanism together.

Representative Bellew: If this is a Medicaid waiver why wouldn't this salary be under FMAP?

Maggie Anderson: None of our salaries under Medicaid are under FMAP. We are paid on what is called FFP, federal financial participation. Depending on the area of the administration of the Medicaid program we received different match rates for that. Most of those match rates are 50/50. For example, my salary is actually up against an allegation. For all purposes it is around 50/50. Our medical staff or any of the staff that have operations with MMIS receive 75/25 match. The majority of our staff are at 50/50.

Chairman Pollert: With that we should go on further. Where are we at now?

Maggie Anderson: We have finished salaries and are moving down towards the bottom of the second half of the first page that starts with travel, supplies and so forth. I will point out some of the change where you will see the biggest difference in that total changes column. One you will see where there is a significant increase in travel. This is for a couple of reasons. I spoke to you earlier about the program integrity position. In addition to a position that focuses on those areas CMS is also doing a lot of training in the area of program integrity. They are asking that all of our utilization review staff and our fraud and abuse staff be trained on the specific areas where we can look for and detect the integrity problems within the Medicaid program. In addition to that our money follows the person individual travels around the state significantly going to intermediate care facilities for the mentally retarded, going to nursing facilities, working with county case managers, and so forth. We have a significant increase from in state travel for that. We also have increases in the area of travel for the individual who runs our medically fragile waiver. We also have a responsibility to reach out to families and communities and people who are aware of the necessary referral networks to refer children for that medically fragile waiver. That individual would be traveling which wouldn't have been included in our previous budget. We also have the new MMIS coming up where we will have some commercial off the shelf products. Some of those will require initial and ongoing training in order to make sure that we get the most out of the reports and the data and information available. Finally, the centers for Medicare and Medicaid services are requiring some new federal reporting. Some of that is actually starting in February of this year where they are bringing people in to be trained and that will be ongoing where they are looking at modifying. They are kind of going more granular with some of their federal reports so we can provide some additional detail and we expect there to be additional training and the need to access that training so we can report correctly for them. That is the big picture of where the increases

are. We still have our existing travel in there for program staff to go meetings on Medicaid changes or updates. I go to the state Medicaid director conferences. We have our home and community based services staff who go out to the counties and not only provide training but review and audit the changes for the individuals who are approved for home and community based services. It is all of that type of travel for the FTE in the division.

Representative Wieland: Does the training take place elsewhere than Bismarck?

Maggie Anderson: Yes. Very little of the training that our staff will receive on to how best utilize MMIS will not occur in ND. This is training that our stall will receive to be better at their jobs and be better at mining the data and using the information in the MMIS system. The training that we will do to provide is not specifically included in that in the new MMIS. There will be some of that in our budget as we go out to train county staff and to train providers. That is not a significant share of the increase but it is a portion of the budget. That training won't necessarily be in Bismarck either. We plan to go around the state and do training on MMIS and try to get as close to the provider groups as we can to do that training. We are going to use technology as much as we can to do that. We know we will be going around the state to do that. Another area where we have increases is the supplies IT software. A significant portion of that increase is the ink cartridges that are needed for the printers. They are a necessary for the processing of claims and printing materials. Miscellaneous supplies, a significant portion is related to the 1.5 FTE with the health steps position and the supplies and the equipment that would be needed for that person. The original IT hookup and the computer, office equipment, and those kinds of things. It is located there right now in the miscellaneous supplies.

Chairman Pollert: When you look over the previous biennium and you look at year one where you are at and ask yourself that you need that many supplies for 1.5 FTE's.

Maggie Anderson: Where it is located, once those positions were filled those dollars would move to the appropriate area to locate that large sum of computers, the IT hookups, a desk, a chair, and all of those things that you need to purchase for an individual when you hire a new position. Those items aren't currently available. It is almost difficult to compare it to our current expenditures without that added amount for the new position. We probably would be very much in line with what our current budget is. The other major increase that you are seeing on here is for rent and that is the result of two things. The eligibility policy staff who are over at Northbrook. They were not budgeted at Northbrook in the 07-09 biennium. That increase needs to be included in here, and the individual who is at southcentral was not budgeted. That increase is reflected here as well.

Representative Bellew: Every other department has had a huge increase in printing because they said Office of Management and Budget has raised their rates by 9&9. Yours is $11,0000 less?

Maggie Anderson: We budget that based on what we are currently using. We are fortunate that our printing was lower in the first year. When we took a look at that we budgeted based on that. We are spending more on the cartridges than on the printing. There are other miscellaneous changes and I would be happy to explain those. Then you will see down at the bottom that little increase you talked about with the claw back and how all that ties together. Where I covered the $23.1 million in operating fees and services in that detail that I broke out. Otherwise we would have had a $327,000 shift in operating expenses and the operating budget adjustment of the $241,318 was specifically related to the claw back in the executive budget recommendation. That ties out the first page. Then we have the totals of the operating. We will get into the grant funds on the next page. We will be able to come back to this and tie out to the total grant funds on this chart. One of the things that we provided to you when we

were doing our long term care testimony was a chart that looked like this but was legal size. Now we provided to you the same chart for the traditional Medicaid services. I won't walk through all of these services with you but I will just walk through the nature of the table. The first column on the left is an actual service. We have those listed in the top ten order which is the same order we show on attachment G to your testimony. That is the color sheet.

Chairman Pollert: Are you getting to the point where you are going to start on this? I would like us to go into depth with how you come up with the rebasing figures for physicians, the inpatient hospital, and the out. We will spend quite a bit of time on that. I hope we ask questions.

Maggie Anderson: Yes. The first column is the services. The second column is the 2007-2009 appropriation. I should point out that three lines from the bottom you will always find healthy steps on a separate line outside of the Medicaid services. Again, that is because it's not a Medicaid services. It is its own program under a different title under the social security act so we break that out separately. The next column over are the cost changes that were considered as we built the budget. The next column is the case load or utilization changes. Then FMAP changes. The rebased services which is the amount for the rebasing. Then the inflation of 7&7 or for some of the rebased services. The amount needed for medically needy and the amount added for immunizations for children and healthy steps at 200. Finally the total changes for the 09-11 budget were added to the house. Very simply walking through for example, which physician services the third line down our current appropriation is $64.1 million. Our cost changes were $4.7 million. Our case load changes were $10.1.

Chairman Pollert: What are you saying then when I look at hospital, drugs, and physician services. You show the case load utilization dropping. Are the amounts of visits dropping?

Maggie Anderson: The data that we used as we prepared the budget was indicating that we were having fewer people receiving services for those area that we were seeing negative. Some of the physician services you might recall from my overview where we are clarifying some of those services that were previously reported under physician services. An example of that would be if you would go down to ND health tracks EPSDT screenings. You will see that we had a $2.8 million case load cost change. That is one area where we are clarifying that service and getting those codes that are used for EPSDT into the correct category. A portion of that case load cost change for physician services is really reflected at an increase down in health tracks. Another example of that would be psychological services which is about 5 down from health tracks. Overall, yes that is what those numbers are saying is that more people are receiving fewer services.

Representative Bellew: In the past we got how you actually build your budget or how you came up with a final dollar amount. The example that you projected would be 2,000 visits to a physician at an average cost of $22. Then you add in your rebasing.

Maggie Anderson: That is the chart we referenced earlier. We will use that.

Representative Nelson: Would you go through the Physicians services column? How did you arrive at that? Would you go across all those areas and give me your equation. Whether it is utilization or the next column over. Let's start with cost changes.

Chairman Pollert: The way you did the rebasing or the increases was different for physician services versus how you did it for hospitals. As far as the numbers you expected.

Maggie Anderson: Each of those services areas has a different way to go about establishing costs and looking at that so we can get through that. Handout B.

Chairman Pollert: Could you go through how you got to that number?

Maggie Anderson: When we built the appropriation for physician services it was built at $12.89 for 07-09. When we started building the budget. Our state fiscal year 08 average cost per unit was $14.96. That is where our average was at that time. We would look at where that trend was going. IN addition to that we applied a 5% increase. We had to take into account some of the shifting that was happening. That is how we got from the $12.89.

Chairman Pollert: So the $14.96 adds about 75 cents so it's like $15.75. That doesn't get us to $17.61. That little extra number comes from?

Maggie Anderson: That also includes the rebasing and 7& 7 of that number.

Representative Bellew: The sheet we received last year said the average case load was about $120,000. Is that a different sheet?

Maggie Anderson: Is it different from the sheet that we provided?

Chairman Pollert: When I look at what we had last session, you gave us different types of forms next biennium.

Maggie Anderson: We are going to provide those to you in the morning. We didn't think we would get to them this afternoon. I can wait with some of this for tomorrow morning. If I'm correct we use that . Handout testimony (Attachment C).

Representative Wieland: When they talk about the rebasing on the physician where does that 25% come from? Will that be explained in here?

Maggie Anderson: If you would pull out the sheet that Brenda provided to you last week it shows it. It was colored. If I could first go through the top sheet this was something that you requested in terms of what percentage each of the rebasing items reflect. If you look at the 07-09 appropriation total for hospitals its $156.7 million. The rebasing for year 1 only is a 14.05% increase.

Chairman Pollert: Is it easy to explain why chiropractors and ambulances would be drastically higher for the percent changes compared to hospitals, physicians, and dental?

Maggie Anderson: Each of the provider types has different reimbursement methodology. We certainly had to go about collecting cost information and preparing the information that the vendor needed to use to look at that information and make the assessments for what it would look at to pay at cost in very different ways. Cost reporting and collection of data is very standard for hospitals. They have a Medicare cost report that they have to file every year. It's used for data collection purposes and comparison purposes. It's not a very difficult thing for the hospitals to release that report from the vendor to use. From the other areas, the cost recording doesn't exist. Each of the vendors in these areas had to come up with a methodology to actually collect that. As they did that, for example with physicians we did not go out to every physician or every physician practice in ND to collect cost information. We worked with the medical association and some of the larger facility or physician group practices. They had some experience using some regional and national data that is collected from those entities. Using that data to estimate where ND stands in terms of how close we are to cost. We talked about the dental services where the instrument was very difficult for the dentists to complete. In return we had very low response rate to that. So we looked at the percent of bill charges approach.

Chairman Pollert: Aren't the dentists figured on 75% of bill charges?

Maggie Anderson: On setting the fee schedule at an average of 75% of bill charges.

Chairman Pollert: So would you have used that as a base?

Maggie Anderson: The OAR that we submitted was for 60%. It was funded at 75% in the Governor's budget. We were unable to complete the report because of the sample. That is yet another way of looking at how this information was collected. The ambulance service, the

vendor that we hired actually has extensive experience with the ambulance service and actually owns/runs an ambulance service in another state but dose consulting with this type of information on the side. We were very fortunate that they understood the record keeping and the business of ambulance services and they recognized that in small rural states you have a real discrepancy between your large metro type services and your small rural primarily volunteer in trying to establish costs of doing business with those is not always easy. They took this on as a challenge too. They would like to market the methodology to other states to look at. With the ambulance services, they developed an amount at cost. Then they also provided for the department as part of their reporting mechanism and what it would cost to go to Medicare. It wasn't something that was requested but it was part of their report. That information was requested of us during the budget process and we provided both of the costs.

Chairman Pollert: So for ambulances you came up with an average between what bill charges or costs would be and the Medicare rates?

Maggie Anderson: No we didn't do anything with the bill charges. We actually set out to establish the cost, what it would take to rebase ambulance services to cost, and that is the number that is on your OAR sheet. If you look under the category 4 it is the 8th item down. That total at cost would have been $5.4 million of which $2 million would have been general funds. The rebasing total was around $4 million instead of the $5.4. This is your one only.

Chairman Pollert: So the ambulance services off of the study or information that you have would have showed the costs to be at the $5.4 million?

Maggie Anderson: Yes. The rebasing amount for ambulance in the executive budget is $2 million. It is what you see there. Of that $743,710 are general funds. That is in comparison of the $5.4 million in the OAR which would have been at cost. What is in the executive budget

represents rebasing the ambulance fee schedule to the Medicare rates on July 1, 2009. In the second year of the biennium, inflating that forward by 7%.

Chairman Pollert: Ok.

Representative Nelson: To get to the $3.4 then that would include the 7%?

Maggie Anderson: The reason that the OAR is in the shading is that it was funded at a level different than what was at the OAR. It was submitted at the $5.4 total and funded at the $2 million total. In response to your question the 7% of ambulance for the second year is $187,814.

Chairman Pollert: So the total of the ambulances is roughly $2.2 million.

Maggie Anderson: That is correct. Not that you need to do it but in case you want to make notes on page 11 of my overview testimony is where I break out all the rebasing totals as well as what the inflation of what each of those will be. It is also on the detail sheet.

Chairman Pollert: Have we had these figures in another biennium or did we just decide that since we have a $1.2 billion surplus we are going to throw it out there?

Maggie Anderson: No. SB 2012 directed us specifically to collect the information as to what it would cost to rebase these five services. That is why the department went forward and provided this information and included it as an optional adjustment request on our budget.

Chairman Pollert: So then from the study would these have been the numbers or would the numbers have been drastically higher?

Maggie Anderson: The physician number on your OAR sheet you will see the total amount was $53 million. That is what the vendor reported back to the department that it would cost to rebase physician services to cost. As part of the information that Office of Management and Budget gathers from the department in the budget process we were also asked for what it would be at 25, 50, and 75%'s. Looking at all of the state's budget priorities, 25% was

selected. Our OAR was for the $53 million. That was the total that the vendor came back to us. I don't believe our numbers will change regardless of anything other than the vendor's reports to us. The vendor came back and said this is what it is going to cost to rebase ambulances and so forth.

Representative Nelson: Could you get us the number at 50 and 75%?

Maggie Anderson: Yes.

Chairman Pollert: If we wouldn't be doing these dollar figures would you say that our healthcare and everything is going broke?

Maggie Anderson: We certainly have heard from the Medicaid providers that the reimbursement rates are not keeping up with what it is costing them to deliver services . Aside from bill charges we are talking about the true cost of what it is costing them to deliver services. We have heard that in this committee from stakeholders during hearings that the Medicaid rates in many areas are not keeping up with what it is costing the providers to deliver those services. In the Medicaid program we do have a responsibility to assure access to services for our clients.

Chairman Pollert: Any other questions? We will pick up with the remainder of the documents in the morning.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. 1012 – Medical Service detail

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/20/09

Recorder Job Number: 7331

Committee Clerk Signature Morgan Pettit

Minutes:

Chairman Pollert: Called the meeting to order and took roll call. We will continue our discussion on medical services.

Maggie Anderson: If we could go to that packet of information from yesterday and walk through the ambulance and the dental pieces of that. Then I will let you decide on how you want to do the SCHIP. You had asked for the 165/175/185 scenarios. Now it has been assigned its own bill number so I'll let you decide how you want to proceed with that.

Chairman Pollert: I'm wondering because we are going to have to have the discussion later instead of now. I would say we wouldn't have the discussion now. I would say that we won't have the discussion but you will need the information for Chairman Weisz's committee. The one question I have is that the authorization of SCHIP doesn't happen and we go to 200% then general funds will have to cover it. Aren't they trying to fund that with a 61 cent cigarette tax?

Maggie Anderson: That is one of the versions of the SCHIP bill is to fund the reauthorization of the program with a tobacco tax.

Chairman Pollert: But that hasn't officially happened yet?

Maggie Anderson: No it has not. It passed the house and it passed the Senate finance committee. At this time yesterday I didn't know when the vote would happen.

Chairman Pollert: We will skip that part of the discussion until the bill comes in from the house human services policy.

Maggie Anderson: We also covered the increases as a result of the rebasing which was the first document of the packet I handed out yesterday. The next document in there was the ambulance code comparison that was requested. You asked for a comparison of the bill to pay and what that percentage is by ambulance code so we had provided that to you. This is using paid dates of calendar year of 2008. It is very up to date information. You can see by code we have ground mileage codes, ALS, we have BLS which is basic life support, and then to the rotary and fixed wing transport codes and then the mileage that corresponds to those rotary and wing codes, and finally the ambulance response and treatment where they respond to the scene and treat the individual there for what is needed but they don't end up transporting them back to a hospital. Those are the various codes that are based on the current fee schedule and calendar year 2008 dates of service. If you think about the fee schedule being increased for dates of service you will have a mixture of payments in here that some included the 5 and some included the additional money that was provided last year in SB 2012 plus the 4%. The footnote at the bottom provides the information on the additional money that was provided in the department's appropriation bill last year, specifically for ambulance services. That is the information that was requested on the comparison of ambulance rates.

Representative Metcalf: If we make that increase of payments for the ambulances are they going to increase the amount billed?

Maggie Anderson: We would have no reason to believe they would increase the amount billed. The amount billed is what they need in order to operate the business. It is their salaries and overhead, and the deprecation of their equipment. While salaries may increase for people, we wouldn't expect them to arbitrarily increase their amount billed. They are to bill Medicaid

their usual charge. If they would charge a non-insured individual $1,000 to transport from my residence to the hospital and they would need to charge Medicaid the same amount.

Chairman Pollert: So you are saying that ambulance services could not charge a higher rate because they have to have a nursing homes equalization of rates?

Maggie Anderson: We do not have equalization of rates. That is unique to nursing homes. What I'm talking about is usual and customary charges which is very different from the nursing home equalized rates. It means that you can't charge Medicaid more than they charge other payers. It is generally not an issue at all with your medical services. Sometimes it enters in with your home and community based services where we have to be more diligent with the usual and customary. What I'm saying is that they would have no reason to increase their billed charges because we aren't paying them a percentage of billed charges. What is funded in the Governor's budget is to pay to rebase their fee schedule to the Medicare rates. Let's say we would increase their bill charges to 10%. It is not going to affect what we pay them for the Medicaid program for reimbursement. We will still reimburse them off the new fee schedule that is rebased to Medicare then inflated by 7% in the second year of the biennium.

Chairman Pollert: So ambulances will be paid at the Medicare rate and the 7% inflationary for the second year?

Maggie Anderson: The fee schedule will be reimbursed to Medicare July 1, 2009 and will be inflated July 1, 2010. After July 1, 2009 it is not every year going to be rebased to Medicare.

Chairman Pollert: So two years from now unless we do something different, the 2009 rates will be in effect and we will look at inflationary unless something happens and we want to go to 2011 rates?

Maggie Anderson: When we inflate the rates by 7% on July 1, 2010 then those would be what the fee schedule would be for ambulance until additional changes are made by the legislator.

Chairman Pollert: I don't want to get into the funeral rate increases. There they can. I remember asking if they would be lowering the rates of a funeral to the private payers. Their answer was no. I know it's a different subject. We will get on that subject when we do get the bill from the policy committee.

Representative Kreidt: We are rebasing on the Medicare rate. Now ambulances are also for people on Medicaid assistance for the rate. Do you have a rate for ambulances that they are reimbursed on? If you do, why are we using Medicare rate for the rebasing?

Maggie Anderson: I'm not sure I understand the question but I'll try. The vendor who is hired to do the cost rebasing study did provide a number that was in our optional adjustment request that would have rebased the ambulance fee schedule to cost. As an alternative to that, the Governor funded an increase to go to the Medicare rates. Right now we have a Medicaid fee schedule in which this is based off of. We are going to take that fee schedule and increase it to the Medicare rates effective July 1, 2009. If you have an individual that is both Medicare and Medicaid, the chances of us paying on those claims would be very little. We usually process for coinsurance and deductible so we may pay up to the coinsurance. We wouldn't pay any additional. We currently have a Medicaid fee schedule and we are going to rebase it to Medicare July 1.

Representative Kreidt: There would be a difference between the two rates. Medicare is usually higher than the Medicaid rate. The ambulances are receiving the advantage I think. In nursing homes when we rebase we don't use the Medicare rate to rebase. We use the cost.

Maggie Anderson: Rebasing the ambulances to Medicare than to cost is a lower dollar figure. In the optional adjustment request, the amount for the ambulances to rebase to costs was $5.4 million in total funds and to rebase to Medicare was a little over $2 million. It is less expensive.

Chairman Pollert: Say we want to give them more money. Then we want to give them less money. Do you increase the inflator to 10% or do you decrease to 5%, or do you just whack money or add money to the top? It's easy to explain we are going to Medicare. As a committee and section we have a discussion to decide whether that is appropriate, if we should go higher or if we should go lower.

Maggie Anderson: When we wrote the request for proposal for all of the rebasing studies, we required the vendor to provide us excel spreadsheets that would allow us to do what if scenarios. What if someone wanted to fund this at 90%? What if someone wanted to fund the Medicare at 90%? We would go back and work with our vendors and our spreadsheets and be able to do that. If it was the committee's desire to look at the 100% of costs for the ambulance providers but you didn't want to quite go to 100% of costs and wanted to do 80% of costs, we would work with the vendor that we have for that project and prepare a what if scenario at 80%.

Chairman Pollert: So the current rate for ambulances is roughly at what percent of Medicare?

Maggie Anderson: I don't have that number on me but we could provide that.

Chairman Pollert: Could you get me that number?

Maggie Anderson: Yes.

Representative Nelson: In the ambulance division there is a number of codes in your handout. As I understand this, in your rebasing formula you are bringing every one of these codes up to Medicare rate?

Maggie Anderson: That is correct. A couple of those codes are technically over the Medicaid rate as of now. For example the fixed wing air mileage is over the Medicare rate. The rest of them would be brought up to Medicare that is correct.

Representative Nelson: From a practical standpoint are you dropping the fixed wing air mileage down to Medicare or leaving it where it is at? There are obviously some discrepancies. If I had a helicopter I would be happy about the way you rebased. If I had some other areas like ground mileage, they don't seem to be doing as well.

Maggie Anderson: Just for example, the ground mileage would see an increase going to the Medicare rates with the exception of the fixed wing. That mileage there is a bit higher than Medicare. The estimated difference was about $20,000 a year with mileage for the fixed wing only. The rest would be all increases. I don't think that the ambulance providers would be concerned about the ground mileage.

Representative Nelson: I just want a yes or no. Is it possible to rebase this and weight one area as more important than others? If this committee thought there were areas of ambulance services that needed more help than others we could change that rebasing formula?

Maggie Anderson: I hate to answer just yes because it will be misleading. You can rebase and do whatever you want with those numbers and allocate those numbers. You did that in SB 2012 last time. You gave us a certain amount of money and told us to work with the ambulance association and allocate that money where it was most needed. You can see from my footnote that we did that. They told us to put it to the ground mileage rates, put it to the BLS non-emergency transport and put it to the BLS non-emergency transport. That is where we put the extra allocation before the 4&5. Can you rebase and then reallocate? No. That is kind of mixing two concepts. Can you put a certain dollar amount towards increasing ambulance services and direct us how you would like us to allocate that? Yes you can.

Chairman Pollert: So we don't have to have this discussion is it the same with the Chiropractor's? Is it based on 100% of the Medicare?

Maggie Anderson: The chiropractor's amount is based on 100% of costs based on the rebasing study.

Chairman Pollert: So that would be similar to how we are looking at doing ambulances at 100% of the Medicare rate.

Maggie Anderson: It has nothing to do with Medicare.

Chairman Pollert: So the chiropractors are different than the ambulances?

Maggie Anderson: The chiropractors were funded in the executive budget at 100% of cost rebasing.

Chairman Pollert: So chiropractors were based on costs submitted by?

Maggie Anderson: The vendor who we hired which was a public consulting group. They worked with them to collect information and provided it to us based on the calculation is how we came up with the amount that was in the OAR. That was funded in the executive budget at 100% of costs.

Chairman Pollert: Dentists are at 75% of bill charges.

Maggie Anderson: Yes. That is your next handout. This is increasing the dental fee schedule on July 1, 2009 to the average of 75% of bill charges. Not every dentist will be reimbursed 75% of their own bill charges. We take the average; establish the fee schedule and that is what people would be paid. Then in addition to the executive budget there is a 7% inflation on dental services for each year of the biennium. The first line of the next spreadsheet that you have shows what is in the executive budget comparing the 07-09 appropriation to cost and case load changes that we had in preparing the budget? The rebasing of the dental fee schedule to the average of 75% bill charges which was $2.4 million to increase the schedule to 75%. The 7&7 inflation was $1.7 on top of that rebasing for a total of $18.1 million for dental. You asked us to compare that to what it would be without the rebasing to 75%. Again, you have the same

numbers in the first two columns, and no number in the third column. The inflation would just be on the base budget rather than on the budget of rebasing for dental to a total of $15.4 million. The difference in total dollars is $2.7 million should you want to look at the removing of the rebasing.

Chairman Pollert: So is it 75% of bill charges as of what day?

Maggie Anderson: I believe it was HB 1246. That bill started out at 85% and was reduced to 75%. Then it was averted from 75 to 85 for children and adults. In the end it was not a percentage but a dollar amount that was provided and we were to add on to the children's fee schedule which we did. We worked with Mr. Cichy and members to allocate those dollars. There was no funding at a certain percentage?

Chairman Pollert: There is no law in the books against 75% bill charges?

Maggie Anderson: Correct

Chairman Pollert: It is a base that we talk about for discussion purposes?

Maggie Anderson: There have been bills that have gone through the legislator in the past and that was what was funded in the Governor's budget was the 75%.

Chairman Pollert: 75% of charges as of what date?

Maggie Anderson: When we prepared the information for the optional adjustment request and then for the funding at the 75% we used dental services paid during state fiscal year 2008. All of the estimates we did were based on what the schedule was at that time and then what the difference would be at that time to rebasing them at 75% of the average.

Chairman Pollert: If I look at the OAR sheet for dental services for the 09-11 biennium, it shows general funds of $214,000. It shows a total of $580,000. Yet we see the requests from the governor's budget coming in at $2.7. That is going in the other opposite way where the OAR is considerably less than what the Governor proposed in his budget.

Maggie Anderson: That is an item that was highlighted at a grayish purple color. Which indicate it was funded at a different level than what was in the OAR. The OAR was based on an average of 60%. The Governor funded the executive budget at 75% of the average.

Representative Wieland: The problem that I have is when I'm reading what the columns stand for and see the numbers, I don't have any relationship as to where the numbers came from and where they were arrived at. I'm having trouble following where the numbers came from. If I understood that I wouldn't have any trouble following the bill charges versus the rebasing.

Chairman Pollert: Our 07-09 appropriation is $13 million. If we 2008. We had to have data that was already completed in order to build the fiscal note.

Chairman Pollert: So if you rebase at 75% of the bill charges that would add $2.4 million.

Representative Wieland: 75% up from what? What was it before?

Maggie Anderson: There is no set percentage right now. Every code is reimbursed based on a fee set by the department.

Chairman Pollert: Could you say you went to the dental association and they went out and got a report that showed what the average bill charges were and that is what you use for state fiscal year 2008?

Maggie Anderson: We have that information in that office. When dentists bill us they bill us their usual and customary bill charges. We were able to bring all that data in and establish an average and take 60% of that and look at what our current fee schedule is. I'm just going to walk you through a code. The first code is periodic oral evaluation. The total amount billed to the department for adults because most of our children's services are already above 75 or close to that. The largest impact is for adult services. The amount billed to the department in state fiscal year 2008 was $175,000 for that service for adults. When we take that number and

average it based on the number of observations which was $5,759. We take that times 75%. We come up with $22.72. When we set a fee schedule for that service at 75% of average bill charges we would be paying $22.70 for a periodic oral evaluation. Our current fee schedule for that service was $17.78 for that service. That increase for that one service per occurrence is $4.94. That one service we are expecting to cost us an additional $28,438 per year. That's how we looked at it. We went by code for everything we pay under dental services and prepared the spread sheets.

Representative Wieland: Give me the number of people involved.

Maggie Anderson: 5,759

Representative Wieland: So you divided the $175,000 by the 5,759?

Maggie Anderson: That would be my assumption

Representative Wieland: Are you using the same number of evaluations. To figure out the total, are you using the $5,759 evaluations or what number are you using there?

Maggie Anderson: We would believe utilization to be at the level that it currently is. We would take the 5,759 times the difference of 494 and that gets you $28,449. It is off a bit. We know we would expect a utilization for year 2 so we multiply it by 2.

Chairman Pollert: So when you do the 7&7 you are taking the 13.3 plus the $2.4 million and taking it times 107%? For the second year you would take that figure times another 107% and add those two.

Maggie Anderson: It is similar to that but of course we have to build in our utilization into the tables so it's not just a calculation.

Chairman Pollert: I understand that but for simply explaining trying to tell people how we come up with that, that is basically how it is done.

Maggie Anderson: We add 7% to the fee schedule. With this particular example at 75% of average bill charges, that 2272 we would add 7% to that on July 1, 2009. Then we would add another 7% on July 1, 2010. That is how we would do it.

Chairman Pollert: So when I go down to no rebasing with the 7&7, you are paying on the current schedule of how you pay.

Maggie Anderson: That is correct for the example that I walked through where I indicated that evaluation, our current fee schedule is 17.78. Rather than rebasing that to the $22.72 we would take the $17.78 times 7 and times 7 the second year. That is what the bottom numbers reflect.

Chairman Pollert: The question I asked about the ambulances currently being paid at what percentage of the Medicare rate. I know it's not similar to dentists. Where did you get that particular number to base off of?

Maggie Anderson: Where they currently are? I don't have that at my fingertips but we could get that to you. I do know from the data we pulled for doing the 60 and 75%, there aren't a lot of children's services that are below the 60 and 70%. We could get that percentage for you of how the fee schedule compares to that. I don't have that at my fingertips. Are they currently at 52% of bill charges? That is what you are looking for?

Chairman Pollert: Yes.

Representative Nelson: Let's move on to utilization. This is one area where there is a fairly significant increase. Going back, we have heard in the past that many dentists don't accept Medicaid patients because the reimbursement is so low. Was that one of the considerations in your formula for the increase in utilizations was the fact that rebasing and the inflator increase would allow more dentists to accept Medicaid patients.

Maggie Anderson: I know yours won't look like mine but you are looking at this sheet? S you are looking at the average case load increase of $1,919? That is not reflective of the rebasing. The rebasing is solely looking at cost rebasing. That case load is based on what we are seeing with our trend. When I hand out what you referred to as the spend down tables you will see that in there. We are providing more services to the Medicaid clients in the dental area. We had to build that utilization into the budget.

Representative Nelson: Is it a fair assumption that some increase number of utilization will take place if rebasing takes place?

Maggie Anderson: That is a fair assumption. I think some of what you are seeing here in our numbers compared to if you are looking at this sheet for the budget for 07-09 was based on a case load of $9,772. We weren't experiencing and we budgeted $11,691. I have seen some of that increase because of the increases that were provided last time in the appropriation.

Chairman Pollert: That was a discussion e had during the last session of whether the utilization in the dental arena would go up for low income. Did that happen?

Maggie Anderson: I think that is what our utilization numbers are showing us is that we are seeing more Medicaid clients receiving additional services included in that is the dental fluoride varnish that the legislator authorized for practitioners other than dentists to apply during last session. Those numbers, which are dental services and very important for children will be contained in the utilization increase.

Representative Bellew: Why did the dental services get a 7&7 when physicians and the rest only got a 0&7?

Maggie Anderson: That is how the inflation was funded in the Governor's office. We have heard from constituents, stakeholders, legislators, clients, and so forth when they are having

difficulty getting access to services. It was funded that way coming into the Governor's budget to help ensure that access to services.

Representative Bellew: That was not the department's recommendation but the Governor's?

Maggie Anderson: The department submitted the OAR for the 60%. We submitted OAR's for the 7&7 inflation for providers?

Chairman Pollert: So hospitals got rebasing of 0&7? Dentists got 7&7?

Maggie Anderson: Correct.

Representative Ekstrom: If you look at page 11 of the overview there is a chart there that shows exactly and it is all in one spot.

Brenda Weisz: In response to Representative Nelson's question can I add one more comment on utilization? As far as utilization you brought up a very good point about the fact that when we built the budget, how we built it is we took a look at utilization, looked at cost data, and put the rebasing on top of those numbers. If the new rebasing for any of the categories increases utilization in the Medicaid that increased utilization would not be reflected in the numbers. I thought we should clarify that too. The utilization built in this budget was what we were seeing all the way up to the rebased amount without any additional utilization added which might come in from rebasing.

Chairman Pollert: To be fair to everyone else, this sheet shows hospitals, physicians, chiropractors, ambulance, and dentists, is there anyone else rebased and the 7&7?

Maggie Anderson: Other than the nursing homes where the rebasing of the limits is in statute, then we rebased to costs every year as well as to other providers who are paid on costs such as the DD providers and PRTF's. The 5 provider types that the department was specifically asked to rebase in 2012. Those are the ones we did. We didn't single out any additional ones.

Chairman Pollert: You are saying that when we get to nursing homes we have to have this same discussion.

Maggie Anderson: It is different because that is in statute.

Maggie Anderson: Testimony Handout (Attachment A).

Chairman Pollert: This is the information that Representative Nelson asked for.

Representative Nelson: Quickly trying to work the numbers through. If you go to the chart on page 11, in that you have rebased at 25%. It looks to me that it corresponds with the physicians at 50% in the handout you just gave us.

Maggie Anderson: Those are if you go to one year in the biennium you have to go to the biennium number because you have to double it. You would have to carry the costs to the second year of the biennium. It's the 25% number that is in my testimony in the Governor's budget.

Representative Nelson: That is 25% for the biennium and these are one year numbers on your handout so we doubled them right?

Maggie Anderson: If you look at the handout we have doubled them for you. If you look at 100%, year 1 was 26.5 and the biennium was 53.

Chairman Pollert: On hospitals, inpatient and outpatient, that is based on the 100% of costs?

Maggie Anderson: That is based on the vendors report that told the department how much we would need to budget to rebase hospitals to 100% of costs.

Chairman Pollert: In the current biennium, what is the percent of costs?

Maggie Anderson: We could pull that information. I don't know if we can do it to costs, we can do it to billed charges which is not the same for costs. We don't collect cost reports from the providers on a regular basis. I will need to check with Barb and whether we will be able to do that.

Chairman Pollert: I'm going to have the same problem and I think we will as a section. Let's say we will be Santa Clause and give 110% of costs. Say we will be a Grinch but only give 90%. I would like to know how we get to that number. We can talk about that separately.

Maggie Anderson: The other thing I wanted to point out was specifically with hospital services, we have very specific federal regulations in that area that are tied to what is called an upper payment limit which means we can't pay more than Medicare in the aggregate for those services. We need to be very careful that we do that. If we provide more than Medicare we will have a difficult time implementing that with our federal partners.

Brenda Weisz: The other thing that I want to point out in the Medicaid is that it is easier when you are sitting in the audience to hear things that you should say. We don't pay costs. This whole cost rebasing thing that happened really took some provider groups and established costs where they never existed before. The only one that has cost data is the hospitals. When you ask for the requests is because we don't capture cost data for our providers. We can't get you cost data. It will take quite a long time. We could give you what we would have.

Chairman Pollert: I understand that. I'm just trying to get a base of what we can work off of.

Brenda Weisz: I'm just trying to remind the committee that as we go through everything that the rebasing we did is kind of a unique thing we did last biennium and it is nothing that has been done before except looking at hospitals. It's not that we don't want to bring your requests forward it is just that it is not available.

Chairman Pollert: On your OAR for Medical Services, the $36 million, the Governor funded that request?

Maggie Anderson: You are looking at the inflation OAR? The reason that is why it is in purple. Those were funded at a different level than what was in the OAR. It could have been higher or lower. This one was lower because we submitted the OAR at 7&7 for all providers. As you

know, we also submitted OAR's for the rebasing. When those OAR's were funded for the rebasing then some of those providers received only 7% in the second year.

Representative Wieland: This one is funded at a higher level?

Maggie Anderson: Lower level.

Representative Bellew: What was funded is on the handout from yesterday? You have inflation at 7&7, $21,035,670? Is that correct? You requested $36 million and $21 was funded.

Maggie Anderson: That is correct. The differences there would be the providers that didn't receive the 7% the first year because they were rebased.

Representative Wieland: Would you go through the other purple ones that are on here and tell us if they are higher or lower?

Maggie Anderson: Physician cost rebasing was funded lower, that was funded at 25% of that number. Ambulance service cost rebasing was funded lower rather than at cost. Dental services was funded higher. The OAR was for 60% and it was funded at 75.

Chairman Pollert: So anything in yellow was fully funded in the Governor's budget for this OAR?

Maggie Anderson: Of the OAR's listed those in yellow were fully funded in the Governor's budget.

Maggie Anderson: Those in yellow were fully funded in the Governor's budget.

Maggie Anderson: Testimony Handout (Attachment B)

Representative Bellew: Did you tell us what a unit was?

Maggie Anderson: Just a unit. For every service a unit is something different. A unit could be a stay in the hospital, it could be a diaper, or it could be a wheelchair.

Representative Wieland: In month 1, provider 1, there were no units involved. Why?

Maggie Anderson: They received a payout. We weren't able to process their claims. When we do that we don't know how many units are tied to that.

Representative Ekstrom: When we have the new MMIS system, are we going to continue to front load payments to providers. Are we going to get on a string where you submit the bill and the bill gets processed, and they get paid for what they are supposed to get paid for?

Maggie Anderson: Our sincere hope is that the payouts you receive in front of you won't be the last. I won't guarantee we don't do another payout again. One of the significant reasons we have to do payouts is that our current system does not tend to be real compatible with the significant federal changes that have to happen. That ends up resulting in the back log. Our primary responsibility is cash flow to providers.

Representative Ekstrom: One of the things I have seen in my own business is that not all physicians are not tied into electronic filing. That is for death certificates. Do you have a sense in terms of your providers how many would be running it through electronically.

Maggie Anderson: We are very fortunate that today we have a large number that file electronically and fortunately our large facilities do. The other thing we are doing with MMIS is to build in additional features like a web portal where a physical therapist or a dentist can go on the web portal. They can upload their information through that. We are doing all the things that we can to help them interface with their billing/software pieces. The paper claims do slow things down and bog down the process. There is a higher air rate with the paper claims that do come in. I hope we are making all the possible that we can. We will certainly be taking advantage of everything in the future as well. Continued testimony.

Representative Ekstrom: You have prepaid on the basis of claims that are in your office. Those claims have not been processed through. You get to the end of a biennium. You've got

a shift there that you may have prepaid more than perhaps so you won't see claims until the next biennium. How do you reconcile that?

Maggie Anderson: That is certainly a lesson we learned. This last end of the biennium when we had to do some of those payouts towards the end of the biennium. If we had to do it over again I can't honestly stand here and tell you what we would do because the primary driving force was cash flow to our providers. In the way we were caught between a rock and a hard place. We knew that the end of the biennium is not a very good time to do those types of payouts. We also knew our providers could not wait another 6-8 weeks for a cash flow. What I can tell you that we have done is based on how we know and how we processed claims out and how much we should be paying, all of the payouts that we have paid this biennium will be recouped before the end of the biennium. We have worked with the provider groups and within our time frames as to when the claims should have been paid to make sure we are accurately paying and taking back that money before the end of the biennium. Our intent is that it will all be reconciled by the end of the biennium.

Chairman Pollert: You are taking the utilization numbers, and it is the units we are using and not the actual people receiving. You are going through November of 2007 through September of 2008. Now are you doing that through all of these?

Maggie Anderson: I should at least go through dental because it is one we didn't do payouts for and I can walk you through how it makes sense. You can clearly see when you look at September, October and go way to the right we have major outliers. Those are the payouts. We threw those out right away because we knew they would just skew the data. We started in November and went through September for inpatient, outpatient physician services. It was just those three. The rest of them we tried to use the beginning of the biennium. There might be some specifically where you might want to walk through them and you can see about the

outlier and know we would exclude that. Often times we do exclude August because that beginning month tends to be close to the average of the biennium.

Chairman Pollert: So July 2008 and September 2008 are not used?

Maggie Anderson: Those are specific to inpatient hospital

Chairman Pollert: So if I'm correct, we take the actuarial services, average them through that time period and then do the average of the actual cost per unit. We take that and it should come up with over the 07-09 of $553,024. We take the numbers and add the rebasing and you are saying the net number is going to come up to roughly $887,070.

Maggie Anderson: That is not correct. I can't show you how we got to the $887 because of the rebasing. What I can walk you through is that November through September our average for that time period without July and September was $655.90 actual cost per unit.

Chairman Pollert: So if we took those numbers, took the actual cost per unit, divided by 9 I will come up with that figure?

Maggie Anderson: Yes you should. You also have to put the 5% on there which is the inflationary adjustment that the legislator authorized for all providers. Then you add the rebasing, and the 7&7.

Representative Ekstrom: With the dentists, since we aren't doing the payouts, what kind of time frame are they looking at when they are waiting for payout. Do you have a sense of how long?

Maggie Anderson: Very few dentists bill us electronically. They all tend to still bill on paper. It does take a bit longer for the claims to get in the system and for them to process. They are looking at a time when we got into the system about a 32 day turnaround time. I have not received any complaints about dental complaints in terms of timeliness and processing.

Representative Ekstrom: With the web portal idea we are talking about with the new system, do you have a sense that the dental association is going to start getting on board with more electronic file?

Maggie Anderson: I believe there is an interest there. I know that sometimes their percentage of their Medicaid isn't high enough to purchase the required software and some of those things. That is again why we think the web portal will be helpful to them. If they only see 5 clients, it is going to be quicker and more accurate and will see more timely payment by being able to use that portal. We will certainly be working with them to try to encourage them to use the required software that does have to be HIPA compliant. We haven't focused specifically on the electronic piece of dentists. Last session when the legislator did provide that additional increase for dentists, we worked with the dental association to apply those dollars across the fee schedule. We did a specific effort to go out to all dentists who were currently enrolled to tell them of the fee schedule increase and to encourage them to take more Medicaid clients. We went to all dentists who weren't enrolled and provided them a packet . For both sets of dentists we encouraged them to use electronic billing. We connected them up with our electronic billing staff person. I would see us doing something similar to that.

Representative Ekstrom: Do we have a sense of emergency room care that is taking place in this area? I remember last session we talked about folks utilizing emergency services. I would like a number of children who wind up in emergency need of dental work. If we could get a sense that would help.

Maggie Anderson: Antecedently the dental association has talked about that and shared specific stories. Our claims data is dependent on the diagnosis codes that are entered for the claims when they come in. It could be that the preventing condition is something secondary to

the dental. We won't have that information on the claims data. It could misrepresent that. We have tried to dig to that level before but we don't have good diagnosis or codes.

Representative Ekstrom: Let's do one more of your choice. On the utilization report obviously we have case loads in the negative. Could we do one in the positive?

Maggie Anderson: Yes. We will do one with the payout. (Continued testimony Attachment C)

Representative Wieland: Can you explain the two months you want to take out of there? It would be February and March?

Maggie Anderson: It's just September of 2008.

Chairman Pollert: But keep July of 2009?

Maggie Anderson: That will get you to $12.82

Representative Wieland: You said the inflation changed to 59. You said 59% do you mean cents?

Maggie Anderson: Yes.

Representative Ekstrom: Did you consider the ramifications of what would happen to your testimony when you did that?

Maggie Anderson: Absolutely not. We probably would have decided not to do it. The good news is that two years from now we will have that same process in place and we will hope to never do payouts again. We will be able to track all of this for you. We think they were very good changes. They are eligibility categories they weren't service categories. We weren't able to tell you a full picture of hospitalization or physician services. Timing is not always at our choice but it worked out in the end.

Chairman Pollert: In physicians you excluded September of 08 from the actual units of service and you excluded June and August of actual cost per unit? Is that correct?

Maggie Anderson: No the June and August was on the units.

Chairman Pollert: I'm getting something screwed up here. In the inpatient hospital you said take out July of 08 to September. Are both of them that way?

Maggie Anderson: That was actual cost. They aren't going to be the same for every service. Again, there are different outliers for different reasons in each service category. As you look through them you can see where that happens where it seems to be a little high or low. We try to get those numbers where they are falling within the appropriate average.

Chairman Pollert: In other words inpatient hospital could be a little different then outpatient hospital.

Maggie Anderson : Continued testimony.

Representative Ekstrom: On this particular category were some of these people being reported in another place?

Maggie Anderson: That is possible. Durable medical equipment could have been an item with any of those categories of eligibility. The other thing you will see in the case load change is that I reported in my overview testimony of some changes in the durable medical equipment. That will affect the cost per case that was in the executive budget. The trend that we were experiencing and seeing at the time when we built the budget was not in an area of where we did payouts and not an area of where we had big shifts or changes. My notes indicate to me that when you look at August of 07 coming down through June 08 that our average cost there was $1.69 per unit. If you look for the biennium we are still running at $1.70. That has been fairly consistent the whole biennium when we were running about $1.70 a unit. If you add the 5% of that you come up to $1.77.

Representative Ekstrom: When you redo the spend down sheets and show the percentages, could you put a footnote in that? In your testimony you have said a case of diapers was one unit and now it's per diaper. That is a significant number in how the units changed. The major

reasons why the utilization numbers is what I'd like. I see the step by step processes of how you built that number.

Representative Bellew: This is a request. You gave us a grant summary sheet. Would you put all the medical services on a sheet similar to that? The reason why I'm asking is that there is some pretty significant increases in these other services. In psychological services there is over a $3 million increase.

Maggie Anderson: We can do that and I'd like to address the three specific items that you mentioned. Those are three that I brought out in my overview testimony because of those clarifications we made in those. That is why you are seeing those increases in psychological and health tracks that you mentioned. With the medically needy income levels, those are not tied to a specific case. That is the optional adjustment request that the Governor funded in our budget. That is the total dollar amount. It's not going to be something that we have tied back to a specific case. It's the total dollar amount that was funded.

Representative Bellew: I'd still like it broken out to what are federal funds and what are general.

Chairman Pollert: I know we are going to have a discussion on recipient liability and the medically needy. I also want to have a discussion on personal care third tier that you have on the OAR just so I have a little clearer mind.

Maggie Anderson: I don't believe we ever walked through this document yesterday. We started talking about some of the rebasing items so we can do that now.

Maggie Anderson: Continued testimony on attachment F in overview testimony.

Chairman Pollert: So that is total federal, general, and other? Then you just breakdown the totals on the bottom of the page.

Maggie Anderson: It is total funds for all the changes excluding healthy steps. Continued testimony.

Representative Bellew: Shots for the kids, is that in the Health Department Budget or do you guys do some of that stuff too?

Maggie Anderson: I do know that they have an administered for vaccines children program. They actually receive a certain supply of vaccinations. The actual medicine part what this is an increase for is the staff time, what we pay those people to do the injection. That is not arrived by the health department. They provide the vaccine but they still need the health care professional to administer them.

Representative Bellew: So that is all health care providers that actually provide the shot? Not just the one that work at the health units?

Maggie Anderson: This amount of money that is provided here would be used to increase the Medicaid fee schedule for those specific codes. Whatever health care professional delivers that service within their scope of practice, when they administer a vaccine they will receive an increased rate of reimbursement for that.

Chairman Pollert: So federally qualified health centers, with an increase of $700,000. That is when you compare everything else. What is that?

Maggie Anderson: They are federal designations. They are a certain type of provider primarily your federally qualified health centers are in pockets of low income areas. They serve a Medicaid population and we have an encounter rate that we pay them for each service they provide.

Chairman Pollert: Did we need the federally qualified health centers for the immunizations?

Representative Nelson: If my memory serves me right, federally funded qualified health centers and rural health clinics were the ones that were chosen to administer the vaccines.

Maggie Anderson: Again they are federally designated and we have an established rate that we pay for them. With the federally qualified health centers you can actually see that it is more of a case load utilization change that we are just seeing more people participate and receive services through the federally qualified health centers. That may or may not be reflective of them receiving less care somewhere else. It's just for this biennium. Continued testimony.

Chairman Pollert: So the whole medical assistance section of DHS has an increase of general funds of $30.2 million and $147.285 total.

Maggie Anderson: Yes for traditional medical grants. You did want to go more in depth of the recipient liability. This is on the overview testimony on Attachment F. Continued testimony.

Representative Ekstrom: From last session I remember we had at least one group of medically fragile people or children with special diseases but have special conditions that were sort of above and beyond what you would normally see. Did we not exempt them from some recipient liability?

Maggie Anderson: I'm not recalling that. The legislator adopted the medical fragile waiver. The children in the waiver don't pay recipient liability.

Representative Ekstrom: What happens?

Maggie Anderson: The PKU and the Russell Silver syndrome are all in the health department's budget with the children's special health services. They probably would be best to answer that. Continued testimony on page 1 of attachment F Continued testimony 53:00-57:21

Chairman Pollert: You went from 83% of poverty. Is it a legitimate question to ask why you didn't go to the SSI at 637 dollars?

Maggie Anderson: It is a fair question. We tried to keep it comparable with a percentage of poverty that was comparable to SSI and you will see between SSI. Right now if you look at our

family size of 1 and family size of 2, our $500 and $516 there is very little change there. You go to SSI and there is a significant change there. We tried to make those comparable for that household size of 2 and tie it to a level of poverty that got us comparable to SSI and that was the percentage of poverty that did that. If a 2% household receives $16 more a month on a 1% household, that gap or difference isn't very large.

Chairman Pollert: Let's say we went to the SSI level, what would the percentage be? The 83% isn't 83% of 500.

Maggie Anderson: No it is 83% of the poverty.

Chairman Pollert: What does the 500 stand for?

Maggie Anderson: For a family of 1 it is 58%. For a family of 2 it is 44%.

Chairman Pollert: So DHS's position and the Governor's position as well, you looked at a family of 2 income levels when you based your decision on what you were going to fund.

Maggie Anderson: When we looked at that position of poverty that was comparable at that level we looked at a family of 2 comparable to a family of 2. Why that is, is more on page 3 that ties back to the SSI piece and trying to be at least where the SSI levels are?

Chairman Pollert: So the 83% of poverty or the 969 is where we come up with a general fund increase of $2 million to fund this and $3.5 million total funds?

Maggie Anderson: It is to fund them at the 83% of poverty level.

Representative Ekstrom: This is purely dealing with how much income we are talking about allowing. It does not change how someone qualifies for Medicaid. The total number of people who would qualify for this program would be in essence the same pool of people we are already serving.

Maggie Anderson: There could be additional people who currently their medical need surpasses what they have to pay in recipient liability because of where the level is. Let's just

say that their income is $1,200 a month for a family of 1 and they have medical needs of $400. At $1,200 a month with a $500 level your recipient liability is $700. If your medical need is only $400 a month then they may not choose or qualify because they won't have a medical need. So it's possible that if there are people that are right on that edge where they have a $695 medical need but not quite that as the level went up. You could see additional individuals. That was accounted for when we built our estimate.

Chairman Pollert: What would the SSI family increase be?

Maggie Anderson: Comparing SSI to the poverty level? I don't have that information. Are you asking what it would cost to increase from $500 to $637? We will have to calculate that.

Chairman Pollert: I'd like that number

Maggie Anderson: Keeping in mind that SSI only has one and two person households. It has that two person household. I would have to talk to our eligibility experts to determine how we would calculate that for larger household sizes because they do only have one or two person households.

Chairman Pollert: Then that will give me more information so it sinks in a little further.

Representative Bellew: Basically with the increase in your budget for this line item says is that the state is going to pick up the extra dollars for these people. It's not that we are going to earn the money but we are going to throw in $220 for a single person. Is that how we read it?

Maggie Anderson: What it means is that if you increase the income level, Medicaid would start to pay on medical claims sooner than we would have if we left the level where it was. Say we increased the level to $720 for a family of one. We will start to pay $220. If we increase the level to $720 we pay that bill because their recipient liability now becomes 0 and instead of the individual paying that bill then we will pay that bill and it will be at FMAP. Medicaid will pay those claims instead of the client paying those. Someone with a $350 recipient liability, they

are still going to have to pay the difference between the $720 and their income. About $130 is going to need to come out of their pocket. Then we will pay. It's not that they are giving them money or their income is changing. It's at what point does Medicaid start to pay and at this stage it is that Medicaid starts to pay sooner.

Chairman Pollert: Is it a legitimate question to ask if we would say we went to the SSI level of family 1. Would 65 or 70% of the people with recipient liability of that $137, would 55 or 75% of people be covered by that? As versus $720 of a family of 2 of $969? Is there a correlation?

Maggie Anderson: I'm sure there is a correlation or a percentage of clients who would be covered at that level, I do not have that information. If you want that as when we go back and prepare the estimate, we pull out how many clients would have 0 recipient liability when they get to SSI.

Chairman Pollert: I was complaining about all the audits we have to go through. Then we are here doing the same thing.

Representative Nelson: Is there a yearly inflator added to SSI?

Maggie Anderson: It's my understanding and I can confirm this that it is inflated based on Cost of living increase each year.

Representative Nelson: Have we changed this number like we are this biennium? Have we changed it at all? When was the last time we had it changed?

Maggie Anderson: I should have pointed it out on page 1. The last time that this level was changed is under history, was in 2003. Prior to that there were regular updates to the schedule and if you recall it was the biennium.

Chairman Pollert: So the last change was in 2003?

Maggie Anderson: Yes the income guidelines have been setting there for 6 years.

Representative Nelson: What criteria did you use as far as the inflator before? I remember 2003 was a tough session. Maybe we should go back and see how that income level related to previous sessions. We have been stagnant now for a number of sessions.

Maggie Anderson: So you want to know when the last time it was updated and when we did update it, what did we use as an inflator?

Representative Nelson: Yes maybe for the previous 3 bienniums because that would give us a fair look at how income levels were addressed.

Chairman Pollert: Does that kind of answer page 2 because it just breaks down what would happen.

Maggie Anderson: Page 2 gets into the charts. I'm talking about the backside of page 1. Continued testimony.

Representative Kreidt: The SSI recipients, their annual increases on their benefits is that based on the same for social security or is that a different percent?

Maggie Anderson: It is my understanding that it is an increase to SSI. We will double-check on that.

Representative Wieland: Do I understand that in the previous or current biennium that there was nothing appropriated for the medically needy?

Maggie Anderson: There is nothing specifically appropriated on the line item. The medically needy really is a reflection of all of the tables so to speak. It is accounted for in our actual cost of service. When we run reports on cost of service we take in account of what we paid which is net of any recipient liability. The reason why it is showing up on reports is that it is a separate line item because we submitted that as an optional adjustment request which was funded at that. We didn't go back and apply that to the tables. For example we have no idea whether that

Bill/Resolution No. 1012 – Long Term Care detail

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/20/09

Recorder Job Number: 7332

Committee Clerk Signature Morgan Rovell

Minutes:

Maggie Anderson: Testimony Handout (Attachment A) Committee had requested this information relating to nursing home and basic care services. The first chart just shows all of the nursing facilities, what city they are in, how many beds they are licensed for, and the committee was interested in knowing what their lowest rate was and what their highest rate was. This was for the rate year effective 1-1-09. You can tell by the chart that information.

Chairman Pollert: They aren't in any particular order? Is there a reason why Four Seasons is on top and Hillsboro is on the bottom?

Maggie Anderson: They are from highest to lowest. They have the highest low rate. The second chart in the nursing home information is for my overview I reported on the number of beds that were below the 90% occupancy as of 9/30.

Chairman Pollert: Is the veteran's home on here?

Maggie Anderson: Yes. The second chart with the block of yellow highlighting has to do with the occupancy question that came up from my detailed testimony where I indicated to you that as of 9/30, 23 facilities were below the 90% level. The committee asked for a 5 year trend of that so we actually went back to that to the cost report year which is the 6/30. You will see on 6/30/08 the ones that are highlighted are those that were below 90% on 6/30/08. Just so you

have those identified for the current period. Then the 5 year occupancy rate for each of those facilities. As you look at the middle of the page you will see the column on licensed capacity. The reason we provided that is the reflection that some of those occupancy shifts have more to do with reduction of license capacity than an increase in the number of individuals that are being served in a particular facility. For example let's just take 6/30/04 report for the Presentation Care Center in Rolette had 48 beds. They sold or no longer had two of those licenses. Their occupancy has gone from 87.9% back in 04 to 67.5% in 2008. That occupancy is always a combination of looking at if there have been changes in license capacity in addition to looking at the current utilization or the number of residents that they have.

Chairman Pollert: So those facilities with the negative have sold some beds? An example would be Bethel Lutheran Home in Williams County, they must have bought some beds then? Could you say that?

Maggie Anderson: They went from 168-175. They have had an increase in their license capacity. They either purchased beds or someone gave them to them but I'm guessing they were purchased. Barb suggested that I walk you through Dunseith. They are about 5 below the yellow line where you can see they have reduced their license capacity by 7 which has allowed them to get above the 90%. That is exactly what I wanted to show you. Sometimes facilities will de-license or sell those beds in order to get themselves above that 90% occupancy.

Chairman Pollert: Why is the 90% occupancy important?

Maggie Anderson: It is important for the rate setting and payment piece. If you want a lot of detail about that I'm going to need to have Barb come and explain that. It affects reimbursement. The last two charts are maps that we prepared in response to the request to demonstrate the bed movement that is occurring. We did it by county and so some of this may be easier to track that way. It was my understanding that the request was related to how many

beds are moving and are those beds moving from rural to urban areas and how that is all shifting out. We worked with the long term care association to help track those beds and prepare this chart for you. To understand this perspective, the ones that are in purple are current bed capacities. They are licensed bed capacities in those counties. Let's take Morton County for example. They have 276 licensed beds in Morton County today. Over the next three years in Morton County there will be an addition 107 beds. 50 of those are coming from Kidder County, 50 are coming from the Steele Facility, and the other 7 beds are going to New Salem and are coming from Bottineau County. You will see the other negative 7 in that county.

Chairman Pollert: If you added the green all up and took away the pink would you get 0?

Maggie Anderson: You may not get there exactly because of the Turtle Mountain and the Chippewa's who have those beds that they have had 4 years to get into service. They were unable to do that but they were able to sell some of them before they expired and so they may not necessarily show up. It might not work out that way depending on when that happened. Some of those have been sold and relicensed and are being moved to other areas. I can tell you it's this change and the impact of this change that we use to build our nursing facility budget for 09-11.

Representative Metcalf: As far as Barnes County is concerned, does that include this 154 and the psychiatric that they have there.

Maggie Anderson: No it doesn't. Just traditional nursing facility.

Representative Metcalf: So that will change. Basically it should be 16 more. 16 and 16 is quite a change.

Maggie Anderson: With what we are looking for in traditional nursing facilities it won't be represented on here. You are correct because there is actually 30 beds in that unit. There

were 14 previously and 16 now. There are 184 skilled nursing facility beds. Only 154 would be traditional beds.

Chairman Pollert: So the other 30 will show up somewhere else as far as when we get the details? You are going to hand us something like this again and they will show up somewhere else besides the traditional nursing home beds?

Maggie Anderson: The 14 original beds are in there. Because these were taken off of the 6/30/08 cost report these additional 16 weren't in there yet. They should be reflected in here.

Representative Nelson: What county is Lisbon in? Why don't the new beds in the Veteran's home show up in this?

Maggie Anderson: Ransom County. There is something special with the Veteran's home.

Representative Nelson: My memory is that the additional beds don't count against the moratorium but they certainly should count in this equation shouldn't they as far as increased bed count?

Maggie Anderson: I have to be honest. I haven't followed the Vet's home bill. Is that an expansion or just a new facility?

Office of Management and Budget : The 150 beds is not an expansion. That is how many they are licensed for now. Because of the size of the rooms there are many beds that were licensed for two beds being in them. They can't put two people in those beds. They are licensed for that many but have not filled that many.

Representative Kreidt: There are 150 beds but now with the new facility, 52 of those will be skill beds. There would have been a 27 bed increase if I remember right.

Chairman Pollert: You will have to get us a breakdown on what is at the Veteran's Home for enlightenment purposes.

Maggie Anderson: I know that when we worked with the long term care association we were kind of focusing on those beds moving in from rural to urban. We did not specifically look at the Vet's Home and the expansion piece and all of that. We will work with the Long Term Care Association and our staff. I do want to point out one of the increases in Cass County that is also not going to allow you to take the reds and the greens and get 0 which is the plus 33. The reason that you have two different greens in Cass County is the 109 are actually skilled nursing facility beds that are moving from other areas into Cass County to various facilities. The other 33 are sub acute beds that are currently at Meritcare. They are licensed nursing home beds. They are currently Medicare only. They are in the sub acute at Meritcare which is in the process of moving out of that area of business. Those 33 sub-acute beds are staying in the Fargo area. We wanted to show you that those are 33 additional beds that will also be available for Medicaid clients to use as skilled nursing facility beds.

Representative Metcalf: What is the definition of sub-acute?

Shelly Peterson: Sub-acute is a term that we use in ND. Meritcare is a skilled nursing facility just like the other 3 skilled facilities in ND. We have 3 that turn themselves sub-acute. The reason they term themselves sub-acute is that they are located within a hospital. They get Medicare only funding. They provide generally the same types of services as a skilled nursing facility, however they are located in the hospital and have closer access to physician care and other types of services. It is a skilled nursing facility. As Maggie indicated, those 33 beds used to be Medicare only meaning Medicaid residents didn't go into those. Now with them being transferred to Bethany and Eventide they will impact Medicaid budgets.

Representative Metcalf: How does this affect our moratorium?

Shelly Peterson: It does not. Those 33 beds were in the system and in a licensed facility. As long as they are a licensed bed in the State of ND they can be transferred to anybody so it doesn't impact the moratorium.

Barb Fisher: I have just a little bit more on the history of the sub-acutes. Those actually came into the system in 1995. They went before the state health council. At that point in time it was a funding mechanism for Medicare to pay for skilled nursing facility in larger hospitals that could not qualify for swing bed status. At that point in time Medicare allowed sub-acute unites to come into existence as long as they set up a distinct unit within the hospital. In that point in time they chose not to participate in Medicaid. The state health counsel said they would approve the licensure because the moratorium was going into effect if they did not purchase the Medicaid. Throughout the years they have chosen not to participate in Medicaid after that. They were strictly Medicare only. It was services provided at a lesser level than acute.

Maggie Anderson: Of the 219 that are coming into the Bismarck/Burleigh area, 8 of those are the origin of where those are going to come from are unknown. Those are some of your entities that have beds around the state and haven't decided where they may be pulling those from. Again, that is why the plus and minuses won't add up. Finally, it does not include any expected changes with the transition of Richardton Memorial Hospital to a skilled nursing facility which we understand is expected to have 20 licensed beds. This movement won't reflect all of that change. Finally, we did do a map with basic care. This has fewer changes. They are primarily in your large areas. It is a combination of beds moving as well as in the basic care area if the provider has a proven need to the department of health and human services we will approve expansions of beds and basic care. It is a reflection of beds and both of those ways that beds can be moved and added into the system for basic care. Those were the requests you made relating to the nursing home and basic care. We don't have an

organizational chart for long term care. The one I reviewed yesterday with you was all of our staff.

Chairman Pollert: Any questions?

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. 1012 – Aging Services detail

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/20/09

Recorder Job Number: 7333

Committee Clerk Signature Marilyn Pollert

Minutes:

Chairman Pollert: I have made a chairman's decision. I have delayed long term care for the day and am going to start tomorrow morning. with that Linda are you ready to start?

Linda Wright: Testimony handout (Attachment A)

Chairman Pollert: Why would you have the one in Fargo?

Linda Wright: Brian is one of our long term care people. He has mostly Fargo and Jamestown regions of the state where there are a lot of facilities located. He is located closest to where there are a number of facilities that he serves. Continued testimony.

Chairman Pollert: So you stay state fund to provide what, who do you mean?

Linda Wright: This money goes directly out to our Older Americans Act contract entities and along with the federal Old Americans Act dollars.

Chairman Pollert: Who would the providers be?

Linda Wright: Folks like elder care in Dickinson, South Central Senior Services in Jamestown, Burleigh County Senior Adults Program. The non-profits and the units of local government that provide the Older American Acts services. It goes directly out to them. Continued testimony.

Representative Kerzman: Going back up to the community support services, that is all federal the way it looks. Does that end at $1.1 so you are talking about $3.4 that goes out to

communities?

Linda Wright: Actually the $1.1 million would be divided between those community support services and the nutrition services. It also helps provide for the home delivered meals and the congregate meals. Preventive health is federal money.

Chairman Pollert: Could you tell me if one of these is meals on wheels or something like that. If you could just start at State Funds for providers as an example. You told us who that goes to, Community Support services what that would be. Is it in Jamestown or Bismarck, or is it state wide. Could you just give us a little education on it?

Linda Wright: The state funds to providers actually as I said is divided up among all of our Old Americans Act contract entities. It goes out with the federal money. We also are able to use that in showing that we are matching the federal money because we are required to have a maintenance of effort and matching requirement. The community support services would be outreach services, health maintenance services. We fund legal services and information and referral which we are required to fund. It is those kinds of access services that help people know about the programs and services that they might be eligible for.

Chairman Pollert: Where do they get that information from? Do you go to your local county social services or where would you go?

Linda Wright: Probably your local senior center in your community. Continued testimony

Representative Wieland: That is for both of those delivered meals?

Linda Wright: That is correct.

Chairman Pollert: You don't have to meet any requirement except the age of 60?

Linda Wright: That is correct. The Older American's act prohibits you from using a sliding fee scale or setting a rate that people must pay for the service. It is a contribution basis. A little later I have a fact sheet that will show you how much of the money that is expended in the

state comes from contributions from the participants. We are one of the highest rates in the nation.

Representative Kreidt: On the Congregate and the Meals on Wheels, is it a suggested donation or do you specify an amount to use or what you can pay. Is that still that way?

Linda Wright: You can set a suggested donation. Some of the sights do that. Anyone under age 60 have to pay the full cost of what that meal is worth. Continued testimony.

Chairman Pollert: Didn't we do something with QSP's and increasing the amount of dollars last biennium. Was that through this section of the DHS budget?

Linda Wright: That was part of the long term care budget which is in Maggie's. Continued testimony.

Chairman Pollert: What does OAA stand for?

Linda Wright: Old American's Act

Representative Bellew: Was this an OAR or just part of your requested budget?

Linda Wright: This was a nice surprise from the Governor as it was not an OAR. We did not request it. It was requested by the providers was my understanding. They had other miscellaneous fees and services which is like advertising and background checks and that sort of thing.

Chairman Pollert: Give me an example of a service provider, someone from my district that I can relate to.

Linda Wright: One of the providers would be the Minot Commission on aging. Another example would be Southcentral senior services which operates out of Valley City or Elder Care in Dickinson.

Chairman Pollert: What services do they provide?

Linda Wright: They provide Congregate meals, home delivered meals, and some have health

maintenance services. We also fund some public health districts to provide those. Things like foot care, blood pressure checks, those kinds of things that folks can't afford to access.

Chairman Pollert: Do they do that at the senior citizens center then?

Linda Wright: Correct.

Representative Nelson: In this area, the increase is sent back to the service providers in grants? Is there an increase in reimbursement?

Linda Wright: This is money that would go directly back to the service providers. We have to put our contracts out as bids and request a proposal. As the proposals come in they are funded through grants or purchase agreements. The money would go directly to those entities.

Representative Nelson: How many service providers are there in the state?

Linda Wright: We have about 27 contracts in place right now.

Representative Nelson: Would that distribution of the $900,000 would that be by people served or is it taking the $900,000 divided by 27 or how is that distributed then?

Linda Wright: We provide a cost allocation method to distribute funds. It is based on population over age 60, poverty level, persons with disabilities, minorities and such. It is a rather complex schedule. We use that to determine how money is divided out among the regions and among the tribal entities. We use that formula to distribute that money.

Representative Nelson: Are you aware of any cases with the added money if there is going to be increased services or is this a maintenance of the current effort to keep the same services.

Linda Wright: Some of the money definitely would be used to pay for the existing cost of providing the services. What we are able to reimburse is certainly not meeting the need. We reimburse currently $3.00 per meal. Plus there is the 62 cents of that nutrition program money. So it's about $3.62 for each meal. We did increase that now for 2009 to $3.50 because the cost of food has risen dramatically. The average actual cost around the state for a Congregate

meal is $6.18. That is what it costs to produce the meal. For home delivered meals the actual cost is $6.21 per meal. That probably accounts for the kinds of containers you have to use to keep the food hot when you deliver them.

Chairman Pollert: So let's say you have a home delivered meal. Who is paying for the time to deliver the meal?

Linda Wright: In most cases it is volunteers.

Representative Ekstrom: With regard to the $900,000 to increase to the providers, that money has been coming from counties pretty much. If we looked at this as one more offset against property tax would that be a fair assessment.

Linda Wright: The additional local money that you have had to put in I believe is mostly coming from things like fundraisers, other grants, because they also have to provide a match in addition to these local moneys that they are keeping up with to keep operating. Most of that is used for the match.

Chairman Pollert: Speaking of that, I got a copy of that but does the committee want a copy of the senior citizen meal levy. It is a figure that is $2.667 million.

Linda Wright: I have not seen that exact chart but the state treasurer's office usually does inform us of what they have allocated out in dollars.

Chairman Pollert: Ok. Of the $900,000 increase, it sounds like it is an increase of the higher costs of meals. How much of that is going for that?

Linda Wright: For the purposes of the budget it was put into the congregate meals for a place to put it. Once we determine which of the services has the most need for the dollars and then using that funding allocation formula will determine where it will be divided.

Chairman Pollert: Is that on the green sheet somewhere?

Representative Bellew: Yes on page 6 #22.

Linda Wright: Since there were so many questions about the Older American's Act we should flip to the fact sheet called the Older American's act fiscal year 2007. Continued with testimony

Representative Bellew: Where in the budget would state funds with older American funds be located?

Linda Wright: Are you meaning in the cost centers or in this chart? There is a separate cost category called state funds to providers. It's in the operating fees and services category. Continued testimony.

Chairman Pollert: We have been asking this question of everyone when it comes to travel. When you look at this it seems like everyone's traveling is going up when gas is going down. Your department is doing that much more traveling?

Linda Wright: It includes a variety of things. It includes 55 volunteers who serve as volunteers in the long term care facilities. We allow them to ask for reimbursement for mileage. That is included in here. The Governor's committee on aging has a small budget of $20,000 of the biennium. Their travel is reimbursed. We are required to attend conferences and training sessions for some of our programs. One example being the senior community services employment program. They require us to attend two conferences a year which is included in here. In addition, any travel that is done by our long term care is included in here. Also if we are doing on sight assessments of the providers that would be included.

Representative Nelson: When do you go through your budget and start preparing that?

Linda Wright: We had to have our part submitted by early July.

Representative Nelson: We look at gas prices today. You don't have to go back very long. We were still paying $3 plus for gas. For much of this biennium, it has been there as well. I noticed your travel budget is up over your total budget. It's a minimal increase. You will be $5-6,000 over. You are asking for a $30,000 increase. My question is if there is increased travel

from the current biennium or is this just the inflationary increase of what travel you are currently using.

Linda Wright: It would be based on a little of both. Some increased travel as well as what the state fleet reimburses.

Chairman Pollert: I want to go back and go forward at the same time. If you go forward further down the line to rent a little leases with an increase of $35,500. If we go back to the piece of material that you just talked about, we talked about the rent and leases. So now I've got to go back further to the 05-07 and you have a rental lease of $926 and 07-09 is $20,850 and you want an increase of $35,500. It almost looks like your whole staff has moved out of the DHS and moved somewhere else.

Linda Wright: We were located in the capitol. In November of 2007 our whole staff was moved out of the capitol and into Prairie Hills Plaza.

Chairman Pollert: Where you just running out of space in that building?

Linda Wright: Yes. There was room at Prairie Hills Plaza because of some moves of other divisions.

Representative Bellew: Who owns Prairie Hills Plaza? Is it a private person?

Linda Wright: It used to be a bowling alley.

Representative Kreidt: This intrigues me on building and grounds with a budget of $30. Are we planning some flowers or something?

Linda Wright: Because we have had one staff person at Southeast human service center there has been some unusual cost categories that explains what our share has been of having one staff person at the human service center in Fargo. Continued testimony.

Representative Bellew: Instead of going to one place to find out if they are eligible for services can you just go to that place to find out where the services are?

Linda Wright: Yes. They certainly could. Aging and disability resource centers are meant to serve any person that has long term care needs so they don't have to be on public assistance. They could also be a private pay person that needs information. Continued testimony.

Representative Ekstrom: My question is in regards to the ADRC's. It is certainly a national trend that is done everywhere else. From a public policy stand point could we get an assessment in terms of how much pressure we are going to start to get from the federal government in terms of cost containment.

Linda Wright: I certainly have received pressure from our regional office of the administration of aging regarding an aging and disability resource center. As I stated in my overview we have submitted a couple of print applications that have not been successful to date. Now with the change of administration I don't know about the source of funding or the kind of pressure that might be put on us. However, the Old American's Act in the 2006 amendments requires aging and disabilities resource centers to be established in every state.

Representative Nelson: Of all the states that currently have aging resource centers, was there federal money that helped them establish them?

Linda Wright: Yes there was federal grant money that helped them establish those centers. At the end of 3 years they had to be able to be self sufficient. During those three years they had to develop private pay income, other grants income through cost efficiencies. It's a variety of funding sources that have been used to support them. Plus the grant money has helped them establish those.

Representative Nelson: The states that are left , are we all in the same box that if the grants have been written and not funded or is there no desire in some of the states to go to the level of establishing these ADRC's.

Linda Wright: I'm not aware of whether or not those other states have applied for the grants before.

Representative Bellew: Can we possibly get a break down of how you came up with the figure for travel? And maybe for the entire department? I would just like a little more detail of the travel.

Linda Wright: Yes.

Brenda Weisz: Yes I know what you are asking for. It's just a whole lot of detail. When I walk through mine what it was made up. A lot of the divisions have walked through it. We could do it.

Representative Bellew: I guess why I am asking for it is because travel has gone up throughout the whole department.

Brenda Weisz: Yes.

Representative Kerzman: We talked about single point of entry. How are we coming with the uniform assessments. Are we getting that yet?

Linda Wright: We do currently have a uniform assessment . It has some drop down boxes for different programs. It is being used by all of the County Social Service offices to assess for home and community based programs. It is used by the Old American's Act providers to assess for those services. We are working on having a common assessment and data base .There is certainly many others that we would like to include at some point in the future which would be one of the things that an ADRC would accomplish.

Representative Kerzman: Going back to the $40,000 for guardianship, in the last biennium didn't we talk about shortfall there? How are you handling that with just $40,000.

Linda Wright: When the law was passed to provide guardianship services for other vulnerable adults that are not DD there were many sections of the law which we were not able to

implement because of the resources. There was $40,000 that was provided in the budget. I believe the original request with the funding and the bill which came from the guardianship association group was $740,000, somewhere in there. At this point since we administer the $40,000 the only thing we have been able to use it for is emergency guardianship requests. It pays for the legal fees to actually execute the guardianship or take care of getting rid of the guardian who may have been abusing and neglecting the client.

Representative Kerzman: Why didn't the department request more?

Linda Wright: The way that we are administering the program by only approving emergency guardianships, we have been able to stay within the $40,000. Every request comes through one of my staff people who goes over what each request could do. Could the power of attorney do the job? Could a conservatorship do the job? She makes sure that every avenue is explored before she approves the emergency guardianship. We set a limit of $2,500 per case. Most of them are less than that but it is the legal fees.

Representative Ekstrom: We heard from Carol Olson in regards to a grant writer being needed within the department. It may not be a question for you but I would like to know what the priority is for going after the grant for the ADRC for the resource center. In other words, in terms of the department's criteria as far as what they consider most important in terms of grants, is this one high on the list?

Linda Wright: It's been very high on the department's list of things that we would like to move forward with. We see it as a real priority and as I said. For over 20 years it has been recommended that it is something we need to do. We feel it is time to do that.

Representative Bellew: Any more questions? We will recess until tomorrow morning.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012- Children and Family Services detail

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/21/09

Recorder Job Number: 7448

Committee Clerk Signature

Minutes:

Tara Lea Muhlhauser: Testimony Handout (Attachment A)

Brenda Weisz: Legislative Council is going to put the vacancy report together for you but what I would like to do and I didn't get time is give you DHS's piece that we turned into Legislative Council. What will happen is you will have people coming up now that you could actually ask them specifically about the vacancy. I think it would be more beneficial for you to have it right away. I'll get you some copies. Tara did have two vacancies at this time but they are both filled now.

Tara Lea Muhlhauser: Continued testimony

Chairman Pollert: Out of the $391,364, aren't the background checks like $600,000?

Tara Lea Muhlhauser: You may have seen that somewhere. My guess is that it probably wasn't all staff costs. It was on page 8.

Brenda Weisz: I think the $600,000 is on the overview testimony I gave on January 9. The $600,000 was the total and $308,000 is the background checks and another $300,000 was an increase to the child care providers a rate increase. Together those were put in one bullet to talk about increases for child care, background checks, and the fees paid.

Chairman Pollert: So the $300,000 is for the salary position for how many FTE's?

Tara Lea Muhlhauser: Again it's on page 8 of the budget overview testimony on the second bullet.

Chairman Pollert: Its 4 temp staff and basically one FTE. Are you taking an FTE and adding more responsibility to that one that is a .5?

Tara Lea Muhlhauser: These are new positions for us. One will be an administrative assistant. As the background checks come in they come in with a fair bit of paperwork and application. BCI requires that we keep that and we file that and maintain that. The program administrator position is a professional position to work with the work that is created when we get hits on background checks to determine whether those providers have sufficient rehabilitation, whether the history of the hit that is coming back to us is enough to foreclose them from a licensed category and stepping into the category that they are applying to be part of.

Chairman Pollert: The other $300,000 was for rate increase for the child care providers?

Tara Lea Muhlhauser: Yes.

Chairman Pollert: You are including the 4 temp staff. Are the temp staff on hand right now or do we have to include the 4 temp staff?

Tara Lea Muhlhauser: No they aren't on hand now. We won't actually have need for the temp staff until the provisions go into effect on August 1. That will bring in the new group of background checks.

Chairman Pollert: So you are saying that your major case load will be when you start to implement the background checks. Two years from now are you saying that you are going to need the 4 temps?

Tara Lea Muhlhauser: We are anticipating that we won't need 4 temps two years from now. We figured at about a 25% attrition turnover. Our first 2 years we have anticipated about

$9,000 checks a year. Thereafter I think we go down to about 3,600 checks a year. By our own experience in our last two years we are able to handle 1 FTE about 24 checks a year. The 4 temp staff we have anticipated that we will move down to 1.5 positions in the next biennium.

Chairman Pollert: So one FTE can handle 2,400 checks? You figure you are initially going to have 9,000 checks. Then it will drop to how many?

Tara Lea Muhlhauser: We will have 9,000 for the next two years. That will bring on the entire group of child care providers plus attrition that is factored in particularly in that second year. There after we are anticipating the attrition rate for those child care providers will be about 25% or about 3,600 checks a year. Continued testimony.

Chairman Pollert: What do you mean by the $50 increase? You are saying that these are in department employees so besides the regular pay you want to increase it $50 or what are you saying?

Tara Lea Muhlhauser: We are very careful about that. We do have paperwork so that if they are state or department employees they do take annual leave for that day if they claim the perdium from us. They have the option in asking their supervisor if they can just participate as throw in time or if they want to be paid for their time we require them to have to show us the paperwork that their supervisor signs off on to indicate that they have taken the day off. This would be an increase in that actual daily perdium fee from $150-$200. The rational for the increases were substantially behind the federal rates that the federal reviewers pay for that daily perdium. We have lots of people complaining to us saying why they wouldn't go to Hawaii and do the review when you want to send me to Fargo or Dickinson and want to pay us a whole lot less.

Chairman Pollert: Do you know what the federal rate is?

Tara Lea Muhlhauser: I don't know but I can find out for you. We've had some discussion and

we were unable to put our fingers on it. I believe it is $350 or $400. I will find that out and get it to you.

Chairman Pollert: Basically what you are doing is if the employee has to take the day off we better make sure that their compensated for their time.

Tara Lea Muhlauser: Yes.

Chairman Pollert: Are these state or federal requirements for you to do these?

Tara Lea Muhlhauser: The child and family service reviews that we have around the state are not federal requirements but they are built in to our plans that the federal government requires us to have in terms of the quality assurance component in our child welfare programs.

Continued testimony

Chairman Pollert: That would be an increase or decrease or stable as far as 990 children?

Tara Lea Muhlhauser: An increase. Continued testimony.

Chairman Pollert: When I look back at your 05-07 biennium and you were at $878,000 and of course last year and biennium we went to just a little under $5 million. I see a reduction of $120,000. I know you weren't in this position last year. Can someone remind me why we had the huge increase last biennium? Is that increase then consistent with what the operating fees are. What I'm wondering is like on your budget detail I know you reduced it by $120,000. I'm just wondering if some of these are big increase or stable with last year. I still want to know why we increased it roughly $4 million.

Brenda Weisz: It's actual a change of where we recorded our contracts with the Village and Lutheran Social Services. Previously with the layout of the contract they were under the grants area. They were under operating fees and services. They were reported in the wrong line item.

Chairman Pollert: So like the adoption contracts that you have in operating fees that is Lutheran Social Services their program is through there. Who else was?

Tara Lea Muhlhauser: It's actually a contract with Catholic Charities. They run the program that is called ASK. It's an RFP contract.

Representative Bellew: Do you request RFP's every year or two years? How is that done?

Tara Lea Muhlhauser: We reissue the RFP's every two years.

Brenda Weisz: With the procurement rules that you passed back in 05, some renewal options like this one in particular is for a 2 year which means two contracts for 2 years each. Some renew for 2 consecutive terms of 2 years. What we outlined in our RFP is to have one renewal period. That will be up for RFP again this spring for the new biennium.

Chairman Pollert: You said subsidized adoption has 992? I know that is an increase but where were you at the previous biennium. Am I going to have a chart that shows that later? Is it going to show up here when I get looking?

Brenda Weisz: That is part of the grants cost. We will have a chart for you that is in your handout. It actually shows the increase.

Chairman Pollert: It will show the increases for whatever programs you are offering. Do you do foster care too? We will see the increases or decreases in the case load.

Representative Wieland: The $395,000 for travel, that just seems to be high for anybody. Can you break that down again for me as to how it is spent?

Tara Lea Muhlhauser: Do you want me to go to the level of breaking it down program by program?

Representative Wieland: That might help.

Tara Lea Muhlhauser: We have got family preservation training which is at $5,391. That is a decrease. We have got travel for our foster care information systems administrator who is out stationed at the human service center in Williston. That is $12,480. Our foster care administrator and that is travel not only for them but for services under that program. That is

$97,000. Refuge assistance is about $13,000. Early childhood services is about $22,000. Family preservation administration is about $6,000. Independent living is about $43,000. A portion of that not only goes to fund youth activity and coordinator activity in the field but our own program person in our office. Adoption administration is about $23,000. Community based child abuse prevention is about $4,000. Child abuse and neglect is about $68,000. Personally from building that budget it not only includes my travel as a program administrator, but a larger share of that is our ability to select county people and regional people to go to a national child abuse and neglect conference and other kinds of national professional development conferences. It also supports their travel to do that. Early childhood services training is $25,000. Head start is $39,000. Again that supports activity outside our office as well. The director of CFS has an administrator travel budget of $31,000. An example of how we use some of that administration money last year is that in my budget overview I told you about the data system we have been working on. We actually provide the travel support for a number of county people and regional people to come in and work with us at the table to develop that system. That would be an example of how to use the travel dollars. Continued testimony.

Representative Bellew: I would like to go back to foster care and grants county funds. You show an increase of $850,000. Could you tell me how you got those figures? The total cost is $9.1 million. I know it has something to do with the statute that says ND Century Code that says 25% of some federal fund match has to be charged to the counties.

Brenda Weisz: You are right. What that is, is that anytime there is an increase in foster care grants in total where they did increase? When you look at the various areas what you have to do is it says that the statute says that the counties are responsible for 25% of the non federal share. The reason you can't mathematically do it is because what is happening with our foster care population is that fewer and fewer of the children are determined to be 4E eligible. That

federal match we get is lessening which means that our non federal share is increasing which means that 25% of the non federal share is also increasing and it passes to the counties. That is why theirs went up proportionally higher than the foster care costs themselves.

Chairman Pollert: I take it the provider increase is the 7&7?

Tara Lea Muhlhauser: It is actually more than 7&7. There was a 7&7 put on the actual mark rates. This was an increase in the base rates for our family foster care. I can give you greater detail on the actual amount of those rates if you care to know that. Continued testimony.

Chairman Pollert: Why do the rates increase? You are saying the private industries or whoever are doing this are charging you more money?

Tara Lea Muhlhauser: My understanding is that it is a process that you go through to determine what their rates will be given their costs.

Chairman Pollert: The costs are determined by who?

Brenda Weisz: In the ND administrative code, we have cost reports that are required from our foster care provider facilities. Just like we have administrative rules and rule settings for nursing homes and DD providers. The foster care facilities are also required to follow the rate setting rules for them. They turn in cost report as well. Whatever costs are allowable according to NDCC is reflected in their next rate.

Representative Kreidt: Are these annual audits then?

Tara Lea Muhlhauser; Yes. Continued testimony.

Chairman Pollert: What is foster care therapeutic in a statement?

Tara Lea Muhlhauser: It is an intensive therapeutic based care. It is higher therapies. Generally the children have more extreme behaviors, psychiatric involvement, greater need, and so on. Parents are better trained. Continued testimony.

Chairman Pollert: I'm also looking on the next page of your handouts. That doesn't have subsidized adoption. Can we go back to where that was?

Tara Lea Muhlhauser: We talked about subsidized adoption in a bullet point on page 9 in the general overview testimony that details the 922 children per month for a total program increase of $4,210,886 of which about $1.5 million is general fund.

Chairman Pollert: Going to 992 children what was it the last biennium? What is it based off of?

Brenda Weisz: In 07-09 we had budgeted 911. This next biennium, because of the movement of moving children through foster care into subsidized adoption the budget is prepared at 992. That is an increase of $81 a month. We are going from $911 to $992.

Chairman Pollert: Do you have a rate on that?

Brenda Weisz: Average monthly cost per case in 07-09 was $635.36. Our budgeted average monthly cost per case for the 09-11 biennium is $760.46. That is an increase of $125.10.

Chairman Pollert: That is an increase of about 25%. Why the big increase?

Brenda Weisz: The subsidized adoption, the subsidy that is negotiated is often replicated to what is paid to the foster family. Often times the adoptions take place in the foster home itself. The rate is negotiated. That rate nears as to what they are essentially receiving in foster care. Our cost for foster care as you noted are going up as well even though our case load is down. The costs are going up. When we do the negotiation for the adoption you negotiate at a cost that is similar to what you are being paid in foster care. What we aren't paying any longer is the case management cost that go along with foster care. Those costs then are no longer paid. It is a cost savings if you will from that regard. That is no longer provided. Just the subsidy payment.

Chairman Pollert: The increase of the 82 kids, what can that be attributed to? Is there any particular 1, 2, or 3 areas?

Tara Lea Muhlhauser: I think that is attributed to our permanency work to get children a permanent placement. When we look at the group of children we are working with in foster care, there are a number of children who have been in care for 2 years or longer. Those are children that we look at with greater planning intensity to try to move them to a permanent placement via guardianship or adoption. That is attributable to good permanency work in the field and getting those children in a settled placement.

Chairman Pollert: Maybe you had this in your testimony but for your foster care is there an increase or decrease? Is it attributable to meth, drugs, or that? Are those case loads dropping or increasing?

Tara Lea Muhlhauser: I think a couple of years ago we did see a meth bubble. I think our attribution to meth is down a little bit. It certainly has not changed in the general drug and alcohol spectrum. Drug and alcohol is a great contributor to child placement.

Chairman Pollert: There was a bubble from meth but now that is gone?

Tara Lea Muhlhauser: As the testimony you heard last week from JoeAnne Hoesel when she talked about the changes in the drugs of choice, I think we are experiencing the same kind of recognition of greater use of marijuana and continued high rates of drug and alcohol. Then we certainly still do have meth but to a lesser degree then we had a number of years ago. Continued testimony.

Chairman Pollert: The last biennium didn't we have an increase for Bismarck and Minot when they bring these kids in for testimony. Didn't we have like $300,000 for that?

Tara Lea Muhlhauser: Yes you did have a budget line item that was specifically attributed to

the children's advocacy centers located in Bismarck, Fargo, and Minot. They do forensic work and medical examination work with sexual abuse cases.

Chairman Pollert: Is that in this section? Did we oversee it and I missed it?

Tara Lea Muhlhauser: Yes. Children's Advocacy Centers is $500,000.

Chairman Pollert: Where is that at?

Tara Lea Muhlhauser: That is in the child abuse and neglect section. I believe that it is general fund dollars.

Chairman Pollert: So it's going from $300-$500,000 this biennium. Did I hear that correctly?

Tara Lea Muhlhauser: No it was $500,000. Continued testimony.

Chairman Pollert: Collaboration grants?

Tara Lea Muhlhauser: They are dollars that we use to provide support for trouble foster care cases. We call it our 4E claims process where we provide support for them and 4E dollars for the division of juvenile services. We named it collaboration because it requires agreements on both of our parts.

Chairman Pollert: There is general increases in general and federal funds. Is there an increase in rates/clients? Where is that from?

Tara Lea Muhlhauser: It is in the collaboration column.

Chairman Pollert: Contract program changes? It shows an increase of $828,000 general funds and $2.167 of federal funds.

Tara Lea Muhlhauser: If you look above the yellow banner that says collaboration grants. It is right above that.

Chairman Pollert: What do you mean by county reimbursements? Is it as simple as it says?

Brenda Weisz: The counties have indirect costs out there that contribute to the programs they operate. What is in place is county wide cost allocation plans so they can capture additional

federal revenue for some of the services that are provided for the counties like the check writing. We have the county wide class allocation plans in place. Predominately what we do is we draw down the federal funds for them for the foster care areas, not the EA. This is a pass through that a portion of this is drawn out from the federal government. The other part is the DHS receives a social service block grant each biennium. Historically it is an agreement with the counties that 40% of the block grant that comes to the state of ND will go to the counties. 60% of that will remain with the department and it funds services at the human service center because we both have legitimate expenditures that can be covered by the social service block grant. During this biennium and the budget section on September 25 I presented a budget adjustment to you to tell you that instead of giving the counties the 40% of the actual federal fund we would give them the general fund equivalent of that. The reason for that I stated was because there was reporting requirements that are due in December of every year to the social service block grant where we have to state how many were served, what they were provided and so on. In tracking and pulling that data from 52 counties and get the information timely is rather a challenge. It is easier to get it from 4 human service center directors. So what we said to the counties is we will give you the equivalent. We have the funds that are human service center and legitimate expenditures. We will give you those general funds and then we will replace that with the entire block grant. That is the other part of the area. That is the County wide allocation cost we are passing through and their share of the social service block grant.

Chairman Pollert: At the end you said it is 40% of the social services block grant goes to counties. What was your statement before that?

Brenda Weisz: We give them a general fund equivalent of the 40%. Because of the federal reporting requirements it is easier to keep 100% but we still want to abide by that agreement that we had with them. We said we will take 40% of our money we went to the human service

centers with. We will give that to you instead and replace it with the block grant. That way the reporting is much easier for us, you get what you feel you are entitled to.

Chairman Pollert: During your overview I wrote some numbers down. I show foster care at 523 clients Is that for the 09-11 biennium? If it is, what is the client base for the 07-09 budget? I have the same question or the RCC F's and also therapeutic foster I show at $242,000, foster care services at $196,000, subsidized guardianship at $40,000. Are those 09-11? What were the 07-09's?

Tara Lea Muhlhauser: You have a schedule that answers all of those questions.

Chairman Pollert: Could I ask for whatever numbers aren't here for the client case loads, can I get those?

Tara Lea Muhlhauser: Yes.

Brenda Weisz: I think what we need to do is give you a schedule that has the subsidized guardianship on here for you and the subsidized adoption in the same format. Then you will have a complete picture.

Chairman Pollert: Ok. With that we are in recess until 15 minutes after floor session.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. 1012 – Long Term Care detail

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/21/09

Recorder Job Number: 7447

Committee Clerk Signature

Minutes:

Chairman Pollert: Called the meeting to order and took roll call. Every member was present.

Maggie Anderson: Testimony handout (Attachment A)

Representative Ekstrom: How often are they reevaluated in terms of where they are in this continuum.

Maggie Anderson: A lot of that is dependent on the situation of the client if they are receiving home and community based services. The case manager reviews them every six months to see if their care needs have changed. If the manager is aware of a change in their needs of functional criteria or functional abilities they can reassess them and access services at any time. The nursing facility doesn't necessarily do level of care screening on a regular basis. They do their MDS screening that they do every three months or within 14 days of returning to the hospital .Continued testimony.

Representative Bellew: Would you define assets. Does that include a home?

Maggie Anderson: I don't believe it does for SPED. Continued testimony.

Representative Ekstrom: We got a map yesterday with regard to the basic care beds and the nursing facility beds . I would like the rest of the committee to kind of look at that as well as we

are looking at the shift that is happening down the road. These folks are going to have to go someplace. I am referred to the old and that is the folks over 85.

Representative Kreidt: In regards to Representative Ekstrom we are living healthier so we aren't going to need a nursing home so let's look at it that way.

Chairman Pollert: That's a good thought.

Maggie Anderson: Handout (Attachment B).

Representative Ekstrom: On page 9 of your overview you talked about that personal care third tier. The executive budget adds money in to expand that out to 10 hours a day. Your contingency sheet here says in terms of the computer system you need the system up and running before you can implement that.

Maggie Anderson: We have two different columns here for computer system changes. That is to the current system. The new MMIS affects the hospice waiver on this sheet. We don't need the new MMIS. We just need changes to the current system. We need CMS approval for that one. That one we are estimating a January 1, 2010 effective date.

Chairman Pollert: What does AFFC stand for?

Maggie Anderson: Adult Family Foster Care point split. With regard to where you would find these in my testimony, we started covering the program changes on page 3 of my testimony. The first few changes were those items that occurred in the current biennium and those that we expected to occur. Continued testimony.

Chairman Pollert: What do you mean 8 hours?

Maggie Anderson: 8 hours of care a day. That includes the personal care service assisting with bathing, toileting, homemaker services, and those kinds of activities needed to allow people to remain in their home.

Chairman Pollert: You are saying that personal level care B is capped at 8 hours?

Maggie Anderson: If you look at the program cap at the bottom of that level it says 960 units per month. The units are 15 minute units. That comes out to about 8 hours a day. You have the months with 28,30,31 days. It's a little iffy. It's about 8 hours. Continued testimony.

Representative Wieland: Going from the 8 to 10 hour, was there a study done that would indicate at what point the SPED program would no longer be best for someone and they should move into a nursing home. Is there a long range program where 12 hours would work? What is the maximum of going into a nursing home.

Maggie Anderson: With the SPED program specifically we have a program cap of a certain number of dollars per month. They have to receive services within those dollars. With this personal care, outside of the SPED program, this is a Medicaid state plan service. The way we came up with the 10 is we heard about this at stakeholder meetings. People told us that they needed a little more care. We looked at all of our clients who are at the maximum and worked with the case managers to determine what it would take in some of those situations to make sure that those individuals can remain at home. The maximum would be the balance of looking at cost effectiveness and client choice of remaining in the home. In terms of dollars, personal care services has built in the Governor's budget the average cost per case of $1,481.71 a month. That is the combination of getting level a and b today plus adding in the dollars for this third tier. That is still significantly below nursing home costs per month.

Chairman Pollert: Well a nursing home could be $200 a day. Is that what you are trying to point out?

Maggie Anderson: The average daily rate for nursing homes is $170.78. Our goal with doing this isn't to necessarily to make those comparable. It is to give people choices about where they would like to receive care.

Representative Wieland: How many days a week are we talking about? I'm trying to get a handle of how many hours a month that this would apply to.

Maggie Anderson: It's 7 days a week. They meet nursing home level of care. They have care needs and without that they wouldn't be able to remain in their home. It generally is 7 days a week that they need the care.

Chairman Pollert: All the personal care level a and b are 7 days a week? It's offered 7 days a week. You could say SPED is too right? Every one of these are 7 days?

Maggie Anderson: That is correct. With expanded SPED, personal care level A it is possible that those individuals may not need services that many days a week. When you move into the services that meet nursing home level of care and these individuals would otherwise qualify if you go into a nursing home, the expectation is that they do need some level of care each day.

Chairman Pollert: If you give us all your spread sheet you are going to have those daily numbers on there anyways? With expanding to personal care level 3, could it tell me that you are going to have people not going into the nursing homes at $170 a day that this is allowing them to stay home? How many clients do you see shifting to personal care instead of going to nursing homes?

Maggie Anderson: Yes. We would expect this to allow people who the 8 hours doesn't allow them. For example there could be 10 people right now that are at the maximum of 8 hours. It's just right on that edge. Once they need 8.5 hours or 9 hours and we aren't able to provide that with our current limit, their choice may only be to seek institutional care. Those are the individuals that we considered. In addition to that I mentioned that the money follows the persons stakeholders identified this as a service need in order to help people transition out to the community. The combination of the current clients that we currently see as needing this service to prevent them from going into an institutional setting as well as the clients that we

see moving out of the nursing home and back into the community, the growth that we expected from this was 27. When you see the averages on that sheet you are going to see it is going to be 20 and that was because of the 18 months. We have to do that average. We really expect about 27 people to be able to use this between January 1, 2010 and the end of the biennium. That was how our estimate was made.

Chairman Pollert: It is going to be hard for us to see this directly because the nursing home expenditures are going to be going up anyway.

Maggie Anderson: With the shifting of the nursing home beds from the rural into the urban areas and knowing that in the urban areas there is a demand and a waiting list for nursing home and Medicaid has a certain penetration rate. What we will still see is Medicaid clients going to nursing homes. To be able to offset this and say we prevented this, we won't be able to say that. The money follows the person clients we will be able to identify the people who transitioned out of the nursing home and those that are taking advantage of this level of service we will be able to show you that.

Chairman Pollert: But it is a savings. Those clients would be going to the nursing homes. That would be an additional cost to the state if we don't do level 3.

Maggie Anderson: Those individuals that I indicated that we could track, one of the criteria for money follows the person is that they be Medicaid eligible and be in an institution for 6 months or more. We know we are already paying for those individuals in those institutional settings.

Representative Metcalf: You mentioned something a little while ago when you said there are people on the waiting list to get into these nursing homes. If they meet all the criteria, do we have any ways of providing additional hours for those people who are on waiting lists to take care of their needs at their home when it appears very likely that they need to be in the home.

Maggie Anderson: What generally happens with the waiting list, is those individuals need that level of care. They sought that level of care perhaps in a nursing home in an outlying community. They may be in Glen Ullin and Garrison and just waiting for a slot to open up. They are receiving services and they have generally selected a facility. They want to be in Bismarck/Mandan and have chosen a facility outside of that area until a bed opens up.

Representative Metcalf: There aren't people who are on the waiting list that are still at home?

Maggie: To my knowledge that is not the case. I do know that the PACE program is one area that they are doing outreach to those who are on the waiting list and seeking that level of care. That is also the level of care that they provide services too. They have also been able to offer services to those individuals and allow them to remain at home.

Representative Metcalf: I'm just concerned so nobody is slipping through the cracks.

Maggie Anderson: We are working on that. Home and community based services are really a wrap around process. Our administrative staff, our staff, and the county staff members and family members really try to work the puzzle pieces together and find out what's right for that client. I believe that the county case managers would make sure that nobody was falling through the cracks and if they needed services to remain at home in that time that we would step in and provide those.

Representative Wieland: I like the program because I like the idea of keeping people out of nursing homes as long as possible. You said the maximum cost is $1,500 a month.

Maggie Anderson: That is for SPED. There is no maximum dollar cost for personal care. If you look at the purple sheet, way down at the bottom is the program caps. We limit that based on units for personal care. For SPED which is not part of the tier 3 we limit that to dollars. Personal care level B which is the next, we limit it to 960 units. This service is not limited by dollars but by units of service.

Representative Wieland: Walk us through and individual who would be eligible for the 10 hour program. I want to make sure that there is enough money in there for someone to be able to do that.

Maggie Anderson: It could be an individual who is frail, elderly, they need that. Someone is at the maximum of 960 units. The maximum now would be 1200 units. The 1200 minus the 960 gives you an additional 240 units. The way we built the optional adjustment request was at the agency level of QSP rate. You might recall we have agency QSP's and we have individual QSP's and we have rates for those. We use the higher rate to make sure that we account for that correctly. Also, when people need this level of care, often times it is agencies that provide that. That rate was $4.91 per unit. That comes out to $1,178 of an increase per month per individual who would need this maximum level of service.

Representative Wieland: Then would you add it to the 960 units? That is at what rate?

Maggie Anderson: That is going to be at a blended rate of the specific rate. In our executive budget the personal care community is at that blended rate of individuals and agencies because they both provide the services. We do it by the month per client rather than the unit. Per month what we are expecting to pay in the Governor's budget is $1,481.71 per client per month. That is the average for the biennium.

Chairman Pollert: That is for personal care level 3?

Maggie Anderson: This has nothing to do with SPED.

Chairman Pollert: So $1,481.30 is for level 3?

Maggie Anderson: No for all personal care. When we build the budget we don't build from level A, B, or C. We build personal care services. It's an average of all those services weighted within that. Because the Governor's budget reflects the increase including level 3, this $1,481.71 includes the average cost of level A, B, and C.

Chairman Pollert: Now on the green sheet it shows on page 5 $1 million to general funds, $1.7 of federal, and $2.7 total. That is for 18 months?

Maggie Anderson: That is correct.

Chairman Pollert: That is where you are trying to get the waiver?

Maggie Anderson: We don't need a waiver we need a state plan approved by CMS.

Representative Wieland: If you add the 2 together you are talking about roughly $2,660 for the 10 hour days, 30 days a month. Is there something else?

Maggie Anderson: That $1,481 already includes the weighted average of the level 3 personal care. Your number is going to be overstated. It is already in that average. If you want that per unit amount we can calculate that for you. Using this number will overstate this average.

Representative Wieland: I'd like to see that. We have to make sure that there is enough in there. Are there people willing to work for that. It's not very much per hour if you are going to compute it out per day.

Chairman Pollert: $1,481.70 is per month times 12 months times 1.5 times 27 clients.

Maggie Anderson: I don't believe that it is the right way to do the calculation. You are taking an average that already includes that. Let us do a spreadsheet for you on this because you are taking that average and you will end up overstating it. The 491 is the current rate that we had at the time we built that request. The Governor's budget would include the 7&7 inflationary increase for that rate. That 491 would be 525 in year 1 and 562 in year 2. That would of course be accounted for in the inflation side.

Chairman Pollert: Personal care is actual care needs. Are you saying that for the extra two hours it's like the ADL's on this list is what you are talking about, that is the services that will be offered?

Maggie Anderson: That is correct.

Chairman Pollert: It would not be transportation or outside mobility? It's the ADL's not the IDL's.

Maggie Anderson: It would be the ADL's. It could include meal preparation for one of those items. We would not be authorizing additional services for the laundry, the housekeeping, and the shopping. It would be focused on the care needs.

Chairman Pollert: Can you give me the example you used for the spreadsheets.

Maggie Anderson: A client has $925.33 of income. They have assets of less than $25,000 so we are using the first white sheet. They have been approved for 40 hours of service through the SPED program. The current rate was the $1,380. When you take the 40 hours times $1,380 you get to $552 per month. The current SPED fee schedule if you look at that $925.33 and go across the first line you end up at the second column as you are going to the right that says 90% discount or the client is paying a 10% fee. They are paying 10% of all the care that they receive.

Chairman Pollert: That care is the $552?

Maggie Anderson: What they would be paying today is $55 a month towards their care out of pocket. With the proposed revision to the fee schedule and now you have to flip to the first yellow page, that individual is still earning the same amount of income. You will see that it now falls into that first column 100% discount or no fee. Instead of paying $55 a month they will now pay 0 assuming their income doesn't change.

Maggie Anderson: Testimony Handouts (Attachments C&D)

Chairman Pollert: Could it be said that you want to go to a personal care 3 level. Could it be said you are saving the hospital portion of DHS money or not really? I can see where we are with the nursing homes.

Maggie Anderson: I suspect in isolated situations there may be cases where an individual doesn't have those extra couple hours of care something could happen to their aids. Something can happen where it would lead to hospitalization. I don't know if there is a direct 1-1 correlation where you can see by increasing this we can take a reduction in hospitals. I don't believe we can do that. I just don't think you can draw that type of correlation again. If someone is only receiving 8 hours today and if we weren't there for 10 hours, they would end up in the hospital. Would that have happened outside the 10 hours? It's possible. I just think it would be a very hard statistical connection to make. Continued testimony.

Representative Kerzman: Our state is unique compared to other states. Is there any kind of a move on country wide. Isn't our state kind of molded the DD providers so they look like long term care. It just seems so confusing. We are doing basically the same services but doing it a different way on account of the lawsuit. We are almost treating our providers like public employees yet they aren't public employees. We have kind of a hybrid out there. I don't know if other states offer it that way or not. It just seems so different to me.

Chairman Pollert: That is something I would have to do some research on. I am not aware of that. I couldn't give you a good answer on that. I have only been to one out of state meeting and that subject hadn't came up.

Maggie Anderson: I believe that it is probably the best question for JoeAnne Hoesel but she had to go to another hearing. Maybe when she returns she can address that.

Karen Larson: Medical Services Division. Testimony Handouts (Attachment E)

Chairman Pollert: If I can ask you to work through that number and the day supports, in order to get your net growth of 09-11 for the budget you show an increase of 61 which would be the 22, the 9 and the 8. Then you are taking that 61and splitting it by 2 because they are coming in 1 each year. Am I reading that right?

Karen Larson: Yes. It's 31 the first year and 30 the second year.

Chairman Pollert: Is that the same for the ISLA's? When you say the Grafton Development Center, can you state that again?

Karen Larson: What we have is budgeted transitions from Grafton Developmental Center.

Chairman Pollert: That is the ISLA's. You go from the developmental center to the ISLA. You are projecting that you are going to drop 30 people from the biennium. What you are saying is that if we have clientele of about 150 at the developmental center you are hoping that it is going to drop to 85.

Karen Larson: Of that 30 growth of the biennium's, 22 are high school grads. We aren't quite that high. It's 9 and 8 transitioning from the Grafton Developmental Center.

Chairman Pollert: Oh so it's 9 and 8. Not the 22 & 23. I'm just trying to remember off hand. Was it 115 clients or people at the developmental center that is in the budget? This is saying that we are going to drop 17. Are we going to drop 17 people in the Developmental center to put them in ISLA's. Is that what this is saying?

Maggie Anderson: The 115 is correct. We built the transitions knowing they would go into the community care.

Chairman Pollert: Yeah so you are putting them into the budget.

Karen Larson: Continued testimony.

Representative Wieland: I don't have a question. I would like to go back to the infant development and growth for a second. 96 are state birth rates which is down. That is quite an increase. Where is that coming from?

Karen Larson: The numbers came from child count. It's information that DD gathers and has access to. It shows an average of 5 per month currently. You will notice if you look back to the

07-09 information we had projected a higher ending number for the 07-09 budget. It was budgeted at 8 clients per month. That number has gone down. Continued testimony.

Maggie Anderson: Testimony Handout (Attachment F)

Chairman Pollert: We were at 105.35 and then you said the 115 is from where?

Maggie Anderson: It would include the 5% of the second year as well as the increase that was in the base budget. The $2.4 million in total dollars for the ISLA admin change.

Chairman Pollert: We will get into that increase in more detail? What was the $2.4 for?

Maggie Anderson: The ISLA administrative reimbursement increase. In my overview testimony on the top of page 10 we provided the information on that administrative reimbursement so the current rate structure doesn't provide inadequate level of reimbursement for the DD providers who care for clients with high levels of need. So we worked with the DD providers over the interim to come up with a solution for that in terms of looking at this progressive assessment review as a means to establish the administrative funding for that. The $2.4 million was in the base budget. The value of adding that on is included in the number we started with. It will not match to the spend down reports because they are current biennium actual expenditures. We have to start with the plus 5 and any other additions.

Chairman Pollert: Legislative Council isn't here. I'm just wondering which one of these bullets that this is part of.

Maggie Anderson: It was in the department's base budgets. I'm not sure how they laid that out as we submitted it to Office of Management and Budget prior to any changes the Governor has.

Chairman Pollert: It was in the changes of the first request of the Governor before he put the changes in. We had the two column thing and we put them together.

Maggie Anderson: When the department submits the to Office of Management and Budget we call it our base budget. Then the governor makes his changes and it becomes the Executive Budget. It was in the base budget.

Chairman Pollert: So the 115 is the 5% which comes out to about 110. Then the base budget adds roughly another $5 for $115.

Maggie Anderson: That is correct. When you take the $115.50 and you add the inflation of the $818 which is the 7&7 inflation, you get to $123.68. This is not going to match dollar for dollar. That is a reflection of audit settlements and the DD rates being prospective in that.

Chairman Pollert: So it's the plus 5 plus the budget plus the 7&7? That is how we get to the $124.94. Are you using all the months to do your averages for the month? When we were on medical services you had November through September and took out certain months.

Maggie Anderson: It is the highlighted columns. Typically we start building the budget in April/May of the even numbered years prior to session. That is generally the expenditures we are able to use. We did go a little longer with traditional medical. We knew we were having those system payout and other issues and we wanted to normalize that as much as possible.

Chairman Pollert: So in the case of the DD's you did the front months. In Medical Services you used different months? You picked and chose between the months.

Maggie Anderson: That is correct. If you go to the far column from medical expenditures you will see that there is not much of an anomaly there for DD. Where when you look at those for medical services there is big fluctuations because of those payouts we did. Specifically for hospital services and physician services we need to fill the outliers out. If you would go to the level of dental services, we didn't throw out those early months. We would be using the same time frame for those. It depends on that whole system issue we had. If you want to go to MSLA's which is the next item down on your grant summary sheet, and in the chart.

Chairman Pollert: Are we going to be talking about ISLA's or not? Can we talk about that a little bit and as fares you come up with that proposed increase.

Maggie Anderson: If you would like to talk about them we can. We haven't planned any specific information other than answering any questions you had.

Chairman Pollert: The ISLA funding for the $2.4 million increase, can we talk about that a little bit as far as how you come up with that proposed increase.

Brenda Weisz: You want to know how we did the administrative change?

Chairman Pollert: Yes and when I read more into the paragraph it looks like these are individuals coming out of the developmental center that are requiring more levels of care.

Brenda Weisz: Over the last couple biennium's ISLA is set at 2 reimbursement levels. With more and more people wanting to live in those individualized supported living arrangements rather than group homes, when we do have transitions that often is the choice where they want to be. With Olmstead we can't restrict where they go. With that being more of the location what is happening for the DD providers is that they are struggling with the reimbursement. Currently there is only 2 levels of reimbursement. You have varying levels of need for people who are in ISLA and they are measured in par levels. To measure the complexity of the amount of services or level of ability is to a par level which is used throughout the DD system. What we did was worked closely with the DD providers and the interim to talk about what would be helpful to them to be able to retain individuals in the ISLA environment with that administrative structure. We went from a two level payment to a 5 level payment. It's based on their level of ability then of the client and how much direct service time they would need. That is where the change happened.

Chairman Pollert: So in future biennium when we do DD's and ISLA's are we going to get a purple sheet with the columns to show the levels of care?

Brenda Weisz: That wasn't what I was anticipating.

Maggie Anderson: That sheet shows levels of care. Brenda is getting more to a level of need rather than care. All of the clients in the waiver services will need ICFMR level of care. It's a level of need.

Chairman Pollert: Now we are getting into policy between care and need. The $2.4 million you are going from 2 levels of care to 5 levels of care and there will be different reimbursement rates for that?

Brenda Weisz: We actually have two levels of reimbursement for administrative costs. We changed that to 5 levels based on the degree. It varied by just saying 2 blanket levels we said we are going to have 5 levels of reimbursement because we recognize the different levels of need. Some of the clients don't need much direct time at all. Some need a lot of direct time. Instead of just going with 2 levels of reimbursement we move it to 5. It's stepped differently than just two.

Chairman Pollert: So the average cost structures are going to change? So wherever the proposal is at is going to be a combination of all 5 rates?

Brenda Weisz: Yes for the administrative piece of that. There is services in administrative. That is what we worked on to change from 2 levels of reimbursement to 5 levels of reimbursement.

Chairman Pollert: Yeah it's just that the average of $125 is actually an average of a bunch of rates.

Brenda Weisz: Do you want the sheet that shows the five levels?

Chairman Pollert: I'm just trying to segregate out where the enhanced services or the others are. That is where I'm getting down. I need a clear understanding of how you come up with these.

Brenda Weisz: We talked yesterday about our hold even and cost to continue budget. Because of the issues and the problems that DD providers are having with the reimbursement and being able to keep people in the community and with us being faced with the Olmstead decision, the actual cost to continue and the ability for the DD providers to continue with that ISLA service is actually in our cost to continue. That is important for our DD providers to move forward. That piece in general funds is $911,000 of your change.

Chairman Pollert: Would the cost of providing the extra higher levels of care to the DD be more money than the average daily cost of running the developmental center.

Brenda Weisz: It would be close.

Chairman Pollert: When we are looking at the detail of selected services the ISLA's are done because you rose the amount of the administrative to go from 2 levels to 5. Will we see that on the other sections of this utilization?

Maggie Anderson: It would be on the other area. From my overview testimony that wasn't as large of an increase for that area because of utilization is different. That area family care option 3, it was $96,000 total increase and of that $35,000 were general funds. It won't be as significant but we will see an increase because of that.

Chairman Pollert: That is on what?

Maggie Anderson: The next one I was going to go through was the MSLA's which is the minimally supervised living arrangements. It's the next one down on your grant summary sheet. Continued testimony. (Attachment F).

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/21/09

Recorder Job Number: 7470,7471

Committee Clerk Signature

Minutes:

Chairman Pollert: We will call the committee back to order. I think Brenda has some information that we wanted.

Brenda Weisz: Testimony Handout (Attachment A). This is a vacancy report. I will walk you through some of the areas that we have been through already. I won't touch the ones you will be talking to coming up. Walked through handout.

Representative Metcalf: Where this says currently recruiting, some of them have several months that it has been open. What is the likelihood that these will be filled within the reasonable time?

Brenda Weisz: I think most of them that are currently recruiting are at the institutions is what we are predominately seeing. I would feel more comfortable with Alex addressing that.

Chairman Pollert: Out of the 74 unfilled vacant FTE's we know for sure 1.357 million has been accounted for. Of the 74 unfilled for the developmental center and the state hospital has taken back 1.35 million.

Brenda Weisz: That is accurate. Instead of fully funding his pay plan for the full amount he reduced it by the exact amount he said. It is from both secure and the state hospital. (Attachment B)

Tara Lea Muhlhauser: This is a replacement schedule to the schedule this morning with the addition of subsidized adoption and subsidized guardianship.

JoeAnne Hoesel: Handout Testimony (Attachment C)

Chairman Pollert: You don't have any vacant FTE's in your division?

JoeAnne Hoesel: We have none. Continued testimony.

Chairman Pollert: What is the $54,000 from again?

JoeAnne Hoesel: The $54,874 is a combination of things. First is the cost to continue the 4% salary increase for the last year of this biennium which is $37,474. The remaining $17,400 is a combination of increases and decreases with some of the changes that we have made in the division. With that we will go to the operating section of the budget if you are ready to do that. Continued testimony.

Chairman Pollert: Why do you only show funding for the first half of the biennium?

JoeAnne Hoesel: The funds will be expended. They are aware of that and have been planning for that. Then we will go to operating fees and services. Continued testimony 22:13-27:02.

Chairman Pollert: Where does that show up on the grant lines? It's on the grant lines but not the operating fees?

JoeAnne Hoesel: The $80,000 is in the operating line that we are talking about. When we get to grants I'll let you know where that other piece comes up. That is the history. $100,000 was in the Governor's office and they chose to move it over to the division since we manage contracts and have that experience in history.

Chairman Pollert: So you are on operating fees and services?

JoeAnne Hoesel: Yes.

Chairman Pollert: As we are going down this item because you have a $2.5 million increase can you tell me where the increases are at and what the amount of dollars would be.

JoeAnne Hoesel: Yes. The first one is $80,000 for the Governor's prevention and advisory council support.

Chairman Pollert: So that is new?

JoeAnne Hoesel: Yes. The next is $300,000 which is an increase in the compulsive gambling treatment program which is all general funds. We originally had $400,000 and an additional $300,000 was added so we have a total of $700,000 for compulsive gambling treatment in the upcoming biennium.

Chairman Pollert: I think that should be in the Attorney General's budget.

JoeAnne Hoesel: If you would want information as to why it's in that spot I would be happy to tell you that for your information.

Started new job:

Representative Bellew: She answered my question. I was going to ask her why the switch but she just answered that.

Chairman Pollert: Did you say that was from the Grants line? From the tribal?

JoeAnne Hoesel: No we have 12 prevention coordinators around the state. Four of them are tribal

Chairman Pollert: So 1.634410 is regional and tribal?

JoeAnne Hoesel: Yes and we need to be more prescriptive. I mentioned earlier that as the federal government requires more accountability and reporting and oversight, that requires us to be more prescriptive in our contracts as well. That is the main difference between the contracts and the grants and purchase of service. Continued testimony. We could go back to the prevention coordinators which are about half of the way down. That is $1.6 million. Then

you want to know where the safe and drug free schools and communities are. The Roughrider conference which is $16,242 which is halfway down is our prevention conference in the state. From the bottom is $82,990 that is grants that we have a contract with UND which will end in 2010. Then we have an increase due to the transfer of their enforcing underage drinking laws grant from the grant line up to the operating of $220,922. That is just a shift again from the grant line which will be found halfway in there .Keeping in mind that I'm identifying where the increases are. This sheet is identifying the total. We had some already in the operating fees and services as well and now it is halfway in that list, enforcing underage drinking laws and contracts. Then we have $145,810 and that reflects the 7% inflationary. You are going to find that on that list of operating fees and services right under the AOD summit and it is called the share house meth treatment contract which is $1.5 million.

Chairman Pollert: The only increase is the 7% for share house and they aren't getting anything extra?

JoeAnne Hoesel: Correct. From this division and this department, no. I should say that from this division the human service centers might have a contract but for this meth treatment residential no.

Chairman Pollert: How much money does share house get from us now? What did we do last session? $1.2 million?

JoeAnne Hoesel: It would be this amount minus $145,810 for the contract that this division has for them for the Robinson Recovery Center.

Chairman Pollert: I know we are doing a treatment program through the TRCC at the state hospital through Carry Wicks. Do we have any comparison between the outcomes of share house and the outcomes of the TRCC to see which programs are working?

JoeAnne Hoesel: We have not done a comparison study. We do have a report from Robinson

Recovery Center share house that I could share with you.

Chairman Pollert: I would like to know as an example of what the success ratio of what the TRCC program has done. Let's say the TRCC program has a 50% success ratio and share house has a 25%. I'm just using that as an example. Then we need to take a look as a committee as where our dollars are going for the best bang for our buck. Are we going to be able to see if there is correlation. We have been doing that for about three years .Maybe we have to have an amendment to this budget that says I want to see a study between the two which shows which program is working instead of just throwing general fund dollars at share house or the TRCC program. I want to see which is working.

JoeAnne Hoesel: Here is my initial reaction to that. You are talking about two very different programs. One is a prison based program where they are in a locked facility for at least 100 days, it could be more or less. The Robinson Recovery is a residential, unlocked facility where they are required to work at least 20 hours a week. Not all of them have criminal charges. Certainly we have a fair amount of individuals that are under probation or parole. The intent of the Robinson Recovery Program is to be an alternative to prison to get people early in the process. One could make the case that you are talking about two very different groups of individuals and two very different settings. We certainly can do outcomes. We have outcomes but it would be important for the division to work with you and the state hospital to identify what you consider a success. It could be very different in those three. You have locked and unlocked.

Chairman Pollert: Do you have anywhere else in the state of ND that is doing a program similar to share house where we could see if there is different programs. I don't think share house is the only one that does meth treatment in the state. I'm trying to find out if we are getting our bang for our buck in share house versus somebody else.

JoeAnne Hoesel: I can tell you that there are certainly other residential treatment centers in the state. Robinson Recovery is the only one that is meth specific. It is important for you to know that it makes a huge difference. The drug has unique effects. The rest are mixed so you are going to have a variety of drugs.

Chairman Pollert: I'm not picking on share house but I want to know whether our general funds are going for the right programs. Doesn't share house also pick and choose who they want for clients which could affect the results as well?

JoeAnne Hoesel: I would say that they are taking everybody that meets the criteria for that level of care that gets to that facility. They are very clear on why they can't admit certain people. They are real clear on what the barriers are and what the challenges are or what they consider a success.

Chairman Pollert: I wouldn't mind seeing those results. I think as a committee we should see them. Is there any other sources offering meth addiction services that we can make a comparison to that isn't in a locked facility?

JoeAnne Hoesel: The residential treatment centers in the state do provide treatment to individuals that are addicted to meth. Robinson recovery reports the same outcomes that the human service centers do. I'd have to work with Nancy to see the extent of what we would have to give you. They certainly haven't been asked to do the reporting that Robinson is required to do through our contract.

Chairman Pollert: Are you saying that we could actually see some results that are working through kind of an outreach program? The human service centers wouldn't be a 100 day or a 6 month program. It would be an outpatient sort of a program.

JoeAnne Hoesel: Human Service centers have a variety of levels of care. They do have the same level of care that Robinson Recovery has. Which is considered a clinically managed residential. It is a specific level of addiction treatment.

Chairman Pollert: Is it possible that we could see how their results are too?

JoeAnne Hoesel: They would probably come back to me on this. I will work with Nancy and the addiction supervisors at the centers. We do have an individual that works in my division that works with the date for the human service centers because we are required to report federally on the outcomes as well. Let me see what we can provide you.

Chairman Pollert: I'm just trying to see if we are getting a bang for our buck.

JoeAnne Hoesel: It would be important for me to know what you consider a success as well.

Chairman Pollert: I have no idea. If one says they have a success ratio of 25% and the other says 10-15% then we should take a look at that. I'm just trying to see if we are getting what we asked for at share house.

JoeAnne Hoesel: We will pull some data together with you and see if that is helpful. Then we have an increase for mental health evidence based treatment training. Since the department has and is making a consorted effort to implement evidence based treatment which has been shown to be effective this is the division's work force training initiative. What you will see, keeping in mind that it is $146,191 increase on the operating fees and services. The items that fall into that category are the matrix which is 6 down for $62,000. Recovery support contracts for $109,958, contingency management of $20,000, evidence based program development of $15,000, mental health training contracts of $179,542, supported employment of $15,000, mental health recovery of $25,000, IDDT of $25,0000, and under writing conferences of $5,000 would be the major ones in that area. We also have an increase of $225,500 for the state epidemiology outcome work group. In the middle of the page you will see the acronym of

SEOW contracts of $225,500. That is that contract. That is all federal funds. Then we have an increase of $40,098 for substance abuse programs which is general fund and that would be inclusive of the matrix and summit as well on that sheet. $24,093 increase is all federal funds and that would be the trauma network. That is included in that $179,542 of the training contracts. If you look at the first two you will see the sex offender advocate contract and the sex offender treatment contract. Those two reflect a decrease of $911,507 from the current biennium. $894,507 is general fund. What we have done is worked with the ND state hospital in our secure unit and also the department of corrections and rehabilitation and they have identified the number of offenders that would meet the criteria for this community high risk sex offender treatment program and would be coming into the community over the next biennium. So we were able to decrease that appropriation in that line.

Chairman Pollert: By $894,000?

JoeAnne Hoesel: By $911,507 actually. Again, it is total over here. If you would add the total of this is how much is in this division's budget right now for that program. We are taking that much out because there have been some changes in the criminal justice laws for sex offenders that have affected the number of them coming out into the community. The DOCR has identified some other reasons as well. Then we have a decrease of $12,245 for postage and prevention resource center. We have gone electronic with our catalog and then we have a decrease of $37,807 in professional development. That is because in the substance abuse area we just continued a stipend program. Also, back on the Bars report, there is a decrease in $12,916 in other operating costs. That is a combination of changes in printing, communications, and office equipment. We have a decrease in grants as well of $2,657,638 and you can see that on the second page of the BARS report. It's about 1/3 of the way up from the bottom. I will detail out what has created the situation for those that decreased. The first

one is the safe and drug free schools and community. Two things happened. The first one is that the federal government of the department of education they decreased our funds and grants. That dropped it by $268,834. Then the remaining $546,340 we shifted from the operating line to the grant line. We also transferred out $272,000 to the enforcing underage drinking program which is all federal funds. We transferred up to the operating line and fee services $125,000 which is a mental health contract. The increase in this of $200,000 and that is where the Governor's prevention and advisory council grant money is located and that is new. The rest of the decreases were identified as increases in the operating line.

Chairman Pollert: That is on that page 2 of that BARS report on the grants?

Representative Bellew: Can you explain to me again why you shifted from the grant line item to the operating? Does it just make it easier for you guys?

JoeAnne Hoesel: It reflects the amount of directives that we are able to put into a contract. A grant is saying here is the money. This is the type of program that we want you as a contractor can tell us the best way to do it. A contract that is up in the operating line we say we have this much money and we need you to do this prevention program. It needs to be provided to ages 0-7, you need to use evidence based practices from this list, and you have to do this reporting and it gets very prescriptive. As the federal government requires us to report on those things then we have to make sure that we have and are informing the contractors that they have to provide us that information so that it can be reported.

Chairman Pollert: So does the $200,000 awarded to the Governor's prevention, what is that $200,000 being used for?

JoeAnne Hoesel: That committee hasn't met on this yet. However, I can tell you that this document in green shows you the 6 grants that were funded in our current biennium and based on the data it showed that the youth in ND are starting to drink at younger ages. So the

committee used that data and decided to fund 6 grants that targeted 1st – 4th grade. What the group will do when they meet in April and when we have a finalized budget, then that group will decide based on the data where they want to place the money out. It does need to go out to communities. It will be prevention dollars.

Chairman Pollert: When I look at your grants item breakdown, there is not that much general funds. It is almost all federal dollars.

JoeAnne Hoesel: This is actually the major general source of funds for grants that is coming from the Governor's council.

Chairman Pollert: I was looking at the $2.6 reduction and then looked at the line down and it said $2.8 reduction. I thought it was all federal funds.

Representative Wieland: So I can follow this, JoeAnne let's pretend we are moving ahead at the biennium. In your budget for the next time, instead of under operating fees and services shown for that where you have $26,059,484 for the 07-09 budget we would actually add $2,657,638 to that so we would have about $5,317,122. Then you add to that the changes which are $22,534,487. Then we would have the total of the operating fees and services.

JoeAnne Hoesel: You are asking for two years down the road what would be in that total column of operating fees and services? That would be the $7,899,000.

Representative Wieland: I understand that but what I'm getting at is because you are changing and going away from the grants, is that correct. You are taking the $2,657,638 of grants and adding that to the operating? That is why I'm saying that. Then you would add the change to that which is $2,534,847. That is what you indicated here as an increase in operating fees and services.

JoeAnne Hoesel: That is how we got to that number.

Representative Wieland: It doesn't quite come out. I'm just trying to follow all this shifting. I understand why you might want to do this but I would like to know that it is where the numbers are coming from.

JoeAnne Hoesel: That is where they are coming from and that is where when we come before you in the next session that will be our starting point.

Representative Wieland: You will start at $7,899,893 plus any changes at that time? But because we aren't doing it that way this time I just wanted to know that I'm taking the numbers from the right place to put them into what would be actually the 07-09 budget because you are combining two different sources of funding.

JoeAnne Hoesel: Yes.

Chairman Pollert: Yes so you will see the $7.89 million in operating fees and then the next biennium you will see the $1.6 million in grants instead of all the increases and decrease being fluctuated around.

JoeAnne Hoesel: That is all I have for the division of mental health and substance abuse.

Chairman Pollert: Any questions for JoeAnne? Any other questions?

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/21/09

Recorder Job Number: 7472

Committee Clerk Signature

Minutes:

JoeAnne Hoesel: Testimony Handout (Attachment A)

Representative Nelson: Explain that, 33 additional trips around the entire state. Is that from Bismarck to where?

JoeAnne Hoesel: That is the 19 regional visits keeping in mind that there are 3 staff doing that. That is inclusive of the human service center licensing. There are 14 specific waiver DD program management trainings that will be added because of the waiver and the need to train them.

Representative Nelson: This isn't necessarily meant for you but the travel budgets have really flagged this committee. It would be helpful to know how much new, additional travel as compared to increased costs is. I assume there is training going on every biennium with staff. I know it's hard to get a method where you aren't always comparing apples to apples. It seems to be that so many divisions are doing this. We are seeing double with the travel budgets. I'm assuming that some of that is anticipating a higher motor pool cost or gasoline increases. That may be somewhat mitigated in the next biennium. It would be nice to be able to compare that data.

JoeAnne Hoesel: In other divisions it would be a little less obvious as to what's driving the increase. In this division I can clearly tell you that those 19 and 14 are directly tied to the waiver renewal. Those are in addition to what we would normally do. Keep in mind that the waivers are renewed every five years. It's been five years since we've had to renew our waivers. This waiver renewal includes all of the CMS regulatory changes which impact incident reporting which impact abuse and neglect and exploitation and how we review that. It impacts how regional staff do their jobs and how they report them. They will need to report much more than they do now and use the electronic system differently. All of those things are directly related to that. I don't think I would be able to be that clear outside of some of the licensure types of things. This is clearly regulatory due to our renewal and DD waivers.

Chairman Pollert: Representative Bellew asked yesterday for a report from Brenda regarding the travel expense by section. It's not going to be as detailed as Representative Bellew asked. You are going to bring what you can because you are going to computer generate it. Otherwise what you are really asking for would be manual which would take a lot more time.

Representative Nelson: I forgot that from yesterday.

Brenda Weisz: What we will start with is going into the data base so the travel line you see from Joeanne's right here will pull all of that in one report for you so you can see each area that actually increased. We actually had decreases too believe it or not. You will see that. What you will do is look at that. For the areas that there are significant travel that we can dive in to, you tell us what divisions to go do that manual work for. If it ends up being all of them it ends up being all of them. If it's just selected ones then it is selected ones. That is what we are going to start with and go from there. One thing that occurred to us as we were doing this was during the legislative session the perdium was increased. The hotel was also increased as well as the motor pool mileage. Our budgets weren't changed to reflect that although we are

required to pay that. Part of this increase is a catch up because of the perdium increases. We have people out traveling. We have to pay the higher rate. When that legislation was passed we didn't go to each agencies budget and add the additional $5 a night plus tax. The additional perdium amounts. Part of the catch up you are seeing is that we are doing the same travel we are catching up with the NDCC to pay at those levels. We have to pay it now. We are budgeting for it at that higher level as well.

Chairman Pollert: So you will be able to show us because it might be a certain percentage due. We will be able to see that I suspect.

Brenda Weisz: I would hope so.

Representative Wieland: Instead of traveling do you ever use interactive TV?

Brenda Weisz: We sure do. We actually have what we call polycom systems in our human service centers where we have many meetings that we schedule with our staff across the state. The travel we do, a lot of it is required for our federal grants that we receive in the department. We have multiple sources. We are required to take often more than one trip a year to go to the meetings that the federal grant requires. Often times then you have mileage, airplane flights which have increased substantially as well. We use polycom for our internal state and staffing meetings. We do also have the out of state travel that we are required for grant requirements. We also have the other travel that JoeAnne is talking about for licensure because we can't do that through polycom. We actually have to visit the sights. A lot of your divisions have that kind of travel and your advisory boards around the state. I just want to remind you that motor pool is only in my budget of admin and support. All of the other central office divisions do not have motor pool but they might end up having to pay parents and that sort with the new mileage increase with the new mileage increase that was passed last

session. When you start in with the human service centers tomorrow, the human service centers themselves have motor pool in each of their budgets.

JoeAnne Hoesel: Continued testimony

Chairman Pollert: You said 414 individuals?

JoeAnne Hoesel: Yes and it is $5.24 a day. This is a contract that has and will receive the increase of 7% so that it will go to $5.61 and $6.

Chairman Pollert: So what was the number of individuals a biennium ago? For the 07-09 it must be an increase I take it?

JoeAnne Hoesel: 35 people. The court determines an area where the individual is unable to make decisions in. That is the level of guardianship that is applied.

Chairman Pollert: I'm looking further down on your operating fees and you have corporate guardianship contract. That wouldn't be covered under the other contract? The $1.784 million?

JoeAnne Hoesel: That is the one I was talking about.

Chairman Pollert: What is the Acumen contract?

JoeAnne Hoesel: That is our fiscal agent for the self directed support waivers. The corporate guardianship and then the right rack which is the $1.7 as well and that is our infant screenings. Then we have a variety of part C contracts that have to do with our early intervention programming. Then we have parents as trainers and we have a technical assistance. This is the area in this budget that currently works with individuals and screens for autism spectrum disorders that we talked about earlier. Continued testimony.

Chairman Pollert: Did you address the $46,000 increase in professional development?

JoeAnne Hoesel: I'm not sure. The $46,179 is to support the early intervention services contract or program. It is such a rapidly changing program that we supply them ongoing

information and training in terms of what they need to know to appropriately screen infants for potential delays. Continued testimony.

Chairman Pollert: Are there any more questions for JoeAnne on the DD policy? If not we are going to adjourn today.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012 – Human Service Centers detail

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/22/09

Recorder Job Number: 7566, 7568.

Committee Clerk Signature

Minutes:

Chairman Pollert: Called meeting to order. Clerk took roll and every member present. We are going to start this morning on global health initiative.

Nancy McKenzie: Handout Testimony (Attachment A)

Representative Kerzman: Is there any restrictions on how far you can move those people out of the communities to provide the services. Say that Dickinson wouldn't get anything up and running could you move them to Bismarck? You would still be 100 miles away.

Nancy McKenzie: There is not any kind of rule for a restriction. We always aim to be serving people as close to home as we can. It's better for them if they can maintain closet o family. Sometimes if we can serve on an outpatient service they can maintain at least part time on a job. We do, in terms of capacity, have times where we may have a transitional living bed that was available. The person was in the state hospital. If they were ok with it, they would go to another community. We work individually with people on that. We know we can't provide anything, everywhere. There is going to have to be some specialized services. Certainly we try to have those base services everywhere so people can be treated close to home.

Representative Kreidt: The badlands is a 16 bed residential facility. Are you looking at someone building a new facility? Is this an existing one?

Nancy McKenzie: They do have a developer that is interested in putting that together. I believe that it will be a new building structure.

Representative Nelson: I'm assuming that these are new facilities. You look at $1 million here and there, the question I get is that we have communities outlying the regional centers where there may be a school where is closed. They ask why we can't find something to utilize a good facility. The situation that may have a use. The staffing in a rural setting too cumbersome? Why don't we use some of these facilities for housing and other use?

Nancy McKenzie: We would certainly be open to talking about that. If we are able to have a cost savings that is a great thing. The challenges are staffing. Even in our larger communities they are struggling with keeping staff. Those type have 24/7 staff. Obtaining and keeping staff is a tough issue in the small communities. Also, there is the issue of just the other services. When those clients are in either a crisis bed or a transitional living facility they aren't only residing there but probably seeing a psychiatrist for the Center for meds. They might have a nurse coming out to follow up with that. They have a case manager. Some of it is economies of scale and giving people access. We do try to do whatever kind of outreach things away from those major cities. The residential piece is harder for those reasons.

Representative Nelson: I'm sure in some of those cases they would actually give you the building just to get it back to use.

Nancy McKenzie: That is something that we wouldn't be opposed to talking about at all.

Chairman Pollert: Would this be a correct statement in saying that this global health initiative is actually a program that has been going on in conjunction with the hospitals and this is just a way of transferring it to the human service centers and to the hospital.

Nancy McKenzie: It is accurate to say that these services have been going on. This is not a whole brand new initiative. I'm not sure that I fully understand what you are asking.

Chairman Pollert: What I'm hearing is the Global Behavioral Health Initiative is a mental health and substance abuse. We seem to have a fair amount of programs on mental health and substance abuse. So I'm wondering is this brand new? Is this something that has been going on? This will be reimbursed on the new Medicaid rates. Because of what we have been hearing as a section if I'm correct is that the Medicaid rates don't pay worth a darn. Are you going to come back the next session and want a raise?

Nancy McKenzie: The local hospitals know that the rebasing is being looked at and that we are looking at trying to strengthen our contract in that way. They are very pleased. I don't necessarily anticipate that we are going to have to redo our contracts over and over beyond inflation. I imagine that there will be a point where we will need rebasing.

Chairman Pollert: Could it be said that the hospitals don't want to furnish the service anymore and that is why you guys are taking this over.

Nancy McKenzie: We aren't looking for the hospitals to take over what the hospitals have done. We have always done this.

Chairman Pollert: Can the hospitals not afford to do it so they are discontinuing the programs?

Nancy McKenzie: Yes . We have had one discontinue and we have had others talk to us that say they can't continue to contract with us if we do this. There is another piece of that issue. If our clients present that in the emergency room, I don't think a hospital has a right to say they aren't going to serve them. That's not going to happen. We want them to be connected with us. Our staff goes up to Meritcare and up to St. Alexius and sees clients. It usually means a shorter stay for the client. The other alternative is that we go to the state hospital. If everyone under our contracts went there we would be in trouble. Certainly there is a big financial press there. I wonder if it would help if I say that all of the services and what the human service

centers do with some of their step down facilities and so forth are in place. These particular things that you see are additions to better fill out that continuum. Just as in the last biennium you supported some funding for some additional beds in certain places so we could to that. The name is something that we tagged on it to try to convey that it is a packaged deal.

Chairman Pollert: So it's not a nationwide initiative but something that ND is doing?

Nancy McKenzie: Yes.

Brenda Weisz: It really came about with the fact that we had to prioritize our OAR's. All of these belong together in one grouping. We prioritize by category on our OAR's. We came up with the name for our category to prioritize in an OAR so that we could pull these together and prioritize them as our number one priority of services. We arrived at that name. That is a name we had to pick to use to track so Office of Management and Budget and the Governor's office knew what our number one priority was. That is where it derived.

Chairman Pollert: So with medical services we are going to increase the rebasing, do a 7&7. You can clarify that we are going to increase this mental health and substance abuse through the global initiative. It sounds like you are doing the program because the hospitals don't want to fund it anymore but yet we are going to increase the funding to the hospitals then take this service away from them?

Brenda Weisz: In the medical services division we did that rebasing report that included all hospitals which was inpatient and psychiatric. We contract for those two in the regions. What we said is that we have indigent clients that go there as well. Let's build the budget so when they take the indigent client and they get paid the same reimbursement it will be through a contract but the same rate will be paid. It was to make a consistent payment methodology between those clients. Now that hospital is going to get the same rate of reimbursement.

Nancy McKenzie: The human service contracts do have an amount in their budget. There is in essence a cap. There will be a higher daily rate. The total has increased from what it was in the current budget. There still may be some cost sharing with these hospitals because if we would have a real high amount of hospitalization or longer lengths of stay, we may again run out of money before the biennium. It's a capped amount.

Representative Nelson: What is the bed count that generally goes through the human resource centers in a biennium?

Nancy McKenzie: Are you talking about number of people that go to inpatient treatment. We built the budget on about 1,500 bed days which is based on what we have been using which is statewide.

Tim Sauter; Testimony handout (Attachment B)

Representative Ekstrom: The young transitional group that you are working with, is it true to say that they are similar in terms of their problems to the adults that you are serving who have already had a run in with the justice system. Have they already been through the juvenile system process. I know your adult clients have been through the justice system.

Tim Sauter: That is true for some but not necessarily all. A lot of these children have not experience legal difficulties as a child. When they go out on their own they find bad decisions and they come encounter the legal system. It is our hope that we can better prepare them for their transition to adulthood that we can help them avoid those situations. Continued testimony.

Chairman Pollert: Do we know what the average turnover rate in ND is?

Representative Metcalf: Is this rate going up considerably because the department of corrections is viewing their needs in a larger consent. Or because there is more people that have a problem?

Tim Sauter: I don't know if I have an answer for that as far as the cause and effect. Certainly I think there are challenges for hiring people to work in the corrections system. I think they have to often times pay people a higher salary in order to make that job more attractive.

Nancy McKenzie: Were you asking about the referrals in clients or staff?

Representative Metcalf: The people referred over to your facility.

Nancy McKenzie: I do think we have seen quite an increase in referrals there has been a lot of joint work done to look at how people get referred to us if they have mental health or substance abuse problems. That is happening sooner now. We have people on joint work groups. That is a big factor.

Representative Nelson: I'd like to know if the increase in referrals, does it have anything with the quality of the Tompkins program in your opinion? We keep being told that this is one of the most successful drug treatment programs. The success ratio has been very good. This would indicate something other than that. Is it increased numbers?

Tim Sauter: I will say that it does an outstanding job. The people we treat at central speak highly of the program. The people we serve out of that system are people who are in an aftercare program and wanting to maintain their sobriety and keep myself productive in the community. I don't think it's a negative reflection at all. We also have an increase in the Dickinson region. Being in Bismarck, a lot of the people that come out of the penitentiary stay in Bismarck. They go from the pen to the Bismarck transition center. We are just part of that community and helping those people transition into the community.

Representative Nelson: I know that although meth convictions have leveled off through the system there were a high number of people that are probably going through transition at this stage of the treatment. There may be a bump in numbers. Are you seeing that. Every region is probably different.

Tim Sauter: Not everybody who is at the pen with addiction problems go through treatment. I think they are just putting more effort into making sure people transmission into the community and are getting the services they need so they don't reoffend and end up back in the pen. That is probably where the effort is coming from and why we are seeing an increase in the numbers.

Nancy McKenzie: I agree with what Tim said. Not everyone who is referred to the human service centers are coming out of the prison or Tompkins. A number are referred by probation officers or parole officers. They are individuals who have never been in the pen but are being followed on probation status in the community in the hopes that they don't have to go to prison. Treatment is an important part of that. Some people might come to us from aftercare from Tompkins but that isn't the majority of our folks.

Roxanne Woeste: If you will remember back to one of the first couple days of session you did have a joint hearing. They reported that 2008 the average state turnover for all agencies was 9.1%.

Brenda Weisz: The turnover for DHS is 11.37%.

Chairman Pollert: That is including the DD and state hospital?

Brenda Weisz: Yes.

Chairman Pollert: Do you find any segments of the DHS budget are worse than others. I would suspect like the Northwest human service center rate would be higher right now because of oil.

Brenda Weisz: You are right. It is 22.92% turnover there.

Chairman Pollert: I would like to know the turnover rate of each human service center when they come up.

Brenda Weisz: I will leave the sheet here for everyone.

Chairman Pollert: Do you have any clients coming from Robinson?

Tim Sauter: I believe that all the regions of the state do have clients who are at Robinson recovery. If they do return to the community from Fargo then certainly they would be eligible for services. It might be a choice thing unless they are under a court order for treatment. We would have some of them return to the regions.

Chairman Pollert: I know that when we were setting up meth programs at Robinson and TRCC they said we were going to get what success ratios were and I do want to see some of them. We should be asking that question. If there is anything like that, I would like to know if there is a correlation between that.

Tim Sauter: Continued testimony.

Chairman Pollert: So you see a difference between rehabilitation with teen challenge and other programs? Is the success rate better at one of those places? Have there been any studies done on that?

Tim Sauter: I haven't seen any studies relative to the success of teen challenge . I think every program has its place. It's been beneficial to people.

Chairman Pollert: I probably should have asked JoeAnne. I'd like to have that discussion.

Representative Metcalf: This is probably something that you can or cannot answer. I noticed that you said you started two new businesses and assisted six farmers to stay in business. Is this a process that is happening state wide at all the centers or in your particular location?

Tim Sauter: I believe most of the centers vocational rehabilitation programs do have rural services. I would say that it is happening. I believe it is a state wide effort. As far as working with indigent medication programs I can't answer that. I would just assume they do. Continued testimony.

Representative Bellew: What are your other funds?

Tim Sauter: Other funds relate to direct payment from clients and third party. Continued testimony.

Representative Ekstrom: In this salary package, is the Governor's equity package in there already too?

Chairman Pollert: I would suspect that there would be more equity payments for the Northwest areas or not.

Brenda Weisz: It actually will depend on where those employees sit. We can formulate a plan for them that would cover some of those areas. Also we would have to be cognizant of our staff that are there that might be sitting at a pay grade. They may have been there for many years but are still sitting low. We have to balance both of the situations.

Chairman Pollert: Is Office of Management and Budget going to come up with an equity for every department or are you expecting every department to come up with equity?

Lori Laschkewitsch: The department's each come up with their own equity plan. This is not a formula that is done with the class agencies. We are taking a look at each individual agency to see where their issues were and what kinds of needs they had.

Chairman Pollert: But Office of Management and Budget decided the total amounts of equity that go to every agency.

Lori Laschkewitsch: Yes. Based on what the needs for that particular agency were. Where they had their shortages and all of that.

Chairman Pollert: Based on compression, longevity of service, all of that?

Lori Laschkewitsch: All of that was an element that played into that. We felt the agencies would best be able to take a look at where their individual employees were. They knew the specific situations that they had to deal with.

Chairman Pollert :Do you know if government ops are taking a look at equity since the budget is in their section? I think it's on the house side this time. Are they taking a look at how that was done? Any idea? I think their budget was just heard the other day.

Roxanne Woeste: The equity dollars are in each agency. I believe for those agency budgets that you are hearing that you would be responsible for looking at those equity dollars.

Chairman Pollert: At the same time we had heard there was a discussion through Office of Management and Budget.

Representative Metcalf: Along that same line, are the Office of Management and Budget and whoever else involved taking any effort to approve those plans that the agency come forward with as far as the distribution of those funds? I'm concerned if we don't have somebody that is pulling this together and trying to keep them on a level basis, it could become rapid.

Lori Laschkewitsch: The provisions written into Office of Management and Budget's bill are that they have to present a plan that we will approve. We do ask that they present us with what it is they are planning to do but it's not based on our approval. Again, we just feel very strongly that there are so many different situations in each agency.

Chairman Pollert: If I'm correct the total equity was around $3 million?

Roxanne Woeste: The DHS equity was approximately $5 million total funds, $3.5 was general funds.

Representative Metcalf: The reason I asked that question is we had an emergency services department that went wild giving equity payments here not too long ago. I don't feel that should happen. Somehow we have to have oversight.

Tim Sauter: Continued testimony.

Representative Bellew: the 7&7 for provider increases, where did those figures come from, was it the Governor's recommendation or your request? It's in your OAR's too?

Brenda Weisz: You answered your own question.

Tim Sauter: Continued testimony.

Representative Wieland: When you talked about case load on page 1, are those individuals unduplicated?

Tim Sauter: Unduplicated for that population in the grouping of mental health, substance abuse, and developmental disabilities.

Representative Wieland: The second question regarding your FTE, the majority of that is federal funds. Am I correct?

Tim Sauter: If you look at the numbers it is a total of $100,626. $50,313 is general funds. The rest would be federal funds.

Representative Wieland: Was the position because you had federal funds available for that or was it something you wanted to fund regardless?

Tim Sauter: The reason that we are asking for this position is looking at the additional requirements that are coming from the center of Medicaid and Medicare services that relates to the DD wavier. We are looking at an increase in the order of responsibilities.

Representative Wieland: When you have a federal funded FTE, when you hire someone to fill that position do you do it on the basis that if the federal funded goes away, that the job may go away as well? Do you have a policy regarding that type of an issue?

Brenda Weisz: That would come into play in some regard when it would come to some close end funding. With Medicaid, if the expenditures are allowable, we continue to draw it on federal funds. With this FTE we wouldn't run into the circumstance you are talking about. However, if you look at some of our block grants and if there is positions that are funded with block grants or specific close end grants we would have to take a look at if we were running out of dollars

and if the services are still needed we would have to balance services provided versus staffing. It would come into play on some sources.

Tim Sauter: Handout testimony (Attachment C)

Representative Kerzman: Going back to child welfare services, I show 3.5 not 30.

Tim Sauter: Its 3.5. If I said that it was an error.

Chairman Pollert: I'm looking at the vacant FTE's for Westcentral. I see you have 3 of them filled. It showed 5 of them. One says unclassified.

Tim Sauter: That would be the psychiatry position which we are in the process of recruiting that. There were other positions that were being filled. We are still recruiting and have more interviews.

Chairman Pollert: Is the human service center outside contracting psychologists or psychiatrists? Are you able to do it in store?

Tim Sauter: At Westcentral we have two psychiatrists that are on staff. To fill the void while we recruit the third one, we are contracting with psychiatry networks out of Fargo for some additional psychiatry time to help us meet the demand.

Chairman Pollert: Let's just proceed down the line.

Tim Sauter: Continued testimony.

Chairman Pollert: Can you go over the rental again?

Tim Sauter: Our primary office for human service center is 35,521 square feet. The rate will be $14.05. That is a 54 cent per square foot increase from the current budget. Then we added those $5,210 for VR services and that is being rented at $16 a square foot.

Chairman Pollert: That was added the last biennium?

Tim Sauter: We are just in the process of moving into that space.

Representative Kreidt: Fringe benefits seem to be looking at the $11 million in salaries.

Tim Sauter: If you look at the first line item under the executive salary recommendation that is $534,932. That is to cover the health insurance costs for the staff. Then going down the list looking at the benefit increase there of $142,143 that is our other benefits like social security, retirement, and those kinds of things.

Representative Kreidt: Would that also include the vacation , sick leave, benefits?

Brenda Weisz: We don't factor in for the allowance or an amount we set aside for vacation or sick leave. The number you are seeing for the fringe benefits, the three numbers that are singled out is due to the Governors salary package. We don't ever put reserves away. Just like with the other testimony the fringe benefit is the health insurance coverage of the Governor's salary. It just looks different because they have a lump sum budget instead of seeing them all in one group.

Chairman Pollert: On the rental with the increase of $200,000. The rehabilitation services are a new rental or expansion?

Tim Sauter: That would be an expansion that is occurring currently.

Chairman Pollert: Was that improved in the last biennium and then this is just a continuation of the rent going into the next biennium with the $5,200 extra?

Tim Sauter: It would be a new addition to that.

Chairman Pollert: This is proposed. It sounds like you are doing it right now.

Brenda Weisz: Because in his testimony he talked about the issues we are having with staffing over at Prairie Hills Plaza. It's a space issue. Some space opened up in that building structure. In the lower level there used to be a private operation. The space opened up and because of the staffing and the crunch for the west central service center and the doubling up of staff and offices, and the need for more group rooms. We said we would be interested in

that space down below on that first level. That is where our VR part of the human service center is relocating and moving in soon.

Chairman Pollert: So you are in there now. You found the money in your budget to do the extra rent?

Brenda Weisz: That's right. It is VR which is predominately federal funds which helps with that whole decision in order to do that.

Chairman Pollert: Did I ask in the overview for a breakdown of your turn back?

Brenda Weisz: Yes we did talk about that. I talked to you collectively of the human service centers and collectively that is $2 million. I could put that on a schedule for you.

Chairman Pollert: I know there are 2 different breakouts there.

Brenda Weisz: Between human service center and different parts of the department?

Chairman Pollert: No I'm talking about the Medicaid dollars.

Brenda Weisz: Did you want a breakdown for the whole department or do you want it for just the human service centers?

Chairman Pollert: Whole department.

Brenda Weisz: I can bring that later.

Representative Bellew: Under your rent, you have residential apartment rent for CDMIDD. Would that be more appropriate under the grants line item?

Brenda Weisz: What we do when we build a budget is we look at the budget structure that is laid out for us from Office of Management and Budget. All state agencies budget for rent in one spot so we follow that same specific outline. Since there is a rent category that is why we put it in the rent category. We follow the rules.

Representative Metcalf: I have a couple questions concerning the fees for professional services and the amount that it is costing you. You have here fees for professional services. Dose that include the fees you are paying your psychologists who are not on contract?

Tim Sauter: Those would be under our grants line item. This category will be for services like our interpreter fees and some of the support that we purchase from the Beulah Hazen clinic where we have our outreach office.

Representative Metcalf: What is the situation as far as the rent a doc. How much more do they cost us than when we get our contracted services? The psychiatrists you get out of the Fargo facilities.

Tim Sauter: We pay $210 an hour for that service. We are paying our contracted psychiatrists $175.

Representative Metcalf: Are these doctors from Fargo? Are they local?

Tim Sauter: The person who is delivering the service for us currently is from Fargo.

Representative Metcalf: Then you pay them the $210 while they are in travel status?

Tim Sauter: There is no travel we do that through tele-medicine. He is actually located in his Fargo office and we have the clients seen at the badlands office. They are hooked by a network. Continued testimony.

Chairman Pollert: I see you have a $15,000 increase in operating fees. Can you show me where the increases are showing up at? Then maybe explain to me wrap-around services.

Tim Sauter: Right. It is partly federal dollars. When we look at the flexible funds for services to the homeless I think one of the situations there was that it is an item that we are required to do by the federal government as part of our grant. I don't think we had a line item for that in the past. It shows up as new. It was in the budget before but it was just somewhere else. The wrap around services, I don't have the figure there.

Chairman Pollert: Can you tell me what wrap around services is?

Tim Sauter: They are used to help preserve families and preserve safety for children. It can be used for a variety of things from helping with daycare so parents can go through treatment to helping with mileage. It could be providing some kind of a service. It could be helping them with the risk of being evicted from their home. We might take that on as a onetime expense to help them stay together.

Chairman Pollert: I was just looking at years of service awards. If you take $6,500 divided by $135 people if you gave them all a plaque that is $48.

Tim Sauter: The state also has a system depending on the years of service in addition to a certificate or plaque you may receive a gift certificate or a bank savings bond as part of the award for that. It varies by the years of service.

Brenda Weisz: It's not all that much money. If you look at how many FTE's they have and now that they changed it to that. You get service awards for three years. It used to be at 5. It is outlined in administrative code. That is what gets it.

Representative Kreidt: Again in the salary lines, looking down I see you plug in a million dollars down further in the line items under $59,910 and $160 salary and benefits. What is that?

Tim Sauter: That is specifically the Governor's salary package.

Chairman Pollert: That is FICA, retirement.

Representative Kreidt: But that is anther million that is added on top.

Chairman Pollert: Every budget we are seeing, the salary increase is the 5 and 5. The fringe benefits and health insurance premiums increased. The benefit increase is like your FICA taxes and such as that. Is that correct? If there is an extra FTE that would be included there also?

Brenda Weisz: For the FTE that was added to Tim's budget that would be in the total changes column. The bottom category is used specifically for the Governor's salary package and things tied to the Governor's salary package. That is why we left that executive salary recommendation column separate so you could separate out what is done outside of that 5&5 and health insurance. You will see some doubling up on the fringe benefit because they hit both of those for the FTE and changes in the fringe benefits.

Chairman Pollert: I think why Representative Kreidt is asking is that normally the benefit increase and salary increase was up with the fringe benefits.

Brenda Weisz: Yes that is why I said you are going to see it different on the Westcentral human service center and all of the other human service centers and in the institutions it will be different and broken out. They have a lump sum fund budget. At the central office we have salaries, operating, and grants. This ties with salaries in the central office and they will show up together. Because everything is all in one line item the account codes on the left are in numerical order. Because we are held to line items in the central office it will go up with the line item and be in numerical order by line item because this is purely by line item.

Representative Kreidt: That has got the 5&5 on top of the salary? That shows a 5&5 increase in there on the top line.

Brenda Weisz: The increase there would be changes that Tim pointed out in his testimony outside of the Governor's salary package.

Representative Kreidt: Yes but that would be a 5&5 in there then?

Brenda Weisz: The 5&5 is in a separate column. These are changes before the 5&5.

Chairman Pollert: I think what Representative Kreidt is asking is that you have total changes in salary of almost $800,000. Then you show the 5&5 under the salary increase. Why is the $800,000 increase under salaries permanent versus the other.

Tim Sauter: If you go back to page 3, we talk about additional changes in the salary area is the result of adding the one FTE for development disabilities case management. It shows that amount. The realignment of staff to meet client needs made up the bulk of that. Those are the things that are contributing to the larger number up on top.

Representative Bellew: When you realign staff that means you take this amount of money from somewhere else and put it in your budget?

Tim Sauter: In this case we had the physicians but we didn't have the funding. That is why we are asking for the funding. I have enough roll up to cover it during this current biennium. We don't have the money for next biennium.

Chairman Pollert: The 1.552 would be the $534,932 plus the $875,143 plus the $142,143. Is that correct? Then I would think that Representative Kreidt is asking if you have the salary increase of the $1,552,000 if it's in the three columns then why does $797,000 increase in the salaries permanent?

Tim Sauter: If you go back to those realignment issues the $723,488 is the large portion of that top line.

Chairman Pollert: Of the $797,593? Where the 1 FTE is going to make $350,000 plus all those expanses?

Tim Sauter: No. It includes one developmental disabilities case manager which is $100,000. Then you have $723,488 related to the realignment which includes the two psychiatry positions and another portion of the support position and also another portion of the developmental case manager position.

Chairman Pollert: Are you saying that is in there because they were vacant and now you are putting them in?

Tim Sauter: We are seeing a need for services. We are under staffed for psychiatry. We have

long wait periods for people to get in to see the psychiatrists. We have had to reduce some of the existing services that we had psychiatrists doing to meet the demand. We work with the department to look at how we meet that need. We were able to come up with the positions. We had enough money in the budget to cover it for this biennium. We had to request the additional funding for the next biennium to cover those expenses.

Chairman Pollert: So the $697,000 is for the two psychiatrists?

Tim Sauter: For the psychiatry it is about $650,000. Then we have $100,000 for the DD case manager. There are two portions that factor into that.

Chairman Pollert: So the psychiatrist is making $162,000 a year?

Tim Sauter: That would be correct.

Representative Nelson: If equity is in the administrative budget, I'm assuming that it would be proportioned out to the human resource centers as well as with these increases

Tim Sauter: That would be my understanding.

Chairman Pollert: If you remember the P&A budget, their equity ended up being, if you took it employee wise, 27.5 employees would be $3,196 increase per employee besides the 5&5. If you go to the DHS budget it comes out to $2,250 divided amongst 2,230 employees plus they get the 5&5. P&A is averaging $3,200 and DHS per employee is averaging $2,250.

Representative Wieland: I'm still having trouble when you talk about realignment of staff. Are these FTE's that are already in existence? Are they new FTE's? If they were in existence then they were not funded in previous budgets?

Brenda Weisz: These are FTE's that are existing in our field services area. They might be located in another center whether or not they need that staff. When we are appropriated FTE's for the department we have those FTE's we manage. Westcentral based on their wait times based on the services they need to provide needed an FTE to put in place to do those

services. When we locate an FTE within a human service center where they don't need that we will move the FTE but often times that center can't move the budget as well. We do need to provide this service. To do that we do move the FTE to realign our staff to the resources necessary. We look at our existing budgets to see if we can do that or not.

Representative Wieland: Are we going to see a reduction at some other center?

Brenda Weisz: I'm going to say no. The reason you aren't going to is if we were to just stop today and that is all we would do and not have other increasing needs then you would see that. Because of the other increasing needs that are existing throughout the system you won't see the reduction because of other increases. Even though there might have been a reduction for a particular piece of it, it's not going to actually reflect the reduction because of increased need anyway. We could do something else too. If there is a realignment and a need of staff at a center they work together, collaborate as a team, and figure that out where it would best serve. If we would say we are moving the money out of one center and putting it over here, you will just see a bigger increase in another center. We try to contain it the best we can in each of the divisions we move it to. At times, because of increased service needs, have increased requests.

Representative Bellew: If we are creating two new positions for this center, should not the FTE count go up by 2?

Brenda Weisz: We didn't create two new FTE's in the system. In the center we did. It is reflective in our current budget because we made the move of the FTE's right now. When we present a budget to you when it says the current budget column we show you what is currently our budget for that area and because it was this biennium they are part of our current budget count. That is why you aren't seeing a change.

Chairman Pollert: Is there a ratio in the human service centers how many psychiatrists per clients served?

Tim Sauter: We don't have a specific ratio. It is based on demand. We are serving over 1,000 patients with the 2 psychiatrists. In order to treat them we need that additional position.

Chairman Pollert: How many psychiatrists do you have for a total client base. You are saying you need 3 whether they are outside or in house. That is 3 per 1,000?

Tim Sauter: That is about how many people we are serving through our psychiatry services. At Westcentral it is about 1,000. We are at capacity. Those psychiatrists are booked from the time they walk in to the office from the time they walk out. They are 15-20 minute appointments except for the initial appointment which may be 45 -60 minutes. They are very busy. Continued testimony on case aid services.

Chairman Pollert: I hate to really go there but severe mental illness is different than the global health initiative since they are both mental health problems? What is the difference between the two as far as dollar wise?

Tim Sauter: The global health issue is again a term that the department came up with.

Chairman Pollert: No I mean is it targeted to different individuals and what is their diagnosis compared to what you are doing with severe mental illness at all?

Tim Sauter: They take care of the same people. It's these kind of services that help keep people in the community so that they don't end up transitioning into in patient at the state hospital or local hospitals.

Chairman Pollert: That is why I'm trying to get a correlation. It almost seems like it would be a double up between SMI and global health.

Brenda Weisz: I think one way to look at it with the OAR was the increases for additional needs that we saw for these existing services. If we wouldn't have done that our OAR list

would be 3 pages long. Westcentral would have had one more. Because they were similar in need and because they were doing the same thing at getting at the occupancy problem at the state hospital and residential issues in the communities. Instead of having multiple OAR's they were all part of one problem or issue. That is why they got pulled together into that number 1 priority. It's just to alleviate the problems that we were seeing in the existing services and pull them together in one category.

Chairman Pollert: For global health initiative, how many clients will be served. I'm looking at where the state hospital was at for occupancy probably 3-4 biennium's ago and 85% of occupancy or something. I know the numbers were down. Now they are up to 100-103% of occupancy. Now we have seen the state hospital increase in patient load. We are also seeing the human service centers increase in patient load. Had we increased the clientele to be served by 2 fold? It seems that it is something that is exploding here the last 2 biennium's. They all have to be related somehow. We went from an 85% occupancy at the state hospital to around 103%. Yet, our budgets are exploding with the global health initiative and other SMI cases. I'm trying to wonder why we are exploding so bad in 4 years.

Brenda Weisz: I don't think global behavioral health should be considered a new initiative. It wasn't a new initiative. It was just a way to group the issues we were seeing across the state. It's not a new initiative. It's just because we have capacity issues and the capacity issues at the state hospital. We put it into one number.

Chairman Pollert: How many clients were served mental health wise versus how many you are going to do through the 09-11 biennium including global health. I'd like to have those numbers. Have they exploded and why?

Alex Schweitzer: I have a handout tomorrow for you that will show over the last 5 years the

number of first time admissions with the state hospital. As you asked the question if there is additional, that is true. I think it averages about 285 per year.

Tim Sauter: Continued testimony.

Chairman Pollert: Population stays pretty stagnant in the state but yet you are seeing our mental health is increasing 33% in 4 years.

Tim Sauter: That would be correct. That is the people who are presenting at our door. Again they are having more complicated problems then they were years ago. Continued testimony on crisis safe beds and inpatient hospitalization.

Chairman Pollert: So this is not part of the global health increase in funding that the human service centers are asking for. This is separate? This inpatient hospitalization?

Tim Sauter: I think it's a combination of both. We have had these contracts with the hospitals since about 1988.

Chairman Pollert: Yet you are going up three times total? I'm trying to correlate why that is. Is it because the hospitals are no longer willing to fund it in their budgets and so you guys are doing it? The increase is going to be a 3-fold increase?

Tim Sauter: We have always paid the hospital for crisis stabilization for indigent patients. What the change in the rate is, is relating to the rebasing of the Medicaid that they talked about earlier. In our region we had a flat rate of $2,000 per stay. Now it is going to go to the Medicaid rate based on the number of days that the person is in the hospital. When we did this we tried to look at the average patient days for both regions and we multiplied that by both regions.

Chairman Pollert: So the basic rate was $2,000?

Tim Sauter: In our current contract we are paying $2,000 per stay for each of these individuals.

Chairman Pollert: It is based off of what?

Tim Sauter: The new formula will be based on the Medicaid rebased rate that Nancy had talked about earlier. We took a look at an average of 500 patient days. Then based on what the Medicaid rate for inpatient is, for those two hospitals we figured out how many would go to each hospital and we multiplied it by that rate. That is how we came up with that figure. It covers both centers.

Chairman Pollert: What is that rate?

Brenda Weisz: That will differ by hospital because of how the rebasing report was done. How the rate was set was the lower of cost for the psychiatric hospitalization or the standard deviation of one. Take those words and turn it into this number, $1,020.48. That is the max we would pay. If their costs were lower they would get their cost. That is what the rebasing report did for psychiatric. I will pull the cost by centers and hospitals. There is only one center that actually has costs higher than that.

Chairman Pollert: It's not a correct to say we are proposing to raise those amount of dollars to global health initiative we aren't saving on the hospital side?

Brenda Weisz: No. The increase in the rate of hospitals wasn't to create a savings for them but to pay them at a higher rate just as we did in the Medicaid rebasing. The one thing that might be helpful is the worksheet that Nancy handed out that had the numbers to the global behavioral health. When you look at Westcentral on the breakdown you see the increase in the hospital contract there. That should correlate to that increase on here. That is how some of that will tie together too.

Representative Nelson: Is it fair to say that every one of these individuals is being served in the inpatient hospital now but it is coming out of the budgets of the 2 providers in Bismarck in this case?

Brenda Weisz: Right now the clients we have are being served currently in the $200,000 contract that we have right now. They will continue to be served but that hospital will be paid at higher rates. It won't be flat and locked in at $200,000.

Representative Nelson: There is nobody that is being denied service. It is just that the department or the human service center is subsidizing their care?

Brenda Weisz: Yes.

Tim Sauter: The people we are paying for are people who would not be able to pay their bill. We have entered into an agreement with the hospitals that we would pay them this much in order to serve the people. If we don't pay that they wouldn't get any reimbursement for that. In essence they have accepted less than their cost because that is better than nothing. They are saying it is getting harder and harder for them to lose money on those admissions. That is one of the reasons why we are looking at the rebasing.

Representative Nelson: This might be hard for you to answer. Do you expect if the reimbursement to the hospitals takes place, any change in the level of care that is given to these individuals?

Tim Sauter: I would assume that they receive the same level of care. The main concern I have is will the hospitals keep them longer than we think is necessary. We would be a third party payer regulating how long that person is staying. They should receive the appropriate level of care as they would before.

Representative Nelson: Having said that, currently you provided them a cap of sorts with the dollar amount that you are offering. You can be sure that they won't keep them longer than they need to. Is there a mechanism that you envision that could be added to take that concern and move it into this new reimbursement proposal?

Tim Sauter: I think that mechanism would be in our contract process and looking at who is authorizing the days of service. We should be able to manage that.

Representative Nelson: That would be a physician rather than an administrator.

Tim Sauter: That would probably be the head of our regional intervention service unit who is a professional counselor.

Nancy McKenzie: Our system of control is exactly those two things we mentioned. One is the contract itself. When I talked about it earlier each human service center does have excellent dollars. When we are out of money we are out of money. Our regional intervention services approve and authorize every admission that we are going to pay. The hospital doesn't say that we owe them. We approve that they are going to be covered under their contract. We are involved regularly with the plans to move that person and step them down once we are ready to step them down. That gives us some assurance. Plus the hospitals are going to be considered that if we keep people longer and generate more revenue for that admission, they are going to run out sooner in the biennium.

Tim Sauter: Continued testimony on residential services.

Chairman Pollert: So the $1.4 million in which $900,000 is general fund increase why is that going up 50%? We have an increase in general funds and 07-09 it was $1.8 million. The 09-11 budget is $2.7. Roughly that is a 50% increase in general funds.

Tom Klein: I'm the fiscal manager at Westcentral. If you want to look at the increases and provider inflation was $300,000. The young adult transitional residential services were a completely new facility. That would be part of the $1.4 million. There is $320,000 that is part of the city residential adolescent facility. If you recall that is a facility that we share with both our safe beds and the city adolescent services. There was a substantial increase there because of the provider costs which came in much higher than anticipated. That is the majority of that.

There was also part of that city residential adult which was a $40,000 increase based on their costs to continue the operation as it exists now before any inflation.

Chairman Pollert: You have a new facility come online? It is being requested you said?

Tom Klein: It is being requested as part of the budget. The $750,000 is what that is.

Chairman Pollert: What is that for and whom?

Tom Klein: Right now we don't have a provider. It's for young adults transitioning from the partnership program to the SMI adult area.

Representative Bellew: That was not an OAR?

Tom Klein: No it was an OAR.

Tim Sauter: That would come under capacity. If you need to, you can reference page 4 of my written testimony for that explanation.

Representative Wieland: Under psych social club, the appropriation for last year was $196,122. You show that you are starting off with $204,000 plus the provider inflation which is not 7&7. Can you run through the math there?

Tom Klein: The $204,000 figure that we are starting off with is based on what we project our costs to be this biennium. It would be prior to any inflationary cost that would be needed for the next biennium. We are basically saying that we are going to spend that this biennium as this result. That is where it is going to start off with prior to any inflationary cost.

Chairman Pollert: Any more questions on that? We will get off of the grant summary and go back to the detailing. That is basically just an explanation of what we have been going through. You have a general fund increase on the second page to Westcentral human services of about $3 million.

Tim Sauter: Yes we covered that on the overview.

Nancy McKenzie: In the interest of time, I am thinking if we have the directors doing a small overview even of their written testimony instead of going through it completely because you have heard one. They are all organized the same. Maybe each center can hit on their specific changes or things that are unique to them to save you time.

Chairman Pollert: So you are talking about going right to the detail?

Nancy McKenzie: Well hitting the highlights of their testimony.

Chairman Pollert: I'd rather go through highlights instead of going through the whole thing then go to the detail.

Nancy McKenzie: When you get to the detail you can talk about the main changes.

Chairman Pollert: Let's shift gears and go to public testimony.

Tim Sauter: Continued testimony. NEW JOB.

Representative Kerzman: How are you handling that? Will you walk us through? If you have someone from the county that needs care do they have to go to Jamestown? Is there a stopping point?

Tim Sauter: What we have done and especially in outlining counties there hasn't been much change. What we would do is call a local hospital and outline the situation. We look at if the person is committable or not. We work with the state hospital and the county sheriff would transport that person to the state hospital. We do have some other options. In the past they may have brought that person to St. Joseph's in Dickinson. As I mentioned earlier we do have contracts with the two hospitals in Bismarck to do the crisis stabilization for those people who are indigent. So we would also have the option of authorizing in addition to one of those two hospitals. To deal with the psychiatry issue and not having psychiatrists at St. Joseph's we did contract with Dr. Conrad and also with psychiatric networks to provide those services through tele-medicine. The challenge that we have is that Dr. Conrad is planning to retire. He is

actually going to look at May of this year. In 2010 he will be retiring. We will be down to a few hours of tele-medicine a week. At that point in time we will have to request some money. We might need an FTE to look at pursuing a staff psychiatrist.

Representative Kerzman: Another question with the influx of oil field people, have you noticed the numbers going up or are they staying consistent with the number of clients. We often hear that it brings in a lot of riff raff.

Tim Sauter: As I mentioned earlier we did have a decrease in the number of clients served this past year. It was about a 4.5% decrease. I believe we had 1,942 last year and this year we had 1,854.

Chairman Pollert: How many psychiatrists and clients?

Tim Sauter: I think around 350 clients. That is a guess I will have to verify that. We have less than a full psychiatrist. The other thing I'm going to mention is that we do contracts with the psychiatric hospital here in Bismarck. We have 9 admissions in state fiscal year 2008. Three to Medcenter one and 6 to St. Alexius. Continued testimony.

Chairman Pollert: What is the turnover at Badlands?

Tim Sauter: It is a 7.4%.

Tim Sauter: Continued testimony (Handout D)

Chairman Pollert: You had the rent at Westcentral of $16 a foot and the other rent was $14. Is $16 a high number the highest number we have heard? Is there a reason why that is much more expensive?

Tim Sauter: This is actually in the lower level of the building. I think it is attributing to the reconstruction.

Chairman Pollert: Are you saying that the $16 is going to be cheaper a biennium from now?

Tim Sauter: That is looking at the cost of the utilities and those kinds of things. The rest is

missing. The rate will remain there I'm assuming.

Chairman Pollert: Where did the $91,000 come? Is it in one main area or is it all over?

Tim Sauter: The primary part of that comes from the $3 increase and the slight increase at the VR office.

Representative Nelson: Is that increase due mostly or entirely to the increase utility cost? What was the reason for that?

Tim Sauter: According to the college is that it is labor cost. They do provide janitorial service which is part of the rent. The other part would be utilities.

Representative Nelson: Are you comfortable with that?

Tim Sauter: I would love it to be less. I think it is a pretty good rate. It's office, parking, and janitorial. It's higher than we anticipated but it works.

Representative Nelson: It trips a wire when they go up $3 a square foot in one biennium.

Tim Sauter: Continued testimony on operating fees and services.

Chairman Pollert: I see you are dropping down $11,000.

Representative Wieland: The only question I have is on the one service center going back to the psych social club the increase in provider inflation was general funds on one and here it shows it as federal funds. Is that an error?

Tim Sauter: I would assume that is how they are funding it out.

Brenda Weisz: It was just when the adjustment was made by Office of Management and Budget it got put into the wrong place is all. It is general funds. There were a lot of entries that need to be made. That is where it was placed and that is where we have to report it.

Tim Sauter: Continued testimony.

Chairman Pollert: What I'm going to ask for sure is residential services. Is that the 16 bed facility?

Tim Sauter: Yes it is the 16 bed facility which is actually $910,000 total.

Chairman Pollert: What does that pertain to again?

Tim Sauter: Those are 8 beds for persons who have severe and persistent mental illness and 8 beds for persons who have chronic addictions.

Chairman Pollert: Where is that at?

Tim Sauter: It does not exist. We have to do a request for proposal and see if we can find a provider to do that.

Representative Bellew: Is this an OAR also?

Tim Sauter: This is an OAR and it is on the global health initiative.

Chairman Pollert: Under human service centers on the overview I have down St. Joseph's hospital in Dickinson with a $17 million increase. What is that about?

Brenda Weisz: What overview testimony? What that overview bullet talked about is what the global behavioral health OAR would have funded. In total it might have related to something collectively. I will look at that.

Chairman Pollert: For some reason I have a $17 million increase, 20% general fund increase, $7.2 million of salary increase of 5&5.

Brenda Weisz: It could be globally for all human service centers. I'm thinking it was Nancy's overview where we pulled the centers together.

Chairman Pollert: I was just trying to figure out if Dickinson is in your area. That is why I was asking that.

Representative Bellew: On our green sheet is says Badlands grants $665,000 in general funds. On the sheet we just received it says $770,000 in general funds.

Brenda Weisz: What I noticed is that the reduction that was made to St. Joe's contract at Badlands, that number is a net of that 105 reduction and the other number. Those two numbers are netted together to give you that number. It's the increase of $770 offset by the decrease of $105 to give you that net general fund change.

Chairman Pollert: Any other questions on the grant summary? There are some miscellaneous increases in the psych. Badlands says $829,700 is from the global health initiative.

Tim Sauter: Yes and the 7&7% for our other providers.

Chairman Pollert: Right. Are there any other questions? We will be in recess until 15 minutes after floor session.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/22/09

Recorder Job Number: 7618

Committee Clerk Signature Morgan Rennerfeldt

Minutes:

Brenda Weisz: Testimony Handout (Attachments A/B). I handed out two documents which you had requested this morning. One was just a breakdown of the turn back that I covered in my overview. That is the sheet that is portrait style and shows you the rounded numbers of turn back by division. The next sheet has to do with the inpatient psychiatric hospital rate reimbursement. This schedule is on a landscape form. This one tells you based on the rebasing OAR in Medicaid what the daily rate was based on costs in that study for those hospitals that are included in our human service centers budget. When we did that calculation we took the lower of columns A or B and the number of days we have in the year. If you take column C and multiply it by column D that is where you get your annual costs. Column D finally is your biennial costs for the budget. This will be the amount of inpatient hospital contracts at the centers. This is not the increase but the final costs built in the budget. With the OAR being funded we did take into account that we had some of it in the base budget. This should be on your schedule before inflation.

Representative Bellew: On what schedule should this be on?

Brenda Weisz: This will be on your grant schedule for each of your human service centers that actually do an inpatient contract so when you look at those grant schedules this morning it will be in that area.

Candace Fuglesten: Testimony Handout (Attachment C) 4:44-7:00

Representative Ekstrom: In years past I know you had a fairly lengthy waiting list for psych evaluation for children. Do you have a sense of how many days or weeks you are sitting with at the moment?

Candace Fuglesten: In the area of psychiatric evaluations we are probably keeping our waiting list better than it has been in many years. Children, at this point we are probably within a month time tables to get in an evaluation. Very similar for adults as well. If it's an emergency or crisis we can get individuals within a week. Continued testimony.

Representative Ekstrom: Do you have a pay schedule as to what similar individuals are making in Moorhead?

Candace Fuglesten: I can get you one. I don't have one at this point. Continued testimony.

Representative Bellew: You say you increased by 6 FTE's our green sheet says by 7?

Candace Fuglesten: These are capacity in this particular area.

Representative Bellew: The green sheet says 7. Oh never mind I'm sorry. That is the grant line.

Candace Fuglesten: Continued testimony.

Representative Wieland: Would you explain that particular item please? Why would it only decrease the general fund by $41,000?

Candace Fuglesten: Part of that would have been done with other funds that were not general funds. Continued testimony.

Representative Metcalf: You mentioned that there is $192,000 in adult drug court. Is that the total cost of drug court or do they still have the directions to retain more?

Candace Fuglesten: Within our budget, in addition to the $192,000 that was removed from correction, we also from the legislator last session had appropriated 1 FTE to work in that drug court area. So we have additional in the drug court. The expectations that are in the corrections portion of the budget for drug courts would be to provide the staffing for parole and probation. Also there would be costs within the judiciary part of the budget.

Candace Fuglesten: Continued testimony.

Representative Bellew: Can you explain that?

Candace Fuglesten: Our budget instructions were to build a budget that provided an even level of services from the previous biennium. Some of those costs go up in terms of salaries. There are certain portions of federal funds such as social service block grant or addiction block grant where it doesn't match one dollar for three dollars. It is a certain amount of money that we get. We were that much money short which came out of general funds in order to hold even our budget and expenses.

Representative Nelson: Is it fair to say that a hold even budget is the hold even on programs and not money?

Candace Fuglesten: It is a hold even on level of service.

Brenda Weisz: When the Governor comes out with his budget message in March it is really generally speaking hold even in general fund dollars. Then we start working with Office of Management and Budget because of what our budget does and what the services are that are included. There is the cost to continue. We spend a lot more time together, Office of Management and Budget, and the department works on what a hold even is. It starts with a number and that is how we start building our budget. As we continue to work with Office of

Management and Budget it evolves to a hold even in services.

Representative Bellew: Does that mean that federal funds have fallen? I know the FMAP went down but does this mean that we are receiving less federal funds and that these general funds are taking the place of federal funds?

Brenda Weisz: In some regards yes. Let's just isolate a specific position. Remember I told you that we have open ended funding sources. Some of those sources and adding our DD case managers from this morning, that money would be available at the 50/50 still. Let's take an individual that works and is funded specifically with the substance abuse block grant money. With the increase that was given last legislative session their salary went up from the budget that is in 07-09 to 09-11. The block grant didn't go up. To cover that increase that would be covered by general funds. That is where you are limited with the federal funds and that is what the bullet describes.

Candace Fuglesten: That concludes my overview so if you would like to go in to the detail we can.

Representative Wieland: I would like to go back and cover one point. You talked on page 4 about the Fargo school district. I have never heard the number of 113. I have heard of in the 30's.

Candace Fuglesten: The quote here is from the Fargo Forum.

Representative Wieland: I'm assuming that is 113 languages and dialects. Does the federal government pay for a lot of the costs involved with interpreters?

Candace Fuglesten: One of the requirements for receiving federal dollars is that we provide services to all individuals. If translation services are needed we are required to provide those. That is part of the federal law.

Representative Wieland: That is at who's expense?

Candace Fuglesten: That is at our expense.

Chairman Pollert: Do you have clientele that come across the border from Minnesota?

Candace Fuglesten: If we have individuals who do seek services that are from out of state, it is our policy that they are charged full fee. Another thing to that is that if they are seeking services where we are over capacity, we do not provide those services. By and large we provide very few services to individuals who would be MN residents. There are some exceptions. Sometimes when we have the courts involved and the crime is in the state of ND or the county social service is involved with children. Perhaps the parents have moved to MN, we do make some exceptions because of the courts and where the jurisdiction for the case and proceedings are.

Chairman Pollert: The only reason I asked that question is that I remember last biennium there was a legislator saying that with what we were doing with the human services budget that we were going to be denying services to people from MN. I didn't think we should be supplying services to the people of MN. I take it that statement was false.

Candace Fuglesten: The rules that the human service centers operate under is that a non-resident of the state, if there is capacity to provide services the human service center could provide those services but they must be at full fee. None of the sliding fee scale or any of those would apply.

Chairman Pollert: With Minnesota's budget deficits and with our surpluses dwindling slowly, do you see anything happening as far as the state of MN? Do you ever see that where people would try to come over from MN to ND. Do you keep track of that? It's hard to keep track of what MN is doing but you have Moorhead across the river. If the state of MN ends up reducing services, then will they be coming over here?

Candace Fuglesten: We have a very mobile population. We do see people who may live in Moorhead then move to Fargo. Our process, in terms of how people come in to the human service center, we do have addresses and require all of that. We do know where individuals reside. Again, the policies that we would apply is if we would have capacity we would serve individuals. Again, at Southeast the capacity areas are very limited. It would be perhaps counseling. There are not a whole lot of areas where we aren't at exactly that.

Chairman Pollert: But they are paying what your rate of services are?

Candace Fuglesten: They would pay the absolute highest fee. I will move on to the detail. Continued testimony.

Chairman Pollert: This is just a general question. In your overview you provide behavioral services to 5,029. It then showed 1,500 for vocational rehab. Do they have their own budget or is that included in the human service center?

Nancy McKenzie: The portion that would cover our employees is in our budget. The temporary positions are basically Para-professional or part time.

Representative Bellew: On your salary line items, the $872,000 is that strictly because of the 6 new employees?

Candace Fuglesten: That is part of it. The other things that are in there, you have turnover people come and go, there are some changes that are made. You might hire more experienced people at a higher salary. You might hire some people at a lower salary. Some of these also have to do with the way that it is funded is at a point in time which was in March, we looked at the positions that we had and we looked at the salaries and it was computed with those people that were on in that point in time. That is how the budget is arrived at.

Chairman Pollert: When I look at your temporary salaries, 05-07 was $436, 07-09 was

$500,000, and now you are attempting to go to $708,000? Can I get a further explanation of that?

Candace Fuglesten: Due to capacity concerns we made a decision in terms of the utilization of the money we had. We did bring on these temporary positions, a half time licensed addiction counselor. We have a number of Para-professionals who are human service center aids which are case management extender positions. These are individuals who deliver medications, teach individuals life skills kind of things, and so forth.

Chairman Pollert: Is that like a QSP?

Candace Fuglesten: Yes they are similar. Again with the demand in our case management area for services, we have found that the case aids, especially with the high turnover rate that we have, at any one time we have had 4 or 5 case management positions open. If you take that times the case load of 35 and then that case load, even though we don't have positions does need to be covered. The case load for everybody else that is remaining in those positions has increased during those times because we are trying to fill those positions. We have had to utilize case aid to help us to manage that case load.

Chairman Pollert: Brenda when you handed out the vacant FTE's, the ones that show in the southeast human service center being filled in 1/12. When you told us yesterday that there were 114 but you said 40 of them were filled, that would take example of the ones that were filled just lately.

Brenda Weisz: You are correct. Anything that says filled on your description would be part of that.

Representative Nelson: It would be a lot easier to understand these things in this case you have a $208,000 change. It doesn't show any additional FTE's that there was some way of showing the new positions so we don't always get caught in that trap of asking about salary

lines. They seem to go up more than others. You explained why it happens but to me it should be if your previous line is current and comparing the money from the previous budget that those added employees should be an addition and not a zero in that column.

Brenda Weisz: Temporary employees are not FTE's. For the other thing you are talking about this morning, that is what you are referring to?

Representative Nelson: Yes. If there was some notation of additional persons because it is the same thing. You are paying more people. These addiction counselors are additional staff.

Brenda Weisz: They are temporary so they don't actually reflect in your FTE count and they never will. I can't reflect FTE changes for you because they don't exist in FTE's.

Candace Fuglesten: One of the ways we can do that is that we do identify ourselves which are the temporary positions that we have. The understanding with any temporary position is it is just that, a temporary position. If we don't have the money within the budget to afford that then those positions cease to exist.

Chairman Pollert: I'm looking down at travel and I'm utterly shocked. That is probably the least amount of an increase I have seen in the travel expense. I'm wondering why yours is less than any other budget we are looking at.

Candace Fugelsten: Southeast human service center, because we have had at least 3 bienniums where we emphasized services to individuals with severe and persistent mental illness. That service has been a service that we view as it is a community service. It should be delivered in the community. We need to work with people where they live. We have probably had for three biennium's an aggressive outreach and service to people in the community. I can speak when we get into Southcentral where we will have some travel costs and that has to do with being more aggressive in our outreach and keeping people in the community.

Chairman Pollert: I should have looked at the counties of where you serve.

Candace Fuglesten: That is another good point. In region 5 while we are large in population and while there are rural counties it is a much more compact in terms of geographic distance. I will speak to south central. You will see that we have a very large geographic area so transportation, mileage, and things are more expensive. We have an aggressive plan to staff training and things. We try to do most of that on polycom. We also do carpooling whenever possible. We have implemented very effective measures in terms of trying to keep those costs basically directed to services in clients and the money that you will see when you go to the detail is basically for motor pool costs and in reimbursement for individual mileage.

Chairman Pollert: But to go to Fargo from Steele County, is that distance any different from going to Jamestown to Carrington or from Jamestown and Ellendale?

Candace Fuglesten: The distance within the region is what I would say is larger within Southcentral than it is with Southeast. We have aggressive outreach services and perhaps we would have been in place longer.

Representative Wieland: Just to point out in case you missed it that Badlands of Human Services only had an increase of $787.

Chairman Pollert: I should have recognized for that.

Candace Fuglesten: Continued testimony. We have a schedule with our rent that is attached to your handouts. The rent is what you are asking about?

Chairman Pollert: I just see that it is within par of what we have been talking about?

Candace Fuglesten: The rent currently is $11.44 for the next biennium it is going up to $12.01 per square foot.

Chairman Pollert: That is an increase of $1,278. Do we want to go through that? Let's just move to grants and benefits.

Candace Fuglesten: Continued testimony.

Chairman Pollert: In the human service centers budget it is going to show under inpatient hospitalization?

Candace Fuglesten: Yes. Continued testimony.

Chairman Pollert: Are you under residential? How many beds is that facility?

Candace Fuglesten: Yes. That is 42 beds.

Chairman Pollert: Is it currently being used now or is this a proposal?

Candace Fuglesten: The city of Fargo has allocated resources and assigned the Fargo housing authority to build Cooper apartments. They are anticipating a spring construction date.

Chairman Pollert: So the increases in funding here, is that for the two year part of the biennium? Is it going to be going on July or August 1 or is it a year later so this is only for one year of the biennium?

Candace Fuglesten: When we put together the budget, the plan was that the building. They would start building the facility which the City of Fargo is paying for this fall. They were unable to do that. At that point the housing market sort of tumbled and the investor that they had which was lined up and ready to do this was not ready to make that commitment. What we have heard from the Fargo Housing Authority is that in as early as spring as possibly they will be able to build. In terms of when it goes online, it could very well be later than July 1. The 91 individuals that are homeless in our community are still there whether they have a place to live or not. The services directed to those individuals is not as efficient. If you are trying to assist individuals on staying on medications that are homeless and they have no place to keep them, it is not as efficient as having the housing first.

Chairman Pollert: So if I'm understanding correctly the Cooper house is going to be used for homeless?

Candace Fuglesten: Yes that is the target audience.

Chairman Pollert: So the amount of stay is how long? The turnover rate must be pretty big?

Candace Fuglesten: It is intended that we would be able to intervene with the individuals. Many of the individuals who are long term homeless are individuals who have a serious mental illness, who have chronic addiction disorders. The intent is that by providing a home and wrapping services around these individuals that we would be able to increase the stability of the housing, being to look at employment options for individuals and training if necessary so that we would reduce the number of individuals who are counted as long term homeless.

Chairman Pollert: How are they being taken care of now?

Candace Fuglesten: They are living on the streets. We do have homeless case managers who try to work with them to get housing, and such. There is a long wait to get those resources. It was about 14 months. We are trying to stabilize them and provide them with the treatment they need.

Chairman Pollert: So the city of Fargo is going to pay for the construction of this facility. After it is built it looks like it is basically up to the state at 60-70%federal and very little of funds from the city government.

Candace Fuglesten: They will be providing all of the housing subsidy support that goes on.

Chairman Pollert: The only reason I'm asking is that I'm looking at special funds and I don't know if that means city or what that manes. If it's residential services it shows $7,500.

Nancy McKenzie: Keep in mind that none of the residential costs are part of Southeast budget at all. Everything you see reflected here under residential services relates to the staff positions that will be providing that.

Brenda Weisz: The residential services is not paying for any costs for the Cooper house at all. We don't pay for that at all. We are putting in as part of the global behavioral health is about $315,000 of contracted 24/7 program assistance.

Chairman Pollert: So the city of Fargo is paying for the utilities, the water, and all of that.

Brenda Weisz: We aren't paying for that. That is not what the costs are for. The only piece of that cost that we are paying for are the contracted staff. We add every member for the other staff and we continue to refer the staffing costs. Those are up in the salary line and we talked about those earlier. I don't want you to think they are down here when we say staffing. The only thing relative to Cooper house that the state is paying for is that contracted 24/7 program assistant. There are other residential services they currently provide in the community. There is also a youth transition facility that was added for those children transitioning from the youth system SMI partnership program into adulthood. This is the other one that was an OAR that was funded.

Chairman Pollert: Before it was explained to me it looked to me like we were going to be taking care of all that.

Candace Fuglesten: The other thing that I would add about the transitional living facility is about the number of children that are in custody of the human service areas. We have come together to put a proposal together for providing transitional services. We have a number of children who have severe emotional disorders, severe abuse histories. That facility will be geared for those individuals directly.

Chairman Pollert: So I'm going to refer to the green sheet on page 7. That must be #5. It says the youth are young adult transition services. The $1.1 million dollars, that is going to fund what?

Brenda Weisz: That is a combined number. That takes the Westcentral number that Tim talked about for 750. The part that is actually Southeast is 426.

Chairman Pollert: So I should have probably asked Tim the question of what it does.

Brenda Weisz: That is dealing with the children that are with a serious emotional disturbance as they transition into adulthood. They aren't quite ready to step out on their own when they reach the age of 18 or adulthood. This would set up a transitional facility for them that would help them transition into adulthood.

Chairman Pollert: So we probably had that type of population in past bienniums, we just haven't funded it. Or is this an increase in funding to do more of that?

Brenda Weisz: We have had this. It's the partnership program we have talked to for many biennium's. The children with serious emotional disturbances. Those children are in our system. What has come to light is that some of them need additional supports as they transition into adulthood. This recognizes those needs that have been identified through our stakeholder meetings and predominately the Bismarck and Fargo regions.

Representative Wieland: Then that covers them from approximately age 18 to what?

Candace Fuglesten: It would be all individualized but we are going to be working on vocational skill training. We are also going to be looking at life school kinds of services as well as continuation of the medical services that they have been receiving as children. That can vary. We are looking from a planning purpose somewhere between 9 months to 3 years depending on the individuals that are involved. Continued testimony on the last page.

Representative Bellew: I see all the federal funds are gone? Do you have an explanation for that?

Jim Gebern: I am the fiscal manager of Southeast. The answer to that question is we had a grant that was 75% federal and 25% general. As of July 1 that federal money disappeared. In order to keep our hold even budget we had to replace that 113 with all general funds or drop the programs.

Representative Bellew: Did you reapply for them or anything?

Jim Gebern: I'm not sure.

Representative Bellew: The feds are giving away a lot of money right now.

Candace Fuglesten: I do wish to add to that answer. Respit care is one of the services within the human service center that is truly more of a prevention service. Individuals if we work with them and provide some respite, there is evidence with the groups that we serve that they do not then enter into higher levels of care. That is for children's services, individuals with disabilities, and it is to provide some support and relief to parents.

Chairman Pollert: Any other questions? We will move on to Southcentral. One more question. Is this a verbal agreement with the City of Fargo or is it a signed deal with the city of Fargo.

Candace Fuglesten: It is a verbal agreement. The services are something that they recognize that we provide. The homeless individuals with severe mental illness and chronic addiction are certainly vulnerable adults. It is a verbal agreement.

Chairman Pollert: Is the city of Fargo saying from you that if you get the funding from the State legislator for Cooper house that they will build it if we bring forward the money?

Candace Fuglesten: The city of Fargo committed to building this facility without any commitment from us. They did work with us as partners to say would you come to the table and provide services. It is their commitment. They have a 10 year plan to end homelessness as do many cities across the state. They have been very active because of the large number of homeless that reside there. They have been very active in implementing the pieces of that plan.

Chairman Pollert: Could it be said that the homeless people will be living in a nicer facility than the average tax paying citizen?

Candace Fuglesten: I have a drawing of what the outside will look like. It is going to be public housing. It is modeled much like any other public housing unit.

Chairman Pollert: It's not a current apartment building, but will be built brand new?

Representative Bellew: My understanding is that all you want is a 24 hour coordinator for that building 7 days a week. All of the services will be provided. The money is already in your budget for those services, Is that correct?

Candace Fuglesten: The Governor put that money in the budget for 4 positions to help us provide additional services to that target population.

Candace Fuglesten: Continued testimony.

Representative Nelson: Is there an increased utilization or is it stable? Is there a decrease in those numbers?

Candace Fuglesten: There is an actual increase. The number of clients coming into Southcentral increased by 3% over the last biennium. Continued testimony.

Representative Metcalf: Just as a thought that is going through my head here now, you are taking credit for the fact that you are growing your own and through training you filled all your addiction counselor positions that you had. Has there been a major increase in salary over the last five years?

Candace Fuglesten: In the last five years? Periodically in some of the health professional shortage areas which licensed addiction counselors is one of those positions . We have done some equity adjustments across the DHS. In the last five years I can recall one of those occasions where we did increase an equity adjustment across all of the addiction counselors.

Representative Metcalf: The reason I asked that question is because it wasn't too long ago that the prison in Jamestown was very short of addiction counselors. In fact they only had 1 out of 6 authorized. At that time there was an adjustment made to salaries. I just kind of wondered if that didn't have some impact also.

Candace Fuglesten: Continued testimony. I also have Mark Anderson who can assist with some of the financial questions.

Representative Nelson: I'm quite impressed with the rental lease agreements that you have in Fargo and Jamestown compared to Bismarck. You are able to lease at a discount to what we are seeing at a discount to other parts of the state. Just quickly, the buildings that you rent, is it new office space? Is there anything that would set it apart?

Candace Fuglesten: The answer in the Jamestown region is that we have had a long term rental agreement with our landlord that goes since 1983. In that kind of a relationship the rates of held steady. In the Southeast region many times for zoning reasons, generally we talk about putting a residential living facility in a community or an area. We have quite a publicity that is negative. We have most of our space in the Southeast region that is in industrial areas where we have had to do some restructuring to the buildings. We get that at a reduced cost. Continued testimony.

Chairman Pollert: I see that is a $60,000. Unless someone can take a good look at it. We can move on.

Candace Fuglesten: We will move to the grants benefits and claims. Continued testimony.

Chairman Pollert: Where is bridgepoint at again?

Candace Fuglesten: It is in Jamestown and connected somewhat to the psycho social center in that area.

Chairman Pollert: So you were able to, with Bridgepoint, access federal funds thereby reducing the allowance on general funds?

Candace Fuglesten: Yes. When that was bid it was bid by the ND State Hospital. We are able to collect Medicaid for services that are provided in that facility.

Chairman Pollert: Are there any more questions for Candace?

Kate Kenna: Testimony handout (Attachment D)

Chairman Pollert: Do you outside contract any psychiatrists for 1,000 clients. When I look at the other it was 3 for 7 clients. Can I draw a correlation there?

Kate Kenna: We have one psychiatrist that we contract with for 20% of his time. The other has to do with the poverty in the Devils Lake Region and the people who need the service.

Kate Kenna: Continued testimony

Chairman Pollert: We should take a look at rent and lease.

Cliff Nevere: Our rent on our main building is $10.42. Our basic rent hasn't changed since 1987. What the increases have been over time is that we have an escalator clause. Back in 1987 it cost $45,000 to operate. What our escalator is, is that we pay the difference over that every year. It doesn't include if real estate taxes go up. The one thing we are worried about is that our building is up for sale by the landlord. He is getting up to retirement age. He has a partner in the business and wants to sell it. We are kind of worried about what might happen there with the rent.

Representative Bellew: How much is he asking for the building?

Cliff Nevere: He wants $950,000. I did a quick figure of 7% interest of that and we would save about $27,000 a year if we owned it. The building is fairly old and it doesn't have adequate parking. Continued testimony on rent and leases.

Chairman Pollert: You show 05-07 at $69,000 and 07-09 at $94,000. Yours is at $24,000. If you would double that you get $50,000 and your budget would be at $85,000. Is that an abnormality? I'm glad to see the reduction but when you just split it up a bit.

Cliff Nevere: The reason we did decrease it some is that some of it was in A&D ($7,500). We have a lot of rates from the reservations. We weren't able to work anything out there. We still have some in there from that. Most of the expenses are pretty much in line. Other purchases of

services are in the area. A lot of it is an experience program. There is $40,050 in there. All of that more and likely will be spent. The homeless money is almost used every time. Partnership is the other area where we decrease it some too because we hadn't been using it. Our program has been so-so ongoing. We have a new person in there. I don't think we have been getting that.

Representative Kreidt: I noticed in all operating fees that staff licenses vary from 65-$12,000 for facility. Is part of the hiring of staff required to be licensed. Is that just part of the contract that when you hire those people that you pay for those licenses. Is that how that is done?

Kate Kenna: We do pay for once license for a staff person if it is required for their position.

Representative Kreidt: What about psychiatrists?

Kate Kenna: Not the contracted, just in house staff.

Chairman Pollert: I'm just going down to the grants and claims of $294,000. I'm looking at your overview of $959,000 increase in general funds and roughly $650,000 is due to salary increases 5&5. It really comes down to the $294,000 in the grants. Could we go through that? I don't think you have an FTE increase for Lake Region?

Representative Bellew: Are we on grants? The psych social clubs and provider inflation, I don't understand why we are given this social club provider inflation. Who provides for the social club?

Kate Kenna: We have contracts with the social club.

Representative Bellew: Who is the social club? What is the social club?

Kate Kenna: It is a social place for people to go with serious mental illness where they have some group sessions?

Representative Bellew: But the human service centers don't run this at the time?

Kate Kenna: No. In Jamestown it is with Progress.

Chairman Pollert: So it's independent contracting is what you are saying? So in your overview it shows $208,000, you are saying is that the 7&7? As an example, under the grants under residential that is where you are saying the 7&7 showing up for residential services?

Lynn Bigum: On the grant summary that $200 is listed under all the different areas that we have. The social club gets their share of $17,894. In the psychiatric we didn't include it there because when the person works they do take some time off here and there. He wasn't utilizing the full amount. We felt we could cover it with what our current budget is. We can cover the adjustment with what we already have.

Chairman Pollert: Do you have a drop in federal funds and an increase in general funds> Is that a block grant that you aren't receiving anymore?

Lynn Bigum: That actually started a couple of biennium's ago when we had to have our hold even. What happened is in order to make ends meet we had to cut something. What we cut was our residential unit. The residential services portion of our Rolla program. Well then by the time we come to fall and the Governor gets it, we have a better idea of what our revenues are. At that time we put in the information system. We were able to look at stuff better. We had a lot of increases right away on staff productivity because of the information for us to use and manage. At that time we were going to have more title 19 than what we were going to have. What they did was put it back in our budget and put it back as federal. The thing is that we really need to budget our title 19 so like in clinical population services if you look at the cost center you have a big decrease in general and an increase in federal because that is really where the money is generated. For you to make decisions properly we have to put money in the right places. For the center overall there wasn't a drop just a realignment.

Chairman Pollert: Are you satisfied with the grants? I just look at your overview of the budget and take the total increase and divide it by the 07-09. I see it is an 11.4% increase. They are all different. Do we have anything major in Northeast? We might as well start on Northeast.

Kate Kenna: Continued testimony on Northeast.

Chairman Pollert: What was your turnover percentage at Lake Region?

Kate Kenna: It was 14.13% and Northeast is 10%. Continued testimony.

Representative Bellew: In your overview it says support housing for an additional 8 consumers? What does that mean?

Kate Kenna: Last biennium you funded a facility for us. We have got it up and running in cooperation with prairie harvest foundation. We have additional housing for 8 people with serious mental illness.

Representative Bellew: That is not 8 additional people but the 8 we founded last time?

Kate Kenna: Continued testimony.

Chairman Pollert: On the salaries permanent, what is the $493,000?

Kate Kenna: The majority of the money there has to do with when we took a position and reclassified it to a psychiatrist in the last biennium. That is how we got two full time psychiatrists. We had contracts and were able to hire one of our contract psychiatrists full time for less than the contract. That is the majority that is reflected in there. Also, some of that money is what it took to fund salaries for the second year.

Chairman Pollert: Ok. What does a psychiatrist cost? $150-$160,000?

Kate Kenna: Correct. I think what we are paying our contract is $140 an hour. Continued testimony with lease and rental.

Lynn Bigum: There was a negotiating request by our landlord for a rental increase for the 09-11 biennium that was based on an increase in utilities that they were projecting for the coming

bienniums. That was a 70 cent per square foot increase that was requested which resulted in the majority of that 60.

Chairman Pollert: That is the $13.50 a square foot I take it?

Lynn Bigum: It moves us up to $13.15 per square foot which was $.70.

Kate Kenna: They actually had us up at $3.00 and we talked them backwards. Continued testimony on grants.

Chairman Pollert: Crisis Care Safe beds and then detoxification, I have seen that in other ones just probably haven't noticed it.

Kate Kenna: As far as the detox program, Grand Forks has one of the larger communities in the state that has no way to provide detox to individuals who are intoxicated.

Chairman Pollert: I noticed it is basically an increase of $300,000. It goes from 0-300. You didn't have any detox?

Kate Kenna: That is correct. We did not have any detox in Grand Forks. The committee made up of our county commissioners, our city officials, Altru hospital, and Northeast as well as a potential provider have been working together for about a year. Everybody is chipping in. The county is giving us their old jail to use for a place for our detox. The city is putting in money. We are arm wrestling with Altru to see how much they are willing to put in. Right now what happens is police will bring people to Altru. The police officer will sit with the person in the waiting room for 2-3 hours. Maybe they are admitted and maybe they aren't. Our law enforcement is being tied up. Our hospitals are being used for people who don't really require medical detox but need social detox.

Chairman Pollert: Have we had detox in all of the other budgets? Where did those dollars come from in the past. If we haven't had any, was it in some other section of the grants line item or where was it from?

Lynn Bigum: It was $40,000 in the current biennium and the past bienniums as well but we have used federal funding that is under the substance abuse block grant funds that is used for that purpose. About the only resource that we had was Crookston, which wasn't the best terms of transportation to cross state lines.

Chairman Pollert: But if you see where I am coming from you have about a 500% increase in detox. Do you just have 500% more clients getting drunk?

Kate Kenna: In the other regions that have social detox services they are reflected in their grants. That is where it is showing in the other budgets. They just haven't had it in Grand Forks at all.

Representative Bellew: Can you give me a definition of social detox?

Kate Kenna: Social detox is for people who have drank too much. They need to be in a safe place to detoxify to get the chemicals out. Some people might have the resources to get it done at home with relatives. The people that we plan to see are people who live at the Grand Forks city Mission or are traveling through our community. Maybe university students who don't have somewhere to go. What happens is that there is a cheat sheet. You have the staff person look at safety issues, temperature, respirations, and so forth. It's not medical but it looks at the scales to make sure it will be safe to have them sleep it off. We have had people in Grand Forks die as a result of not having a safe place to go.

Representative Bellew: I always thought the jails took care of that.

Kate Kenna: What our law enforcement tell us that it is not legal anymore for them to have a drunk tank. It's not legal for people to go and sleep it off. They have to be charged with something in order to be in the jail. Many of these people haven't created a crime that would result in that. I think the wonderful opportunity about this is that they are going to be a block

from our office. We are going to be able to have our addiction staff to go over there and offer them a different way of doing things to get them started in services with us.

Chairman Pollert: But if you have a 500% increase I'm trying to find out who was covering the cost in the past.

Kate Kenna: The majority of the cost would be covered by the city of Grand Forks who is riding around with those people in their police car, or Altru hospital who is telling us that they wrote off about $700,000 a year in providing social detox. I think they are willing to pitch in with us too.

Representative Nelson: If Altru does contribute some money, what would be the utilization of those funds. Would that offset some of these costs or would it be in the building? What are you going for?

Kate Kenna: When we get Altru to kick in that will decrease some of our costs. We have a budget for what it would cost us to run a detox center. We are dividing it out among the people who are participating right now. This was our share. We are hoping that our share would be less.

Representative Nelson: In the numbers that you provided us, that is the total cost? If Altru comes in, the $295,000 could go down?

Kate Kenna: Not only is Northeast contributing to the cost but the city of Grand Forks is also giving us some money. They have pledged some money. Along with that the costs will go down when they contribute.

Lynn Bigum: $140,000 of this amount is in the global health OAR.

Chairman Pollert: Let's move on to the next page. There is an increase of $1.4 million total.

Lynn Bigum: There are three parts to what is involved with the residential. There are provider requests that basically were what providers told us that it would cost to continue to provide

services at the levels that they have been providing. The second part of existing providers was the 7% plus 7% inflation amounts. The third component was in the global OAR there is $149,000 of additional supported residential that basically is a capacity issue. We are trying to provide 20 more client hours per week with our supported residential. That is where staff is case workers and they go in to try to assist clients with living in their homes throughout the city of Grand Forks.

Chairman Pollert: So when I look at your overview on page 11 it says $894,000 general funds. Are you telling me that the contracted providers are just raising their kind of dollars that much?

Lynn Bigum: Within that amount we would be getting 20 additional hours of client time as well as sustaining the contracts that we currently have with the residential providers so we wouldn't have to be cutting back on the number of services that they are providing.

Representative Bellew: Basically your providers are raising their rates. In the Governor's budget there is a 7&7 inflation increase on top of that? Is that what I'm hearing?

Lynn Bigum: That is correct. Our providers had informed us that the rates we have been paying in the prior biennium's including the inflation adjustments were not sufficient to keep up with their costs for them doing the service. They have had to put other funds in there as well. This was meant to try and catch them up. The 7% would address a future ongoing cost .

Chairman Pollert: So that is what you are talking about provider increases. Is that in the SMI residential prairie harvest and SMI transitional living?

Lynn Bigum: Everything except transitional living facility

Chairman Pollert: Could you tell me the percentage of rate increase that the providers charged you?

Lynn Bigum: They gave us dollar figures and I did not calculate the percentages of them. I could come up with those figures.

Chairman Pollert: Could you tell me the dollar figure or is it the one I talked about before?

Lynn Bigum: Overall it is about $967,000. It has one exception and that is that there is a service that is called Net monitoring at $45,000 that is included in that. We found a need for that in the current biennium and it's in that $967,000.

Chairman Pollert: In that dollar amount, how many clients would that cover?

Kate Kenna: With the residential programs that we are talking about, particularly centers that offers 21 days of housing for someone that is in our addiction treatment. We would have large numbers that come and go to that program. We do have a daily rate. It is always full. The capacity is 25. People are always coming and going as they move along with their treatment and recovery.

Representative Nelson: Just to get an idea have you seen this coming or is this something that was kind of a surprise.

Kate Kenna: I've been almost 30 years at the center but only a couple of years as director. Yes, we did see it coming in. In fact ,this past biennium we haven't been able to sign a contract with the center. They are providing services for us but we don't have a contract with them because they weren't happy with our reimbursements.

Chairman Pollert: Any other questions? We will recess until tomorrow morning.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. 1012 – Human Services detail continued

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/23/09

Recorder Job Number: 7798

Committee Clerk Signature

Minutes:

Chairman Pollert: Called the meeting to order. Took roll call and every member present.

Brenda Weisz: Requested handout (Attachment A). What you have before you is what we did as a step down approach to Representative Bellew's request. We tried to isolate the specific areas that you didn't get enough detail when they were up here talking about their travel. If we do it for the whole department it is a manual process. We'd get to it but it's not as easy as just throwing the numbers out on a schedule like this. What we did is took the bars report that you are familiar with, took every section that you have heard from, lined it up on the report and gave you the prior expenditures, the current budget, year 1, total changes, and the request to the house. We just isolated travel only. There were some decreases and increases. What we were thinking if it would be a direction you would want to go is if there are certain areas you want us to do that manual breakout then we would do that. If you would want to isolate which ones that would be. I know yesterday the 6 of 8 centers talked about their travel. Some actually had very little increase that you had mentioned to southeast.

Chairman Pollert: I see at least a couple that I want.

Representative Bellew: This report is good. I'm concerned that travel is up $700,000 in your

budget. Let's do administration, medical services, mental health and substance abuse, and vocational rehabilitation.

Chairman Pollert: Would the state hospitals be attributed when the staff makes a trip from Jamestown to the developmental center?

Brenda Weisz: With the increases in the meal reimbursement and the increases in the motor pool cost to do that, the travel would be in there too.

Nancy McKenzie: Handout Testimony (Attachment B).

Chairman Pollert: I know the price in oil is dropping and they are starting to get layoffs. I suppose it is still too early to see if that is going to make a difference for Northwest or not.

Brenda Weisz: As of yet we haven't really seen it impacting our employment, especially in some of our residential programs and support areas because there are a lot of jobs out there for people.

Chairman Pollert: Turnover would have an effect on this. Are the equity payments if you would look at the percentage, is Northwest getting up at a higher proportion of percentage of that equity because of the salaries in the Northwest and the oil boom?

Brenda Weisz: We haven't done anything with the numbers to analyze and come up with a plan. That would be fitted within that plan to do so because of that turnover. We will look at that.

Nancy McKenzie: Continued testimony.

Representative Ekstrom: That point rang something home for me. How many of our service centers have a dual director?

Nancy McKenzie: All of them. Four of them are covering 8 centers.

Representative Ekstrom: That might explain why the travel has gone up so much.

Nancy McKenzie: Yes. It's not so much this biennium because it has been in place for awhile but it originally had an impact.

Chairman Pollert: I'm sure that is why Representative Bellew didn't ask for the detail.

Nancy McKenzie: Continued testimony.

Keith Welsch: Business manager for Northwest and Northcentral Human Service centers. Part of the reason is we have a lease with a number of renewal clauses. The rent rates have stayed the same for a number of years. I'm not sure what year we are on. There were 5 two year renewals when it was signed last time. He has asked for additional money for utilities, taxes, insurance, and upkeep on the building. We are keeping the square footage rate low too.

Chairman Pollert: Wasn't it P&A's budget that had a huge increase about the building which was about $800 a month? Aren't we getting some questions answered?

Lori Laschkewitsch: P&A was located in the courthouse. The building they were in they were basically getting their rent for free. The building was then vacated and everyone had to move out of it. They are looking for a new place. They don't have the benefit of a renewable contract like some of the existing offices do if they have had rental space in the past.

Chairman Pollert: Did we ask Teresa to get us what that square footage was going to cost?

Lori Laschkewitsch: We have that information. It is like 1,200 square feet and $7.84 a square foot.

Nancy McKenzie: Continued testimony.

Chairman Pollert: Where are the residential services special funds from?

Nancy McKenzie: Third party collections. That is up for us.

Chairman Pollert: Yeah it just shows 07-09 as nothing for special funds. Then it shows in the 09-11 budget a pretty significant one.

Nancy McKenzie: I would think we would have had some client income from last biennium. Continued testimony.

Representative Nelson: I never gave it a thought that people having health insurance coverage, that it would be applicable with regional centers. Can you just briefly tell me where the mental health portion came from? Whether it's a blue cross policy or how that works and whether their party payers are included in the operations.

Nancy McKenzie: Everybody that receives services from any of our centers we do a fee determination process. We find out what the person has available. We bill anything to any applicable payers. Some people who have nothing are private pay. We apply the sliding fee scale to see where they are income wise. I can tell you that the percentage of clients who have third party payers really varies across the state. Typically, in terms of a trend we have tended to see in the smaller centers more paying clients with insurance. Those communities don't have a lot of other providers. When we get to Fargo there aren't very many because of the demand for capacity there. There are lots of private counselors, etc. We do prioritize that. We let people know that we have a high demand and some weight and we recommend other places they can go to. We attempt to not compete with the private or take their customers. We have plenty who really fall into the most vulnerable. Where people do come to us because the service is appropriate or there isn't another person to provide that, we are happy to have third party pay.

Representative Nelson: Another area that is interesting to me is that it looks like every one of the human resource centers we have talked about so far has had a shortage in psychiatrists. I'm assuming that it is a state wide issue. Is there a lack of psychiatrists in the state or is the private pay or practice a much better reimbursement or salary situation? That is why we are having a hard time attracting them?

Nancy McKenzie: Historically we have had trouble keeping up with the private sector salaries. There have been times where we have had to make some adjustments in our salaries. Right now there is truly a shortage. They are really struggling with trying to recruit psychiatrists. It is one of the reasons at Southeast that we keep that psychiatric residency program and be able to get those folks exposed to the centers and maybe interested in working with us. Right now there is a more shortage situation than there has been at times in the past. We are doing more telemedicine with contracted or with our own docs. That will continue to grow. Where we can get them we can use them more for rural service too.

Representative Nelson: Do you track salary guidelines for psychiatrists? If you do, what is the average of a private practice psychiatrist?

Nancy McKenzie: We do look at that regularly when we are hiring. I know that most recently Meritcare was starting individuals at $200,000 with a $20,000 sign on bonus. The reason I know that is they had someone, gave her $20,000 and signed her on and she decided she wanted to come to us for a bit less money. We are about the $160-170,000 range with her. One thing that is a plus for us is that our psychiatrists don't tend generally to have to do hospital hours and weekends. Over $200,000 would be typical.

Representative Kerzman: Does the med school psychiatrist come through the med school?

Nancy McKenzie: We do work with the UND medical school psychiatric residency program. Dr. McLean who is the medical director at Southeast Human Service Center and the state hospital in Grafton is an adjunct professor. We think it is so important to keep that residency program. It's been mostly located at southeast. However, they have a resident who is looking at wanting to do some experience at Northeast in Grand Forks who is interested to relocating to that part of the state after she graduates. We have talked about how we have the potential to place them in the human service center for parts of their rotations. We think there is room for

growth in that area. We have been able to hire some people due to their residence. Candace mentioned the difficult to fill psychology positions. That is why we are pursuing the APA certification for psychology. UND will only send their psychology residents to APA sites. We have got to make sure we have at least one or more in ND so we can get those residents out and have a better chance of hiring them as well.

Representative Kerzman: What is a medication monitor? Is that a person or equipment?

Nancy McKenzie: Where are you looking?

Representative Kerzman: On the grant survey under psychiatric services.

Nancy McKenzie: In various human service centers contract with providers like Western sunrise in Williston, Dakota foundation in Bismarck, those private providers that do a number of services for us. They provide staff that will actually see the clients get medication; they might need to take them to fill the pill box that the nurse at the center has prepared if they aren't able to do that themselves. They follow up and make sure that the person is taking their medications and if they are getting their refills dealt with. They are able to use case level services so that those people aren't coming back in and calling the center saying they are out of meds. That is a regular service they use to make sure they have the support at home.

Chairman Pollert: Have any of us requested a breakdown where all the 7&7 is going and all the dollar amounts?

Brenda Weisz: No but we have that schedule. I can get it for the committee.

Nancy McKenzie: Continued testimony.

Representative Nelson: If you do the math with the people hospitalized it comes out to about 4 days a visit. Is that typical of a hospital stay for a mental illness?

Nancy McKenzie: We really look at these local hospital contracts to serve people that we think we can quickly stabilize and get back home. If someone goes into one of these it can be 48

hours. An acute length of stay is considered 2-3 days. If we get someone admitted locally and we can see that this is going to need to be a longer hospitalization that is when they are going to talk to us about the referral to ND State Hospital. An average of 4 days is long. That means that there was nowhere to go sooner. They had to wait there until a bed was available.

Representative Nelson: I don't know how specific you get but in a number of critical access hospitals they will admit them inpatient. They will swing them towards the end because they have 96 hours for reimbursement purposes. Is swing bed used for mental illness as well?

Nancy McKenzie: It is certainly accurate. I don't know if you think it is exactly the same. They certainly are attempting, because we have a limit in our contract. They are anxious to keep things moving or they are losing money. They aren't so much that they can't have people longer. A lot of the insurance companies are very into that they have to have reauthorization after 72 hours or 36. It's a challenge at both ends. Continued testimony.

Chairman Pollert: Did you tell us what the turnover rate for Northcentral was?

Nancy McKenzie: 10.7%. Continued testimony.

Chairman Pollert: Is the temporary salary for a part time psychiatrist, is that the $56,000 as well as the one counselor position from Bottineau? That is about $94,000 increase. How many psychiatrists are at Northcentral?

Nancy McKenzie: Yes. We have one vacancy. We have some contract hours and are contracting with 2 clinical nurse specialists to help fill some of that out. We also have one clinical nurse specialist on staff. We are getting some tele-medicine hours. Right now it is split all over while we are trying to recruit full time. Continued testimony.

Chairman Pollert: Can we talk about professional development?

Keith Welsch: That cost includes anything involved with somebody going for some type of professional development. It could include the cost of whatever they are going to. It could

include travel, lodging, and those kinds of things. Plus we just feel that professional development is an important part of a person's job as far as needing to continue to evolve in their training. We actually have put more money into professional development. When you look at the original figure of $16,000 you have 110 plus people per year. That is not very much. Most of the time if you send someone someplace it is a way from Minot. You are going to have travel and lodging plus the cost of training. If there are things that do happen in Minot we try to take advantage of those but there is not a lot happening as far as our professional clinical staff.

Representative Bellew: I heard you say that there is some travel in there too? Shouldn't it be in the travel account?

Keith Welsch: Basically we tried to isolate the cost of any professional. That is why there is travel in there, yes. The other travel is client related.

Representative Nelson: I'd be surprised if the policy for professional development has changed since last biennium. I'm looking for a little more information as to why there is a $24,000 bump. Is there some professional development that you weren't able to take advantage of in the prior biennium's that now you are able to?

Keith Welsch: I believe a few biennium's ago we had a $50,000 or so budget for professional development. Because of economic times we have had to reduce it. Now we are trying to get back up further where we had been previously.

Representative Nelson: There are areas that you think you have been shorted?

Keith Welsch: Many of our staff that are licensed need a certain number of Continuing Ed. To keep them licensed they need to attend certain types of workshops to give those particular CEU's.

Representative Nelson: Are you saying that in the previous biennium that some of the employees were falling behind on that?

Nancy McKenzie: We do ask staff to pay a part of those costs themselves. We don't have funds to fully provide everything that someone might need for their licensure. We consider that partly their responsibility too. We try to share in that cost.

Representative Nelson: Is there a policy change?

Nancy McKenzie: We look at the total amount of professional development we have in the center. We look at the number of FTE's. What we will do with someone is say we will pay up to some amount on a given opportunity. We will pay registration, travel, and they can get meals and room. We do that kind of sharing.

Chairman Pollert: Southeast Human Service center was a $3,000 increase. Southcentral was a $5,000 decrease. Lake region had a $75 increase. Northwest had a $6,500 increase. There are less employees there. There is a 0 increase for Northeast.

Representative Nelson: I think it would be good to understand the programmatic costs that are involved. Obviously they have to keep up with certification and there are a lot of professionals in these centers. For no other reason it may be good for us to learn some of your challenges. Your budget is very modest compared to some others. I wouldn't take that as a bad mark.

Nancy McKenzie: I think we can answer that question.

Representative Kerzman: Is there any correlation between that and turnover? Anytime you have turnover you have more training.

Nancy McKenzie: There may be some.

Chairman Pollert: I think it will help with the detail as well.

Representative Wieland: Has there ever been an opportunity for using Interactive TV for the education?

Nancy McKenzie: Absolutely. We do as much as we can. Our staff participate in that where we can call in and sign on to those.

Representative Wieland: How many human service centers have an interactive TV within their offices?

Nancy McKenzie: All of them. We have it in every center because we have computers with internet capacity. That access is there. Continued testimony.

Representative Bellew: When you say operating fees didn't change much, they increased 37%.

Nancy: Ok. It depends how big you are thinking. Continued testimony.

Chairman Pollert: You said the 7&7 was how much on the grants?

Nancy McKenzie: About $409,000.

Chairman Pollert: That is total? Then the global health initiative is under inpatient hospitalization?

Nancy McKenzie: Right. No that is under residential on the grant side. The inpatient has the increased rate of Trinity on their contracts. That is why those two areas are primary here in terms of change.

Chairman Pollert: There is a new 8 bed proposal?

Nancy McKenzie: Yes it is part of the global because we don't have a crisis bed facility in Minot. We could maybe move someone out of Trinity more soon as Representative Nelson was saying. There would be people who might be able to come out of the hospital in 2 days to crisis or go there rather than the hospital.

Chairman Pollert: How much is that?

Nancy McKenzie: That is $1,000,387 million.

Chairman Pollert: A lot of the other human service centers are adding FTE's for global health. I see where you are adding an 8 bed crisis center but you aren't asking for FTE's. Is this a private contract?

Nancy McKenzie: Yes we would be looking to contract that which is primarily what we do in other places. That is why no FTE. To contract that with a private provider, floor space, and staffing.

Representative Nelson: From the program standpoint of the crisis bed, would the patient spend more time there and have a better treatment option than the inpatient hospital?

Nancy McKenzie: The crisis bed facility is a different level of care. While someone in the hospital has an RN 24/7 when we put them in a crisis bed we believe we can provide the supervision. It might be a client we know very well who lets us know they are having suicidal thoughts. We might use a crisis bed for a couple days. It might be someone who has been in the hospital and the hospital says they have stabilized them. They really don't need that level of care. They should still be supervised before they go back to their apartment and live alone. We might use those beds for someone up to a couple weeks. Mostly it is a transitional thing like a swing bed. It's another level of care. We are often to move people out of the hospital sooner and sometimes avoid hospitalization. We have someone who is expressing suicidal thoughts. It provides us all those options. We also move them back to the community quicker from the state hospital. They don't get held up because they are waiting for a bed.

Representative Nelson: How many of the regions have crisis beds currently?

Nancy McKenzie: The larger regions all do. The smaller regions tend have a couple crisis beds. They aren't as large in operation but have something available. In Minot at our transitional living facility we could sometimes use a bed for a crisis purpose but it is not set up

to do that. Usually they are organized physically so people can be in their own area if they are real agitated.

Representative Nelson: Of the 4 major cities in the state, Minot is the only one who doesn't have this?

Nancy McKenzie: Right.

Chairman Pollert: Out of the $2.2 million increase in grants, $1.3 is global health and $400,000 is 7&7. The other $500,000 is scattered amongst that. Are there any other areas where that $500,000 will show up?

Nancy McKenzie: The local hospital increase.

Chairman Pollert: Oh the $1.5 million? Now we are within $300,000.

Nancy McKenzie: Cost to continue current services is $305,000. Certainly the largest issue there is the crisis beds followed by the inflationary increase.

Representative Bellew: Inpatient hospitalization's cost went up almost $700,000 general funds. I guess I'd like a specific breakdown of how that was figured out.

Brenda Weisz: You have that. I handed that out yesterday in the afternoon. It was the landscape sheet.

Chairman Pollert: Those are the contracted rates we are talking about?

Brenda Weisz: Yes with the change to reflect so your contract amount.

Chairman Pollert: This is all part of our continued discussion of the global health initiative and the restructuring of the rates.

Representative Bellew: My concern is that last biennium it was $81,000 and now it is up to $700,000. That is an enormous increase.

Brenda Weisz: It just relates to how we rebase those rates in conjunction with how we rebase them with Medicaid. Plus we weren't compensating them for all the days they were providing. Now we estimated the patient days on the sheet and the client days at the new rate.

Chairman Pollert: I haven't had a discussion with the hospital association but we need to have one with them to further our knowledge on global health initiative. I'm getting there but I'm not completely sold on that.

Nancy McKenzie: We did work with the ND healthcare association. We had a few meetings because of their concerns if they could stay in business and do this. They have been involved in those discussions. You will note that it was in terms of the OAR categories and the first identified priority for the department because we see it as having so much impact on both the local hospitals and the state hospital.

Chairman Pollert: Are you saying the global health initiative wouldn't matter if it was a 501C3 or a critical access hospital. It is going to be working with most of the facilities?

Nancy McKenzie: They will work with our inpatient hospitals that we contract with.

Brenda Weisz: As you noticed on the schedule there are no critical access hospitals that have inpatient for our clientele.

Chairman Pollert: So you are saying that this is a major hospital in the main areas?

Nancy McKenzie: Those hospitals are the ones that we have contracts with that serve our people. In addition to those hospital contracts, yes the crisis beds in Minot would be contracted to a provider. The social detox in Grand Forks would be contracted to a local provider. It's not all human service center. It is local providers as well. They don't have the inpatient mental health units to provide the service.

Chairman Pollert: That helps me clarify.

Nancy McKenzie: If I could just make one other comment about the Minot contract, this might be helpful. When you look at that information about Minot you can see that their daily rate has been one of the lowest prior to rebasing. Our prior contract with Trinity was a flat $200,000 a biennium. That is significantly less than what some regions paid their local hospitals on contract. We probably had our biggest gap in that region.

Representative Bellew: Where did the other money come from?

Nancy McKenzie: That has been accounted for and is already in the budget.

Representative Bellew: The $200,000 is not on your grant line item.

Brenda Weisz: There is an error in that grant schedule.

Representative Bellew: The $81,000 is not right?

Brenda Weisz: What I'm looking at is that it is $200,000 too high for the budget request.

Keith Welsch: The original budget was $81,000. With the psychiatrist position we haven't been able to fill we increased that to $200,000 just to be somewhat fair to Trinity hospital. Then the behavioral on top of that brought it up to the current $600,000. It would have been shown in the original grants.

Chairman Pollert: Is there any other questions on the grants sheet? I hate go to back to it but the inpatient hospitalization that was $200,000 for something and $400,000 for something else again?

Keith Welsch: The $200,000 has been our current contract this biennium. The $400,000 additional is part of the global health initiative.

Representative Nelson: When you look at the inpatient piece of this for Northcentral, the utilization is that it is the second highest in the state. In a lower populated region is twice what Bismarck's is. Does that have something to do with the fact that there is no crisis beds in Minot?

Nancy McKenzie: Certainly that would be a part of it.

Representative Nelson: Is there anything else that would trip a wire?

Nancy McKenzie: Potentially the census at the state hospital as well. There have been times that Minot has wished to send people to the state hospital. We have had to wait for bed space and not been able to send them.

Representative Nelson: So they stay in the hospital longer because of that?

Nancy McKenzie: Perhaps we might have even gone first to the state hospital but if there wasn't census we might have looked elsewhere. There are a number of reasons for that.

Representative Nelson: When this occurred under the current contract, conceivably Trinity is losing money each hospital day that the patient stays there, people that use Trinity hospital.

Nancy McKenzie: They certainly have expressed a great deal of concern about the amount of uncompensated care they are providing and it is being paid for somewhere.

Chairman Pollert: I know that one of the questions we will ask next week is about the global health initiative. I mean he's coming in to talk about medical services and the Governor's request. That is a question we should ask of him.

Representative Nelson: That is the greater question is if we are shifting costs to a provider for example, how that affects healthcare. We know from where we live what critical access hospitals are having a hard time struggling to exist. I don't think it's much different for Trinity.

Carol Olson: I just want to make a comment about the whole global health initiative. I regret that we did this direction. It has led to some confusion I believe. I just wanted to remind the committee why we did this. I said it in my testimony. We had the stakeholder meetings and every region of the state that we went to we heard the same thing over and over again. The capacity for serving those with mental illness and substance abuse problems we heard in every part of the state. So when we went to build the budget we had a decision to make. We

could say ok should we put more money into the state hospital entirely and build up the beds there at a much more appropriation request. It is much more expensive to treat them at the state hospital. Or do we try to move it into communities where people can be served closer to home. That is the decision that we made. We added a few FTE's at the state hospital to assist them with their underfunding of their salaries. Then we moved it in to the community and that is what you have been hearing from your human service center testimony. We really felt that the best way to serve the citizens of the state is to serve them closer to home. You see the increase of FTE's and the appropriations in the human service centers. That is what this is all about. If you can think about it in that way I think it will help with y our decisions on this. I think it makes sense when you look at it that way. You will hear from Alex when he talks about the state hospital admissions. You will see the first time admissions at the state hospital are increased quite a bit. Why a population of ND is abusing more alcohol and drugs now:? I don't know the answers to that. Why we are having more of our citizens with mental illness? The fact is that we are and we are seeing them at the state hospital and we are seeing them in our communities. It is our responsibility to treat them and get them back in a very productive life. That is what we are doing. I have been listening to your questions and they are good questions that need to be asked. Overall, that was the basis of why you are seeing the additional appropriation request.

Chairman Pollert: I can understand that but at the same time we are looking at significant increases. We are giving them a pretty fair glob of money that is being proposed. We are turning around on the other side and taking that away. That will be an enhancement to the hospitals as well. I am struggling with that. The Governor's budget has significant increases for reimbursement. It is almost like a double reward to the hospitals. I understand they have had extra costs.

Carol Olson: I understand what you are saying. You have some tough decisions to make in that regard. That also played into our decision making. You are aware that St. Joe's closed their behavioral health unit in Dickinson. The department has had discussions with other hospitals around the state. We are somewhat nervous about what the future is for other hospitals in regard to the direction they are going to take with their behavioral health units. We know that there has been added focus to Medicaid reimbursement to the hospitals that weren't talked about 2-3 years ago. It was always Medicare rates. Now all of a sudden in the past 2-3 years, Medicaid reimbursement has become right up there with Medicaid reimbursement. In reality Medicaid reimbursement to hospitals is about 10% or a little less. Medicare is really the higher percentage of reimbursement to hospitals. Medicaid has taken almost the same front seat as far as attention goes when you are talking about hospital reimbursement. Our discussions with the private sector in that regard is that we certainly have taken the lime light there as well. There is a concern on our part what happens if other providers follow suit that St. Joseph's in Dickinson did. What happens with our providers. We have been cautious of that. We are trying to figure out a way when we built our budget on how we were going to be proactive and present a budget that allows you to try to come up with a reasonable answer.

Chairman Pollert: I understand that and I understand that we have some Medicaid problems in Devils Lake and Rolla. We don't have as serious of a Medicaid problem in other critical area hospitals. We will have a discussion and see where we are at.

Representative Kerzman: Can you answer this question. They stated that none of the critical access hospitals offer psychiatric care? Dickinson is looking at going to a critical access status. How is that going to affect that area?

Carol Olson: They don't have it and they won't get it.

Chairman Pollert: Any other questions? If not we will take a break and then move on to the Developmental Centers.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/23/09

Recorder Job Number: 7799

Committee Clerk Signature

Minutes:

Chairman Pollert: What you handed us today was for the state hospital?

Alex Schweitzer : Yes the stuff for the developmental center is here.

Brenda Weisz: I have to make a correction to what I said was a mistake because it's not. On the hospital schedule, that number is not a mistake. I got the increase confused with the total requested. That schedule is correct I just have to make sure it's on record.

Chairman Pollert: You are talking the $200,000 that Representative Bellew was talking about?

Brenda Weisz: Yes the number in the grant schedule for North Central. The amount that they are requesting for inpatient is the correct number. The increase was the 400 +. When they did that rebasing it coincided with Medicaid. That number is correct when I had said it wasn't.

Alex Schweitzer: Testimony handouts (Attachment A- Chart)

Representative Ekstrom: Can you tell me the terms of folks that you are selecting to go into the community? Maybe on an average sense of how long they have been at Grafton and how long they resided there?

Alex Schweitzer: It's hard to tell. In many cases they are long term residents. There are individuals who come in on short term basis. The majority of them are long term residents though.

Representative Ekstrom: You are obviously selecting folks that stand the best chance of transitioning into the community. They have lived there their whole lives in Grafton. I'd like to see who you are selecting. I don't mean names but I mean cases that are particularly going to make it and how long they have been there.

Alex Schweitzer: We will do that for you.

Representative Metcalf: I noticed the people going to the state hospital are increasing. Does that red line mean something? Is that something you are going to be expecting to see when we move those last 15 people out in the communities. Do you think that the state hospital will increase that area?

Alex Schweitzer: That increase is primarily because of young folks. The developmentally disabled people that come in between the ages of 16-25. We are actually seeing that little jump because of young people having difficulty in terms of behaviors, some are aging out of school systems. They are having difficulties in terms of placements in the community. That is the reason that number is higher than normal.

Representative Metcalf: It has nothing to do with the reduction of clients in the developmental center?

Alex Schweitzer: It really doesn't. There may be an occasional return from the community. We would get that no matter what. We have some people in group homes that will come into the state hospital for treatment. These individuals that are at the hospital, in most cases we place them back into the community setting. (Attachment B)

Representative Wieland: You have got 445 FTE's for the last biennium. You have 445 for the next biennium. Hopefully you are going to be reducing some of them. It looks like about 20 over the next two years. How have you not allowed for a reduction of FTE's over that time frame?

Alex Schweitzer: In this budget there are 16 FTE's and $1.4 million that are dedicated to transition. Those individuals are in this budget. We aren't asking for additional transition money this time as we did for the last two biennium's because we are essentially taking staff and assigning them to transition. They are in what is called a Cares team. Their role is to make certain that we don't return people to the developmental center. We try to stop readmissions. That is our big issue right now. People are coming back. We can't reduce the population but continue to have people coming back in the facility. The role of the 16 individuals is the working community providers to make sure the individuals stay within their homes and home community and do not come back to the developmental center. In addition, they will be involved with the discharge of individuals. Although the FTE number does not come down to the total, those 16 FTE's are dedicated to transition so we can reach that goal of 97. I think as you look into the next couple of bienniums as you get that number down I think you can reach those goals. You will see a significant drop in FTE and costs. Continued testimony.

Representative Ekstrom: What is your turnover rate then?

Alex Schweitzer: 15% the last two years. 2007 15.29 and 2008 it was 15.5%. Continued testimony.

Representative Nelson: In relationship to your nursing staff, do you experience shortages of nurses and when you do, do you contract service with agencies in times of those shortages?

Alex Schweitzer: Nursing is not the problem. We get a lot of individuals on the professional staff that drive in from Grand Forks. Our issues are direct care staff on the line. Similar to what a nursing home would be.

Representative Nelson: Do you contract services with agencies for CNA's?

Alex Schweitzer: We have not. We try to avoid that and recruit the best that we can and meet the needs of the people. Continued testimony.

Representative Wieland: Under the rentals and leases, are there any empty buildings or potential rentals in some of that space? Does it fall under your budget or somewhere else?

Alex Schweitzer: Yes. We rent now to quite a few community facilities. We are looking for more renters. We do collect the rent and it goes into our budget. We have space because of downsizing we have an entire building open right now. We have one building that is completely full of outside agencies. We have retirement houses on the campus. We have a variety of not for profits. That is part of our long range plan.

Chairman Pollert: With what you are speaking about the 16 FTE's dedicated to that. IF you would look at that number versus where you are at for clientele at the Developmental Center in 03-05. Is the FTE number with that consistent with what we had appropriated in 03-05 or 05-07. Do you see where I'm trying to go?

Alex Schweitzer: You are asking where we are at in terms of FTE's. Of course there is no increase from 05. I'd have to look.

Chairman Pollert: Ok in 05-07 you were a 449.

Alex Schweitzer: We are at 445 now. I'm not sure what we were in 03-05. I'd have to look.

Chairman Pollert: So for clients in 03-05 off of this chart, we would have been on an average of 144 or 145? Then 07-09 our clientele, what was that based on?

Alex Schweitzer: 125. 09-11 is 115. Within that number is you have the 16 individuals that are

pretty much going to be dedicated to transition. Instead of looking at 05-07 at 449, if you took the 16 out you have a lower FTE number that will be dedicated to work at the developmental center. I think it's important to note that the people that are remaining at the developmental center are a higher acuity pack. That is why we are having a little more difficulty placing people now. They have pretty complex needs. It's important to have this team in place to prevent readmissions and work towards transitioning these people.

Chairman Pollert: I know there are groups that say developmental centers should be out in independent settings. I don't agree with that statement. Is the community of Grafton trying to get the DD client to go into the Grafton area? Is that the idea of the 16? Is Grafton trying to do that to help them with their employees to stay around the Grafton area?

Alex Schweitzer: The Grafton community is very concerned about what is going to happen to the Developmental center. I have been invited to numerous meetings over the last five years by the city council, the mayor, chamber of commerce and others. I have sat in and talked to them about transition so they have a full understanding of it. The department from a public policy standpoint has never taken the position that they have never been advised that the closing of the developmental center is an option. We don't talk about that. In this point in time it's not even something that has been established by the legislator, the Governor, or by the department. We don't talk about closure with them. We do talk about transition. There are a lot of services in Grafton now for the DD individuals. We also do some things on campus. We are moving more and more towards a model that deals more on an independent level to people we serve. The bottom line is that the community is very concerned about the facility. They would not have a problem how we provide the service as long as we do provide some services.

Chairman Pollert: For 115 clients in the budget you have 99 FTE's servicing them. Out of your 445 FTE's you have 16 that are for community transition group?

Alex Schweitzer: Yes.

Representative Wieland: You mentioned that people are coming back from the transitional individual group homes. About how many are we talking about?

Alex Schweitzer: I believe I handed a chart out that talked about that. It is attachment C of my original testimony. It shows the number of admissions from 1997-2008. This is a summary. 2005 it was 17, 2006 it was 20, 2007 it was 11, and 2008 it was 20. Those are admissions

Representative Metcalf: Kind of a running discussion, how long has this 16 man team been in place?

Alex Schweitzer: Just starting that up this biennium. We are starting to hire positions and doing some work. We are just starting it up.

Representative Metcalf: How wide of an area are you trying to get this team to operate in? Are they going to operate in Grafton, are they going to operate in Northeastern ND, are they going to operate in their home state?

Alex Schweitzer: It is a state wide team. That is a purpose of having the staffing that we have. It is state wide and there is a need to have it state wide because we get referrals to the entire state.

Representative Metcalf: Is your intention to have these people located in different locations throughout the state or where will they be located at? I'm talking about their private location.

Alex Schweitzer: At this point in time they are located in Grafton. There is discussion eternally to have some of the care staff on a contractual basis to do it in other parts of the state. Out of 5 of those staff there are 5 staff that are behavior analysts. Four of them would be located statewide with the other at Grafton. Their role is to help private facilities deal with people with significant behavior issues. Those four will be located outside Grafton.

Representative Metcalf: At this point how many do you have hired up for the 16 person team?

Alex Schweitzer: At this point in time we have everyone hired except the 5 behavioral analysts. So 11. They are selected from people who work within the facility.

Chairman Pollert: When I walked in you were talking about how you had one vacant building. Can you fill me in on that?

Alex Schweitzer: I was asked about the vacant buildings and how we were utilizing those. We utilize several of our buildings now for outside agencies, rent to them. We have senior housing on the campus. One entire building is a daycare center and head start program. We have a building that became vacant because of transition. The long range goal is to try to utilize that space as much as possible. We have been asked by a variety of agencies about the use of that particular space so we will work towards that. We also have on campus a VA clinic and the migrant health clinic that we rent to.

Chairman Pollert: Are these buildings being rented out for the daycare or donated to the community? Are you making some rental income?

Alex Schweitzer: We make rental income off of that. We don't have any donated space at this point.

Chairman Pollert: Where would that show up on detail? We can wait until we get there but would you keep that in the back of your mind.

Carol Lebertowski: Fiscal director at the developmental center. That is in the other revenue at the developmental center.

Chairman Pollert: I think it is important that we are using these buildings and they aren't sitting empty. There probably is a little bit of misinformation as far as when the clientele

numbers are going down. It is a facility that looks like it is being vacated and obviously it's not. You are doing good utilization.

Alex SChweitzer: Some of the space in the one building, we talked to Northeast and private providers about some possibilities for youth and children. We are working on utilizing it and renting it.

Chairman Pollert: Do you charge by square foot?

Alex Schweitzer: Yes we could get that to you.

Carol Lebertowski: It's generally about $2.50 a square foot. I can give you exact figures also if you want more detail. We work with individual renters but as a general rule that is what it is. We do have Northeast human services on our grounds. They do have a satellite office and they don't pay rent.

Representative Wieland: $2.50 then they pay utilities? Or are you paying utilities out of that?

Alex Schweitzer : We are paying utilities. You would have to do each building individually if you did that. A lot of these are not for profits.

Chairman Pollert: I understand like the daycare.

Alex Schweitzer: It's the crisis intervention center for women. There is a variety of rentals too.

Chairman Pollert: But the buildings are being utilized. That way they are being up kept.

Alex Schweitzer: Yes they have staff there that live in the community. Continued testimony.

Chairman Pollert: Well when you look at operating fees and services it is a 2% increase on a $2 million area.

Alex Schweitzer: Yes. Continued testimony.

Chairman Pollert: Where is the other $120,00 going to come in?

Alex Schweitzer: We have standard contracts and that is what we will probably spend until July 1 of this year.

Chairman Pollert: So you are telling me that you will have an extra $100,000 of expenses in year 2 of the biennium to get you closer to the $263,000.

Alex Schweitzer: That is correct. Overall it is a drop of $6,000.

Chairman Pollert: Is there a timing issue so you aren't going to have more money?

Alex Schweitzer: No its terms of the contract is the issue. Continued testimony.

Chairman Pollert: IT Communications on the $28,000 is that something through ITD or what do you mean by IT communications?

Alex Schweitzer: That is the IT telephones. There is an increase of cost of ITD. We are switching out the IT phones. That is why you have seen that. Continued testimony.

Representative Bellew: How much longer is the bond payment for?

Alex Schweitzer: This is the final biennium. Continued testimony.

Chairman Pollert: These extraordinary repairs, are they one time or continual repairs from the general fund?

Alex Schweitzer: These are onetime expenses.

Chairman Pollert: They are under that then?

Representative Bellew: In this extraordinary repair you have preventative maintenance on the parking lot. To me that seems like it is a continuing expense. That is just my opinion.

Alex Schweitzer: It is a onetime expense this biennium but it may show up again.

Chairman Pollert: What is the total one time expenditures that we have in DHS?

Roxanne Woeste: $4.3 total for the department.

Chairman Pollert: With the $4.3 total, there is one time at the Developmental Center of 700 basically. You have how much with the $3.2 at the state hospital?

Alex Schweitzer: Around that.

Chairman Pollert: So there is $300,000 scattered around the DHS budget?

Lori Laschkewitsch: There is $352,000 of equipment over $500,000 that is one time.

Chairman Pollert: That breaks down to our one time in DHS?

Lori Laschkewitsch: Yes.

Representative Bellew: Did we ever get a printout of what that equipment is. Is it computers? I don't consider those one time spending items.

Alex Schweitzer: It's for hospital beds and mechanical lifts. You could argue that one time. You will have to replace them sometime but hopefully a hospital bed will last a number of years.

Representative Wieland: Is the list provided in the order of priority.

Alex Schweitzer: No it's not. It's what we need to maintain the infrastructure of the campus.

Chairman Pollert: On capital improvements and extraordinary repairs for the developmental center.

Representative Bellew: On your one time funding, is that all general funds?

Alex Schweitzer: Yes.

Carol Lebertowski: In this biennium they are all general funds.

Representative Ekstrom: I'm particularly aware of steam line troubles on other state property like the University system. Has there been an analysis of your steam lines in terms of how efficient they are. Do you have leaks?

Ken Schultz: Chief Operating Officer for the center. We had an energy audit done about five years ago now. As a result of that we did have an energy project where we replaced pretty much all of our steam traps and made major changes to our electrical and plumbing work. What we look at in here and we have had this winter, two steam breaks. It is very difficult to anticipate those. We have an old cast iron system. It's just one of those things when a break occurs. We are not recommending going in and replacing the whole system. It's too expensive

and not necessary in my opinion. Obviously they are all underground and usually require a bit of work to get to them. What we did was put in some money to anticipate that.

Chairman Pollert: We had a discussion on roofs. This doesn't equate to you. The DOCR and Youth Correctional Center they are asking to re-roof four roofs. When we got to the point of which ones are the really bad ones. We found out there were 2 of the 4. We didn't have to do the other 2. My question would be on the Maplewood. I see it says that it is not leaking at this time. Some of the stuff we do have to put a priority on. I do understand that. I have to ask that question. If you look at this list of priorities I'm assuming that the steam distribution system, the pipelines, and that stuff have to be done. I will ask the question about the roof. If you were to prioritize the $712,000 what would you tell me?

Alex Schweitzer: The roof needs to be repaired. It's not leaking at this time is a pretty telling comment. A lot of times there are buckets in offices because we have had to do patch work.

Chairman Pollert: So it's not leaking now because everything is frozen?

Alex Schweitzer: Yes. It is in bad shape.

Chairman Pollert: If I take the $54 million that is the total amount of money that you are proposing with the developmental center, I will divide that by 365 days. If I take that and divide by 115, that is the per day cost per client is $1,287.

Alex Schweitzer: That is correct. What the rates at the developmental center are is $525 a day. You have to add in $94 for medical costs. Our base rate is $525 and we add in an additional $94 for medical costs. It should come out to a number you are looking at. About 58% of that $525 goes to direct care. 28% goes to indirect which is the support plant and dietary. Then you have political services which is about 12% because you have a number of people with behavioral issues and PT/OT. About 2% in administration.

Representative Kreidt: Looking down on the budget totals, what kind of IT funds are those?

Alex Schweitzer: If you look where it says S101, this is the entire department. We are the caboose. It was basically ran off the BARS. That bottom part was the whole department. Our number stops at the 54. We don't have that number. That would be within the Department of Human Services. The bottom part if you look below where it says S101, full time equivalence, that area has nothing to do with that.

Chairman Pollert: Can you give me the difference between the clientele that you are doing and the clientele at the Ann Carlson center?

Alex Schweitzer: I would not have the knowledge of who they serve there to give you that answer.

Chairman Pollert: Can you tell me the difference of the clientele between the Ann Carlson Center and the Developmental Center?

JoeAnne Hoesel: The main difference is age. Ann Carlson center works with children. The developmental center does not. They are both the same level of care. They are both ICFMR's. That really is the difference.

Chairman Pollert: They are both ICFMR's. I am just saying Ann Carlson Center because it is easier to say than all the other providers for the children. Do you have an idea what that cost is per day for that care versus Alex's 643?

JoeAnne Hoesel: I can get that for you.

Alex Schweitzer: The important thing to know on that is to make sure you have the medical costs included. Sometimes they just give you the base rate.

Chairman Pollert: I would like to know that as well.

Representative Wieland: I missed when he was talking about the percentages. I got direct costs 58, medical 28, and the 12% is that operational?

Alex Schweitzer: It's 58% direct, 28% indirect which is food, dietary, plant operations, etc.

$9,365 is additional for costs per day.

Chairman Pollert: Do you have nationwide what the figure for administration is?

Alex Schweitzer: We compare and look at them. There is that information out there.

Chairman Pollert: If it's simple that is fine.

Representative Bellew: What is the difference between medical and clinical?

Alex Schweitzer: Medical essentially is a position doing a medical service similar to you going to a clinic. The clinical side is things like PT/OT and so on.

Chairman Pollert: Any other questions? That is it for the developmental center.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/26/09

Recorder Job Number: 7801, 7802, 7804

Committee Clerk Signature

Minutes:

Chairman Pollert: Called the meeting to order. Took roll call and every member present. We are planning on spending all day on public testimony for HB 1012.

Dennis Sommers: Testimony Handout (Attachment A)

Representative Bellew: Does Medicaid pay for dental braces?

Dennis Sommers: They do on a limited basis. Medicaid requires that you have to qualify. In order to qualify you get so many points for crooked teeth, impacted teeth, cross bite, overbite. Once there is a significant score achieved so the problem is recorded as deeming severe enough the state will provide coverage to those cases to the tune of about $3,000.

Representative Nelson: In your testimony you talk about the need for dental care at a young age. What is the current reimbursement for youth and Medicaid reimbursement?

Dennis Sommers: Are you asking for a percentile?

Representative Nelson: Yes.

Dennis Sommers: Differs from procedure to procedure. I believe it is somewhere between 45-50% of a typical bill service.

Representative Nelson: I thought that it was part of the 2007 bill was that youth would be raised to that 75% level?

Dennis Sommers: The bill in 2007 would have changed the overall funding. All of the services billed during the previous biennium would have been totaled together. Then 75% of that amount would have become the new budget. That was the bill that was approved by both chambers. The final result however was different.

Representative Nelson: That was for the total Medicaid population wasn't it? The youth weren't carved out of that in the bill? I thought after the conference committee report that the youth still were at the 75% percentile? Am I wrong about that?

Dennis Sommers: I believe you are wrong about that.

Representative Kerzman: You quoted other states and how the access went up after reimbursement levels. Have you surveyed providers in ND to see if they would follow those same trends?

Dennis Sommers: We have not surveyed the membership with respect to will they? We have asked the membership of the association to ask what obstacles there are to providing services. We know that there are several obstacles. The primary objection at this time and the years has been inadequate reimbursement. If reimbursement is less than what it costs to provide the service it becomes a stumbling block. There are other obstacles such as failing to appear for appointments and compliance in various levels. The number one issue that our membership says is that it keeps them from opening the doors wide to patients is reimbursement levels.

Representative Metcalf: I've been told from various sources that the level of reimbursements is important. One thing that they run into serious problems with is getting people to show up for appointments. They will schedule them in, have the time set aside for the individuals, and then they don't show up. I'm sure this costs the dentists money because they could have been using that time for someone else. Is this a true statement or is this incorrect. Do you have some statement that you would like to make?

Dennis Sommers: Indeed that is true. It is a frustration for dentists when patients fail to arrive at their appointments in need. It is loss for production for the dentists. It adds to the expense side of seeing Medicaid patients. I point out that it is not the number one reason why we have a problem in ND for accessing care. It is one of the reasons. The ADA report indicates that in states where reimbursement levels have increased, the instance of failure for appointments seems to decrease as well. I don't have an explanation for that but it has been the results in other states. To what degree that occurs I do not know. There may be other things that may be done to assist in that portion of the problem. Perhaps there are ways. In fact the ADA is working on a position referred to as community dental coordinator whose job would be to ensure that those who have appointments are reminded and have access in their transportation and arrive on time to their appointments. The ADA is approaching this from another angle as well to get the people there. That is something that is in process right now.

Representative Kreidt: I remember something different from last session. Could we have Maggie Anderson step forward and have her give us an update on that?

Maggie Anderson: HB 1246 did start out at looking at requiring Medicaid to pay a certain percent of bill charges. I do believe that was 85 when it started out. It went down to 75 and then when it was amended there was a realization that many of the children's services were already above 75%. There was another amendment to do children at 85%, adults at 75% and then at the end we were given a blanket amount of money. We are told to apply that towards the children's dental fee. There was no percentage in the final bill.

Representative Kreidt: Overall average when you did the payments do you have an average of what they were paid?

Maggie Anderson: We are working on that for some information that you requested during the

detail on medical services. We were going to provide that percentage of bill charges on a couple of different areas of where you requested that.

Chairman Pollert: So did the dollar amount that was appropriated last session in that house bill, would that have been 75% of bill charges or higher for the children? I know it's a dollar amount but what would that percentage have figured out for that time?

Maggie Anderson: We did not do that calculation at that time because the bill just threw a certain dollar amount at that. What I can tell you from the portion that is in the Governor's budget right now to pay everybody at a minimum that there are a lot more adult services that are below 75% than there are children's services.

Chairman Pollert: We can get that in our own section since this is public testimony. In your testimony you mentioned that GA, IN, MI, TN, SC, raise their reimbursement rates to approximately 75%. Do you have any idea what those states were before they did it and what it is now?

Dennis Sommers: I do not have those figures at the top of my head but can certainly research that and get that information to you.

Chairman Pollert: I still struggle with the whole medical services in the Governor's budget. What I'm struggling with is that we are rebasing funding for hospitals, physicians, chiropractors, ambulances, and dentists. Of course the hospitals and physicians are on costs, and the dentists are on 75% of bill charges. When they rebase the hospitals, there is 0 inflation the first year and a 7% inflator the second year. Yet when the dentists are done at 75% of bill charges, they are also getting a 7% inflator a first year and the second year. I'm trying to figure out why. In the other segments of the medical services are they at a 0% inflator when they are getting rebased and yet the dentists are at a 7&7 plus getting the 75% bill charges.

Dennis Sommers: I cannot answer that but if could comment on one thing that Maggie alluded to. We are talking about some of the procedures for children are at different levels than others. One problem that skews the numbers for the dentists across the state when they submit their claims to Medicaid know that Medicaid will pay 25 on this procedure when my normal fee is $50, I'm going to submit $25. We have tried to educate them to say to submit their average typical customer fee so that the state has information on where things are. Unfortunately some don't do that and it does skew the numbers.

Representative Nelson: Chairman Pollert talked about the winners and losers aspects of Medicaid reimbursements for different providers. My recollection of last session is that we asked for the analysis of the interim to determine from a provider list to get to a base line where all providers would become part of a system and increase together which would take away some of the winner loser type situations that have occurred in the past. Do you agree with that philosophy or would you rather go alone in the arena or provider services?

Dennis Sommers: I struggle with winners and losers. The losers here are the Medicaid recipients and children in particular. The dentists will be fine. We are not here begging that we deserve. We are asking for better reimbursements so that we can better take care of those children. Those children are the losers. Every system is different between medical and dentistry. Dentistry has a very unique business where we have each operatory equipped with equipment and materials to do things. They obviously have expensive things as well in the operating room. Visits to the physicians are different. Sometimes it is just an examination and prescription. Almost every visit to the dentist involves a dental surgery with high tech equipment and lasers and various pieces of equipment for definitive treatment. The delivery systems are different. It's hard to compare medicine with dentistry. I'd say we deserve to be treated differently.

Representative Kerzman: Does your organization have a suggested fee scale for dentistry? Does it vary across the state rural and urban?

Dennis Sommers: The dental community itself does not have a fee scale suggested. The service corporation certainly has one which is the arm of that organization. They have an allowable fee for different services. Is that what you are looking for? Dentists are certainly aware of that as for what the DSC will allow. Some dentists charge a little more than that. Some charge less. Perhaps what you are looking for is that. States don't all have the same kind of set up for determining their reimbursement as we are talking about here. Some states contract with a private entity like the DSC to administer the delivery system. In some of those states that are listed they have brought their fees up relative to those dental service corporations' fee levels in order to gain access.

Representative Bellew: Can dentists cost shift? Can they shift the costs for different procedures to make up for some of these losses?

Dennis Sommers: Dentists do not typically do that as I understand. It may take place in hospital settings or other medical type settings. Dentists don't do that.

David Zetner: Testimony Handout (Attachment B)

Chairman Pollert: When I look at reimbursement levels of what we are doing and what is proposed in the Governor's budget. In dentists it is proposed that 75% of billed average charges. Which is better? Where is the level field? I wish we could just look at this and say what it is. I think we are struggling with what is right and wrong.

David Zetner: I don't know how to answer that question. At one end you are looking at costs. On the other end you are looking at a percentage. Are they close? I would say they probably are. When you look at this 75th percentile you are saying that 75% of the dentists will get what they are billing.

Dr. Brad King: Testimony Handout (Attachment C)

Representative Kerzman: I want to applaud you for not discriminating and handling all patients. I think that is a very honorable thing to do. We had a dentist back home that as far as I know he did the same thing.

Brad King: I do want to be very honest. We do discriminate in a sense. We take Medicaid patients who we know will show up. There are people in nursing homes which we get the worst reimbursement from but will take them. We see people from all three nursing homes, the prairie learning center, that they are brought in. Someone else is responsible for them. To give you an idea of what our financial losses are.

Linda Kleinjan: Testimony Handout (Attachment D)

Chairman Pollert: When I look at the practice where you are the administrator then, for your business are they then reimbursed on the hospital side of the reimbursement or are you still on the dental side because its oral?

Linda Kleinjan: We are just reimbursed on the dental side. Whatever our fee is to see the patient, that is billed to the patient or the hospital doesn't reimburse us.

Chairman Pollert: So then these patients aren't being put in the hospital?

Linda Kleinjan: We are not admitting them.

Representative Nelson: I'm interested in how many Medicaid patients you have as part of your business? Do you have that number?

Linda Kleinjan: I don't have a specific number. We see them on a daily basis.

Representative Nelson: That is an important part of this. I don't want to appear to be insensitive to your needs. You provide a valuable service but from our position we are going to hear the same thing from every provider that comes up here. They are all right. That is why getting back to the study that was done during the interim that was our goal. We spent millions

of dollars to compare apples to apples, the different Medicaid services that are provided in this state so we would be able to determine a base line and wouldn't have this picking and choosing of who is the winners and who is the losers. The point is that every reimbursement system is different, costs versus percentage of bill charges. Your billing system is more spread across the region as far as predominant charge than with hospitals. Medicare reimbursement would indicate that the hospitals in ND receive less money than those in other parts of the state. In your business, a tooth extraction in Minot is it different in Minneapolis?

Linda Kleinjan: I'm sure it is. I would think Minneapolis would be at a much higher rate because of their cost of rent. I know in other parts of the country things are different.

Representative Nelson: That would be true to some extent. Some providers it is a government controlled system. Are you losing money in your business practice for the total business aspect? Is it fair to say that some cost shifting does take place?

Linda Kleinjan: I don't believe cost shifting does take place. Right now we have been very desperately trying to find another oral surgeon to come to our practice. We have been looking for about three years. The gentleman in our practice, we have got three of them with two doctorates, three specialties, they are board certified in multiple things. Their education is so high. Just that they would be here really says something for them. They could go anywhere. They are heavily recruited out of our practice. To find someone to come in is really difficult. It's to the point where they are already losing money and I just can't imagine that they are going to work for less. They are board certified in multiple specialties?

Representative Nelson: I would invite you to stick around for the other providers because I think you will see the same situation.

Representative Metcalf: I see where you have in here that a number of your clients are juveniles and adults for the control of the department of corrections. Can you give me an

estimate of what percentage would you say are from that department versus the average services they provide?

Linda Kleinjan: I do not have those numbers.

(Recorder quit working)

Nancy Callahan: Testimony Handout (Attachment E). Started new job (7804)

Representative Bellew: They would question that though?

Carla Kelly: I believe they would take cash. I could go down. Each one of these has a different system. A couple of the dentists on here will see the kids. It might take 6 months to get in. Some don't see Medicaid patients at all. Some of them if you miss one appointment then you can never go back to them again. We have one that if you call up and cancel he will no longer take you as a patient if you are on Medicaid. I have heard the stories over and over so I know they are true. I deal with it every day because we have to get the kids in as part of the federal program. The reason I really care is because I see kids sitting in school in pain. A lot of times they are showing that. They don't eat, maybe they have behavior problems. The next thing we know they have a swollen jaw and we have to get them in because they have an absence. I think rural families in our region have an extreme difficulty finding a dentist.

Carla Kelly: I am a hygienist for the southwest region. I work for southwest district health unit. I am on the oral health coalition in the state. We have a dental practice in Bowman. Most of the things I have to say have been covered already. I do want to talk about reimbursement and that I would like to see it not necessarily for the money that it brings to our practice but for the help that we need to take care of these kids and adults. We see an amazing amount of Medicaid clients. We see them from ND, SD, IA, etc. We just have a huge need. We see patients from 100 miles away. There is not a day goes by that we don't see Medicaid patients. It's an everyday thing for us. We do see the correctional center women from New England. No

one within 20 miles of their center will see them. They drive the 60 miles to see us. They bring them by bus. The way our software was set up I could not get all the information as far as percentage wise. It's just the way it was put in. I was able to get out specifically one group which was the correctional center. I do have some numbers here. In last year's production we did $77,000 of work. Our reimbursement rate was $37,500. Our overhead runs about 70% so it's a bit more than Prairie Rose and that could be because there is more dentist work involved. The corrections center does pay us a stipend to see their patients because no one will see them. We do make a little extra money on that but we still at the end of the year, the first things with all these patients we ended up with a $1,600 loss. I think dentists are really good about giving away dentistry to people that really need it. We don't have to leave our home or office to do charity work and that is a wonderful thing we can do in dentistry. The few people that are doing it with the 20% are becoming overwhelmed because there is only so long you can run at a loss.

Representative Kerzman: You don't handle MT patients anymore? Is there reimbursement level less than ours?

Carla Kelly: It was getting to be overwhelming. We do see some SD. We actually had to go to the state to see if we could see the boys and not all residents. We are just overwhelmed. You can only run at a loss so long. It's wonderful to do charity work but I'd like to see someone from Dickinson help us.

Representative Kerzman: Do you know what MT's reimbursement rate is?

Carla Kelly: No I don't.

Representative Nelson: Before we get started I had a conversation with Dr. King during the break and I think it would be helpful for this committee to know the criteria that was used in the interim study as far as the rebasing of providers. It seems as if there were different groups

doing the individual study. The dentists make the point that it was very difficult to provide the information that was needed for them. I would be interested to know how uniform or how easily it was for them to provide the information we need to move forward with the increases.

Chairman Pollert: Do you want an explanation for the bill or someone from DHS to come up?

Representative Nelson: It depends on the answers from some of the groups. Dr. King did say that the questionnaire that you received from whoever was contracted to provide that service was unusable. I don't know if Joe or someone has knowledge about that but if they do, I think it would be important. We did spend a lot of money to get results. If the process was flawed I'd like to know if that was true across the provider board or if it was an isolated case.

Chairman Pollert: All we can do is have Legislative Council read what the amendment said on the SB last session that was done through DHS. If you want more detail we will have Carol come down and explain.

Representative Nelson: I think the intent of the amendment were to know the details of what took place, what firms did the analysis, and how user friendly it was. It would be important for us as a committee to see in case it was as valuable as we thought it would be.

Chairman Pollert: What I would say is that we should bring them into our section.

Beverly Adams: Testimony Handout (Attachment F)

Representative Nelson: I don't expect you to have this but it would be nice if you did. I brought this issue to Blue Cross before and their answer is always fine. We will pay you at other states but then policy holders in ND will have to deal with the reimbursements. You don't happen to have a premium comparison as well?

Beverly Adams: Yes that is on page 16 exhibit 5.

Representative Nelson: On a quick look at this what they told me was true.

Beverly Adams: You are correct. The premiums in ND are currently the lowest in the nation for private healthcare insurance. I believe that NDA or NDHA have done a study. The perception is that the citizens of ND think they are paying very high premiums for health care costs. We are the lowest in the nation.

Representative Kerzman: Prior to the restructuring of Blue Cross Blue Shield it was a wider variety on the board. Did these scales start sliding after that? Can you see the difference?

Beverly Adams: I don't know if I can answer that question. Continued testimony.

Representative Metcalf: ND has a medical school at UND. They graduate so many doctors every year. I think it's about 60% of these doctors or more stay in ND. You say you have to spend a certain amount of money to hire doctors out of the state? How many additional doctors do you have to recruit over and above what we are producing out of our medical school?

Beverly Adams: I don't have the answer to that question but I think this may be the time for me to introduce Dr. Gilbertson who would better address that question.

Chairman Pollert: What is the reimbursement for critical access hospitals versus the big 4, 5 like Altru? Is there a difference?

Beverly Adams: Yes. I can't give you the numbers on Medicaid however on Medicare the critical access hospitals can be reimbursed at 100% of allowable costs versus the large integrated systems are paid on what we call a DRG type of system where we are provided a fee for the service that we provide. It doesn't take into consideration the cost of providing the service. In critical access you have to be in a particular area of the state that is considered more rural and a lower number of hospital beds. For the larger hospitals when you are located in urban areas and have more hospital beds they pay you on a fee for service type program versus a Medicare critical access type concept.

Chairman Pollert: Do you have any idea what that might be compared to the critical access at 100%?

Beverly Adams: I do not.

Dr. Gilbertson: I have four quick points of underscoring what Miss Adams said. The reimbursement system and existing payment system for healthcare in this country is a very complex one. Fundamentally if it is governmental programs or commercial payment it exists as a fixed payment for unit of service. That is done regardless of what the costs might be. This varies a bit across the country because of the ability of people to negotiate. What we are doing is having conversations to negotiate the needs. Basically we have very little control on what we get paid for services. Meritcare is the largest healthcare provider in the state of ND. As Bev pointed out they feel that large size may single us out against the significant challenges that we and others face in healthcare. I can assure you that it does not. The numbers just get bigger. We deal with the acute care setting as an adequate county hospital. We cover a fairly large area of the state. The other thing that maybe wasn't quite as clear was that the integrated systems in the state of ND which is a unique state provide the vast majority of all rural healthcares in the state. It covers 90% of healthcare. We aren't an urban delivery system. We are urban, rural, and remote. We cover the full spectrum. There is an enormous amount of benefit that goes into the communities. I want to point out one additional thing. The idea that having a. There is no question that the profit margins and some of the sub specialties are good. Unfortunately it is going to be fewer. If you look at professional services alone, very few have professional margins at all. When you count the benefits and salaries, having to recruit the number of people you will see that the cost is significantly high. There is a limit to this. The limit is how long we can stay viable. It's not that the work that has been done.

Chairman Pollert: I have this perception too. I have been that way too until your testimony too this morning. Say it is heart surgery or a specialty surgery. I always thought it was easier at the Big 5 as compared to a critical access hospital for you to shift costs. Does the private payer pay more for a heart surgery or liver replacement? I always thought the margins on that would be greater where you can cost shift.

Dr. Gilbertson: That is an important question. Talking about heart services, if you have a bypass surgery the costs are oddly much higher than if you are seeing someone in an office. Because of the supply cost and the other things are tremendously more expensive. The margin on that is also larger as a general rule. In recent times that margin is steadily declined because the reimbursement for cardiovascular services has steadily been eroded particularly on the physician side. In order to recruit and maintain cardiologists we have to subsidize that professional side of it on a continuous basis more and more to retain them. If you look at where Medicare has gone and reimbursement for positions, some of those have stayed over the last three, four years that we are going to have a 9% cut or a 12% cut. There has been a steady decline over the last 5, 6 years with many of these services. The ability to cost shift some of those things is not great. There is only 4, 5 areas of places where margin is made in hospitals these days or in health systems. Most of it is in the hospital. That is where reimbursement is greater. In the large clinics, this amount is about half of our revenue and this is where we lose money big time. Maybe $20 million a year. In order to maintain that level and quality of service. That used to be cost shifted to the hospital which had better reimbursement. Because we can't cost shift, that margin is just eroded down.

Chairman Pollert: So basically you are saying that the specialty services that the margins are high and you are cost shifting because the margins for the physician services are drastically lower. You are cost shifting to try and break even between the two services?

Dr. Gilbertson: I don't want to start saying the profitability for cardiovascular is high. It is in relation to other things. Of course there are marginal costs. I'll give you an example in orthopedics. That includes both hospital and physician component. How narrow the margin has gotten, most people think if you have an orthopedic surgeon you are golden. If they choose the wrong prosthesis, we may lose money or make money. In the variance of those things is anywhere from $1,500 to $8,000. If they take the $8,000 we probably lose money on the case. Part of that whole program is quality and standardization and efficiency with lower costs. We can probably get our costs even lower. Right now we are the lowest in the country. Nobody compares with us in the cost standpoint. We aren't whining about that. The whole context of this conversation is for you to understand as you think about it from the Medicaid standpoint in ND but you are also the legislator for the whole of the state and for all of us in the state. Part of this is an opportunity for us to say this is frail that is going on in healthcare system in ND and a lot of it centers on the reimbursement issue that has ND specific. I can assure you we have talked long and hard to the conventional delegation that we have here. They are helping and trying to help us improve some of these things. In Congress it is hard to change things when you look at the votes in NY, FL, TX, and CA. Some of this goes way back to the 1980's when ND honestly reported their costs to the Medicare office when they were going to the prospective payment system. Our costs were lower and we have been stuck with those ever since.

Chairman Pollert: I have heard that Altru is thinking of expanding in Grand Forks. Let's say it's another facility. I know in Jamestown they are talking about building a facility and going with the critical access. Normally, when you are building a facility you are getting bigger because the profit margins are better so you build. How does that work as far as hospitals go?

Dr. Gilbertson: I don't think Altru is expanding beds in Grand Forks. There is a private for

profit for entity called Aurora that is under construction in Grand Forks. That is probably what you are referencing. Critical Access hospitals change their reimbursement. They were struggling. They are still struggling. Their reimbursement isn't probably different than ours. We are paid on a fixed price per unit of service whereas Bev pointed out, critical access are cost based reimbursed. There are qualifications of how those costs will be used. Fundamentally they are. You will see in the country that many critical access hospitals are actually building. They are looking into that, should they really be building? You can cost that back into a cost and get reimbursed for that. Some of that is made possible by some of those things. Many hospitals when they get marginal from a volume standpoint, if they want to go to critical access so they can go from PPS to cost based reimbursement, that is what Jamestown has done.

Representative Kerzman: One of the big disturbing things to me is how we are going to handle that cost. It just seems like we are way out of whack in this country. I have neighbors who are self employed who are paying close to $1,000 a month. The problem we have here is that if we raise one rate the other rate is going to come up to meet it or vice versa. We just have something that keeps snowballing out here. We have been trying to address this for a number of years and it just doesn't seem to get any closer. Do you have any answers how we can get a handle on costs?

Dr. Gilbertson: Yes I do. I would say that they should have our reimbursement be not ridiculously low like it is. Otherwise they match the system we have in ND and you will save hundreds of billions of dollars of healthcare costs in this nation. There is tremendous waste in healthcare across the nation. Part of the dilemma that we have had for years is that we get painted with the same brush. When CMS pushed the button on the computer to lower their costs, that effects everybody. What they are after when they do that many times is a corruption and fraud in NY, FL, TX, and CA. We get wiped with all of that same brush and everything

drops down. Efficiency in the health care system is not where it needs to be. If you look at ND, if the costs per unit of service in ND and you compare it with someone else it is just about half. We have got the right system. We are part of studies nationally that are going to try to prove that. Our hope is to participate in the reform so that they will embrace these systems that you have and truly reward us for the high quality that you have. I will give you another thing on how inequitable this thing is. If you are in LA, which has the highest cost and the lowest quality in the state, they give them the same benefit for incentive. Now they are the second lowest but they get the same as we would get. We are at the top of the pile. It's harder for us to go over into the stratosphere here with some of this. They should be paying if you are high quality; you ought to be paid at a certain level. If you are less than that you ought to be paid less. That is not happening and it is part of the political process.

Representative Kerzman: Your charts show different. ND is on top in the quality but we are down with the reimbursement. I don't see much correlation between reimbursement and quality. I see just the opposite. We talk about efficiencies. I'm not seeing that happen.

Dr. Gilbertson: You are making the whole point when talking about ND. You are absolutely right. What they do nationally is point to ND, MN, and some of the other states. Lower cost ends up having higher quality. Because you have high costs in LA and the worst quality. What people get paid for is not the issue. People have to look at the quality issue. There is not more money put into that. What we are talking about and discussing with you is that there has to be sufficient amount of reimbursement in the state so we are competitive and we are survivable in the marketplace with this. I would plead to you that in my work with the economic developments are that ND does have an issue with wage scale in the state. We need to raise that. It's not a good deal to have a low wage base. It's not good for us. As we try to improve business and activity in the state and try to retain our youth and all the rest, it is going to be a

big factor going forward. The economic boom that is part of ND, part of responsibility would be that you look at that and see how we use it wisely. Part of that is having a stable and viable health care system. That is a critical part of that.

Representative Metcalf: One of the thoughts that came about was the cost of recruitment for medical doctors. I referred to that to our medical school. How many more doctors should we have in our process of education in order to meet our needs in ND? I realize we can't meet all our needs especially in the specialty areas. Could you give me a statement concerning our doctors and recruitment position?

Dr. Gilbertson: That's a very good question. The context of that is we do actually retain a fairly high percentage of physicians in to ND. Even some of the specialties, we track them from entering med school and try to recruit them back to ND. Once they go into a residency program some place and they are there for 3, 4 years they get surrounded by the area where they are at. The data shows that they end up going into practice within a 200 mile radius of that. They do look at that. How do we attract them? Paying them 10% more or benefits might be better. Workload is certainly not less. For primary care, we have residency programs and internal medicine. Meritcare is a major teaching facility in the state. They have residency programs in psychiatry and internal medicine. Family practice has residencies in Grand Forks, Bismarck, and Minot. We do pretty well with those people. That is going to be insufficient. Someone just told me that the hardest recruit in the nation is a general internist. I think you are going to see a shift in the leverage there that is going to come for primary care. ND medical school is a tremendous resource for us. My own feeling about that with the integrated system and perhaps that is where it comes into effect. If we can also develop some specialty training, not just internal medicine, fellowships for cardiology and some of these other specialties that are going to be critical. We are very easily in sufficient size to qualify to have some programs. I

do believe we should be growing more of our own and retaining some of these people in the state. It's a tough market out there. We contact 100% of all graduates from UND and try to recruit them back. They also get married when they go to residency. Getting the spouse back here is not always an option.

Representative Metcalf: Based on the number of doctors that are retiring and the numbers of doctors that we are training, are we gaining or losing?

Dr. Gilbertson: We are losing. There is a projection to be 200,000 physicians shortage by 2020. The irony of this whole business of a healthcare delivery system that is out of sight from costs. Not even really competitive internationally. It drastically needs reform. We are going through a reform process and lowering costs but we are running into that. The supply and demand issue is going to be a crisis. The physician shortage is going to be worse and worse. That doesn't sit well with ND if we are viewed as a low paid state. It is also a crisis for nursing. The average operating room nurse is about 54 years old. You look at this group of physicians that are about 55-65. In order to replace every one of these people, any physician with the new era, you have to hire between 1.5-2.5 to replace one because of lifestyle issues and other things that have changed.

Representative Nelson: You as well as every hospital in the state is under an increased challenged system. I'm going to limit to one question. We have some students here from Mayville. I don't know how many of those young folks were born in the area. I would guess that in that period of time when they were born, a good many of them were born in Mayville. Now I would guess there are no births there. There has been a shift. The shortage of physicians and shortages in rural hospitals have been pushed to the major centers. Now in your discussion with the internal medicine situation, most critical access hospitals are going to be limited in the scope of who they can admit. To get into perspective what is your volume of inpatient

business. Is that on a sliding scale downward or is that increasing? There is an area of difference.

Dr. Gilbertson: Our admissions are increasing. Some of that has been related to the increase in size of the company. Some mergers and acquisitions. In general our admissions have gone up. 15 years ago a futurist told me that we would only need a 100 bed hospital in 2013. We have added beds continuously during that period of time. The issue of rural health and some of the things like OB and delivering babies is what we will talk about. There are two factors involved. It is less the availability of physicians than it is the availability of patients and population base. They just stopped delivering babies in Valley City. That is now a critical access hospital. Physicians were very upset that they had to stop delivering babies. The reason is you don't deliver enough babies to stay competent. You have to have sufficient volume so people can stay competent in doing that. Otherwise you are putting mothers and children at risk. If you are only delivering five babies a year that is not adequate to stay skilled. That is part of the dilemma in critical access hospitals.

Representative Nelson: This is not reflective on your situation at Meritcare. I know you did have a number of satellite clinics in surrounding areas. I believe that some of them are closed because of the economic situation. I know it's been said in areas where clinics have been placed in outlying areas. Some of them in fairly large communities. Devils Lake for example, where Altru has an association with a clinic. The hospital in Devils Lake has a perception, if not a reality, that many of the patients go to Grand Forks that could be handled in Devils Lake. There is a shift of where the services are being provided. That does skew the imbalance of what critical mass would suggest. If you are going to have 5 births a year you cannot afford to have that. As a shift takes place to the larger areas, it only makes the challenge greater for those communities that strive to keep their hospital, would you agree?

Dr. Gilbertson: Yes I would agree. That migration is going to continue. It's not going to go away. It also depends on the full population. I don't want to talk about Devils Lake because I don't know that market. I think that some of the comparable areas that we have like 40 clinics in eastern ND, western MN. There is a lot. Actually the Mayville people are here and we have a clinic there. We do believe that we think we should optimize the car at the local level to have as much care as we can. I will tell you one of the problems of doing it is getting specialties from the urban areas to go out to the urban areas to see patients is a hassle. We would like them to go out there. We don't have time to go out there. This is where some of the incentives that you have to do to manage a rural and urban organization like we have. You have to create an incentive to subsidize physicians so if they lost time they can deal with it. I don't have an answer for you but I do have some passion for this. We need to assure that rural ND has appropriate healthcare as well. High quality healthcare. The model for doing that I think will change over the years. Probably starting right now as you see this evolving. What that will look like, I'm not entirely certain. It won't probably be a fully fledged hospital in every one of these locations but there should be health facilities. There should be a safety net for them. If it's not managed well there will be nothing. I think it's important for us to look at ND as this ecosystem as well that we need to take care of all the citizens of ND.

Representative Kreidt: Kind of along the lines of going back to the UND school of Medicine and the physicians that we are educating there and the number staying in ND, what are we seeing on the side of foreign physicians coming to ND? Are there still a lot of individuals trying to come here from other countries?

Dr. Gilbertson: Foreign medical grads are getting better and better. I have seen them for about 40 years in medicine. Their quality is increasing, they are improving. I think we are going to see more and more. Number 1, America is not graduating enough physicians to meet our

needs. In the state of ND, we may see some increase in that over the years. If we don't have a better system for retaining our own physicians in the state. Not because they can't go somewhere else but they need to go to an underserved area for a couple years so they can get a green card. Then they can go where they want. In fact some of those happen in the state where they go for two years and another one is gone. That is not a good system. Foreign medical grads are going to be part of the delivery system here. That will be part of the social adjustment that we will all have to deal with. For example, critical care physicians, when we were recruiting a year or so ago we had 10 applicants. Every one of them was foreign. Not one was American. They are all trained in the US. We are seeing that in some of the specialties. I expect some of that to continue. The good news is that they are highly trained and highly qualified. I think they will do an excellent job and often times they are excellent citizens.

Representative Kerzman: I have seen an individual that has been trying to get into med school for some time. The selection process is limited. Going back to med school, the mill levy that goes on to support that. They aren't getting representation out in the rural areas. It is hard to get people in and to get them back out in rural ND.

Dr. Gilbertson: I would say that the quality of student is competitive. The competition for the slots varies depending on the number of applicants and so on. I think that decreasing the qualifications of physicians would be a mistake. As a matter of fact more people think there should be greater screening of physician applicants in med school. The reason I say that is, is because some of these people in medicine probably shouldn't be there. This has to do with interpersonal skills and behavioral issues. UND does a great job of doing that. I think the medical school is rising as a school. I would say that southwest ND should have programs that could enhance that. If you go to Concordia you have an 85% chance of getting in. To me, one of the biggest criticisms I have is in nursing. They have extremely bright nursing students that

can't get in because there is no slots. That is more critical. It is more unjust to them. They would qualify for medical school. I think that the process isn't bad. The state has to create incentives to get them there. You can't assign people out to these areas. It just won't happen.

Matt Schwarz: Testimony Handout (Attachment G)

Representative Kreidt: When you are talking about caregivers are you talking about a CNA or a QSP or what type of care provider does Jessica have?

Matt Schwarz: These are caregivers that go into the home to provide services to people with disabilities. In our case the needs are much higher. My understanding is that one of the problems is when you have people that come into the home and provide services similar to Jessica, there is no extra pay for those people as if they come into a home and help someone with much less intense needs. There is the problem. The people in our home have to know so much more. They have to spend a lot more time training. It's difficult to learn all of those things. Those people that do and have the capability to do that have a tendency to move on to other jobs. Then of course you have that process repeating itself by spending more money on training. Our service provider has treated us very well because he has told us on many occasions that it costs him money to provide services to our family as opposed to the services that are provided in other cases.

Representative Nelson: Maggie is here now. The question is that Mr. Schwarz talked about the level of service that is needed for his daughter and that is paid for under the same pay scale as the people with less training. Does this fall under the QSP program? Help me understand how the pay reimbursement goes in this area.

Maggie Anderson: The services that are being discussed are through the waiver. Those individuals are typically hired through community options that provides the services. They aren't technically QSP's because they are considered DD waiver service providers. They don't

fall under the same fee schedule as a QSP. A QSP typically provides personal care services. The services through the SPED program and expanded SPED program. They can also provide services through the home and community based waiver which is the equivalent of the old age and disabled waiver. Through the DD waiver it is a little bit of a different system where the DD providers are set up. We set those rates and fees based on cost reports and different criteria. I'm not an expert on DD rate setting. We certainly can get into that detail a little bit more when we come back to the committee. It's not the equivalent of QSP's.

Eric Froehling: Testimony handout (Attachment H). If I can address one thing that has come up. Representative Nelson asked about the study for the dentists. Our rebasing study was done by a group called PCG. Initially what they sent us to fill out was somewhat laborious and difficult to discern how to do that. We did work with them in order to revise what they need. They were willing to do that until we got to a point where we were able to provide them the information that they needed. At that point it became a very usable study. I would say that it did seem to work for us.

Arnold Thomas: I'm for the Healthcare Association. If I may, the physician is also going to be offering testimony in respect to the physician rebasing also has an early afternoon commitment. I would be willing to let him go and I will go later.

Chairman Pollert: I will see who is left to testify on this division.

Arnold Thomas: We can be here when you need us to be.

Bruce Levi: Testimony handout (Attachment I)

Robert Thompson: Testimony handout (Attachment J)

Representative Nelson: My question is I have heard that there has been some recent changes in the J-1 program for that. Obviously there are many hospitals and communities that have utilized that program for family practice. Certainly in my community, I can't remember the

last internist that wasn't a J-1. Is that true. Has there been changes that make ND less attractive or competitive to attract J-1 applicants to our state.

Robert Thompson: Yes. Most of the J-1 applicants that we get tend to come from countries that are a bit more tropical. The J-1 people who come here are looking for opportunities. We probably have more luck in the bigger communities. A lot of these people are from large cities and international areas. They want to go to an area that is on the border of being underserved. They struggle in some of the real small communities. I do think that ND in general is a tough place to recruit. I think with the J-1's, I don't know that answer. I am involved in recruiting in our system. We are recruiting J-1's. We have exceptions for kidney doctors and ICU doctors. It used to just be primary care doctors. Now it is global. The number of slots is across different specialties.

Representative Nelson: You also mentioned that you were on a task force with a congressional delegation. I understand the challenges that ND has within the US Congress given the limited role that we have in the House and being as rural as we are. Is this an area where the J-1 program would have an impact to help direct some more applicants to our state. I think the last numbers we looked at we were 400 positions short in this state. I don't think that is changing is it?

Robert Thompson: The J-1 Visa issue hasn't come up as part of that task force. We were more looking at Medicare reimbursement and the disparities there. I dare not answer that question because I would be making it up. We are at the bottom of the reimbursement. I will say our congressional delegation has been very helpful.

Chairman Pollert: Are there any more questions? We will be in recess until this afternoon.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. 1012

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/26/09

Recorder Job Number: 7803

Committee Clerk Signature

Minutes:

Arnold Thomas: *I'm the President of the ND Healthcare Association. Before I begin my remarks I would like to present something to the committee that caused by remarks to be completely re-altered for today's presentation. One of the presenters that we invited to address you was Mr. Terry Hoff who is the President and CEO of Trinity Health in Minot, ND. On his way down he was notified his mother had a serious health challenge. That is one of the reasons why I won't pass out any prepared remarks and we will have those available for you shortly. I am here to support the Governor's budget for the budget request that is before you that will reimburse hospitals at a rebased rate. What is that amount? In the Governor's proposal there is approximately a little over $8 million that we will finish an initiative that you began last session when you took the first step in rebasing rates for hospitals and you applied that rebasing action to critical access hospitals. I would like to remind this committee that you are not comfortable nor are we able to express any confidence in the necessary dollars needed t complete the rebasing for all hospitals. Instead what you elected to do was put money aside in your appropriation request for human services commission study to identify what dollars would be necessary to complete that rebasing project. Those dollars are in the Governor's Budget and that is why I'm here today. With me are other people who have*

appeared before you last session. They indicated the importance that Medicaid has for her particular facility. She is here to tell you what the consequences of your actions were last session have meant for her organization. In the context of arguing for rebasing of all facilities, why? Rebasing is long overdue. It has been 17 years since we have had a rebasing of hospital payments. We think it was timely when we presented the request for you last session. We ask you to basically finish the task this session. The numbers are now known. I would suggest that Representative Nelson's early query with respect to how the studies were done, by whom, and the refutability of numbers that you are asked to address would be put to the department where they would have an opportunity to talk about who conducted the study of the materials that were included and is the department satisfied that those numbers in fact represent costs?

Chairman Pollert: What I'd like to find out from someone is how many critical access hospitals we have in the state. Does that depend on the percentage of Medicaid patients that they have coming in. I would suspect Rolla and Devils Lake have a larger proportion to share with Medicaid. I know that is where a lot of the problems are coming in. I would like to find out if there is a correlation somewhere.

Arnold Thomas: I can get that information. You are really asking what is the percentage of Medicaid business spread throughout the 43 community hospitals in ND. Others also have the same proportionate burden. Medicaid, by itself is what we are talking about today. There are other payers who have different arrangements with those providers as well. The earlier comments of cost shifting are problematic for everybody. Approximately 85% of our rates are unilateral set. The people who wind up with that burden for the most part are those who we have been able to shift the costs too which are captured in our commercial premiums. Or for an individual who walks in and receives treatment but for all practical purposes is for insuring himself but not with an insurance product. Those individuals wind up paying more because of

the ability to shift the cost that is not recognized by other payers. In terms of Medicaid, the difference between the costs for all staff except for physicians, what it costs to turn on the lights, insure the place, to make sure the equipment is relevant to today's standards, and what the cost is to be able to have drugs and supplies to keep the place open. That is what I'm talking about in costs. There are no returns to stockholders and shareholders. It's just basically to keep the place in operation. What our study has indicated and what is in the Governor's Budget is to bring the remaining hospitals up to cost.

Representative Ekstrom: Is this going to be enough? Are we just putting a mandate on it this year, or are we going to be back next biennium?

Arnold Thomas: That question was asked of me last session when you took an action that put the critical access hospitals at a rebased rate at cost. This would be built in as far as that budgeting process. Through your normal process, if revenues were not adequate, you would end up going through the normal process that you normally do in terms of what are the priorities, what are nice to have, etc. We had requested last session, was to give you a figure that was not arguable that showed what the difference was between our cost to operate and what the state of ND was paying. Will that solve every institution? No. Those are factors that are also in addition to payment. I believe others this morning outlined some of those additional pressures. We are here to do is augment with our voice what the Governors requested you to consider and that is the rebasing of hospitals to cost.

Kimber Wraalstad: Testimony handout (Attachment A)

Representative Bellew: What is the difference between the critical access hospital and like Trinity Medical Center?

Kimber Wraalstad: There are two types of hospitals in ND. One is a PPS. Those are the large six. They are paid on a prospective basis. You heard DRG's talked about sometimes. That is

how Medicaid and Medicaid determines that. If I have to go in and have an open heart surgery. They know in advance what they are going to get paid. The critical access hospitals is a definition provided by CMS. We have to apply for it and be surveyed for it and meet certain criteria. It can be no more than 25 beds. We have to be a certain distance away from certain facilities. We have to provide ER services. The differences that we are then paid by Medicare is 100% of an allowed cost. What is not allowed? Physician recruitment is not allowed. Any kind of cost that deals with that, Medicare does not pay for it. They believe you should be paid by your third party payer. Last year when we came and talked about what we wanted was Medicaid to pay the critical access hospitals our cost. That is what happened to the cause essentially. Except they did carve out this lab and anesthesia piece. That is paid differently through Medicaid than Medicare. What we are asking for is to be paid our cost. The critical access hospital is 25 bed. Literally every hospital besides the big six will be critical access hospitals.

Chairman Pollert: This is based on 101% of what?

Kimber Wraalstad: It is allowed cost. Earlier today there was a lot of conversation about how some of these costs are determined and for some of the other providers. From the time that Medicare essentially was established, they required hospitals to do cost reports. We've got many years of history of costs. They have reports that are mandated for us to do. That is the Medicare and Medicaid. Even Blue Cross uses those reports. So when we talk about allowed cost, they will take that cost report and say ok these costs are allowed, these are not. Physician recruitment costs are not allowed. Interest costs are not allowed. One of the things that drives me nuts is cable TV costs are not allowed. Those are non allowed costs. You are supposed to make those up from your third party payer. Blue Cross Blue Shield's not willing to make up all that much difference.

Chairman Pollert: You mentioned in your testimony that 49.5% of your patients are Medicaid. I'd like to know what that percentage of Medicaid patients is in Devils Lake if someone has that. I'd also like to know if there is a correlation between the percentages of Medicaid patients coming into some of the other CA hospitals, and is there a point that it is ok so you aren't losing money?

Kimber Wraalstad: One of the things that I'm also a member of a group that calls ourselves the Gang of Five. We worked with pretty much all of the critical access hospitals in this last year and asked them to give us their financial statements. We wanted to see how everybody was doing. Essentially was what that came down to was critical access hospitals in ND are running at a -3.4% loss. Whether or not you have high Medicaid and that causes you to lose more, it's not. We are all struggling. That is why we are all coming back and saying we need appropriate cost base whether you are Rolla with 49% of the people that walk in to the door being Medicaid, or whether you are someone who has a less volume. That means that all of us are losing money. How are we trying to make it up? Grants. Back when there was investment income. You are probably going to see losses even greater. Some of the communities support their facility with tax funds.

Chairman Pollert: I'm a person who likes hard copy. I would like to get that information to hand out to the committee so we can have that. We are being asked to appropriate funds and somehow we have got to do it in a fair beneficial matter.

Kimber Wraalstad: We actually put together a document that we shared at election time with the Governor and with Sen. Mathern as well. It just talked about certain issues going on with critical access hospitals. Because our advocacy efforts aren't just talking to you in regards to Medicaid. We have been talking to the congressional delegation about Medicare.

Chairman Pollert: I understand that. Dr. Gilbertson said one of the major problems we had was because ND and the federal government that ND isn't treated fairly. I understand our hospitals are very critical. When does the point come that the state has to kick in a substantial amount?

Kimber Wraalstad: I would be happy to give that to you. I will make it available to you.

Representative Nelson: In your operating losses that you reveal here, I'm curious to see what value does depreciation have in your facility?

Kimber Wraalstad: Our depreciation expense in 2007 was $298,000 and in 2008 was $310,000.

Chairman Pollert: Which is a percent of what of your operating costs?

Kimber Wraalstad: Approximately 5.

Representative Nelson: That is pretty common from the facilities that I am most familiar with. These bottom lines are quite familiar as well in many critical access hospitals. The one that I am most involved with is having a 6% Medicaid utilization. In facilities like Rolla I'm sure this has had a much larger impact on bottom lines. Quite honestly this is the best way that we can affect the stability of rural hospitals through Medicaid reimbursement.

Chairman Pollert: As far as that information, if you would get it to our clerk and we will get it distributed out.

Mark Weber: Testimony handout (Attachment B)

Representative Nelson: As I understand the distribution if this bill passes, Maggie if I heard her right, indicated that this would be proportioned out in lump sum and then you would weight a certain area of service you would have the ability to do that. Did I understand that right?

Mark Weber: That is correct. That is what we did in 2007. We got a little bit of money and we got together. What we did we think was pretty fair? Medicare came out with a fee schedule a

couple of years ago in 2005 I believe. They did a study to find out where the ambulance charges needed to be from BOS-ALS non emergent and emergent. What we did in 2007 was we took all of the allowable charges and tried to get them as close in percentage wise to what the Medicare percentage was. So that significantly helped the BOS rural population as well as the ALS people. I believe working with Maggie's office, that she will allow us to do the same thing.

Chairman Pollert: When we look at the Governor's proposed budget, and I take a look at the increases with hospitals, physicians, etc, the increase in funding is probably 15-20% compared to the last biennium. Then we go to dentists and chiropractors and ambulances, and the increase in funding is probably about a 60-80% increase from the last biennium. I'll say to you as I said to Kimber and everybody else, we are trying to figure out what is a fair balance of what we are going to be doing. When I look at and see that yours was based on Medicare rates, yet the increases were so huge compared to the last biennium percentage wise. I'm just trying to get a correlation but I'm not doing well.

Mark Weber: That is because we have done with so little for so long. When you look at what the charges have been, the actual charges are kind of skewed because a lot of ambulance services are volunteer in ND. About 80% of them are. Only recently over the last few years have they started to increase their billings rates. There is at least one ambulance service in ND that still does not bill. When you look at all the Medicaid patients and you look at what was billed the numbers are skewed because some main bill services aren't billing properly. The other thing that you have to take into consideration is that 80% are volunteer. We are actually mandated to respond. We don't have a choice. Some of the other groups have a choice whether or not they accept the patients. We don't have a choice. We have to go, we have to take them to the hospital. Throughout the country the average cost of an ambulance run is

$450. In North Dakota it is a little more than that. When you look at the most rural areas in ND where I come from it costs over $650 to do a call. We have all the expense and very few runs. When we are looking at this kind of money and looking at all of the problems that EMS has, this money will help. Even if you funded what the Governor recommended, it will help EMS. It's not going to solve our problems but it will help especially the rural areas.

Tim Cox : Testimony handout (Attachment C)

Representative Metcalf: To what degree do you expect to increase the number of people that you care for and expand this out to other communities in the state of ND?

Tim Cox: Enrollment is not a quick process. We don't have extensive numbers. We won't have the thousands of participants that Denver and so have. We anticipate being around 50 at the end of this year. If the program works we would expand out. We are developing a model that is unique. We are in Dickinson to use that model.

Representative Metcalf: If the program works what would make it so it wouldn't work.

Tim Cox: What would not make it work would be the numbers not increasing sufficiently so that we can have a critical mass of funding to carry the program forward. Based on our projections there are numbers that will make it work. We budget at the feasibility analysis which indicates that it would. We don't think that will happen but if people decide not to enroll, that would be the reason we could not carry forward.

Representative Kreidt: In your points you eluded to that Medicare and Medicaid clientele, that you would take private pay?

Tim Cox: Yes we do take private pay. We have just done some analysis across the country to find out how many individuals that have been totally private pay in this program. They were able to come up with two. One in Hawaii and one in San Francisco so it is a rare occurrence that someone can afford to pay the entire amount of a PACE program. The care is intensively

managed and the costs are fairly significant. The savings comes because we are able to keep them out of the long term care facility where the rates would be more per day than what it is costing to have them independent at home.

Representative Kreidt: Do you at some point possibly see a long term care type of insurance coming into play as a continuum care for this entity?

Tim Cox: Yes there is some indication that long term care insurance is looking at this type of service. In some states they have paid for it. It is a new entity but most aren't as familiar with it as they are with other programs. I'm sure as more and more programs develop throughout the country that it will become a funding source.

Representative Kreidt: In regards to Representative Metcalf, the number of clientele that you anticipate at some point, in ND the different levels of cares were all competing for staff. Your entity will be drawing out the staff to go to work with you.

Tim Cox: That is a question that we have looked at and in establishing that we have decided it was expensive and that is one of the major components in cost of the program is your payroll. We have tried to cooperate with the members of our organization so we are sharing positions and staffing with them. Because of the way the PACE side is designed, it allows some flexibility in the way that you utilize people in a part time basis. It's not going to have that significant of an impact because of the flexibility that we have. We aren't needing staff 24 hours a day. We are open 8-5 Monday through Friday. That is the period of time. We have some flexibility with staffing then maybe other groups don't have because they have to staff on a 24 hour basis.

Carole Watrel: Testimony handout (Attachment D)

Barbara Murry: Testimony handout (Attachment E)

Sandy Marshall: Testimony handout (Attachment F)

Jon Larson: Testimony handout (Attachment G)

Cindy Vollmer: Testimony Handout (Attachment H)

Dan Howell: Testimony Handout (Attachment I)

Tom Newberger: Testimony Handout (Attachment J)

Charlie Dunseth: *To paraphrase my testimony I wanted to say that quite simply this is the problem. When I started at the center in 1978 we had about 138 people coming to the center. They were all from Grand Forks. We served those people very well. There was about another 150 people that came from Grafton and San Haven that came from Grand Forks. That put pressure on our ability to provide services and on our budget. What did not happen with the institutionalization was any of that money following down to the center or the activity center, both established programs within the respective cities. There was no help to defray the costs of serving additional influx of people. With the tight state budgets over several years and the Governor's request to continually cut back, I'm sure nobody wanted to add another $1 million into the state budget for DD centers so it might have been out of the question. The problem persisted to the point where you heard Tom say that Lutheran Social Services had to give up the program. They could no longer afford to do it. Red River had some extra money that they would be willing to put towards the program. Even after they picked it up they are still owing about $30,000 a year. The bottom line is this. We work hard providing these programs. They are award winning, quality, community based activity programs integrated and meaningful for the people who come there. I'm also sure that we are going to be seeing a small influx of people from Grafton with the continued pressure to deinstitutionalize. All I'm asking for is a little help. The help we are asking for is pretty minimal. If we were to get $50,000 the first thing we would do is not go out and give raises to people. We would go get people to work with people. That is what it means to us. The numbers you have before you speak to about 800 people with*

disabilities that are served between our two agencies. We aren't affiliated with each other besides the fact that we both provide the same kinds of programs. Our requests for the $200,000 for the biennium. To explain the information that you have in front of you, the sheet that has the agency logos contains current numbers of individuals and attendance figures for both agencies. People who have disabilities. The sheet that has the letter from the Governor the numbers that are on there are the full picture showing how many people are served over all. What we are talking about today is the people of ND that are served by us. The one thing I wanted to say before we close is I would like to add that the cooperative effort of the disability division has been positive and unprecedented in the working relation with the providers. I think they should really be commended with their working relationship. I think it's a breath of fresh air and I think it is a pat on the back for all their efforts.

Danetta Agnes: Northern Lights South Advocacy, Devils Lake: *This is Steven. He is also a member. We are here in support of the budget that was proposed. We are looking for increases for services that receive Developmental Disability services. We have many friends that have been living on their own in their own apartments. Because of budget cuts there hasn't been an increase in the amount of money given to these services. They are no longer able to live on their own. They have to go in with a roommate that they haven't met. They don't really know them well or they have to go in to a group home because there is just no funding to stay living in their own apartments. They very much want to be able to live in their own homes, close to their families, and friends, and with a person that they really want to live with instead of a person that they have to live with. We are also looking for an increase for our direct support staff. These staff are more than just workers to us. They are our friends, they help us learn to live on our own, to take care of ourselves, they help us to maintain their independence so that they can live on their own, and they become more than just staff. They become friends*

and family. When they have to leave because they can't maintain their home budget they go to places that pay more with less responsibility. We lose them. It's very painful to lose them. We just want to support this budget proposal. If you have questions I will be able to answer them.

Representative Wieland: I just wanted to get a repeat of the name and organization again.

Danetta Agnes: I am Danetta Agnes and I am the advisor for the Northern Lights Self Advocacy Group in Devils Lake.

Dianne Sheppard: Testimony handout (Attachment K)

Representative Nelson: You mentioned that you are happy with the executive budget, and the department's budget. At the end of the budget cycle they projected a $62 million surplus. With that having been said, where do we find the kind of money that you are asking for DD services and expansion with some of those programs with that carry over?

Dianne Sheppard: Every state that has gone through this process of closing their state run institutions have needed bridge funding for a period of up to two years. We are fully funding our state institutions while we are downsizing and closing. It is upon closure that our state is going to realize savings. In the report closing the State Developmental Center, you will see a financial outline, a structure, to get that job done. It is painful to get that done for those first initial two years. You do need bridge funding. You are going to still have people living at the center while you are going to have people exiting and setting up a residence in the community. It's long term cost savings and is also a quality of life issue. At closing the Developmental Center report does a nice job of outlining what is going to be needed as far as resources.

Shannon Grave: Testimony handout (Attachment L)

Kris Langlie: Testimony handout (Attachment M)

Betty Heuchert: Testimony Handout (Attachment N)

Kimberly Ternes: Testimony Handout (Attachment O) (Attachment P)

Mike Ahmann: Testimony Handout (Attachment Q)

Amanda Chase: Testimony Handout (Attachment R)

Chairman Pollert: What does your husband do if I can ask?

Amanda Chase: He works for the Lennox dealership.

Representative Kreidt: You went back to college, what career did you pursue?

Amanda Chase: Pharmacy Technician

Allan Metzger: Testimony Handout (Attachment S)

Chairman Pollert: Can people from long term care come in starting at 8:00 tomorrow morning? Does anyone else here have to give testimony today? If not, we are going to come in at 8:00 tomorrow morning. With that, we are adjourned until tomorrow morning at 8:00.

Chairman Pollert: Called meeting to order and took roll.

Kurt Stoner: Testimony Handout (Attachment A) 3:00-6:30

Representative Kreidt: Do you do any contract nursing at Williston at your facility?

Kurt Stoner: Yes we have had to use agency nursing for CNA's and nursing staff.

Representative Kreidt: Could you enlighten us for what you paid for hour for a CNA and RN when you contract?

Kurt Stoner. It varies by agency but its well into the 20's. We also pay for their travel time. There aren't very many agency nurses or CNA's close to Williston. We are paying for travel time. We are blessed in Williston to have a nursing program so that helps our community.

Chairman Pollert: We as a section have to decide what we are going to do and where we are going to go. We have to decide if we do the 7&7 and the $2 increase. Then we might have to make a decision. If we have to look at something else are we better with the 7&7 or the $2, or is there a combination. What are your thoughts? Are the wages and salaries more important than the inflator?

Kurt Stoner: Saying one size shoe fits all providers would be inaccurate. We did adjust salaries but I don't think a lot of facilities have that option. We did a very large renovation

project about six years ago. We do have depreciation money. Many facilities haven't been able to even do that. They don't have the depreciation money. Long term care is much more than brick and mortar. Right now I am kind of living off of my brick and mortar through funded depreciation. It's our caregivers. If we don't have quality caregivers we don't provide care. I think the salary pass through is a very important part of this. We all have expenses that we incur with this oil spike. It affected a lot of our expenses from transportation costs to paper products to everything. Those are things we have to pay for. Sometimes you pay for those and the salary adjustments you give yourself come after that. We have a membership meeting at long term care. I'm sure those topics are going to come up and we are going to discuss those. It's something we are going to try to keep in contact with all of you.

Chairman Pollert: When we call for amendments if that happens, there will be a debate in our section.

Representative Nelson: As I understand, the fiscal note has been worked on for the wage pass through. Is there an alternative like a targeted group that you would look at? We have heard through the overviews about turnover in staff. I remember that the turnover is 10-15%. That is nothing compared to what you are going through. You are in that 50% range. Is there an alternative of targeted staff that you would look at as a wage pass through?

Kurt Stoner: Although I'm the chairman of the board of directors I don't' know if I can speak for all facilities. That is probably something that we today need to talk about. When we voted on this we unanimously voted for a pass through for all staff. There are certainly staff that are paid more. RN's nurses are paid more than the front line care givers. In different communities are too. You don't have that problem in a lot of communities. I'm sure that is something we will talk about. Overall, the average they have we are right at the bottom. That is our average.

Representative Kreidt: Stating you have done contracting nurses and CNA's, do you feel that with a pass for salaries that you would become competitive enough to attract staff?

Kurt Stoner: I think in Williston you have more people going into nursing if they knew salaries were so much better.

Shelly Peterson: Testimony handout (Attachment B)

Representative Bellew: You have the 3 additional items that we are asked to look at. I'm looking at the list and I don't see any of those three under the OAR's.

Shelly Peterson: The wage and benefit pass through we have been debating this past year, and it was only in December after meeting with the Governor that we decided based on all the data we were looking at that we needed a wage pass through. The department's acceptance of OAR's and items for their budget is during the summer time. We were not in a position nor did we have sufficient data to request it at that time so it did not come in as an OAR simply because they began budgeting very early. We were looking at these issues and only took positions in September which missed the deadline for an OAR in June. Continued testimony.

Representative Nelson: Have you run the numbers on the turnover of LPN's and RN's in the entire industry?

Shelly Peterson: Yes we have but I can get you that information I don't have it in a chart. Continued testimony.

Chairman Pollert: Now those have fallen. Will we see costs drop?

Shelly Peterson: In your cost report it is based on your actually cost. If we don't spend the money it doesn't go in there. That's why some of the rollup you see in DHS you see the utilization is down. The last reporting period I don't believe came in as higher as they were projected to be. People are trying to conserve and operate as efficiently as possible. If that bill isn't as high then you don't get the money in that cost category. It drops the following year.

Cathy Schmidt: Testimony Handout (Attachment C)

Representative Kerzman: You say that 90% are self paid. Are there any long term care insurance providers that pick up assisted living now? Has that changed?

Cathy Schmidt: There are more and more people who are picking up long term care insurance and that is one of the reasons we support tax credit for insurance. I would say in our facility, out of 64 units, 10 of them are being paid with insurance.

Representative Nelson: There is a situation in my local community. We opened an assisted living component in our town. Prior to that, our long term care facility was nearly at 100%. When assisted living opened up, the population decreased in long term and there has been openings ever since. It appears to me that people are using assisted living as a stop gap to the nursing homes much like you testified to. Is there any comparison data to look at to see if that trend is true in other parts of the state? If it is, that is definitely a cost savings.

Cathy Schmidt: The national centers for assisted living is currently doing a survey on that. We do see that. People are choosing assisted living because they are remaining independent in their own home. These are their own apartments. They can have overnight guests and be just like you and I. This is keeping people out of the nursing home. They are getting the care they needed. I don't know if we asked the questions of where the people are going to. More and more people are staying in assisted living.

Representative Kerzman: With some of the services you say are provided, inaudible.

Cathy Schmidt: The assisted living facilities in ND are a little bit different than basic care. They have full apartments and get no funding. There are no asset limits or anything. It's basically an apartment setting with services that are there. We have basic care in ND which other states call assisted living. We have a little different terminology in the state. Our basic

care in a lot of other states is ND. The main difference is we have no funding from outside sources and we do have more of an apartment like setting in basic care.

James Moench: Testimony handout (Attachment D)

David Zentner: Testimony handout (Attachment E) 00:54-4:00

Chairman Pollert: We are debating about the one stop center. I struggle with where people go for information. The only trouble is if we set another phone call to go find out about something. If we fund the one center, than should we not take away that reference from someone else so they aren't calling 4 or 5 different telephone numbers or are we setting another phone call to call to be in another layer to get a hold of somebody?

David Zentner: If it is used properly and there is enough information out there that this is the place you go, I could see that you would be able to diminish the other areas related to this process. If the center is the center for getting the information, you would think that once that knowledge is out there for getting the information that people would go there to get the most comprehensive information. The other aspect of that which many states use is the assessment process whereas you go in and have an assessment made to determine what your needs are. If those needs can be met in the community and that is hopefully where they can be provided. Information and assessment are important. That is what I would see the resource center doing that combination. Testimony continued.

Representative Kerzman: I see where you are going with this but how does it address the struggle that goes along with it for clients and employees. There are different programs that are all addressing the same personalities. It's like a balloon when you squeeze one part it has to be a deflation or inflation for another part.

David Zetner: You are right in the sense that all of these areas are under pressure. If you take the private QSP's they are their own employee. They don't get any benefits. They are paying

their own social security and paying that 15%. I think you have to look at it as a whole. You have this continuum of services out there that are needed and they need to be funded. I don't know how else you get around that aspect of it.

Representative Kerzman: Inaudible question.

David Zetner: You are certainly right. We need cooperation. The balance is important too. If we have beds that are open, naturally you are going to want to fill those beds and do it aggressively. I have experienced that in my own situation. I don't know what the final answer is. Some states have gone to the point of requiring assessment and requiring people to look at what's available before they make that final decision. ND has never decided to go that route. That forces the issue that at least people are looking at the final decision.

Amy Armstrong: Testimony Handout (Attachment F)

Sandy Zaleski: Testimony Handout (Attachment G)

Representative Nelson: On the back page of your testimony you talk about the fiscal impact. The OAR was submitted for $2.4 million and rejected. Can you explain the breakdown between general and federal funding? Than it looks like in the total cost in the following chart that it is $1.9 million.

Sandy Zaleski: We went back and revised the budget to include a reduction to $1.9. The breakdown from general funds to federal funds we got off the OAR from the original one.

Representative Nelson: Have you seen that much general fund and little federal fund split before?

Chairman Pollert: You see it sporadically but I can't really explain it. Basically the OAR is what Representative Nelson is asking. You have done research on this and it is basically a 90% appropriated.

Representative Metcalf: I noticed here that you said the DHS submitted the OAR which was rejected as part of the Governor's budget. Was there any reason given to why this particular activity was rejected?

Sandy Zaleski: I don't know. I wasn't given that information.

Nels Nelson: *Welcome Gentleman and Ladies. My granddaughter was supposed to come live with me at my house but we have nine kids so my wife said no. We started talking to different people and talked to the facilitator for the Village. She said there as a new program and we went through that. I had my daughter and the grandchild live with me at my house. She was registered as a 12 year old. What the Village did was open up the doors and helped with the HIPA laws so we could get all the information together. They opened up the doors for all the family members to come to her side. They arranged for the two sides to get together and facilitate a plan to make this child's life better. It worked marvelously. It fell into place. We learned all this information and got counseling. There was sponsorship, mentorship, working with Social Services, working with all the other agencies was simple. The power we had to get through this as a family was unbelievable. I just see that it saved a lot of time and money. How it ended up today was that my daughter is living in Jamestown with her granddaughter. She has full custody. She was registered as a 12 year old so they couldn't let her keep her child. One of the things that came up in family group was why we didn't treat her like an adult. That hadn't been an option because once you are registered you stay in the system that way. She is probably more adult than most people I know today. That is because of what family group did. They saw the issues. They talk about strengths, concerns, and issues. They write lists of how to deal with all this stuff. It worked marvelously. I read a lot about business and listen to tapes. That is how big business and good church foundations are run. This program to me just came*

across my heart. I will do whatever I can to help. I work with a lot of people and I've never seen anything that works so smooth and helps families.

Sarah Highum : Testimony handout (Attachment H)

Linda Johnson: *I am a peer support worker for Western Sunrise in Williston, ND. I believe in peer support program because it is a program that encourages recovery for people with mental illness. I have a match that has gone from sitting in his apartment day and night to playing piano for the church a couple times a week. I have another match that has gone from just existing to putting on her snow boots and jacket by herself. These two matches have stayed out of the hospital for a very long time due in part to the peer support services they receive. My newest match has stayed out of the crisis bed for one weekend out of three. I believe this is also due to the peer support program. I am always there for my matches when they need me and they are always there for me too. That is what this program is all about. Friends helping friends recover. Thank you.*

Representative Kerzman: How many matches do you have and how often do you meet with them?

Linda Johnson: Three, I meet with one of them every other week. The other I meet with once a week for approximately two hours. The first one for approximately two hours and then the newest one I meet with for about 1.5 hours one day and she is kind of needy so I meet another 1.5 hours another day during the week. That is the one that has stayed out of the crisis bed.

Steve McWilliams: Testimony Handout (Attachment I)

Amber Hammer: Testimony Handout (Attachment J)

Todd Christlieb: testimony Handout (Attachment K)

Susan Rae Helgeland: Testimony Handout (Attachment L, L1)

Representative Kerzman: Are the individuals that are involved in this compensated for the work they do with their peers?

Susan Helgeland: I can't speak to the issue of people that are involved. I don't know the salary levels and where the funding is coming from. I know it started with Olmstead commission funding several years ago. The plan for the initiative is that Medicaid will eventually fund from across the state, peer support services. We have existing programs now that funding may or may not be sustainable. Their outcomes are so good like 50% hospitalization . We would like it to go to the entire state from every region to benefit. We also feel that the Medicaid reimbursement plan, which other states have done, but I believe it is going to require a waiver from the DHS. Once we get that in place we would be able to split the federal and general fund costs. We would have consumer services that would be offered, employment opportunities that they have never had before. They would be able to enhance existing case management services and other services that are already in place.

Representative Kerzman: It looks like your outcomes are really good. I'm not disputing that point but just trying to understand what it involves.

Susan Helgeland: I suppose you could say that. I don't know how our consumers would do that. It's a little different but I understand where you are coming from in terms of someone who has experience of that. The point is that our consumers at mental health services who are in recovery already have been there and done that and they can talk to people who are perhaps more fragile and having a more difficult time in transition. I'm thinking particularly in Fargo about the new shelter we have there. We are looking to transition people into apartment living for the first time. With a peer support specialist someone could go visit them and take them. These folks are not used to living independently. We don't have existing human service center staff that are already stretched to the max with their case management services. They don't

have time to do as much as the peer support specialists could do. They could visit and see if they need groceries, see if they want to go get a cup of coffee. I think in the testimony that was given, it illustrated how these kinds of things can get people over the really tough spot of that first coming out of the state hospital or first coming out of being homeless for many years. I think you have heard personal testimony to that. The folks that spoke before me can much better speak to that than I can. I have seen it work. I know peer to peer is a very good program.

Carlotta McClearly: Testimony handout (Attachment M)

Andi Johnson: Testimony handout (Attachment N)

Chairman Pollert: Are they voluntary admissions?

Andi Johnson: A large part of them are voluntary but we are seeing an increase of legal admissions as well, where probation is contacting us and saying that they have the ability to enter that person into treatment to defer incarceration and ask if we are interested in receiving this person. You are receiving voluntaries but you are receiving people that are involved in the legal system but because they do not have minimum mandatory's connected with their sentence we are able to provide treatment.

Chairman Pollert: I am trying to get an apples to apples contrast. Robinson Recovery Center, you don't' deny anybody unless they have a legal problem?

Andi Johnson: The reason for the denial on page 3, denied admissions, these are the reasons. We offer treatment but they refuse to take it. Keep in mind that the Robinson Recovery Center is the highest level of care for addiction treatments that is known. There are other levels of care but if they do not meet the criteria for the highest level of care they cannot come through the doors of Robinson recovery.

Representative Nelson: Can you give me an example of unresolved legal matters.

Andi Johnson: They might include a class A felony in addition to a class C felony, where you have the combination where the person can either service concurrently or consecutively. If a person is scheduled to go before a court and to be sentenced, it is very difficult to involve them in treatment if they will be sentenced on a minimum mandatory which means we could start them in treatment but one month later they will get moved to a penal system. There is no such thing as in lewd of incarceration. Continued testimony

Representative Metcalf: You inferred that people who entered Sisters Path came from the Robinson Recovery Center, is that the way they have to go?

Andi Johnson: They can go many different ways. One of the things is when we see a CPS involvement with a woman we automatically refer to Sisters Path. They may or may not meet their criteria for homelessness. If they do not meet their criteria for homelessness, our tendency is to keep them a little longer so we can enable an intervention and help them get their children. Many times these women will stay longer in the residential program for Meth and then we will try to get housing secured for them.

Representative Metcalf: How many of them go directly from the Robinson Recovery Center to Sister Path?

Andi Johnson: Sisters Path is predominately a female program. We are eliminating half of the gender. If you were to just look at women I would have to say as a guess, roughly 30-40% of the women. Continued testimony.

Chairman Pollert: So you can't give me a success ratio a year or two after graduation?

Andi Johnson: For those people who have not only successfully completed but not successfully completed we have close to a 65% success rate.

Chairman Pollert: How long has Robinson's been in place?

Andi Johnson: January of 1906.

Chairman Pollert : So what was that percentage again?

Andi Johnson: Close to 65%.

Chairman Pollert: After how long?

Andi Johnson: This is a comprehensive overview from the day that we opened so three years. Thank you for allowing me to testify.

Tom Alexander: Testimony Handout (Attachment O)

Representative Nelson: Tell me where North Central got the funding to institute their $65,000 program.

Tom Alexander: They received their funding through the Human Service centers budget. The first project that was established was in 2003. Some seed money from the Governor's Olmstead group put some money in the human service center developed a peer support project that had extreme success. The center director has established some funds allocated to peer support specialist services.

Representative Nelson: That having been said, is it possibly that the other regions could find that same amount within their budgets?

Tom Alexander: I can't speak for what the human service centers directors would say. In my opinion the grant that was funded is a well written plan that has been approved which can be implemented. It just needs the funding in order to do that.

Bruce Murry: Testimony handout (Attachment P) 33:30-39:46

Susanne Hanson: Testimony Handout (Attachment Q) (packet) 40:00-42:44

Crystal Farmer: Testimony Handout (Attachment Q1)

James Baumgarter: Testimony Handout (Attachment Q2)

Valerie Koivunen : Testimony Handout (Attachment Q3)

Taylor Petermann: Testimony Handout (Attachment Q4)

Katie Storm: Testimony Handout (Attachment Q5)

Paula Storm: Testimony Handout (Attachment Q6)

Gail Eckstead: Testimony Handout (Attachment Q7)

Lynn Fundingsland: Testimony handout (Attachment R) 8:00-14:30

Chairman Pollert: If we decide to fund the staffing, I would just want to make sure that everything is good and the money is in place. The only reason I'm asking the question is we acted way to quickly on the Veteran's home and now we have a mess. I would like to avoid that as much as possible. That is what I'm trying to do is make sure all the funding for the Cooperhouse is all in place and is in writing and not a verbal agreement.

Lynn Fundingsland: All the funds are committed. A lot of them are already spent to require the land and demo the project. Frankly, we had intended to put this project in the ground last fall. As I stated a big piece of our financing is private dollars that are coming through the low income housing tax credit program. Late in the fall, due to the economy collapsing around our ears, our prior investor was a bank. In the fall they retracted from the project. We postponed it until May. If you are familiar with the low income tax credit program, the dollars for that program are syndicated by a syndicator and they will collect money for insurance companies and banks and whoever might want to invest. We have a written commitment from a syndicator. Our syndicator tells us he has a first tier investor that needs to have ND investment which tells us it's a bank that meets credits in ND. I can't tell you that this is 100% because there is always a chance in our current economic environment that the particular bank that has committed to invest at the last minute could find themselves in the position where they can't use tax credits. Last year ½ of the low income tax credits awarded nationally didn't get funded. That is the first year for that program ever. It's a tense time we are in. We have been assured repeatedly by our investor that they are in. They have spent a lot of money underwriting on

their side. It's an issue that is out of our control. Everything that we know at this time is we have a firm project. The public dollars are firm and the private dollars are committed. It's not an irrevocable commitment.

Michael Carbone: Testimony Handout (Attachment S)

Janell Regimbal: Testimony Handout (Attachment T)

Representative Wieland: Did you receive funding from the state in the last biennium?

Janell Regimbal: Yes in the last biennium we received $300,000 for our Grand Forks and Nelson County Projects which have been included in the department's budget for this upcoming biennium.

Representative Wieland: I noticed that there was an OAR for an expanded Healthy Families which was $385,000. Is your request a part of that?

Janell Regimbal: Explain the discrepancy between that request. We had been on the OAR list for our Burleigh Morton country project. Also, we had a federal grant which is a competitive grant process that we had written to expand this project into Ward and Mountrail counties. We were not successful in receiving that federal grant therefore we revised our request down to the $200,000. Unfortunately, on the OAR list we did not make it through the Governor's office so we aren't currently in the budget. That is why we are here today.

Representative Wieland: To use these services, there are no means or requirement on the part of the recipient.

Janell Regimbal: Correct it is all voluntary and at no fee to the families.

Representative Wieland: To any family?

Janell Regimbal: Correct.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012 –Public Testimony

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/27/09

Recorder Job Number: 7941

Committee Clerk Signature

Minutes:

Chairman Pollert: Called meeting back to order.

Jonathan Holth: Testimony handout (Attachment A)

Lisa Vig: Testimony Handout (Attachment B)

Representative Kerzman: Are you able to use the same counselors to say as they do at the alcohol place?

Lisa Vig: My initial training as an addiction counselor provided a marvelous foundation for my work with compulsive gamblers. I didn't learn anything about gambling addiction in college nor in my training/internship practicum. There are some very unique differences and some specialties about working with gamblers that make it different from working with alcoholism. The state has made a recommendation in following with national standards that people who want to work with gamblers have 60 hours of gambling specific training.

Representative Kerzman: I've been reading where a number of states facing financial difficulty have been talking about expanding their state programs. How do you address taking care of people who are addicted?

Lisa Vig: Jonathan experienced two opportunities for treatment. He had inpatient treatment program for his alcohol and an outpatient program for his gambling. Initially he came to us for

gambling help because of some legal difficulties and because his gambling was the thing that was getting the attention. He was brought into our program but he made very little progress until we told him to go get help for his drinking. Once the drinking was addressed he came back and was able to complete his gambling addiction treatment and has been a marvelous role model and mentor and peer supporter for people in the group.

Representative Kerzman: Inaudible Question.

Lisa Vig: There is a variety of ways and means that other states are using to fund treatment. Many of them do just like we are doing. They go and lobby the state and say that the state is benefitting to such a degree from the profits of gambling that a certain dollar amount or percentage needs to be set aside to deal with treatment. There are some states that are beginning to see insurance companies provide some coverage for gambling addiction treatment. Those are efforts that are being put forth. Most of the states have a state funded treatment program for gambling and awareness. I think if we, in comparison, look at what we as a state spend on advertising for the lottery and what is spent on providing help for people, there is a great difference. If we are in the business of promoting and encouraging gambling for the benefit of the state and for recreation and entertainment we certainly need to be having the forefront of our mind as a concern for people who are damaged from gambling. Not everybody gambles in a reckless, pathological destructive way. Those who do should be a priority for us. Our state is benefitting greatly from their destructive behavior.

Chairman Pollert: Is the $300,000 that is being proposed in the Governor's budget, is that going to be spent similar to how the $400,000 is now or do you have any idea?

Lisa Vig: The problem gambling advisory group that I am a part of have been brought together to make some initial discussions or bring forth some initial recommendations about how we would spend some of that money. Initially we would put a lot more into public awareness and

advertising and awareness building so that people are getting involved in treatment and prevention programming. I think the total now would be $700,000 for the biennium and we would look at a much heavier load of the first year of the biennium being placed on awareness and educational opportunities statewide.

Frank Redeye: *I'm from Fargo and I am a compulsive gambler. I want to use myself as an example of treatment that works. I just completed my 19th year of not gambling on November 12th of 2008. I can tell you for a factual part of this thing that it works. It will work and continues to work because the challenge never stops. When a person is consumed with gambling in their background it stays with them on a lifelong basis. I made my mind up along with my family to give myself enough time to be with their program to represent a part of my life. It is just like going to the grocery store. If we have 4-5 meetings a week in Fargo, I try to be at least 2 meetings a week. They do an inspiring thing for me. To listen to peoples success stories and unfortunately their failures. A normal success story would be someone who has come into the program completely down and out. Their financial status is completely in ruins. Their family is about ready to leave them. Their work is up in the air. To see that person have the ability, with listening and working, to turn their life around to the point where they become citizens that care about themselves first. In this program that we have, if you don't have a love for yourself it can never happen. There can be no success. You have to care about yourself. Then you have a pecking order of the people that care about you including your state. What I mean by that is most of the people that I work with over the years; I work because I've been there 19 years. My job is being an example of what can happen if you work hard enough and listen to enough people to be free of gambling. This person that comes in stays their long enough and watch them. You see a personality change. You are so personally excited about the way that person looks at themselves. There is a whole change of who is doing the gambling and where they*

are doing it. To be able to see these people that have a caring effect, they bring their wives and family to a Thursday night meeting which has become like a community meeting of family and learn everything about the whole picture. The requirement is that you have to come to meetings. The other thing for me is that gambling is all over, including our fine state. The state of ND chose to be in the charitable gambling business. The gambler didn't choose it. Consequently these dangers that are out there from all the gambling sites that we have like horse racing, we have to do everything we can to make them understand that each and every one of those things are not the way they are going to recover long term. There is no two way streak. You can't have it both ways. You either have to believe in yourself or you have a situation that is talked about. The other part that I wanted to visit with you about is self destruction. I have seen everything in my time in Fargo from suicide all the way though the worst financial things that have ever happened to anybody. I have tried to be as big a part of that as I possibly can because I listen to what they had to say. Those things do in fact go on. When a compulsive gambler doesn't realize that he can find help and he starts re-gambling again, we have a task on our hands. They call it how do you hurt your wife either verbally or physically, how do you steal. I'm convinced that if we charted embezzlements in the state of ND, we would have more of those to do with gambling than they would with anything else. We don't chart it that way but I do know several instances myself where that has been going on. All the things you have on the one side of this problem and the other; at least we are able to still come back to their program. This is a welcome hand. If someone relapses we welcome them back. If somebody is having trouble we try to do anything we possibly can to have an opportunity. I will be willing to answer any questions.

Representative Kerzman: I know some alcoholics that won't even take a taste of wine. Do you ever buy a church raffle ticket or anything?

Frank Redeye: Never.

Chairman Pollert: Do you currently have a waiting list for people with addiction gambling?

Lisa Vig: We don't have a waiting list. We do whatever we can to get a person involved as quickly as possible because we know when we establish a waiting list for services, they usually find a bailout and they don't have a problem anymore and we lose them. It is very imperative that when an individual calls for help that we make an appointment with them that day or the following day. If we don't have room in the group we work with them individually. We don't want anyone to have to wait.

Chairman Pollert: Are you talking outreach on the $300,000? I'm trying to figure out if the need is out there. I understand that Alan was in here two years ago asking for the $300,000. I'm asking a similar question. I know the services are out there but is there a demand for these services?

Lisa Vig: That is why we want to front end the advertising like the public awareness and marketing opportunities. We want to teach the general public that help is available. We have a manageable demand right now for services. However, with the instances and prevalence study that shows 12,000 compulsive gamblers living here, we aren't accessing this to the level that we believe they need to be. We'd like the opportunity to try to educate them about the addiction and that there is help.

Jon Mielke: Handout Testimony (Attachment C)

Carrol Burchinal: *I apologize for not having written testimony. I was driving by the capitol and had miscommunications about the hearing. I stopped in to see when it was going to be conducted and found out it was now. I will send you a written testimony. My wife Arlene and I*

have been foster parents 35 years. During that time we have cared for about 260 children and youth. It has been a great experience for us and we have enjoyed it. We are still doing it and it is making a difference in our lives. We have been in Burleigh/Morton County for most of those placements as well as Standing Rock. Most of our placements have been preschool although we have had elementary and a few adolescents. Jon mentioned some that are medical fragile. One that came to my mind who had a broken arm and severe head injuries the first time we received him. Then he went back to his parents and a few months later. Six months after that we saw him back with a broken arm and two broken legs. We had him quite some time. He was eventually adopted. The other night I had a chance to visit with him when he called me from Minnesota. He said he is doing very, very well. He still is handicapped of course. He is living with his adoptive parents. We do have calls from them. We seem to have more calls from the earlier ones we had. They want to know about their early life. Those are the things that foster parents work with. Not only the caring we give them, but the emotional part of it all that keeps coming back to you. It is a reward when they do come back and say thanks for what we did for them. I might say that I am pleased to see this increase. There was a national report a few years ago that was related to the maintenance payments that we receive. It showed that we were at the bottom of the region and the lower part nationally. We started working on that and talking about that. We are pleased to see that the report and the recommendation that we receive some kind of an increase in the payment has been recognized and is included in HB 1012. For many reasons we have received no increase. What we received was 6 cents an hour. When I started doing the study I realized that there was more to this than the daily, monthly support. You must remember that 56 cents an hour is with two people. It is something to keep in mind. I would be able to answer any questions you have.

Leanne Johnson: Handout Testimony (Attachment D) 36:45- 45:10

Representative Nelson: The additional $200,000 you are asking for is for a coordinator position? That would be a program position that wouldn't go to the parents and foster parents?

Leanne Johnson: That is the basis for the request. Right now we do not have a post adoption coordinator for ND. The pilot project that we have offered is that the adoption worker would follow a family for three years. What is happening is the case load is just getting to high to manage. Meeting the needs of the front and back ends have gotten too great. What we are exploring is that a post adoption coordinator could then be a contact for families as well as providing the flexible funding and support for RESPIT care and other supports. At this point we are looking at a post adoption coordinator and the supports for that.

Representative Nelson: That $200,000 completes that and the entire amount would be used for that person and the position?

Leanne Johnson: That is my understanding yes. To be clear that the department on the pay point with the upcoming RFT that is issued, they would be asking that anybody's responding to it, to address how they would provide post adoption services.

Nathan Aalgaard: Testimony Handout (Attachment E)

Representative Ekstrom: You and I have had multiple conversations over the years. I think one of the things that would be good for the committee to know is that for the folks that are not accessing your services, are they going to more restrictive environments. Are they winding up so to speak institutionalized because they are not getting the kinds of services they need in the community?

Nathan Aalgaard: I think it happens. One thing I'll talk about is ramps. Sometimes having a ramp on your home when you are in the hospital will make a difference between going back to that home or to a nursing facility. It is a pretty simple deal but a major thing when you can't walk or are in a wheelchair. What we have done is got some funding that we have used to buy

some portable, temporary ramps. We can bring them over to the house and have them for a month or two. While we help that person work on funding for a permanent ramp. Something like that can make a big difference. That is just one example.

John Johnson: Testimony Handout (Attachment F)

Tonia Johnson: Testimony Handout (Attachment G)

David Shove: Testimony Handout (Attachment H)

Ron Sandness: *I just recently retired 8 months ago as a state employee. I worked for the rehabilitation consulting services in Fargo at Southeast Community Services. I am retired. My wife wanted me to go do something. I chose very carefully and became a board member of freedom result center which is a natural to my former employment because freedom result center and now independent living centers have a realistic view of human beings who are disabled. I can further my expertise in this area through freedom and other independent living services. As I have had cerebral palsy all of my life. I am thankful for the opportunity of being able to continue the activities I learned as a rehab consulting services staff person. Thank you and are there any questions?*

Charmaine Yvette Boehler: Testimony Handout (Attachment I)

Michelle Barth: Testimony Handout (Attachment J)

Tammy Theurer: Testimony Handout (Attachment K)

Jo Burdick: Testimony Handout (Attachment L)

Representative Ekstrom: We have been hearing a lot of testimony about radio towers and obviously telephone towers. Are there simply areas in the state that we cannot use telemonitor?

Jo Burdick: No. As of now the technology that we are currently utilizing, there is a number of them out there. I could talk for a long time about the technology. The service that we utilize is

through the telephone line. It is also now expanding because so many people are dropping their land lines. We are going to admit 3 patients last week. Because we haven't updated our technology we haven't updated to the new web based technology. We were not able to put that monitoring on those patients. It will go both ways. We will be able to use different types of technology that way. This is basically through a land line phone.

Representative Kerzman: Inaudible question.

Jo Burdick: We actually don't. Through the state we currently are asking for by the visit. That is on the skilled side. These patients are on our skilled program. It would be by the visit. As Tami was explaining our skilled program has registered nurses, therapists, and more professional care. Our personal side care of the business we do bill by the 15 minute increments for state services.

Representative Nelson: Tell me exactly what telemontoring is. Do you monitor vital signs or how detailed can you get with diagnosis?

Jo Burdick: I'm very excited about the program. I absolutely love this program. What it allows us to do is on a daily basis. On a daily basis we can get blood pressure, pulse, respiration, blood glucose. We can get protein monitoring with INR ratios if we choose to do that, and also weight. The most common diagnosis is congestive heart failure and cardiac problems. We set our parameters on our central station. Each patient's vitals come in. It's not an emergency response system. The vitals come in. They can take them more than once a day. They appear on a screen which is hard to see right now. It tells us who is outside those parameters, who is in the middle, and who is green and doing fine. To give you an example, we just put a patient on last week 39 miles out of Lisbon. If you look at some of the areas that aren't being served, not a problem for us to go out, put that unit on, and not having to go back for a week. Before we would have to go every day. It really is a time and cost saver. Most of the patients when we

discharge them and take the unit out really appreciate it. They get involved in their care and it is a great tool to enhance what we do.

Representative Nelson: I would agree that it is very exciting to see this because there is so many underserved areas in the state which begs the question. Does the monitoring go to Meritcare itself, to a clinic setting? Where are the units placed that you have now?

Jo Burdick: The 30 units that we are using right now go out to the patients homes. What happens is it feeds back to a central station which is a computer in our office. What we do is each day we have a telehealth monitoring team. Each day someone is assigned to monitor those vital signs. They come in, look at them, depending on where that falls they will talk to that patient's case manager or immediately call the patient themselves. It makes you feel like you are there. It is an interesting kind of situation.

Representative Wieland: Can you tell me what a skilled nursing visit, what the rate is? How many visits would you anticipate?

Jo Burdick: What our rate is, is $102. Our actual cost is $126. We continue to bill our $102. We don't get reimbursed at that amount but we continue to do that. One of the things that we would want to work with is many states that provide home telemonitoring have a variety of ways that this might be reimbursed by the department. I'm actually going to be visiting with the executive director of the Minnesota Association this week to discuss their new legislation. They have current legislation and we are going to talk about comparisons. We have looked at other states. It could be that if you were going to monitor that patient every day you would not to bill the patient every day. That is going above and beyond what we would normally do. It might be that write in the legislation that it is so much for this certification period or something of that nature. I think there is a lot of details to be looked at so that it is fair to both the department and us.

Representative Wieland: How many QSP's are there now and what is the average number of hours that a QSP works?

Tami Theurer: I can only speak for the home health agencies that provide QSP services. There are many independent providers as well as proprietary agencies that also provide those services. For example, my agency at St. Alexius, we have certified nursing assistants. We would provide services to those patients who have chosen our agency as our QSP provider. I don't have the number of what the total number of QSP providers is. In our association about 17 of our members are QSP providers.

Representative Kerzman: Inaudible question.

Jo Burdick: I think that most of the time, unless it is a real outlier case our costs are less than institutionalizing or having a patient have to go to long term care. It is a rare circumstance aside from that. We have a lot of special needs kids. Those cases begin to reach that maximum of $10,500. We have over 800 patients on service. We have nobody that would come close to the cost of long term care. This service actually reduces the cost to the department. As I was saying, if we can put somebody on a monitor and keep them on the monitor forever, it will improve their outcomes. It will reduce the cost.

Representative Kerzman: Inaudible question.

Jo Burdick: Yes depending on what the patient has. We don't come anywhere close for any of our patients except our special needs kids to even $5,000 a month.

Representative Metcalf: I believe this question would probably go to Tami. I see that Valley City has two services. City County and Health and Home Care and Mercy Home Care services. It kind of runs a little bit difficult in our area because they give somewhat of the similar services. One may be a bit different as far as extension and full services. There is a

definite difference in the amount of money that they are paid. It's been bothering me for a long time and I'm trying to get a handle on this.

Jo Burdick: I'm not sure which one is getting paid more right now.

Representative Metcalf: Mercy

Jo Burdick: I started that agency. It's a hospital based agency. At that time it was City County Health. They have a certified home care agency. Twenty years ago when I left Valley City I met with the county commissioners. One of the things I think we have to be careful with when spending public dollars is I'm not sure why we should be paying someone to do something that private enterprise is already paying for. The county did not and was not certified to do some of those things but has taken a more active role. In the past they hired a consultant to look at who should be providing that service, should they combine their provider number, could they continue to serve together? The way that I would see that, and this is my personal opinion is that the reason the hospital has more is that they have more of the acute care patients that the physicians refer to them. The county doesn't get as many of the skilled patients because their basic rule is to provide public health services, screenings, immunizations, programs that serve the needs of the public. I think that is why you see more state and federal dollars going to the hospital than you see going to the county.

Representative Metcalf: The only thing I want to say is basically they are very compatible as doing the same services.

Jo Burdick: Yes in a very small community.

Representative Metcalf: Why are we paying one of them more than the other? This is not your decision and you may not even be able to answer that but it is something that I've got to find out.

Jo Burdick: Are you saying that the hospital is receiving more state funds than the county? Probably because they have more Medicaid patients that are skilled.

AJ Klein: *My name is AJ Klein. I'm here to speak in favor of the Aging and Disability Resource Center. My family has just experienced one of many examples why there is a great need for the type of services that this bill would provide. Our father recently suffered a stroke at his home here in Bismarck and was hospitalized. He is now a resident of a nursing home here in Bismarck and receiving excellent care. While he was hospitalized, we believed dad would be coming home again, we started doing extensive research into what his options were regarding home health care, the agencies involved, assisted living, and their qualification requirements. We were also trying to coordinate the three types of therapies he needed, medications, nutrition, and personal hygiene needs. We contacted the veteran's administration, county services, and anyone we could think of or who we were told that knew something of the information that we needed. It's a good thing we have a large family. We split up the list and did a lot of calling. We held meetings to coordinate our efforts. Many of us took leave from work to do this. Our mother has her own medical needs and physical limits so we had to be concerned with what was best for both mom and dad. Once it was determined that dad needed to be admitted to a nursing home the process started all over again. Social services as the hospital was very helpful with the information but we needed more answers. There are 11 nursing home facilities within a 60 mile radius and we did research into many of them. At one point it looked like dad would be placed out of town and that meant inquiries of a different kind. We also had concerns of dad being away from mom and his family and home and what impact that this would have on dad impacts and health. This process was overwhelming and stressful for the entire family. If there had been one source of information to go to , one contact person to speak with and build a trust with, it would have enabled us to make the best decision*

possible minus all the anguish. That is what this bill would provide. Myself and many others ask you to give this bill a favorable consideration that it deserves.

Chairman Pollert: We have had a lot of discussion so far and we aren't done yet either.

Representative Nelson: We have sat through a lot of discussion today. The same issue comes up not only in aging services but the center of independent living people. Because there is no grant money now for the ADRC, we would have some flexibility in this program. Could you envision incorporating more than just aging services to include some of the disability situations that we have talked about today. I that worth exploring and bringing into this whole one stop shop concept?

AJ Klein: I thank you for your consideration of my opinion on this. Speaking for the public and the many experiences I have heard of from my family and friends since this has happened, I would say yes it could be incorporated. There are many agencies involved in this. I don't know if I'm the best person to answer this. I think I should defer to someone who is.

Representative Nelson: I'm just curious. There is always turf. If we are going to go down this route it would seem to me that there is room. It covers more than just one event.

AJ Klein: This would take care of those questions and concerns. If there was one person to go to and hear it from and have the information, it would greatly enhance the decision making process.

Chairman Pollert: There was a comment made that the one stop centers should be in every community or maybe every county. I struggle with that. Why wouldn't we just invest $200,000 and have a media blitz and an 800 number to call aging services. They will be this one stop center for the whole state .

AJ Klein: I don't know that it would reach all of the people who would need this information. I think this would be best served if you are going to have the money dispersed that it is done through the services that were touched on earlier.

Chairman Pollert: At the same time it shows us the struggle between calling a one stop center or calling social services in the same county.

AJ Klein: I don't think social services could answer all those questions. They couldn't for us. They were helpful but they weren't able to give us all of the information they needed. It has to go beyond just social services or assisted living. It required a lot more. The therapies, who are the organizations, all of that. The assistance my father would need. That fell on us to find out. We couldn't go to one place. Social services couldn't tell us everything. Veteran's administration was helpful.

Representative Kerzman: Inaudible question.

AJ Klein: Speaking from our experience we had a large extended family with many members involved in various employment that could help us disseminate that as well. I can't speak for everyone else but our mother was still capable of making a determination of what was best for her father and for herself. It wasn't like we were making these decisions for them. Then it goes beyond are you capable, it goes to hopefully you have a living trust or attorney who can make that determination for that person if they aren't able to. Most families are able to make the determination once they have all of the information. Then they can make the best decision. If you have to scramble everywhere to get that information, it really sets everything back.

Representative Kerzman: Inaudible question

AJ Klein: I'm sorry I misunderstood. Now that I know it's the individual that you are concerned about having assessed, I think once the policy is drawn up by the agencies or the agency that is involved in this, that determination would be determined. I don't feel that as a public person I

have the qualifications to settle that up here. I'm coming to you with my experience but I would think that there would be some type of something in play that would determine that.

Brian Arett: Testimony Handout (Attachment M)

Representative Nelson: Just so I understand this, the request that you are making is in addition to the federal money that we are receiving in a block grant. If we would match more state dollars there wouldn't be any additional federal money that would come along with that.

Brian Arett: That is correct. The federal dollars are capped so the amount received from the federal government will not go up if the state share goes up.

Pat Hansen: Testimony Handout (Attachment N)

Edith Armey: Testimony Handout (Attachment O)

Chairman Pollert: Recessed for the day.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/29/09

Recorder Job Number: 8143

Committee Clerk Signature Morgan Pollert

Minutes:

Chairman Pollert: Opened meeting and took roll call which every member was present.

Representative Bellew: How many policy bills are we going to get?

Chairman Pollert: I'm not sure how many we are going to get. I don't know exactly what we will have to deal with. The only thing I know for sure is we have HB 1267. As far as the other bills that are re-referred we don't have to have them on a schedule. They already had the public testimony. We are here this morning because we still have detail to do on long term care. After long term care we are going to go to VR. If we don't get this done this morning we will have our hearing on HB 1267 and then we will go back and finish DHS. I also understand that there are numerous reports that we have asked for that Brenda and Maggie are going to handout.

Clerk Handed out Attachments A and B

Maggie Anderson: I will start by handing out a few things then going to explain each of those items. You should now have three handouts. The first item which is the BARS report (Attachment C) is just a summary of the prior biennium expenditures from 05-07. Our current budget for 07-09, what we have expended in year 1 of the biennium, the total changes , and then the amount to the House .This of course will include both the long term care continuum

which includes the DD grants which are within this number. This is not going to tie out to this page. It will tie out to the other pages that we have provided to you including the one that shows all of the changes by the different funding that the governor placed in the budget.

Chairman Pollert: When we get to that point I want to make sure we spend a little time on it. I don't remember the exact dollar amount but there has been a pretty sizeable increase in the dollar amount for home and community based services.

Representative Kreidt: Under the IGT funds, the $3 million, can you tell me why that was taken out of the fund and where it has been used in the department's budget or has it just been spread out in there?

Maggie Anderson: That funding is all in the nursing home area to fund the increases in that area.

Chairman Pollert: Did we ask for a draft where that is going and all that kind of good information? Are you requesting that information?

Representative Kreidt: I am.

Maggie Anderson: The next two items that you have we will actually use together. (Handouts D,E). I can walk you through the services in the long term care excluding DD. The grant summary sheet you will want to have available because that is how we will be tying the numbers out. We will walk you through how we got to the case load and the average cost that is on your grant summary sheet. With nursing homes, you will see on your grant summary sheet that they incorporate all of the items that are listed on the bottom of your page so you're in state nursing homes, etc. You can see what the monthly averages are running. This is a service that we don't use monthly averages. We don't use that when you budget because nursing home rate setting is its own rate setting mechanism. We establish rates annually from cost reports. With swing bed rates, those are always based on the previous year's average.

Those are always dictated on what the nursing home average rate was in the previous year. We are always one rate year behind swing bed and that is how the federal regulations tell us to pay swing bed. Our out of state services are what we average pay for those. Those are individuals primarily in Minnesota where we have that reciprocity with them. The limits were increased 1-1-09, based on the average number of beds and individuals. That adds $1.39 per person per day for each day of the biennium. The nursing facility rates were also increased for property related costs. That is $3.15 per day. Of course not every facility has property increases but based on the facilities that are either constructing new or remodeling that is what the average per day ends up adding out to. When you consider when you are looking at the average of $1.35 we have a new rate year that starts 1/1/09. Those increases are not in that number. The increases are 1.1.10. Those are not in that number. The rate increases for the last 6 months of the biennium starting 1/1/11. There are three rate year increases that are tied to the first bullet where we say we have to establish new rates annually based on the cost report. When you add those three rate year increases plus the limits plus the property related costs plus the inflation of 1089 per day, we are coming up with an average of 170.78 per person per day in nursing facilities for the 09-11 biennium. That is how we arrive at that number. I did skip over the bed movement bullet. You will see that currently our monthly average is running $3291. Our final budget is $3388. The reason for the increase is actually a combination of increases and offsetting decreases. If you go to the rather large bullet you can see that we increased 125 nursing facility beds to correspond with the known bed movement. Keep in mind that when we talked about all the additional beds, it's a much larger number. Those are total beds. We only budget for the expected Medicaid use of those beds. We added 16 general psych beds during this interim. Those beds became operational in the fall of 2008. As of December 2008 they are fully occupied .Those 16 beds are not accounted for in your

average above of $3291. In addition, we had 9 new beds at Dakota Alpha that were added during this interim. Those are the beds that are specifically for long term TBI clients. Those beds were added to accommodate the clients who need that service so they don't need to seek that service out of state which is generally where they would otherwise need to find that level of care. Then we had a 19 bed increase of the utilization because of hospice when we were building the budget. Last time we had around 67 beds for hospice that we budgeted. At the time when we built that budget we were running an average of $81. That trend was increasing up. We increased that to a trend of 86 that you see at the bottom which is an increase of 19 beds for that area. Finally decreasing 63 beds for individuals that we expect to receive services through the PACE program rather than nursing facilities. When you put all that together it gets to our average of $3388.

Representative Kreidt: Are you anticipating those PACE beds to be all out of nursing homes?

Maggie Anderson: No there are some other services where we have pulled people out of those.

Representative Kreidt: What is the rate for PACE in ND?

Maggie Anderson: For the 07-09 as well as the 09-11 because we don't build inflation is $4,053.57 per person per month. It's the second to the last one on your grant summary sheet. We tell you 76 individuals and the rate is there as well.

Representative Kreidt: The PACE beds, are you anticipating all of those to be out of nursing homes yet, the 63 beds?

Representative Kerzman: Where do we stand with the moratorium on this?

Maggie Anderson: It is on both nursing home and basic care beds. Are you looking for the number or how it applies?

Representative Kerzman: How can we keep adding beds when we have a moratorium?

Maggie Anderson: The moratorium is on basic care and nursing home beds. We are not allowed to bring additional nursing home beds into the system because of the moratorium. With basic care beds there is an exception where the facility can apply to the department of health and human services. We look at that request to determine if there is a need for basic care. There is no additional basic care beds. If someone does receive basic care beds through that process they can't turn around and convert them to nursing home beds. Facilities can convert nursing home beds to basic care beds if they want. What you are seeing here in terms of when we are saying increase the beds is these beds have existed out in the rural areas and in areas where their occupancy was not using all of those beds. We were trying to represent that movement. Those beds were unoccupied and are now moving into the Bismarck/Fargo/Minot/Grand Forks areas. Once they move in we know they will be occupied at our current Medicaid penetration rate. They aren't new beds coming into the system but new beds we have to take into consideration as we are budgeting.

Representative Kerzman: What is the maximum amount of beds we can have in the state?

Maggie Anderson: We don't have that at our fingertips but can probably get it from the Health Department.

Chairman Pollert: Did I hear you say that basic care beds can increase if there is a need shown?

Maggie Anderson: That is correct. It is an exception within the moratorium where the facility has to apply to the Department of Health and Human Services. Then the two agencies meet and review occupancy information within a certain mile radius. What the aging statistics are showing in terms of how many people are aging to a place where they may need that service. We look at the other beds and during the last session the legislator did add an extra consideration there that if a facility is requesting additional beds that they would be given

priority consideration if they are willing to accept Medicaid clients. There are basic care facilities that don't accept them. There was a concern to make sure that the Medicaid clients had access to that service. That was an additional provision added to the language last session.

Chairman Pollert: So basic care beds cannot be switched over to nursing home beds?

Maggie Anderson: Correct but you can switch nursing home beds to basic care.

Chairman Pollert: So is there one or two bills out there dealing with bed and capacity? Is it on the House or Senate side?

Maggie Anderson: There are three bills to my knowledge. There is the nursing home moratorium bill which is the bill that the legislator typically sees every year. That started in the Senate which is SB 2044. That passed and is now over in the house but hasn't had a hearing. Then there is HB 1327 which is a bill that would create an exception to the moratorium. That was introduced because of the facility in Steele. It is also my understanding that perhaps other facilities may fall under the criteria as they are written in the bill. That bill hasn't had a hearing and is in the house. The final bill technically doesn't touch the moratorium. It's HB 1433. It's about the Richardton facility and transitioning from a critical access hospital to a skilled nursing facility and their need for a Medicaid supplemental payment in order to do so. They want to take their critical access hospital designation and convert to a 20 bed skilled nursing facility. Those are the three I'm aware of. I don't have the fiscal note with me. It's not large on 1433 and the supplemental payment contains no general funds. Its city and federal funds. There are no general funds.

Chairman Pollert: But it would still affect the moratorium.

Maggie Anderson: Richardton actually purchased their beds. They purchased their 20 beds from Wishek and Williston.

Representative Nelson: I don't know if you or the health department track the exceptions to the Moratorium but I think it would be helpful that each biennium that it is part of the material that we know if there has been some exceptions granted and where they are granted to.

Maggie Anderson: Absolutely.

Representative Metcalf: You said you cannot transfer basic beds to long term care beds? But you can if the beds came to long term care then down to basic care. Then they wanted to take their beds back to long term care, can they do that?

Maggie Anderson: Yes. You have one year. Continued testimony on handouts.

Representative Kerzman: When I look at the chart on top and it starts out at about 600 people receiving, we actually lost about 50 clients. Yet when you build the budget you are adding in 5 per month. Can you give me some rational on why you did that?

Maggie Anderson: We look at where we were. Of course we had some very high months and some very low months. These are always unduplicated recipients so it's possible that you had two claims for one recipient in a month. It varies. We were continuing to expect, based on the communications and the information we received from counties, case managers, clients, about the need for home and community based and personal care services and to have the choice. We considered that for continued growth. It's not tied to a specific other than the personal care tier 3 where we can say we are going to have an additional 20 people because of that on average of the biennium. The 5 is what we believed where the numbers when we built the budget. Again, the continued expressed interest in the home and community based services.

Representative Ekstrom: In that tier 3 that expands services from 8 to 10 hours, with that small addition we made by keeping people out of nursing homes.

Maggie Anderson: We would expect current clients that are receiving at an 8 who may need to seek that higher level of care at a nursing home if we didn't have the personal care tier 3 in

addition to those individuals that are already receiving. We expect another average of 20 over the biennium. If you would like to talk about any of those items that were funded in the Governor's budget request as we go through this I would be happy do discuss the details on those as well.

Representative Bellew: Explain the 7&7 inflation again, the $86. The reason I'm asking is the 5% for one year is $60 but then the 7&7 is $86.

Maggie Anderson: The 7&7 is in the Governor's Budget where he provided an increase for all providers. I'm guessing that since we are adding people it is pulling the average down. You have growth in people at the same time when you are adding dollars and so those number of people are going to skew that inflation. You can't go double that number. At the same time you are adding people to the service.

Chairman Pollert: Let's go a little further. I think I will understand your question. Why not 4&4, 5&5, etc. I mean how did the 7&7 come about? Was it discussions with long term care saying this is what we have to have? I would suspect that part of that discussion would have been because natural gas has gone up, utilities have gone up, but now we are in a totally different environment. Does the 7&7 have to be there because you the reimbursement costs should probably drop next year.

Brenda Weisz: We did work with Office of Management and Budget and the Governor's office with the inflationary factor. Yes, long term care did talk about the 7&7. We did run scenarios then for all providers at 7&7, etc. With looking at what the providers thought they were costs were and things they needed to cover in their operation, we did submit the OAR at 7&7. That was what was improved in the Governor's budget then.

Chairman Pollert: So do you have some formula you are using and coming up with. Insurances went up 15%, etc.

Brenda Weisz: What we actually look at is the CPI that exists at that time. There is CPI for various services. There is the medical CPI, there is the CPI that the long term care association has to be cognitive of. I think a lot of it just ties to what is the CPI. We take a look at that and what providers have talked about as to what their increases are. Like you mentioned in utilities, gas prices, travel costs for their staff, things that aren't directly reimbursed in that nature, and then land on a CPI that would accommodate.

Chairman Pollert: Let's go to human service centers and you got 7&7 in human service centers. Could it be saying that the 7&7 might be overstated for some of the human service. Nursing homes are facilities. They have electrical bills. They have a lot of costs. Could it be said in other parts of the DHS budget that the 7&7, do they have all those costs?

Brenda Weisz: Some of the human service center providers are residential provider facilities. They would have similar costs too.

Chairman Pollert: Let's take a psychiatrist that is an outside contractor. Why should he have a 7&7. Won't his billing charges by the hour be automatically in there anyway so his costs are going to be up?

Brenda Weisz: That is a tough question. That does become a matter of policy.

Chairman Pollert: That's fine. I'm just doing some correlation. I am still struggling with the dentists getting rebased at 75% of bill charges. Then you are getting a 7&7 and everybody is getting a 0&7. I might as well ask what is the number if we go 0 the first year on dentists and 7 the second year. I have already asked for the numbers all the way up like 4&4, 5&5, etc. We are going to want them as a committee. I know there are amendments coming that are going to talk about wages for long term care. I know there is going to be an amendment coming on DD.

Brenda Weisz: You did ask for a request and was that to do a 0&7 on dentists?

Chairman Pollert: I can ask for that amendment anyway so maybe that is when you want to give it to us. I have talked to the dental association asking how come you are the lone people getting a 7&7 plus rebasing.

Representative Nelson: The one request that I would have because this has bothered me since the overview was the dentists were the only ones of the providers part of the study that complained about the methodology used in the study. I would be interested in knowing and seeing the differences between their requests and some of the other providers. All the other groups said it was easy to work with and they had no trouble with the information. The dentists said you should have gotten somebody else. It sounded like it didn't go well.

Maggie Anderson: We can provide to you the instruments that were used. The two studies that are similar that were done were the chiropractors and the dentists. It was the same company that was hired in a very similar instrument keeping in mind that chiropractic codes and dental codes are different. Other than that the study was very much the same. We can provide that to you. Certainly we didn't collect information directly from the physicians. We used those surveys that we worked with. We didn't go out to Dr.'s and ask that. There was national, regional, and statewide information available. For hospitals there is a standardized cost report. Then for ambulances there was a totally different vendor and a very different service. We can provide you what we asked for from the chiropractors and dentists and you can do that side by side comparison.

Representative Nelson: In your opinion, I have asked for the information and when you give it to me will I understand it.

Maggie Anderson: I know that both the chiropractors and the dentists struggled with the instrument. I don't think it is any fault of the vendors. I think this was a very unique request. I know when I went out to my colleagues in other states once we knew we were going to do this

study, they all wrote back and said good luck. Nobody had ever really done something like this. I don't think that we perhaps had to criticize the vendor or the dentist. It's just a reality that the records that are kept for a small dental practice versus a hospital who has a responsibility to report to Medicare on an annual basis are very different. I think all of the groups involved did the best they could with the vendor to prepare an instrument. It turned out to be where it was difficult for some to understand.

Representative Kreidt: Going back to your example of contracted services, your 7% wouldn't play into that. Under contracting services you are negotiating with a psychiatrist or a physician for a set rate. There could be a 20% increase per year for those services as you are contracting. The 7&7 really wouldn't play into that to a great degree. You are probably looking at more of an increase on that type of situation. Going back to the 7&7 on the heating bill, that is a moving target. Last year we had a mild winter so we probably got by with the 5. This year the 7% probably isn't going to cover the heating costs because of the extreme cold. You have great variations on that. Costs go up. We all think that fuel costs have gone down and commodities have gone down but the people that are supplying those food products, they forget to put the price down.

Chairman Pollert: I have that in my business. I know prices are going to drop but it takes about 6 months to a year when this thing starts.

Representative Kerzman: I'm making an assumption that the 7&7 is a bit of a catch up because of the underfunding. In the next biennium are we going to be down more than the CPI. I think the last time I heard it was down like 2.6 or something like that. I'm just making the assumption that the 7 is a little bit of a catch up because of the underfunding. That is why I thought I could probably support it.

Brenda Weisz: I can take you back a couple of bienniums. We all remember 2003 when there was a shortfall in Medicaid. That year we weren't able to give a second year of inflation. We did hear the providers talk about how that year was never made up for that inflation. In 05-07 we approved an inflationary increase of 2.65. I'm not sure that it exactly matched CPI of that year. The medical CPI was lower than the other. For the legislative session that approved the budget for what we are in right now. In 07-09 it was 4&5. Part of it can be said that there was some make up that was being done for the years that the inflationary increase didn't match CPI being about 4 years ago. That has been a comment that we have heard as well.

Chairman Pollert: So having said that though and maybe I'm off, wouldn't have the costs being direct or indirect, wouldn't they have gotten that back on reimbursement since everything is behind about a year because of the way the pay system is. Wouldn't we have caught that in the next biennium.

Brenda Weisz: You are talking about in the whole rate system if the cost would come in as allowable?

Chairman Pollert: So wouldn't the costs have gone up in the next biennium? We have never decreased the spending for long term care. We have always increased it so if we did it 2.5 inflationary and say it was actually 4, wouldn't those have shown on the direct costs or indirect costs that came in the next biennium to do the rate structure for the nursing homes?

Maggie Anderson: With the nursing home rate setting we have increased the cost because it is rebased every year. Because they file a cost report. The limits are rebased every four years. So when they have their costs that they are incurring now they will come in on their June 30 cost report. For January 1, 2010 rate setting. So when you build the increase in, we have a known cost increase that we know we are going to have because their costs are going to go up. We have to reflect those within the limits that are out there. We have historically budgeted

depending on where CPI is at. That has nothing to do with inflation. That is just cost increasing. On top of that you have the inflation. So in a way you are always behind in catching up with those costs because they are incurring those now. I don't know if it is a catch up as much as behind.

Brenda Weisz: The inflation would inflate the limits as well. Until inflation is put on the limits their costs might increase and we might add to the costs but the limits are still lower and not increased because we have not added inflation to those limits. They are going to bump up to the limits quicker if we don't add the inflation. Nursing homes were unique that one year because it was in statute at the time and they did get their inflation that year both years when the other providers didn't. The inflation is important to the limits so that those are raised as their costs go up.

Chairman Pollert: So my statement might be half true.

Brenda Weisz: Yes we will go with that.

Chairman Pollert: So do you have what the CPI has been since for the 03-05, 05-07, and 07-09?

Representative Bellew: If we approve the 7&7 for the nursing homes, they won't get a 7% increase July 1. They will get it January 1 based on their costs?

Representative Kreidt: Maggie did a good job of explaining the percentages and increases but you have to realize right now with what we have done with the 4&5 last session, the 5% right now of January 1. At this point with what we have done we have facilities out there that are over the limits that are eating costs close to $4 million. They eat those costs.

Chairman Pollert: I can understand that when we did a 4 and a 5. Actually our costs were probably 8 or 9. Or maybe they were 10. I think anybody in business has run into that problem this last year.

Maggie Anderson: Continued testimony.

Chairman Pollert: So when I look at the growth of 125 or the 10 per month, do you have the historical data to show that up or is it kind of a guess?

Maggie Anderson: It is similar to personal care in terms of what we were hearing about for needs of the services and clients desire for those services. We estimated that growth. You will see a bit of a decline here. Some of that has to do with the new waivered services that we will talk about when we get to the waiver table that were added in the current biennium. Some clients, because always choose Medicaid as a funding source before SPED because of the federal math, you will see that some of our wavier numbers are going up. The second half of the biennium and some are going down. It's just that those clients might be receiving those family, personal care through the waiver versus some of that they may have been receiving through SPED before.

Maggie Anderson: Continued testimony.

Representative Kreidt: Last session we didn't do any inflator for basic care? They didn't fall under these categories?

Maggie Anderson: They would receive that inflation. We built it into the cost that we do because of the cost report. We kind of build that inflation into that cost change piece. We are just showing what the 7&7 is for the current biennium and acknowledging that the other difference is those annual cost reports. Continued testimony.

Representative Bellew: Can you explain that hospice waiver to me again?

Maggie Anderson: That is a hospice waiver specifically for children where typically when individuals elect hospice it's because they have been diagnosed with a terminal illness. The doctor has certified that they are likely to have less than six months to live. The Medicaid

program as well as the Medicare program only pay for palliative care for that time. With children there is often a desire to seek curative measures. There is a lot of grief, counseling, and support that is necessary to try to keep the children and their families in their homes and supported during that time. That hospice waiver would allow us to serve children whose families have elected hospice to provide that curative service component and the additional therapies that are needed. All of which the intent is to keep the child at home. If there is a curative measure that may help for the family to be able to seek that. Continued Testimony.

Chairman Pollert: You talked about $1.5 million targeted case management. What was he talking about?

Maggie Anderson: I wasn't here for Mr. Bernhardt's testimony and I don't know what he said. Was it an increase?

Chairman Pollert: It said the targeted increase of $1.5 million on the county reimbursement. This says child welfare services? So maybe I'm on the wrong section.

Maggie Anderson: It is children and family services. It's related to the change in regulations. That's not my area.

Chairman Pollert: Maybe it's not even related to this. It was just something in his testimony that he had talked about.

Maggie Anderson: It's related to the targeted case management regulations that the centers for Medicaid and Medicare services issues. When they issued those last December they indicated that Medicaid program could not pay for certain kinds of targeted case management including the targeted case management provided by the counties. I'm guessing it's related to that.

Deb McDermott: The counties would not be able to bill Medicaid. However those costs were included in the maintenance rate within our budget. The counties actually would not see a loss

in revenue. That revenue instead of being generated from Medicaid will be generated from 4E funding. Actually it is pretty much a wash in our budget.

Representative Bellew: I need this explained again. Is it those federal rates? We have to do that because of the feds? This is to me an unfunded mandate.

Maggie Anderson: With the federal regulations that came out with targeted case management, they were very detailed about the types of rate setting mechanisms that they would allow states to use. They do not care for bundled rates. For example with this service, typically clients are seen upon receiving the service and then every six months. There is an annual visit then a six month visit to make sure all their services are what they need and make sure to recess their care plan. So we pay this annual fee and pay it every six months. They are saying no they need to know if the case manager was with the client and how long. They may let us go to a daily rate but we haven't negotiated that. All those were currently in negotiations with state plan amendments. We do know that they will not allow us to continue to retain the rate setting mechanism that we have. By doing that we have to unbundle this long standing rate that was to cover a six month period or a twelve month period. We know that in doing that we have to prove to CMS that we have used some kind of appropriate cost collection and rate setting mechanism. For example they won't let us take that rate and divide it by 6 months and come up with a rate that we actually have to prove to them how we set that rate and does it correspond to what commercial individuals would do or what other payers pay for something like that. It is a federal mandate.

Representative Kerzman: It sounds like it would be an exemption for the contract providers like PACE if I'm hearing it right.

Maggie Anderson: Since we pay that one fee to PACE how they negotiate paying for services within their system is up to them. They wouldn't need to account for that. They need to follow

the requirements of providing services under Medicaid. How they establish that is negotiated. If you are a physician they are going to negotiate with you as to how much they are going to pay you for delivering services. Continued testimony.

Chairman Pollert: Did I hear you say that the non medical transportation, is that something new that was proposed in the governor's budget or did I not hear that right?

Maggie Anderson: That is funded in the Governor's budget in the 09-11 budget. It was funded prior to the department submitting our budget to the Office of Management and Budget. It was not an OAR that was funded it was something we funded before we submitted it. We included it in our budget.

Chairman Pollert: But it wasn't in any other biennium though?

Maggie Anderson: This service did exist previously and it was removed. This was a service removed from SPED and expanded SPED. Continued testimony.

Chairman Pollert: This gets us through the three forms that Maggie handed out this morning.

Maggie Anderson: It does but there are two services that don't have charts and that has to do with timing of payments. So you don't necessarily have expenditure charts. One of those is the PACE program which Representative Kreidt had talked about and I referred you to the chart with the 76 individuals at an average monthly cost of $4,053.57. The other one where you do not have a chart is the children's medically fragile waiver. We are just beginning to see the expenditures come in from that. How we built the case load and the dollars, you might recall that the waiver is funded for 15 slots. We currently have 3 individuals on the waiver. We are working with other families going through what is called the level of care. Then they have to meet the level of need. They have to meet the nursing home level of care and have to have a certain level of need to qualify for the waiver. As we are working with that and we see the applications and requests coming in, we built our growth over the 09-11 budget to average out

to 11 children for 09-11. The way we achieved our cost is when SB 2326 was passed last session we provided an estimate of what the average monthly cost was. We inflated that forward by the 5% for the second year of the biennium and the 7 inflationary increase for the 09-11 biennium. That is how you get to the average monthly cost there. That should take us through all the handouts so far.

Representative Kreidt: Looking back at the bed transfers and we are using 125 beds. The way I read this, the way I assume is that we are going to have 125 beds banked. There must be a breakdown on how those beds are going to come online. I think for the committee that it would be helpful.

Maggie Anderson: I was planning to hand out an updated version of the nursing facility bed movement. As I was thinking about that I realized I didn't go into the detail with you that would lead you to that assumption about the 125. We use the information from the long term care association and we worked with Shelly and her staff as we were building the budget. For example we know that Manor Care is bringing beds in August of 09. I believe we figured the penetration rate of that particular facility was 12 beds. We also knew that all 12 wouldn't be filled the first month. So we put 3 in August and 3 in September of 09. Then Good Samaritan is also bringing beds on in September of 09 so we also put those beds on. So it's not 125 from the get go. Every month of the biennium we built them based on what we knew and what the long term care association knew at the time we built the budget. We would be happy to provide that to you if they would be helpful.

Maggie Anderson: Testimony Handout (Attachment F)

Representative Metcalf: Are there any PACE recipients currently in the nursing home?

Maggie Anderson: I don't believe there are. They are all in the community. The three that were in the nursing home came out of the nursing home and back into the community and are

providing the services to them. Currently we haven't had anyone on the PACE program return to a nursing home or need to go to a nursing home.

Representative Kreidt: Going back to Stark County and Richardton, have those critical access beds been transferred to Dickinson at this point? Where are we at?

Maggie Anderson: Dickinson doesn't have the critical access designation at this time. Richardton will maintain that designation until the point when they transition over. I understand from Jim Opdahl who is the CEO of the Richardton Memorial Hospital, did testify for HB 1433 on Monday. He indicated that their giving up the designation will happen. When they accepted the grant funding that Congress passed this past year, part of accepting that grant funding was a contingency that they give up their designation. If HB 1433 does not pass, they are still obligated to give up their designation. I further understand that the centers for Medicare and Medicaid services were involved in the health care task force that was meeting out in Southwest ND this past year. Mark Gilbert who is the regional administrator for CMS has assisted in helping move that Dickinson application along. Typically you can't apply until that is available. There are some concessions being made to overlook some of those federal time lines to assure that once the designation is given up that Dickinson can secure that as soon as possible. It hasn't transitioned yet because it is my understanding that Richardton wants and needs that designation until they go to a skilled nursing facility because they want that payment structure in place .

Representative Kreidt: Did the department take a position on HB 1433?

Maggie Anderson: No we didn't. We only provided the information for the fiscal note and that was the extent of the department's role.

Chairman Pollert: Are there any other bills on the house side that are DHS related that DHS supports that are going to be coming into this section or to whole appropriations? If there are, are they OAR's and are they a priority?

Maggie Anderson: I just jotted down the list from memory.

Chairman Pollert: This afternoon when we come back let's talk about it. I'm just doing this so our section knows what might be coming after us.

Maggie Anderson: Testimony Handout (Attachment G) 35:00-39:00

Chairman Pollert: We are on ISLA's right? When I look at 09-11 case load growth and the developmental center has an increase from there, are we going to see a corresponding decrease in that budget?

Brenda Weisz: When Alex was in and discussing the detail last Friday, you won't see a corresponding decrease specifically in the developmental center but you will see was the 16 FTE's that was set aside to operate the CARES team that would enable us to do the transition up to the community and then assist those providers in and across the state to maintain and deal with behavioral issues to keep them in the community. Although they didn't have the reduction of the FTE what we do have is the change in their focus to move towards transition. Then as we get those individuals transitioned out, then we can actually see some decreases in future bienniums. It's not so much a direct reduction of staff but a reprioritization of what they are doing when you talked about the 16 that goes towards the CARES team.

Chairman Pollert: I remember the talk about the 16. At some point are we, in this budget, to go down to 67 in 09-11?

Brenda Weisz: I don't know?

Chairman Pollert: But that is our goal in the next biennium?

Brenda Weisz: Our beds were based on the 115. I think we have to get to a goal of 97 first and then 67. We have some time to work through that. It won't happen all next biennium.

Chairman Pollert: So you are telling me that we have to keep 445 FTE's at the Developmental Center, including that 16, even though we are dropping to 97?

Brenda Weisz: That is accurate but I think the distinction needs to be made with the 445 FTE's. 16 of them are there to no longer be functional and operate at an institutional setting. Their focus will change. Handout (Attachment H). Continued testimony.

Chairman Pollert: Do we have 32 levels of care in nursing facilities?

Brenda Weisz: 34

Chairman Pollert: ISLA's were at 2 and we are going to go to 5 right?

Brenda Weisz: No how we reimburse for administrative costs for ISLA is we are currently in our biennium at 2 levels. We are moving that to what already exists in the system. There is already a PAR evaluation tool that is used. We are just making our reimbursement which was thrown out there at 2 rates to say whether it is enhance or normal. We are going to spread that based on our client needs. Why don't we pay administrative reimbursement based on the par level as well because that is what dictates how much time is spent with the client.

Chairman Pollert: So you said we were basically doing this in the past. What we are going to **be doing now with this structure is putting it in statute.**

Brenda Weisz: No we just changed our reimbursement methodology.

Representative Nelson: Can you tell me what the increase percentage in that column?

Brenda Weisz: I don't know the percentage. We either paid them 275 or 420 a month. Now we are going to pay them either 340,390,415,440, or 540. We didn't do it as a percentage per say. We actually looked at what we reimbursed them. We are paying them right now under 2

rates. It is either regular or enhanced. Now we are going to reimburse you based on the functioning of your client.

Chairman Pollert: I'm trying to get this into perspective. Let's take an example such as the Ann Carlson Center. What their needs are is getting reimbursed which we have been told is day and night. Now is that set in administrative code, how that is done? I'm trying to correlate this as to how we do nursing homes. Now with ISLA's you are setting in a rate structure that yes you are kind of doing it in previous biennium's but now you are putting it in as this is what you are going to do.

Brenda Weisz: We weren't kind of just doing it in prior biennium's we were always doing it.

Chairman Pollert: So you are telling me that you have always been paying these five par levels at these rates plus inpatient.

Brenda Weisz: No what I am saying is we always paid them an administrative payment at 2 levels. Now what we are doing is taking those two levels to be more representative of what it is costing them as to what they need to do. We are breaking it into five.

Chairman Pollert: I understand that. Basically you are going to be reimbursing more for the higher levels of care for them individuals. Now could you turn that and switch that over to people in the Ann Carlson Center. I'm not just saying Anne Carlson Center. It doesn't matter what service we are providing for what clientele. I'm just trying to figure that. Now you are raising this level to ISLA's then are you going to do that for the people like Ann Carlson Center?

Brenda Weisz: ISLA is an entirely different service than what is provided in the ICFMR's. That is why you aren't going to see a consistent treatment. What we have found in the movement from our clients in the developmental center and throughout the DD system, we always have to keep in mind the Olmstead commission decision which says that people need to be residing in

the lease restrictive setting. The least restrictive setting for many of our clients would be an ISLA. What was happening for the DD providers is they were struggling because of the higher functioning of the individuals that are coming out of the Developmental Center to pay them at a two level structure isn't going to allow for us to keep them in that facility with the amount of reimbursement that DD providers are getting for that. ISLA is a service that has changed over time with the fact that as individuals go in to the community as we move more, it is a service that is demanded. A waiver program is very similar to the Medicaid plan that once you are deemed eligible, we have to provide the service. We also have to be cognitive of the Olmstead decision which is least restrictive setting for the clients.

Representative Nelson: Is it safe to say the five levels will treat us well as more people are coming out of the developmental Center and going into this type of setting? Do you see the expansion that might be needed in that area.

Brenda Weisz: The PAR system already exists in our system. It's plain well what we currently do for service direct service dollars. All we are doing is changing the admin to correlate with what already exists.

Representative Nelson: So there won't be a need to expand this? That will serve us well?

Brenda Weisz: That system that we have in place is what we continue to go forward with, with our current clients and services. That PAR won't change. This is just to make this more consistent with how we pay other services based on PAR.

Representative Kreidt: Going from the 2 to the 5 par, have you already done some type of screening to see the numbers that are going to fall under the different PAR levels?

Brenda Weisz: Yes when we worked as a work group we did take a look at who is in what areas. Like I said the system already existed in the DD system. We already know who is at those PAR levels. When we built this budget and how we arrived at that when we used these

rates or the cost to do this, we did look at specifically what individuals were at what functioning level and how they would be reimbursed.

Representative Kreidt: So we are looking at 790?

Brenda Weisz: What you want to know out of our clientele what level of PAR for administration of ISLA and what caption they fall under?

Representative Kreidt: Yes.

Brenda Weisz: Ok we have that.

Chairman Pollert: So if I can answer Representative Nelson's question and tell me whether I am right or wrong? The question was what was the percentage increase and it showed as a 22% increase on ISLA's total. All I did was take the grant summary and took last year's total expenditures of $59 million and took $13 million divided by $59 and you get a 22% increase to ISLA's.

Representative Nelson: My question was in the administrative reimbursement level. I was trying to understand how this related to the 07-09. I know we are comparing apples to oranges.

Brenda Weisz: We didn't base our increase on a percentage increase to say we were going to increase them 7%. We did it a little different.

Representative Nelson: I didn't quite understand Representative Kreidt's question. Was it the assumptions you used to build from 767-790. What par level was used? You have that information for those?

Brenda Weisz: We have that too. We would have our existing clients that when they were on the 2 system payment reimbursement we know where they fall on one of the 5 pars. There is also growth in that number and we also know where those growth numbers fall into PARS.

Representative Nelson: My guess is it is going to be a par level lower.

Brenda Weisz: Pretty fair yes. Par 1 we have growth of 9 and 8 individuals. The other areas is 6 and 5. We will get that for you.

Deb McDermott: Can I just make a comment about the ISLA service?

Chairman Pollert: I understand that the 22% increase also includes case load increases, I understand that. I'm just talking total dollars that you have in your grant summaries, a 22% increase in total expenditures. That's a pretty easy figure to come up with. How you got there, I know it is explained. I know it's not the same figure if its 500 people treated.

Deb McDermott: It is about ISLA. I just want to make the point that this is directly related to the efforts. Providers are telling us that in order for them to be able to serve individuals in the community at these higher intensive service levels. The reimbursement as it had been structured was not reimbursing them. Unless we find a way to better reflect the intensity of care that is following the individuals out to the community of which this does, we would have difficulty moving people out of institutions.

Chairman Pollert: I understand that. With these individuals moving out of the developmental center I know it would be done less expensive in that DD setting. I am struggling with as to why we aren't starting to see a reduction in the total expenditure of the developmental center. As of now I support the developmental center and why it has to be there. At the same time though we are getting questions from other people in the legislator asking when the total expenditure of the developmental center going to drop. I can't give them an honest answer. That is just a statement.

Maggie Anderson: Continued testimony.

Representative Kerzman: Would any of these individuals be going to the Cooperhouse?

Maggie Anderson: No. Continued testimony.

Chairman Pollert: Thank you for breaking down on that. That lets us really get down into the numbers. I know it takes more time but we appreciate that.

Maggie Anderson: I just have one more handout (Attachment I)

Brenda Weisz: Just a clarification for the sheets we are handing out, for the developmental center when you look at their rate they include medical where the DD providers don't include their medical costs.

Nancy McKenzie: Testimony (Attachment II)

Representative Ekstrom: What page on your overview are you on?

Nancy McKenzie: Page 5

Representative Nelson: As far as that handout goes, this is mostly federally funded. The question about your portion of the equity pool, could any of it be used for the reclassifications and workload increases? Do you apportion any of that into this area?

Nancy McKenzie: As you have heard other people say we haven't really finished our formula as to what equity would look like in our department. I might refer that question to Brenda. These are reclassifications and work load increases that have happened.

Representative Nelson: So this is built into the budget on a cash basis and the equity is added later?

Nancy McKenzie: Equity is the different part of the picture. Continued testimony.

Representative Bellew: We notice throughout every budget that you are almost doubling travel. Do you have a breakdown of federal and general funds in that category?

Nancy McKenzie: Specifically or operating? The reason I did that so quickly is because VR is one of the four areas you asked for more detailed information on in the travel. Rather than really diving into that information, Brenda wanted to do an overview of the travel.

Representative Ekstrom: This doesn't have to do with operating and I apologize. Looking on the OAR sheet, VR had no additional requests above and beyond?

Nancy McKenzie: That is correct. When we were asked to put together our original hold even budget, our federal funds and state match were adequate that we didn't ask for enhancements to that specifically.

Representative Bellew: Operating fees and services shows an increase of $343,000. You did give us a breakout. I don't see the increases on that breakout.

Nancy McKenzie: That breakout lets you know what is included in that budget. In my overview testimony, if you go back to the lower part of page 5, it does breakdown for you some of the things in terms of rental increase is 48,6. We have that travel increase that we are going to detail more for you. The public awareness campaign. We talked a little more about the printing.

Chairman Pollert: On Representative Bellew's question about the $343,000 it just says public awareness media campaign. What does that entail?

Nancy McKenzie: That is the piece I just referred to when I talked about our input from our federal requirements as well as our state rehab counsel and stakeholders about reaching out to consumers with disabilities to make sure they are aware of the services provided. We have those federal standards and indicators that require. We make sure that we addressed minority groups, persons with significant disabilities, etc. This is a number of different materials. For example, a number of years ago in our federal review we did not meet the level we were supposed to on percentage of minorities in the program. One of the things that we are looking at in this budget, which will have an attached cost, is that in all of the HIS health centers and different areas around the state and all of the reservation areas, we will be doing some television spots in our in house in lobby. Or when we are asked to provide materials for doctors and clinics that we can share with clients who may have become disabled.

Chairman Pollert: You are talking the media blitz. Do they do the advertising or does the DD portion of the DHS budget? I didn't notice. Do they have any blitz as well?

Nancy McKenzie: I don't know that I could really speak well to the DD. I know within mental health substance abuse we do have other parts of our budget that block grant dollars ask us to do a piece of that. Some of the information on substance abuse prevention. It would be like that.

Nancy McKenzie: 79% are. Continued testimony.

Chairman Pollert: This is all general funds?

Nancy McKenzie: Yes.

Representative Bellew: Do you have a breakdown of who gets the grants and who is awarded them, and to what degree?

Nancy McKenzie: I don't have a breakdown of amounts but I do have a breakdown of the entities that we do have the grants with. Our Older Blind Vision Services which is for client purchases.

Representative Bellew: Could you just give us a list?

Nancy McKenzie: Yes I sure can.

Representative Bellew: And if it's possible an amount that goes with each one?

Nancy McKenzie: Yes we can do that. Finished testimony.

Representative Wieland: I have noticed throughout all of the budgets that the rental leases that we have are from anywhere from $2 to $4 in the state. I'm wondering who does the negotiating for this lease space and how is that done? Is it just done by how the rent was going to be?

Brenda Weisz: Individually the agencies work with the landlords to figure out a rental rate but we also involve facility management. A lot of times because they are private landlords, and we

need space, you end up being between a hard place. What I am handing out is a request from last week. (Attachment J). This just lays out the inflation at 7&7 by the major groups. That way you will have it before you. I think when we put our scenarios together, what we did last time was put the 5% right underneath this. That way you can see the difference if you move to the 5. If you move to a 6 what the difference in dollars would be. This is the framework for what is in the budget at the 7&7.

Chairman Pollert: It seemed to me that it was a colored matrix?

Brenda Weisz: It was probably in color. It was colored when we showed you the difference between 1%. (Attachment K). This is the handout dealing with the reason for the increase. We did do a report so you could take a look at what divisions you wanted to look at further. I asked to go first for admin and support. You had also requested medical services and voc rehab and mental health and substance abuse. If I could lay the framework for you I will explain he changes for admin and support and then the other three areas will be explained for you with at least half of the schedule being already covered. What we did for you on the top was to show you what the comparisons were in the rates from the current biennium and what the rate increases and changes were from the new biennium. The lodging changed. It went from 50 plus tax to $55 plus tax. Continued explaining Attachment K.

Chairman Pollert: We are in recess until 2:30 this afternoon.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/29/09

Recorder Job Number: 8188

Committee Clerk Signature

Minutes:

Brenda Weisz: Testimony Handout (Attachment A). I have a TANF schedule if you want to do that first. This is how the expenditure is appropriated for the 09-11 budget. I think I want to explain a couple things first. Our TANF block grant for a biennium or two year period is $52.8 million. That is the revenue we take in. You would have to add a few numbers together and the carry over. So $52.8 is the grant award for the biennium. The amount of carry forward that we are bringing in to this biennium if expenditures stay consistent will be $11.6 million. If you look at your schedule and look at the top at the revenue for fiscal year 09-11. The number of the revenue for the TANF block grant that we plan to have available for expenditures is $18,244,000. $11.6 million of that is carry forward. The rest is $6.6 million which is the 25%, because since we are on a state fiscal year we divide our TANF block grant in the first year. In the third year you have 25% available for the first three months of the biennium. 25% of that grant award is that $6.6 million. If you add it to your carry forward that is how you get the $18.2. Then for 2010 we have a full year of grant award money which is the $26.399 million. For 2011 you only have 75% for 9 months. The $500,000 that we have subtracted out of there is out of the revenue what is going to happen is a continuation of what was SB 2186 during the 2007 legislative session. The $500,000 that goes to work force development for quality child

care. We transfer that to the child development block grant on purpose. We have held that even and it was enacted during the 2007 legislative session. That gives you your available revenue for the next biennium. The estimated expenditures are in the column right next to it. The bold number is $62.9 million. Our estimated carry over then into 2011-2013 is $1 million. That compares to a carry forward we are bringing in to the $11.6. If I would just cut to the chase we are going to have some trouble in 2011-2013

Chairman Pollert: That was my next question. We are going to be short $10-12 million.

Representative Bellew: Is that $500,000 an ongoing expenditure or is that limited time?

Brenda Weisz: The reason we carried that forward is because it was enacted in 2186. There is still additional development that they are doing and we continued the effort forward.

Chairman Pollert: Will the $52.8 block grant stay constant. There is going to be a decision that is going to have to be made on about $10-12 million on funding. That would have to be general funds

Brenda Weisz: Before it even gets to you we will have to have some discussion on Office of Management and Budget and amongst our department. I will walk you through the expenditures to refresh your memory on what they are. That $62.9 million breaks down by categorizing it by assisting needy families. That is your transition child care. I will just refer you to where that is covered in testimony. That was when Tove Mandigo was talking about Economic Assistance. The general and other funds are to meet our maintenance of effort. So I'm just focusing on the federal funds. That is where our problem seems to lie for carryover of funds. Job preparation is the things that are needed to comply with the federal regulations in relation to what participation. That would be the work activity special payments are the PRIDE program that was discussed previously. The jobs transportation client services and support services are those jobs contracts that we enter in to in order to assist our TANF clients to seek

employment and make sure our work participation rates meet those of the federal requirements. The next area of the budget is the formation of maintenance of families. This is the TANF funding that is actually included in our child welfare program so Tara Muhlhauser talked about the child welfare services foster care. There is TANF money in that part of the budget. It's allowed for expenditures that were previously authorized under Title IV a Emergency Assistance. That is when they had the program aid the families AFDC. What that is, is that covers part of our wrap around case management and our parent aid and in home which are the services to keep children in their home that are at risk for placement. Child abuse and neglect investigations that are the work we do when we have the complaints that are filed or the reports that are filed and the follow up work necessary there. Foster care is the funding of our foster care for those that qualified under the previously authorized IV a emergency assistance.

Chairman Pollert: Foster care is all federal dollars? Do you remember during the interim Human Services committee there were a few questions asked about foster care. How much has it increased from the last biennium?

Brenda Weisz: $1.4 million is the increase of the TANF use in foster care compared to the current budget for this biennium. That is because anytime you have an increase to foster care whether it is a 7&7 or whether it is moving the payments to the mark for the family foster home. Based on the funding formula for the foster care grants a part of that will be an increase to your TANF funding. That is why you are seeing an increase there. The other area, because they don't really fit nicely with the categories above, is we call it other. It is system maintenance and operations. Those are the CPU costs for the text and vision eligibility system that are used to determine eligibility. That is also where we list our alternatives to abortion program. That is steady at $400,000. Then there are expenditures that the county incurs. The first one is we still

use the old title of emergency assistance. That is the targeted case management that they do. We pay that out to the counties. The next item is TANF assessments. This is the work the counties do that is direct service things like information and referral for the TANF clients and any assistance they provide for the counties. That category accounts for $4.2 million rounded. Then you get to the administration area of the budget. Along with our jobs contracts to help with work participation rate with our clients, there is an administrative component. The reason it is not grouped up with the other jobs payments under job preparation is that we do have to track our administration separately. We are held to a 15% limit on our TANF program. Right now we are at 9.56%. We cannot exceed 15% of the total TANF program. That is why we have to track that administrative component below in that category. You have your state office administration. That would include funding for the individuals that work directly on TANF policy. We do draw down federal funds for the indirect and support services that people do for TANF such as the reports and the work of the fiscal administration staff, the HR staff, and the IT staff, things that are allocated and assist that TANF program. County administration that is where the counties actually determine eligibility. That ends up being a claim against the TANF grant. The human service center administration, we mentioned before that there are people out at the human service centers that actually oversee some of the child welfare work and licensing that goes on. Because some of our children are TANF eligible, the funding of their salaries then were able to tap some TANF funds for their salary as well or we would be using all general for their salaries. That outlines for you the TANF expenditures. They haven't changed in concept. They haven't really changed on how we use the money. What probably has changed is our carry over is dwindling. Our expenses have continued to grow when you had inflation and you add higher reimbursements for child abuse and neglect.

Chairman Pollert: Are there are any bills out there attempting to tap TANF dollars.

Brenda Weisz: I'm not aware of any.

Nancy McKenzie: (Attachment B). I'm going to start with the Voc Rehab grant information that you requested. Let me introduce Lynn Derman who is our liaison accountant. I need to apologize because Lynn had this all ready for me just how you like it and I put the wrong copy in the packet. We can walk through this a little bit. This breaks down our grant budget for you. Just to tell you a little bit about what each of these are, our older blind services client purchases means anything specific that is directly for client use. It doesn't include any staff time or anything in grants. We assist older blind individuals who might be with materials who can help them to read or access information. That is federal in general split there. The Randolph Sheppard program is the vending machine program that is out there in a couple of places in the state. This is just past the federal money for us. That money goes to the individual with disability who manages those vending machines. The IPAT contract that used to be part of VR's budget is not now. This money goes through the department's budget to IPAT for better services.

Lynn Derman: We have the funding source for basic support transition services and basic support grants are the same grant. We have specific grants that we write for transition programs which are dealing with transitioning youth from schools to working situations or from high school into a trade school or college situation. We set aside some of our basic support grant for that program specifically. The funding source is the same grant with the same federal/non federal breakdown as to 79-21%.

Nancy McKenzie: The next one I will identify is the Centers for Independent Living and we walked through that a little bit this morning on a separate handout that is in your packet. As you can see that too has some federal funds but a lot of general amount funds.

Representative Bellew: Is that the part that has $800,000 increase in general funds?

Nancy McKenzie: Yes. Extended services is to support ongoing employment. It's for ongoing needs for persons who need support in their job setting. You heard from some of those folks in public testimony. This particular budget covers just those that are not part of the DD waiver or the budget for individuals with serious illness. It might be someone with a traumatic brain injury. It could be any number of different things. Supported employment is another level of vocational readiness in which people get a lot of supports training and assistance and hopefully can move on to extended services. That is fully federal dollars. The disability determination services grants. A lot of theirs is about payment for medical services and medical consultation as I mentioned earlier.

Nancy McKenzie: (Attachment C) If you look at the travel information for Voc Rehab, As Brenda explained that whole top section are the rates that are applied to department wide. Unless you have additional questions about that I would just skip over that and go to the bottom to what is specific to VR and DDS. We show that broken down as Brenda had for admin and support into non employee trips or in state trips. So you can see the difference between the current 07-09 budget and the 09-11 budget on both growth and the number of trips as well as an increase of what the budget would be for those trips. Then you see the section that breaks it down by what part of that is attributable to the rate increase. You can see both the rate increase and utilization. Some of the notes on the bottom are non employee trips that have increased. That really is about involvement of people on our state rehab counsel. We have been very fortunate to get an active counsel and keep it fully staffed. People participating in services is full as well. Within DDS, their medical consultant is doing more outreach services. Those become non employee travel areas as well as our state independent living counsel. That is what those are. Our instate trips cover a lot of things. We are responsible for state office staff going out to all of the regions to the human service centers and working with

our regional staff. We do care reviews to make sure we are doing what we need to do with federal monitoring and so forth. When I did my overview I talked a little bit about the client assistance program which is available to anyone seeking services or in services who has a concern and wants special assistance from someone or may want to appeal something. That all falls under in state trips. The increase there is really because of needs for more federal monitoring. I mentioned earlier that we had our triennial every three year review in October. We know we are going to have a number of follow up things we will be doing with staff state wide in relation to their recommendations as well. Out of state trips increased based on the meetings required by the agencies. Also, social security administration is starting to work on a whole redo of their computer system nationally. We know that there are going to be additional training trips required for staff because everything they do is connected to that national computer system. (Attachment D) My last handout is in relation to a question that you folks had brought up. I believe it was Representative Ekstrom who asked about compensation for case management. That is what this is. It shows you the comparison on top of the ND Classification and pay scale. The range is there. The bottom the information we got from Lakeland Mental Health in Minnesota. You can compare the salary ranges from a mental illness case manager 1 & 2. The main distinction is the bottom paragraph says that in Minnesota when someone comes in to that system every January they have their cost of living adjustment. On their employment anniversary date they automatically move steps of 4-6%. That tends to move people quicker in to the range than our staff.

JoeAnne Hoesel: (Attachment E) This is the travel information for the division of Mental Health and Substance Abuse. I'll go right down to the bottom section and start with non employee travel trips from 07-09 to 09-11. That did increase from 36 trips to 417. That is in the explanation for usage increases at the bottom. The first paragraph under non employee trips.

We have a number of grant programs that have come forward where we reimburse consumers and family members that participate. The first one is the youth advisory council. That is directly tied to our underage drinking grant that we get from the Department of Justice. We have a gambling advisory council that meets quarterly. We have several members that are compulsive gamblers in recovery. We reimburse them for our travel costs. We have the State Epidemiology outcome work group that I talked about earlier. (Attachment F)

Chairman Pollert: So you are telling me that we pay for people's travel to go to these meetings like compulsive gambling?

JoeAnne Hoesel: No. This is to come to the advisory meetings. That would cover the costs of non employee trips there. We have peer support groups, mental health planning counsel, and the traumatic brain injury implementation grant. Those are the grant and funding specific initiatives. I mentioned the increased licensed substance abuse programs in the state that are requiring more follow up visits. We also have non division individuals that participate with us. That is the individuals that are involved in that process.

Kerzman: The State Epidemiology group, how do you determine if that would be in your department instead of the Health Department or AG's office?

JoeAnne Hoesel: That is a grant that came through the substance abuse/mental health services administration. It is tied specifically to substance abuse prevention work. That falls within our department. That was predetermined at the federal government. Representative Wieland had asked to get a brief description about who were some of the groups that were represented at the public testimony for mental health and substance abuse and developmental disabilities. I just took a partial list that appeared before you on Tuesday and identified if they were funded by the Department of Human Services and what their role was. He was wondering whether the department was funding them. This is a response to that request.

Maggie Anderson: (Attachment G) First I'm going to provide the travel information and then all the items related to traditional Medicaid grants. The travel document is the same format as the others you have seen. Going down to the box at the bottom, you can see trips that non employee trips were 0 and now it's 80. Our footnote indicates that this primarily consists of the money follows the person stakeholder committee and the Medicaid advisory committee. Neither of which were budgeted in 07-09. We do pay for mileage and meals and sometimes lodging for the stakeholder meetings. That is the non employee piece. The total of in state trips you can see there were 402 trips budgeted in 07-09 and in 09-11 684. Again most of that increase is related to money follows the person with the individual who is the money who follows the person grant administrator travels around the state quite a bit to nursing facilities to institutions that serve the DD clients to the counties and the purpose of that is to fulfill the expectations of the grant which is to transition 110 people out of the institutions. That is a big portion of that. We also have some dollars budgeted to train once the new MMIS is up and running.

Representative Kerzman: I had an individual that talked to me and he said he was transporting a family member and they weren't getting paid mileage for that. If someone else transported that family member they would get that mileage. Is that true for out of state?

Maggie Anderson: We do have an administrative rule that indicates that we don't enroll family members to transport Medicaid eligible individuals. Within our state plan we do have an exception to that to look by a case by case basis if they have exhausted all other transportation that might be available. The free or volunteer transportation is supposed to be looked at prior to requested the exception. The total of out of state trips, 53 to 74, primarily there are some extra trips related to myself, the assistance directors needing to be in Denver and or in Baltimore with CMS on issues and discussing those. I have shared a few times during

testimony about the complexities and the oversight and the program integrity areas increasing. Sometimes that necessitates face to face meetings. We also have some meetings with the new MMIS system coming up where there would be some products that our staff would be needed to be trained on. (Attachment H)

Representative Ekstrom: I ran into a lady the other day at the hotel when I was here during the interim. She was up here from the Centers for Disease Control coming into the Department of Health to do some training. You also have folks that come here from the federal government to assist in training?

Maggie Anderson: We do have people from the federal government who do come here. Certainly they provide technical assistance but doing mass training of staff, they don't. Typically our regional office will have a training and the expectation is that you take your staff and go to Denver. We ask them on a regular basis to provide those opportunities via a web or interactive video network. Sometimes they do sometimes they will not. There are just required trainings. For example there is one coming up in February because they are coming up with a new reporting system for all of our federal reports and we have to send somebody because we are required to do those federal reports. Typically they do not come out here to train us. (Attachment I). I think we will start with the cost survey instruments and I will get into a little bit more information that you requested specifically about percentage of bill charges. You did ask to see the information for the cost surveys to understand whether the dentists were asked to provide more complicated information than the other providers. I indicated that what I would do is provide to you a comparison from the dental survey to the chiropractic survey. The reason why you have multiple pages stapled and labeled dental is the first two pages were the same on both two surveys. I didn't want to provide one more piece of paper for you. The instructions that were provided to both provider groups were the same for the first two pages in terms of

offering the assistance providing their fax number, their phone number, the contact person, that they could submit the information electronic, they could send it online or fax it to the vendor, whichever met their needs. Then getting in to discussing each of the items in the cost survey. It's just contact information, total expenses, net revenue and encounter information. You can see both instruments are fairly close to the same. The differences in them relate to that coding issue that I talked to you this morning where the chiropractors look at more of a RVU. That is the system that they use to do a relative value of the service that is provided and the dentals have CDT which is a dental code used for each service. They were asked to provide their fringe benefits. The information for the chiropractor, the administrative support that they would have, the facility operations and maintenance and other costs to specify those. The vendor provided the definitions of what would be included in each of those areas and again provided their phone number and other ways to contact them should they have questions. The way that this whole process worked from beginning to end is we did release an RFP to higher vendors to do this survey. We involved all of the associations in the process. We had members of the hospital association participate in reviewing the proposals for the hospital portion of the rebasing. We had members of the medical association do the same for theirs, the EMS association, the Chiropractic association, and the dental association. Those individuals were involved in scoring the proposals and making decisions about who would be hired as a vendor. Then when the vendors came in to do what they call their kick off meetings, we once again brought those individuals from the associations to the table to participate in those discussions. So the vendor not only heard from the department about what we understood was directed to be from SB 2012 but to hear from the providers about how they perhaps see the new cost and financial information within their industry to be unique and assist the vendor in trying to capture the information. In this particular area with dentists and

chiropractors, once we receive the draft cost collection tool, we did send that out to both of the associations. We had conference calls with the vendor to walk through the tool and for associations to provide feedback and make the necessary changes that they felt would be needed to be included in order for their members to be able to complete those surveys. Then we mailed the surveys out to everybody. There was a lot of discomfort in completing the surveys. Some of that is the information of salaries and benefits and information like that there was concern about the information and what would be done with it. Certainly if you have a multi practitioner practice that information is a little less obvious than it is if it's a sole practitioner. There were difficulties in completing the instrument. The vendors tried to assist in both the chiropractor and the dental area. With the chiropractic area there really was a particular one who was the champion who individually took the responsibility and said we wanted as many of these surveys returned as we can. He got on the phone with the vendor so he could totally understand what was being asked. Then he got on the phone with his colleagues and called them and offered his assistance to his colleagues. I'm not aware of that happening with the dental survey. It certainly could have but I was not aware of it. We did have a couple of subsequent calls with members of the dental association who had recommended alternative ways after the survey had gone out. All of those surveys would have certainly led to estimated costs that we couldn't have substantiated. They would have been too specific to be an individual provider. We didn't believe that was what the legislator was looking at. We understood that we wanted us to look at the practices of a whole statewide. If we only collected 3 or 4 practice information we could potentially be skewing that final data. Again, is the survey instrument perfect? No. It was certainly something that the vendor we hired had never done. In fact none of the vendors that bid on this had ever done anything specifically on chiropractors or dentists. They all had experience doing hospital rebasing.

Representative Ekstrom: We heard in public testimony that there are some people who know what they are going to get back from Medicaid. Therefore that is what they bill. They do not bill what their actual costs are.

Maggie Anderson: That is certainly a possibility. It's actually a possibility with all provider groups. Our guidance to providers is you need to bill us your usual customary fees. We pay off of our fee schedule. If in fact they are doing that, it is not under our guidance our knowledge and we just don't pull that kind of information to look at it. If they are doing that it is not because we directed them too. Our rules are bill usual and customary.

Chairman Pollert: The hospitals were done on standardized cost reports. Are ambulances the same?

Maggie Anderson: Hospitals you are right with the cost report. It's an annual report that the hospitals have to file. It's called the Medicare Cost Report. Physicians were done a little differently than everybody else. That partially was because the magnitude of trying to survey all the physicians in ND would have been great. We worked with the medical association to locate and use data that they use and their salary offers and knowing they have to be competitive in the market. We used regional and national and statewide data that they already provide to these practicing groups. We use that information to calculate the physician estimates. Probably more than any of the groups the Medical Association, we met quite a few times with the vendor to review the data from those entities and to make sure that it was ND targeted. Ambulance providers were done very similar to what happened with the chiropractors and with the dentists. It was a different vendor. That vendor happens to have multiple businesses and one of them is that he is an ambulance provider. He understands the ambulance system. He also developed a cost collection tool for ambulance providers. The EMS association took an active role in working with the ambulance providers to assure that we

had a good return rate. The ambulance providers are certainly one of those where you have the big and little. The big was of course, very sophisticated accounting systems and billing systems in some of your small rural ambulances that operate with some paid staff but a lot of volunteer staff don't have those same types of systems. They collected the information and developed the model based on that data collection. Those are the tools and if Representative Nelson wants more information I can provide that to him. The numbers at the bottom in terms of the trend didn't change they just did prior to that. The next item in the packet is the information that was requested on where we are at with the services that were rebased in terms of billed to pay. This is dates of service of fiscal year 2007. It is now over a year old in terms of data. In order to get that claims run out and make sure the claims were paid we use state fiscal year 07. For physicians the amount of paid to billed is 40.5%, hospitals were 40.48%, ambulance 29% and chiropractors a little over 35%. Dentists are on a separate sheet (Attachment). The first sheet shows you the 75%. This is what is funded in the Governor's budget. The 75%, if you look at the first numbers as to where we are today for children on average we are about 74%. For adults it is about 59% overall putting them both together. 66% with the 75% that would go to 78% for children, 76% for adults, and 77% for an overall average. You might question if we are going to a minimum of 75% why would that adult one now go from 59% to 76% and be higher than the 75%. The reason for that is there are some services today that are over 75% for adults. Not a lot but enough to take the others up to a minimum of 75 will bring that average up 1% point. It's not rebasing everything to 75. It's just bringing everything up to a minimum. The blue sheet is the same information but is just based on the 60% rather than the 75%. I believe that was the information you wanted on that particular item. The final one is the ambulance rates. A request was made regarding the Medicaid fee schedule as compared to the Medicare fee schedule. Keeping in mind that our

fees are affected July 1of each year typically. Medicare's are typically effective for the calendar year. We are off a little bit in our comparison. You can see the Medicare and Medicaid percentage just as one example. The ground mileage for basic life support, our fee is $5.41 a mile – their fee is $6.87 a mile. We are currently ay 78.75% of Medicare. If you will notice at the bottom we footnoted that we are using the urban base rates and mileage here. With most things there is never anything that is straight forward. Medicare has multiple fee schedule for ambulance services whether they are urban or rural. They have different specialty codes. We just have to pick one of them and do that. We picked the urban one to do the comparison.

Representative Kreidt: Urban v. rural. What is the proximity to Bismarck that is considered urban. In New Salem we are considered urban on our Medicare rate.

Maggie Anderson: You are in a metropolitan statistical area. You want to know the rural rate?

Representative Kreidt: Is there something like from Bismarck a circumference before you fall under that?

Maggie Anderson: My understanding is that it is the location of the service or where they pick them up. It's where they pick the client up. It's where that is established whether it is urban or rural. This information I am passing out is the critical access hospital detail (Attachment J). As with that information in regard to the dollars that were placed in the department's budget for the 2007-2009 biennium. We were asked to provide some detail on that. I will quickly walk you through this. At the end of the legislative session when that payment methodology was changed, there was 31 critical access hospitals in ND. Since that time there have been 4 additional hospitals that have converted. We have those listed there and the dates in which they converted. That brings the total to 35 at this time. We are aware that there are two additional critical access hospitals in progress. Jamestown and Richardton which we talked about a little earlier today.

Chairman Pollert: Can we go in to this a hair more? Representative Kreidt's question was about how the critical access designation was coming for Dickinson and how it relates to the HB 1433. My question is can you repeat what you told Representative Kreidt so I can hear it again?

Maggie Anderson: It's our understanding that when Dickinson accepted the grants from the federal government, there was a grant that was authorized last summer that allowed critical access hospitals who are converting to a skilled nursing facility or to an assisted living to access these grant dollars. Richardton applied for those and they were awarded $990,000 and the grant could be up to a million. Those dollars can be used to help them renovate their facility to make sure they meet the certification requirements to be surveyed by the health department under the CMS requirements. They could use those dollars to purchase the nursing home beds that they needed to get there 20 and other infrastructure that they had. Those dollars cannot be used to retire the debt. When they accepted that $990,000 it's our understanding from what Mr. Opdahl has told us is that at that point they agreed to relinquish their critical access designation at the point that it is going forward. If they didn't that day they are under obligation to do so. I want to say it is of six months when they sign that grant form. They are going to a critical access. They have purchased the beds that they need. They want to be a 20 bed skilled nursing facility. They have purchased those from within the system with the dollars that they have received. They have HB 1433 going through the process which would provide them a supplemental payment. The board at the Richardton Memorial Hospital has indicated that based on the current limits that are in place and the Medicaid rate setting for skilled nursing facilities, they cannot be financially viable without receiving dollars above those limits. They can receive a supplemental payment up to their cost as long as it doesn't exceed what is referred to as the Medicare Upper Payment Limit. So we have prepared the estimates of what

that would cost. That is the basis of that fiscal note for HB 1433. If the bill passes then we would apply to CMS to get approval to begin providing a supplemental payment . It's my understanding that everything is moving through the process. They are planning on or around April 1 of 2009 to convert to a skilled nursing facility.

Chairman Pollert: Does HB 1433 have to be passed in order to make sure Dickinson gets a critical access? That doesn't have to happen. They are two separate issues right?

Maggie Anderson: That is my understanding that because they accepted that federal grant that it was a contingency on the federal grant. The last two paragraphs that we have there is that our appropriations bill from 2007 contained $4.3 million to increase the critical access hospitals from the previous payment methodology to cost. The change was implemented right away at the beginning of the biennium. Just as a footnote that $4.3 was information that the ND health care association had calculated for the committee as based on their interest of moving the critical access to cost. Looking at our current information and the first year of the biennium and taking that forward for the second year, we are expecting to spend $2.7 of that $4.3. You already have the document I'm sending you. We thought you would need it as we go through the spend down table so you didn't have to try to find the other one in your folder. (Attachment K). You will see in your summary that the services that were provided in the detail encompass 90.4% of the traditional medical services budget. Indian Health Services, about the 6h item down is 100% federal funds. We do not have a break out table for you on that particular service. In patient hospital is one that you are going to need the reminder of the salmon colored sheet. At the time where we started building the budget our cost was about $65149 and our unites were around $6,800. We can add the inflationary increase and the rebasing of the 7&7 inflation. Then we have this gap of both units and dollars. That ties back to this example that we provided you that where we are doing the payouts and doing the offsets

they don't reconcile correctly as those offsets are happening. (Attachment L) You will see the footnote that indicated that this area is affected by the payouts and offsets resulting from the claims backlog. This impacts both the units in cost and the earlier handout. In addition the new reporting system that we discussed on pages 13 and 14 of the overview testimony tells you that we are using different payment methods. That reporting system looks at things a little different. It just contributed to it being off. Finally with the critical access hospitals being paid at cost and the other hospitals still being paid off of DRG's. Our out of state hospitals being paid at a percentage of bill charges. You mesh all of those together and it's a combination of those that are just throwing those off and the utilization is also showing a negative from the time that we built the budget. Outpatient hospital has the same type of methodology. We use November 07-September of 08. Those areas where we sunk down more into November, we did remove May of 08 from the data. You can see from looking at that, that the actual cost and units are quite a bit different from the other months. Something was going on there with the system and payment issues. The 5% inflation comes out to $1.29 but if you try to calculate from 1703 to 129 you won't get 5%. The reason that is goes back to having critical access outpatient, out of state outpatient, and in state outpatient. When we build those we can now get to the level of detail where we can build them very distinctly. When you roll them up they don't always roll up to 5%. The 7&7 inflation, when you look at the utilization you will see my footnote about that. We try to account for the growth that we knew of the two new critical access hospitals moving over from non critical to critical. We try to account for those units in the appropriate spots. Those services were rolled up into the overall outpatient again. Our utilization went down a little bit from the 138 that we had when we were building the budget to 137. Physician services were averaging out about $13.20 at the time we built the budget. The same inflation, the money for rebasing, the 7&7 inflation, and this is another one of the offsets and payouts. We

are up to 12 cents. That is a matter of how those things don't balance out. We are also seeing a difference in the units of a negative $920. Our average on drugs when we built the budget was $3724. Inflation and the loss of pre2008 J Code rebates. With drugs we don't apply the 7% or 4% on July 1. Its natural inflation is with the price of drugs. To cover that inflation to the end of the biennium and in addition to that we started invoicing J Code Drug rebates during this interim. When we did that we were able to go back as far as we were allowed to go back with those. Essentially we caught up in terms of expenditures but then we had to account for what that would reflect in terms of cost in the next biennium. That is the combination of the inflation and those pre J Code losses. We still have J Code rebates Budgeted. We won't ever be able to go back and invoice them for past years. We have already done that in this interim. Then we have a 4&4 inflation. I have a footnote at the bottom that says inflation is not 7&7 for drugs. This service is impacted by the actual cost of the drugs. As noted on page 13 of my overview we actually used 4&4 for brand and 2&2 for generics. Even though you will notice on that page of my testimony that we have a 68/32 split of generic brand. When you look at the cost of the brand drug at $149.13 vs. at $22.13 the weighting usually goes in favor of using the 4% inflation versus the 2. You are putting that 4% inflation on a much higher number for prescription. The next chart is t e Healthy Steps SCHIP chart. We used September 2008 which is our actually number from 9/2008 to begin with the final numbers for the SCHIP area. We also added 3911 what we expected for natural growth for the rest of the biennium as well as the growth we were expecting when we implemented 150 for SCHIP on October 1. We had an average of 984 additional. Then our 09-11 growth for expanding the 150 because that growth for the 150 actually is calculated out over a longer period of time than just the current biennium. That would still be going on for a little over a year into the next biennium. Then we had the growth for expanding to 731. That is an average of 731 over the biennium to get us to

the number of the house of 6021. Our premium is 243.93 which we have footnoted that is the premium from Blue Cross Blue Shield. Then a little explanation as to why we used September 2008. We looked at those numbers as late as possible in the process to make the best projections that we could. The next item is Premiums. Premiums for both our Medicare savings programs and they are also the premiums for Aids and other group health insurance that we refer to as cost effective. In other words it is cost effective for Medicaid to pay their existing health insurance premium. Otherwise we would be paying all of the expenses first rather than as a secondary payer. Our average cost when we began the budgeting process was 88/25. Plus the inflation on those premium costs effective January 1, 2009. Because most premiums inflation is for the calendar year. You get notice of your increase going up. You will notice here that you have inflation going up and broken up by the portions of the calendar year that are applicable to the time periods within the biennium. Both of those are 11.5% increase. That is based on what we are experiencing with those health insurance premiums and what we are dictated to pay by the federal government. So when you add all of those together you come up to the 111.51. Our case load of 9134 and below we provided for you our expectations for case load growth for the Medicare Savings programs. That information is available there. The Psychiatric Residential Treatment Facilities, these are our residential treatment centers for children. Our average at the time when we built the budget was 295.74. We did remove December and February from that in terms of cost. We have those whited out there because they were outliers in that process. We included the 5% inflation for the second year of the biennium. Then you will see an annual cost report increase very similar to the information we provided to you for nursing homes and basic care. This type of facility is an institutional level of care. It has the same type of cost reporting. We have to recognize those increases of cost in our rate setting. That is again for both in and out of state facilities. Then we have our 7&7

inflation. Our estimated growth of 1 child per month for the biennium bringing our case load to 93 and our cost to 381.18. Then on to dental services, the average of 4785 the 5% increase, the rebasing of 872, the 7&7 inflation of 623 gets you to a total of 6519. If you go down to the bottom and see what our to the house is, is a hold even case load. Our cost is a little lower in our budget. We have a little explanation. It is a 66 cent difference per unit. We budget children and adults separately. When we roll them together everything doesn't average out perfectly. You can see one is higher than the other. That is mostly attributable to that children services are at a higher rate on average than the adult services. It's throwing that average out. If you went to each of the tables there, they match perfectly as you roll them up. They come off 66 cents. The last thing you have in your packet is Durable Medical Equipment. This is one where on your grant summary sheet when we walk through that, last week you will see that the units went up significantly. We talked about that it is because of the new reporting system where we used to report a case of diapers is a unit. Now it is every diaper is a unit. The units went up. You can see the months that we used as an average. We did pull out September of 2007. That was an outlier. That is for the units. The costs were pretty significant. For the units the 145 then at the time if you look at the months as you were building the budget, you look at December, January of 08, March of 08 we were seeing an upward trend in our utilization. We trended that forward. We budgeted for an additional 62 units per month again keeping in mind a unit might be a wheelchair, it might be a diabetic testing strip, or a diaper. Units are very different in durable medical equipment. An additional 62 per month would get us to what is in the budget. (Attachment M) This is the request you had about the bills that the department is supporting. There are four bills in the house that the department is supporting. You have HB 1307 which is related to nursing home rate setting. This has to do with education. The funds for that would actually come out of the ACT fund where the match would come not from the

general funds. If those dollars would be needed in this biennium then we would receive the transfer of those dollars into the budget so we could draw the federal dollars down. The other three bills that you are familiar with are the 3 bills that were pulled out of here to place for the policy.

Representative Ekstrom: That should be $3,000 to $7,000.

Maggie Anderson: Yes. Thank you for pointing that out.

Chairman Pollert: We are in recess until tomorrow morning.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012- Committee Work

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 1/30/09

Recorder Job Number: 8206

Committee Clerk Signature

Minutes:

Representative Bellew: Called meeting to order, took roll, two members absent.

Alex Schweitzer: Testimony Handout (Attachment A). This is the information that you had asked for in respect to the Developmental Center. First on the chart is a breakdown of 1992-2007 in respect to comparison to the D.C costs and the national average daily cost. This is the Medicaid base rate. This wouldn't include medical in there. It does show you what is going to happen. I think one of the things that you might note about the Developmental Centers is that it is happening nationally as well as in this state. As you downsize costs for awhile will continually go up because you end up with a more high acute individuals living in your facility because of the smaller population and they have more behavioral issues and medical issues. Someone had asked a question about the budget and why there hasn't been a decrease in the budget this time. During testimony I said that is going to happen in the next couple of bienniums. If you remember that there is a $1.4 million that we actually did take out of the inpatient budget that we are utilizing for cares. We asked for a transition budget in 05-07 of $55,000 and last biennium of $1.1 million. We aren't doing this now. That is really the decrease which actually goes for work in the community to keep people out of the Developmental Center which has been our problem. We almost readmit more people we discharge. Until we get that

under control you will not see that population drop. I think that with this initiative and everything else we are doing, what you will hopefully see is a drastically reduced budget in the next biennial period.

Representative Ekstrom: On those readmits, the cause is primarily behavioral or care?

Alex Schweitzer: It is a combination. A lot of it is behavior but there is also some medical care. We also do short term stays for people. This week is a prime example. An individual went into surgery and the facility that the person lived at would not deal with them when they left the hospital so he was readmitted to the Developmental Center for that period of time until they were certain they could function in their facility. We get a lot of that. The majority is behavioral. That is why we put the CARES team in place. We were working on the mandatory screening so that the CARES team absolutely has to see everyone before they come back into the Developmental Center. WE think that will help as well. People can be worked with and kept with their home. That is where a lot of the $1.4 million is going towards.

Representative Metcalf: This is just a statement. We are transferring those 16 people over to that project you are talking about. I hope they understand that they better keep no the ball and work as hard as they can because their job is definitely on the line. If this does not work out they are probably history.

Alex Schweitzer: I think the team will do well. This is an effort that will help us maintain people in their home settings.

Representative Nelson: There have been a lot of questions about the lack of savings in the DD center. I know it's a challenge to lower the numbers with the acuities you are talking about. Also, we hear in the public testimony that there are advocates of in home placement that are dissatisfied with the slow rate of the drop in numbers. I'm curious on what year you are going to be able to get to this goal. You have a big challenge ahead of you.

Alex Schweitzer: I heard the same thing you heard but I would disagree somewhat that we haven't made progress. In 2000 we had 150 people in the DD. Today we have 123. That is significant progress when you consider the type of individual that you are dealing with. We expect to be at the 115 goal. You are looking at 150 to 115. That is 35 people which are very significant. I think it's a challenge but it has happened. We will continue to move people out. The 67 has been an argument. The advocates would like to see a lower number. I think it's likely going to be between 67 and 97. It's going to be difficult but I think we can get to the 97 number. That is the number that the staff have told me is a reasonable number to look at. When you get to that number you really start closing suites which we need to do. That is where you get a reduction of staff. In addition we are looking at different ways to deliver service there. That will also help in terms of reduction of staff. It's going to happen but this is really a transitional thing. You heard someone say to close a facility you would have to have bridge funding. That basically means you would have to have $50 million so you could maintain a Developmental Center and $50 million to transition people out. We are doing that without those kinds of dollars. It's a slow process but we are doing it in more incremental ways but I think we are getting there.

Representative Nelson: I'm glad to hear that because my guess was that you wouldn't get to 67. That explanation of closing suites does show some significant decreases in operations at the DD center. The legislator is going to expect that in some point in time. I think that we do understand your challenge today.

Alex Schweitzer: That is the goal. The goal is to get to that 97 number. We are working towards it and if we can start closing suites you will see some change in budget there is no question. The next handoff is about how we prioritize our capitol and repairs at the DD. I don't know if there are any questions about this.

Representative Metcalf: Do you have a viable working group or something that is looking at what needs to be done to downsize physically so that we don't have to have to cost of this large facility. I know we have discussed it but I'm just wondering if you have a group of people that are doing this as a requirement.

Alex Schweitzer: Yes. It's part of our strategic plan. We have people within the senate working on a variety of subcommittees, infrastructure, if we can utilize our buildings as rentals. We are doing that. We are looking at the whole plan. We have what we call future of the DC initiative that continually looks at staffing, operations in general. That discussion is ongoing with the DHS cabinet and Director Olson. These things are part of what we do and part of the overall strategic plan of the DHS.

Representative Metcalf: I assumed that you are looking at the possibility in providing individual homes within the community rather than this facility that has the power plants and heating systems.

Alex Schweitzer: That is correct. That is part of the excessive costs because there is a big campus. You have to have a lot of support staff and all of that. We are looking at more individualized living situations so we are talking about more direct staff and less support staff.

Representative Kreidt: Going down to the bottom of your list there, the sprinkler system, are these buildings not sprinkled now and you are going to be sprinkling them? Are these updates? I know there are some new federal requirements coming out in regard to that.

Alex Schweitzer: What number are you looking at?

Representative Kreidt: 18

Alex Schweitzer: We have sprinklers throughout the system and a lot of times when there are any changes here it is because of a change in regulation. That one is specifically for that reason. The next handout is dealing with when you asked with the DOCR pays us in the

Tomkins program. Essentially they pay us $4.7 million. The 09-11 it was $4.2 million with a 10% overhead cost that they pay for infrastructure, utilities, and part of the back costs. The total that they pay us is $4.7 million for this biennium.

Representative Nelson: How many beds are in the Tompkins unit?

Alex Schweitzer: There are 90 beds. There are 60 male and 30 female beds. The last handout you asked for is for extraordinary repairs at the ND State Hospital. Those are there for you. We are of course only looking at the 09-11 area there and they are prioritized down to 40.

Representative Bellew: These are all general funds and considered one time funding requests?

Alex Schweitzer: That is correct. That is pretty much what you had asked for in terms of additional information.

Representative Metcalf: When was that building built?

Alex Schweitzer: Around 1983.

Representative Metcalf: And we already have to replace the sewer system?

Alex Schweitzer: That is correct. There is some work that needs to be done on that for sure. What priority are you looking at?

Representative Metcalf: 6

Alex Schweitzer: Yes. That is going on 30 years old. We are talking 25 years.

Representative Bellew: Is that a septic type system or a city sewer system.

Alex Schweitzer: It is our system that will eventually be tied into the city. That is what we eventually will be doing. That is what part of this work is to do. We are actually going from own system into the city's.

Representative Bellew: Does the committee request any other information from the department at this time?

Brenda Weisz: We do have some requests you have asked for that are coming forward to you. We hope to have those to you Monday. I was going to deliver them to the clerk. That would be the question of yesterday of Representative Nelson on the PAR. We are pulling those numbers together for the ISLA and the inflationary scenarios at 4, 5, and 6. If that is ok with you we will drop them off at the clerk on Monday.

Carol Olson: I would just like to encourage the committee to think hard about the requests of the department's budget have been. If you have any questions please summon any member of us down here to answer them. I think you have seen our priorities. I think you know what is important to the department and what is important to the citizens of the state. I think if you look at the overview testimony that I gave and look at Brenda's you can pretty much understand what we have heard from the citizens, what we have picked up at our stake holder meetings, and what we have prioritized in our funding request for instance the medically needy, the ADRC. I think you still have questions about the ADRC. I'd like to clarify that it isn't redundant it isn't going to duplicate any services that we have out there right now. I would ask you seriously to consider what we are asking for in that pilot. Anything else you have questions about please don't hesitate to ask us to clarify them for you. As you noticed, we are here in 4's. We would like to clarify anything you have. I know you have a lot of work ahead of you and we appreciate it.

Representative Bellew: From my perspective I want to thank you and your staff. Your efforts have done a very, very good job. You need to pat them on the back.

Carol Olson: I will do that and yes they are the best staff in state government. They are super and committed.

Representative Kerzman: Could you put together something to show how much it would cost to get a single entry evaluation or assessment put together in the counties so they could assess all the counties. There seems to be a lot of concern about that.

Brenda Weisz: I'm not picking up on what you are requesting.

Representative Kerzman: They have like 3 or 4 different computer programs that you have to go through.

Brenda Weisz: Yes that is our eligibility system. Can I tell you where to find that information? It's on our OAR listing we do have the costs to replace that eligibility system. It's under the 5th category, 2nd page, and 2nd side of that sheet. I believe it's just over 18 million.

Representative Bellew: I think its $3.6 million total. It's $9.3 general.

Brenda Weisz: It's a 50 50 match. It has an additional FTE associated with it to go through the development.

Representative Ekstrom: How long would it take to implement that?

Brenda Weisz: I think what we are looking for is we were counting on a 24 month implementation to do the work. Right now the difficulty with that system change would be with that ITD and their staffing and the majority of the staffing being associated with the MMIS project. Right now there is a lot of difficulty for ITD themselves to do this kind of work. As far as the staffing for the projects that relate to our department with MMIS being so big and taking up a great deal of their resources.

Representative Ekstrom: Is there a smaller bite of the apple that we can take this time to get this started?

Brenda Weisz: We could look at that to see what pieces we could do. There would be a planning phase that you would have to go through. Similar to what we did with MMIS. Right now, this biennium, the majority of the funding is to do the whole implantation of the system. If I

back you up two biennium's we did actually have a planning phase to that. There is planning involved in that number and there are steps that need to happen before you go forward with the development and looking as to what kind of changes you make, what kind of off the shelf there would be and that sort of thing.

Representative Ekstrom: This sort of goes hand in glove with the single point of entry does it not?

Brenda Weisz: I think it would assist definitely. Anything that would consolidate your eligibility systems and anything that would consolidate and make things easier from a processing standpoint would certainly help. The more we can bring things together the better it is and more efficient it would be.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. 1012 Amendments

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 2/4/09

Recorder Job Number: 8650

Committee Clerk Signature

Minutes:

Chairman Pollert: Called the meeting to order and took roll call. Every member present. Am handing out information that was given to me by the health care association (Handout A) and from Mr. Cichy (Handout B) about the dental. Before we get started who could talk to me about SB 2074. It is an autism bill. Just so everyone knows we aren't going to be voting on any amendments today. All we are going to do is ask for amendments whatever they may be. That is what we are going to do. I would hope to have a little debate but I don't think it is necessary for us to have a lot of debate. We will be coming back as a committee to vote on the amendments and HB 1012 on Tuesday of next week. We will probably start at 8:30. We will do the amendments on HB 1012 at that time. If I'm correct we are going to have to have time because legislative council has to write them up and we have to come back. We will have to have whole appropriations give us some time. Hopefully we can get to HB 1014 this afternoon also. I know on the green sheet in the DHS budget there is money in for autism from birth to age 5.

Brenda Weisz: Up to age 5.

Chairman Pollert: Do you know what SB 2074 does? That is about a $3 million fiscal note.

Brenda Weisz: I cannot.

Chairman Pollert: Could you find that out?

Brenda Weisz: Yes we could have JoeAnne Hoesel talk to you. She is at a hearing right now.

Chairman Pollert: Ok thank you. That might help make a decision as far as what is on here. If you remember this is a very informal process. We only ask for amendments and no motions. With that I will ask for amendments for HB 1012.

Representative Ekstrom: I'm asking for a study directing the department to report the uncollected arrayed numbers in terms of total as well as interest accrued . As separate numbers and to report on the practices of other states, which ties in with their study, to consider a new model for our system in ND. I have a little bit of whereas language. What I'm trying to get at is that other states are obviously charging interest. It's racking up to about $275,000 a month. We aren't seeing what I consider is a true number what is owed. Obviously they owe the interest. I just want to know if we are making progress with the collections. What have we managed and not managed to collect. And also to look at the uncollectable and whether or not we are writing that off .

Representative Bellew: Uncollectable? What are we talking about?

Representative Ekstrom: If such a low dollar amount, is it worth our time to try to collect it.

Representative Bellew: Where is the money coming from?

Representative Ekstrom: People who haven't paid their child Support. I'd like to add funds to the peer project which is the mentoring project for mentally ill. We would be adding $4.6 million additional of which $2.7 is general and the rest federal. It's on the OAR.

Chairman Pollert: I just want to make sure that I'm tracing through to what you are asking.

Brenda Weisz: It is second from the bottom on the first page of the OAR sheet.

Chairman Pollert: It is peer support. Could you give me a brief explanation about it again.

Representative Ekstrom: If you remember testimony from the public. We had several folks come in that have been mentally ill. This is an employment program. We pay them to mentor and buddy up with other individuals who have recently gone through mental illness. If you will look at the OAR sheet on the back, the last item is in blue. Centers for Independent living was only partially funded in the Governor's budget with $800,000, I would like to fully fund it. That would allow them to do expansion in terms of sites.

Chairman Pollert: Each side of the aisle has met separately the last couple of days. If we have to bring someone forward for an explanation we will do that. With the $800,000 didn't that include them going into Wahpeton and doing some outreach?

Representative Ekstrom: There is a little more going on with outreach that we had.

Chairman Pollert: I have the amendment on my desk but I forgot it up on the house floor. What my amendment is going to do is for the Developmental Center but what it will do is help with the admissions at the Developmental Center. It would tighten up the admissions because we need to be on a schedule to dropping down the clientele. There will be an amendment on that.

Representative Ekstrom: Are you calling for new admissions or talking about the facts that folks are coming back from the community and re-entering.

Chairman Pollert: It would be both. They would go through a more stringent process. We are trying to get the numbers down at the Developmental Center. That is what those amendments would work on.

Representative Nelson: Adding to the Human Service budget, I would like to have an amendment drawn up for a $2.1 million for assisted living rent subsidy.

Chairman Pollert: Was that an OAR?

Representative Nelson: Yes.

Chairman Pollert: Can you tell me where that is at?

Roxanne Woeste: It's on the back page. It's the second one under provider requested enhancements.

Chairman Pollert: Assisted living and board subsidy? Ok.

Representative Kerzman: I would like to offer an amendment to get a comprehensive eligibility system started. I got some information from the department. To get started we would need a couple of temporary positions that would go away after they get the program up. It would be $100,000 on that. We would have six county members to go through the needs with them which would be about $85,000. They figured the contractor would cost about $500,00 for a total of about $685,000 that would be split amongst general funds. It would be $342,500 each way. It would address a lot of concerns out in the counties if we would try to get the single assessment going. They wouldn't have to have individual sessions for every program. It wasn't an OAR but I think to get it fully run would cost about $18 to try to get something going.

Chairman Pollert: I've gotten some emails on the computer eligibility system. Is that what you are talking about?

Representative Kerzman: Yes if you look at the fact sheet of OAR's and the eligibility system replacement, it looks like a total of $18 million. I just want to see to get something going to look at it by next biennium. I know the counties are pretty adamant that we do that.

Chairman Pollert: When we initially start the groundwork on the computer process, is it normal for us to start with the funding to start the process?

Brenda Weisz: Yes. There is usually a component you have to do some planning before you move in to the whole full fledged product. You need to lay out the groundwork as to what you are going to do. We did that with the MMIS project as well. We had money in the budget to do the planning. The next session we came forward with the development costs.

Chairman Pollert: It seems to me that Cytec was number 3 or 5.

Brenda Weisz: it was number 5.

Chairman Pollert : Do you remember how much money we had to put up front to start with MMIS.

Brenda Weisz: The number that sticks in my head is $10 million. We spent $10 million the first biennium. The plan might have been $5 million. We will check. I think it was somewhere near $5-6 million.

Chairman Pollert: Would it be my suspicion that whoever is here in the next biennium that this eligibility computer system is going to be on? I would suspect that it is going to be in your budget probably.

Brenda Weisz: We will come forward with the request.

Chairman Pollert: How fast would this speed up the process?

Brenda Weisz: This would probably give us a good 6 month start on it.

Representative Kreidt: In regards to basic care facilities and their personal needs allowance, I would like to increase their allowance from $60 to $75. I'm thinking this is going to cost $150,000 in general funds.

Chairman Pollert: When we don't have the exact, I take it you will get a hold of DHS and have that conversation?

Roxanne Woeste: Right.

Representative Kreidt: Number 2 is on the nursing facilities asset limits we all realize that nursing homes are beginning to age. There is a lot of new construction going on . We have an asset limit right now that I feel is a little bit on the low side. I would like to increase the nursing limits for nursing facilities of general funds to $324,506. What that amount of money will do is

allow us when you are building the facility to have the dollar amount when you have a private room and semi private room it would be to increase .

Representative Ekstrom : Would this pull in federal funds too?

Representative Kreidt: Yes a little over half a million dollars. Moving on, in regards to basic care facilities and nursing facilities I want to put in a benefit and wage path for those facilities. This will be for individuals in those facilities that are making $15 and less per hour. More or less directed to CNA's, dietary, housekeeping, and your maintenance personal. Broken out it would be about 75% of the individuals now working in those facilities, around 10,000 employees. Using dollars out of the general funds and out of the health care trust fund to do that. I'm going to use a dollar amount in my amendment of $14 million in general fund and $1 million in health care trust fund. If my memory serves me right we have about $1.375 million left in the health care trust fund. We will have to check that. $3 million was used already in the department's budget in regards to long term care.

Chairman Pollert: If Roxanne has a question she will get with you.

Representative Kerzman: What did you say the wage pass was going to be? An hourly figure?

Representative Kreidt: Something along the $2 range.

Representative Metcalf: As I recall you mentioned basic care and long term care, this has nothing to do with the DD facilities?

Representative Kreidt: No it doesn't. I believe there will be further amendments coming forward in regards to DD.

Chairman Pollert: Do you have numbers basis 50 cents an hour or $1 an hour?

Representative Kreidt: I will be getting those. Right now I am using a $2 an hour figure with this dollar amount.

Representative Ekstrom: Will it be at the discretion of the supervisors at the facilities to decide who gets what?

Representative Kreidt: It will be up to the administrator or supervisory staff. I think we would probably have a way to a degree to track that through the cost reports. We should be able to track that because we would see where the increases are. This is what they would have to do. This would be effective July 1, 2009. This is where we are hurting in these facilities in attracting staff. Instead of going through the regular process of where they receive their increases and inflators. We would want to enable these facilities to plug those salary increases in as quickly as they can and be able to maintain the staff they have. A lot of the facilities, the turnover they have would be a big problem.

Chairman Pollert: So you are going to have a statement of intent as far as how this amendment goes?

Representative Kreidt: Correct.

Chairman Pollert: We know we have oil dropping and that the revenues are dropping as well. In your amendments, do we need to ask for amendments on the 50 cent or one dollar? Are you going to bring that forward so we can have a discussion amongst the section?

Representative Kreidt: Yes I will bring it forward.

Chairman Pollert: Will that be ok? We will have the $2 out there but if we have amendments we can substitute them.

Representative Kreidt: In regards of talking with those dollar amounts right now, I don't know how many of you are aware of this. Looking at the nursing home numbers, approximately around 49% of the facilities are doing contract nursing. They are spending about $3.5 million a year in doing this. I'm hoping that with this amendment and being able to plug in those dollar amounts into those pass through for wage and salaries that we are going to see a significant

amount of this contract nursing come down. We are already paying for that. We can see that number come down significantly. This will offset that amount to some degree.

Chairman Pollert: Could you have the amendment to say it would eliminate contracted services?

Representative Kreidt: We can't say we would eliminate it. It would be nice if we could but if you have a facility out there that is in a real spot and needs staffing, they have to go that direction. I'm hoping that we can give them that amount of money to plug into CNA salaries. Some of the facilities that have nursing staff haven't been able to raise their salaries. I hope they can get to a place where they are competitive and not have to contract for those individuals.

Chairman Pollert: Are contract services and wages both involved in the direct cost of formulas? What would to say if the $14 million passes but the contracted services are still out there, is that a way to still raise the rates? I'm not being accusatory just asking the question.

Representative Kreidt: I can't sit here and guarantee that we are going to eliminate all contract nursing. I would hope that we can eliminate a significant amount. You have to realize that under contract nursing if you are paying an in house nurse $20 an hour and you are contracting a nurse outside of the facility you are paying that nurse $60. If they are driving you are probably paying their mileage and their hotel and everything else. It would probably fall into different categories of your cost expense. Still, if I was an administrator facility and I could give my staff that are underpaid $2 an hour I would make every effort I could to eliminate what contract nursing I am doing. These facilities don't want to do it they are forced into doing it because they just aren't able to give those individuals the salaries they need and deserve in those communities to attract those people to come and work for them.

Representative Nelson: I think the last time this was done was after the money was used for the wage increase. This industry has a turnover in excess of 50%. The last time this was added it was $1.50. On the chart, the turnover declined very rapidly. That is the whole thing. If you can attract and retain nurses your contracts are going to go down. There are obviously areas in the state where your employee opportunities are less. To eliminate contract nursing would be hard to guarantee. I'm certain that if something like this would pass you would see a rapid decrease in contract nursing. I know for our facility in Rugby we have had occupancy at 100%. On a monthly basis we are losing money. It's hard to imagine how this could happen. That's an area that is the most likely place this loss occurs because of contract nursing. This just kills facilities.

Chairman Pollert: We know that there is equity in the state employee funds. I know that when we do that it affects the salary ranges for the nursing homes and the long term care industry . I know there are amendments going to be coming forward. Whatever passes we have to be cognizant of the fact that if we do this for long term care we are going to have problems with DD. We have to keep that in mind with our deliberations as well. In all these discussions, I am going to ask for a discussion on the inflator. If we are going to do a wage increase we have to have a discussion on the 7&7.

Representative Metcalf: I just have a question. Unless I misunderstood you, you mentioned that the state employees will get that raise and so will the DD and long term care. Is that what you said?

Chairman Pollert: No I said if we do a 5&5 and do equity, I know that affects high acres manor and all of them in the Jamestown and Valley City area. Then we have a salary discrepancy between the state hospital and long term care facilities. Then we know we have a discrepancy for opportunities. This is an effect that we have to keep in the back of our minds.

Representative Kreidt: I have an amendment that will be attached to HB 1012 in regards to the health care trust fund. My amendment will say any money from the health care trust fund can only be appropriated by the state legislator.

Chairman Pollert: So what you are saying is that the DHS cannot have that as far as a funding source in the Governor's budget?

Representative Kreidt: Yes that is correct. It can only be appropriated when we are in session and directed to that. Nursing homes would generate those funds. It was put into the long term care. I would feel better that whoever is here as the years go forward that they would handle that fund. There is money coming in continuously and it will for the next 15-20 years.

Chairman Pollert: Roxanne, can the legislator hold off limit trust funds from the Governor's budget and from agencies appropriating them?

Roxanne Woeste: I would have to do some further checking.

Representative Kreidt: This one goes to the green sheet, page 6, number 25. This is the compulsive gambling services. Historically, $400,000 of special funds from the lottery is used to do what we do with compulsive gambling. There was a general fund increase of $300,000 that would have increased it to $700,000. My amendment would state that we would include, instead of the $300,000 the $100,000 to bring the amount up to $500,000 for compulsive gambling.

Chairman Pollert: So you are asking for an amendment for $200,000 decrease in the funding?

Representative Kreidt: Yes that is correct.

Representative Ekstrom: Do you have a rationale for why that is?

Representative Kreidt: Personally I don't think it should be in the budget. I think it should be

in the Attorney General's office. That is almost doubling those funds. Let's give them the $500,000 and see where we go in further sessions.

Representative Metcalf: For the Children and Family Services, they have requested an additional $200,000 be added on the CFS.

Chairman Pollert: Is that an OAR? Or is it for a particular service?

Representative Metcalf: It is not for an OAR. It is for an expansion of services that are currently provided.

Chairman Pollert: Are you talking about health families?

Representative Metcalf: Yes Children and family services.

Chairman Pollert: What segment are you talking about? Last session there was $300,000 appropriated for the healthy families to start in the Grand Forks area. Then they expanded through a Bush grant to Burleigh and Morton County to a couple hundred thousand. Then they were asking for a couple hundred thousand to substitute. Is that what you are talking about?

Representative Metcalf: I am talking about the testimony that was provided to us in open testimony day. It was provided by Lutheran Social Services. That is underneath healthy families programs serving the counties of Burleigh and Morton. They want to expand their services. They have basically testified that they could easily pay for the additional costs with the services through the families that can be saved through early intervention.

Chairman Pollert: Yes I think you are talking health families.

Representative Bellew: On the OAR sheet it is the second to last one. Is this the same thing?

Representative Metcalf: It is in addition to that $300,000. It's to add another $200,000.

Chairman Pollert: Are you saying that you want the OAR of $385,000 plus the $200,000. I know health families had asked for about $200,000. You are showing the OAR plus $200,000. The whole appropriation would be $800 and some odd thousand. Currently last biennium we

did $300,000 to start the healthy family's project. If you add the OAR of $385,000 you are looking for a total of $685,000 or $885,000.

Representative Nelson: I'm guessing that the $300,000 is in the base budget. Their OAR is for $385,000. So we are talking about $685,000 with an additional $200,000.

Representative Metcalf: $200,000 additional above what the OAR has requested.

Representative Nelson: From this wouldn't we be using plus $585,000.

Chairman Pollert: That is what I understand is that it is an extra $585,000. We are looking at $885,000. They are at $300,000 at the base budget. There have been emails asking for an additional $200,000. That would raise it to $500,000. Representative Metcalf is asking for the OAR of the $385,000 with the $300,000 plus he wants an extra $200,000 on to the $385,000. Instead of it being the $500,000 that would equate to the emails that I had received, Representative Metcalf is asking for the OAR to be added on to that.

Representative Nelson: I have a couple amendments. At the State Hospital in their capital improvement line item I would take $1 million from their request. I believe that still funds on their priority list, it funds 1-15 or 16.

Chairman Pollert: Wasn't it for $3.2 million of onetime funding? Are you saying you want to fund priorities 1-15? Or are you saying you would leave it up to the discretion of the state hospital and DHS on how they would want to address that?

Representative Nelson: I would like to see the State Hospital have the discretion to use the funding and have the flexibility to use it as they need. It would be a $1 million savings in this area.

Chairman Pollert: Can I bring Brenda up for a question? This pertains to Representative Nelson's amendment but it doesn't. It also pertains to the economic stimulus that might happen. We don't know what that means. With the capital expenditure of the $3.2 million, there

is $3.9 million in the DHS budget of one time expenditures. If there is money coming on the economic stimulus package could those dollars be used for the capital expenditure projects? My concern is with the economic stimulus package is we are going to throw whatever it is going to be, we will fund more ongoing programs causing more of a problem when the federal government figures they can't keep spending money. They are going to reduce those dollars. We are going to have the wrong programs that we are going to have to use general funds. I'm asking for one time funding. Do you have any idea when the economic stimulus package would be allowable for this?

Brenda Weisz: We continue to work with Office of Management and Budget on the economic stimulus package. One of their budget directors is the lead on the package. There are some categories specifically when you look at the categories that pertain directly to DHS there wouldn't money to that. There are some other categories that have improvements that are combined within those categories that we don't dive in to as much. We will be working with Office of Management and Budget to find out if some of those can extend to areas of those budgets. From the funding that directly comes to us or that they are proposing that will effect DHS programs, the answer would be no for that. However, some of the other categories we aren't sure with. We are still trying to unravel what all of that means and what kind of requirements for any of the other improvements that they are talking about in other categories.

Chairman Pollert: We know we have a long ways to go in a short period of time to see how this is going to unfold. This is probably going to unfold in the second half so we have some direction.

Representative Nelson: With that having been said, I will ask for an amendment to be prepared to reduce and take out the resurfacing and paving line on that priority list for $300,000. Then maybe there is some better understanding that will take place .

Chairman Pollert: Are you talking $1.3 million.

Representative Nelson: That would be the total. That line item would be removed completely in this amendment. It does take away some of their flexibility. I have another. At the Developmental Center under the capitol improvement I would move to reduce by $150,000 from their priority list as well from capital expenditures.

Chairman Pollert: Are you saying that it is at the discretion of the head of the developmental center? The one stop center and DHS?

Representative Nelson: Yes it is. I believe it would allow about half of their priority list to be funded.

Chairman Pollert: I think their expenditures were about $700 and some thousand dollars. I know there were some roofing projects in there that we would do if they are leaking.

Representative Nelson: Although they would have the flexibility to choose which projects they go forward with. Certainly it is my understanding that the funding would be available for the major roof projects.

Chairman Pollert: So you are still going on with the priorities they asked for with the listing of Alex.

Representative Ekstrom: We have several stand alone bills. The money is in the DHS budget. All we sent to policy committee was the policy part. When are we going to see those things being plugged back into this? This is certainly going to affect our ability to make a judgment on where we are going with this thing.

Chairman Pollert: If I'm correct, it wouldn't be my intention to ask for the removal of them. Those have already been removed from the DHS budget and put into the policy committees. If the policy committee comes with a do pass it will come to the appropriations. If it comes out with a DNP it will go to the house floor.

Roxanne Woeste: I believe that is correct.

Representative Ekstrom: What I would be asking is that if we have a sense of timing on that right now?

Chairman Pollert: The fiscal notes are all supposed to be out of the committees today. Either Friday or Monday they are supposed to be out by then. If I understand right they are still being pushed to pull the fiscal notes out of the committee's today. By Tuesday we should know. We may have to ask if there are amendments on that or what we need to do with the time. That is what we are trying to do. The money is still in the DHS budget but in a way it isn't. I think it is just going to go to the whole appropriations because we are going to run out of time. Those three we are going to have to keep in the back of my mind. There is a dementia bill out there for about $1.2 million. Since they aren't in the DHS budget right now we don't have to account for that?

Roxanne Woeste: The dementia bill is a separate stand alone bill. I believe it is in the Senate right now. No it is HB 1043 so it is in the house. It might be coming your way. I don't believe it has any tie in to the existing budget.

Chairman Pollert: That is why I'm trying to get a feeling. I want to know what SB 2174 does for the autism. I think it is Sen. Lee's. Is that related to the autism waiver on the green sheet?

Roxanne Woeste: I believe that SB 2174 doesn't directly relate to the autism waiver. It may do so indirectly. It creates an autism spectrum disorder task force. It lays out who should be in that task force. The members are supposed to be appointed by the Governor who gives the task force specific duties and responsibilities. The appropriation that is tied to that bill is $3,000 from the general fund. It goes from the department of human services. It is for expenses relating to the task force itself.

Chairman Pollert: Someone told me it was $3 million.

Brenda Weisz: It was. It started at $3 million. It was amended down to $3,000.

Roxanne Woeste: I think it is introduced at $5,000. It just relates to expenses associated with this task force.

Brenda Weisz: What you are referring to is an individual that worked on the bill did put a budget to it to just under $3 million. That is probably what you saw.

Chairman Pollert: I didn't see it, I was just told. We are trying to find out what is where.

Brenda Weisz: Initially they designated the health department for the oversight of that bill. They then switched the fiscal impact.

Chairman Pollert: The autism waiver is $450,000 some dollars on page 5 of the green sheet. What is the objective of SB 2174. If the objective is to try and figure out what the task force should do, then my question would be why should we do the $450,000 of autism and the FTE if we have a task force trying to figure out which direction we should go.

Brenda Weisz: The purpose of where the department went with their request was actually to provide the services to the children that would be diagnosed with autism and then would qualify under the waiver. Ours is services driven. To provide the services for the individuals that would be impacted. The other bill talks about establishing the task force to oversee that I would imagine. We would work with what the families are bringing forward as to what they are seeing with autism.

Chairman Pollert: I understand that. I know that you are a lot smarter than I am with the services. Are we getting the cart a little before the horse when we have a task force out here? Just for a little further discussion I am going to ask for an amendment.

JoeAnne Hoesel: I will give you some information on how this evolved. The Department of Human Services pulled together a group of stakeholders last spring. That was to provide us some guidance on how we address the autism issues and how it can be dealt with. Out of that

came the request for an autism waiver for 0-5. In addition, Congress provided funding to Minot State University for funding that deals with school age individuals that have disorders on the autism spectrum. The autism task force formalizes a group that is already meeting on how the state of ND needs to address the areas of autism spectrum. These are areas that have already been identified. We have the transition age group that we have not addressed. The 16-24 year old that has autism spectrum disorders. We also have adults that have autism spectrum disorders. We have not really targeted our attention. That task force will not only provide us guidance on how we write the autism waiver. They also provide guidance to Minot State to provide guidance to how they are addressing the school age so all the pieces fit together. I think this is a continuation and making sure we are all on the same wave length and not having a conflicted system.

Chairman Pollert: I'm still going to ask for that. I take it this must be Sen. Gary Lee and not Judy Lee? I'm still going visit with the policy committee. I'm going to have the discussion. I'm still going to ask for that.

Roxanne Woeste: I believe so but I think we got caught midstream. You started your amendment but I don't think you completed it. Do you want all of your funding out for the autism waiver? Is that where you are headed?

Chairman Pollert: On page 5 on the green sheet it is the last paragraph. $450,724 I want a chance to talk to the Senators to see the intent. I just want to have the discussion before I get to there and the talk to Sen. Judy Lee as well.

Representative Nelson: So if I understand you, your amendment is to eliminate that?

Chairman Pollert: We are going to have a discussion. That is what it is going to do, yes. That gives me a chance to talk to the people I need to.

Representative Wieland: It is my understanding that within the department they have some flexibility in how to utilize FTE's. There are two FTE's in here that I would like to take out and then we can have the discussion on it to see whether or not that they can be replaced by existing FTE's that will not be filled. One is on the green sheet under management, Item 1. There is $56,724 in general funds. Total is $129,055. That is the auditing standards. The other one is on page 5, under 16, the waiver for home and community based care. There is an FTE position in there. The general and the federal both are $66,872. I'm not asking to remove any part. I'm just including the FTE.

Chairman Pollert: Are you talking about the autism waiver? I already asked for that one. Your amendment would take out the FTE but keep the autism in?

Representative Wieland: That would take out the FTE but keep the autism in so there is a difference.

Chairman Pollert: You talked about an FTE about grant writing?

Brenda Weisz: That was a .5 FTE

Chairman Pollert: Where do you have that under the section of DHS?

Brenda Weisz: It's not on the green sheet under administration and support.

Chairman Pollert: If we don't ask for that amendment it is still kind of in there then?

Roxanne Woeste: That's not a new .5 FTE. Perhaps they are adding money to an existing position that has been funded.

Brenda Weisz: It's a realignment of staff to meet the priorities of the department.

Chairman Pollert: You haven't gotten the general fund as to what that would do?

Representative Wieland: On the waiver the general fund would be $66,872.

Brenda Weisz: To clear up the confusion between 2174, we mixed it up with 2198. SB 2198 is actually a TBI bill. That bill has an appropriation of $2.6 million to the DHS for TBI services.

The reason that there is additional service dollars in that bill is the result of developing a registry for TBI with the thought process that there would be others that once they saw registry and were on the registry or realized that there would be services available, more would come forward. That was the confusion with the $3 million for 2174 it is actually 2198 and that one has two appropriation sections. That bill 2198 has the two sections and one is for $40,000 and the other is for $2.6 million.

Chairman Pollert: I want to have an amendment drawn up for a discussion. I need to ask a question. Anything with global health whether it's at the state hospital or the human service centers; I think that amount was $4.3 million. We do have some discrepancies on the green sheet with some items and also from what DHS says is an example, the CIL's and the community for independent living services. I can't remember what that number is. All the testimony showed an increase of $800,000 for CIL's. I think the green sheet showed $900,000 some thousand.

Roxanne Woeste: It is $800,000.

Chairman Pollert: What I'm saying is with the $4.3 million that is what is pulled off the green sheet. Anything related to global health initiative, I'm asking to pull it. The whole thing. The Cooper House staffing, because of how it was written in the testimony, is that part of global health or not part of global health?

Brenda Weisz: It is part of global behavioral health. The staffing that we had built in that global health capacity issue OAR was a contracted FTE. It is included within that number. Your number is correct with general funds. It is $4.3 million. That is what it should be. The contracted FTE is all we had related to Cooperhouse.

Chairman Pollert: So there is nothing else for Cooperhouse in the budget? Let's say the staffing stays in for the Cooperhouse. Does there have to be an amendment drawn to make sure that all the contracts are signed before this happens?

Representative Ekstrom: What I would suggest is let's put the Cooperhouse as a standalone. Then we can put that instruction into the language so that they indeed have to have all their money in a row. The local commitment on this has already been done. They have already done demolition work. They are a long way down the road.

Chairman Pollert: So your amendment would be a separate one as far as the Cooperhouse? Then we would want some language as far as that goes for the amendment to make sure that everything is done before we commit ourselves.

Representative Nelson: I'm confused as to what the dollar figure would be for the Cooperhouse contract. I had $279,178 as one. I don't' know if that is right or not.

Brenda Weisz: It is 24/7. I need to check my notes. I have it as $315,360.

Chairman Pollert: Are there further amendments to HB 1012?

Representative Bellew: This pertains to the green sheet again on page 6. This is just a discrepancy I saw between Legislative Council and DHS. Number 23 they have listed $323,921. I think I wrote it down as $308,496.

Roxanne Woeste: The difference could be the compensation package. I've noticed on some of the schedules. Sometimes there is a minor difference. The numbers on the green sheet would include the 5&5. Those numbers were taken right from salary reports.

Representative Bellew: This is the one FTE position with background checks for child care providers.

Brenda Weisz: We get a sheet from Office of Management and Budget that tells us what the Governor's recommendation is for our FTE's and what they add in general funds. The amount

that the Governor's office added for us is $308,496. That is what I would have added for general funds. On top of that they do add the salary package. We get the number from Office of Management and Budget before that and they give us a separate number for the salary package. For the 5&5 on those two half time positions which equate them to a 1.0 FTE that would have been included in the commentary from when Tara Muhlhauser did her overview. It would be within the difference between the green sheet number and my number that the 5&5 would have been reported in a category where we tell you what the 5&5 would be.

Representative Bellew: Is the number on the green sheet right or not?

Brenda Weisz: Both numbers are right. The reason that I will report to you exactly what is added to that position specifically is often times when we go through the legislative session there are adjustments often times to the Governor's salary package. We keep those numbers separate so when you actually go in and do an adjustment. If you would change anything in the 5&5 we know what those numbers are. Let's say it changes to a 7&7 then we know which ones to increase.

Representative Bellew: I'm going to request that $15,921 be taken out of that.

Brenda Weisz: If you take that 15 out you are taking that 5&5 out but you will have enough to cover that.

Representative Bellew: On the medically needy budget levels I would like two amendments to raise the rates to 65 and 75%.

Chairman Pollert: Currently in the DHS budget it was 83% of poverty. You said that was 75% and 65%.

Representative Ekstrom: Do you have any sense of the dollar figure on that?

Representative Bellew: I don't at this time.

Chairman Pollert: We are trying to get the dollar figures. You said that it was 65% and 75%?

Representative Kreidt: I don't have an amendment I just want to make an introduction. Today is National Cancer Awareness day at the capitol. My son and his wife and three of my grandchildren are here. One of them is a cancer survivor who is Anna. They are here for the day from Dickinson.

Representative Bellew: On the OAR, number 2 it says the capacity and DD case management and 4 new employees. I want an amendment to remove that OAR.

Chairman Pollert: On page 7?

Representative Bellew: It is the 2nd one down. That does correlate with page 7 on the green sheet. According to the OAR it is $201,252.

Chairman Pollert: The green sheet shows $235,000.

Roxanne Woeste: I believe the difference is the compensation package. When I remove positions I take all the funding associated with that position.

Chairman Pollert: We have a vacant FTE listing. If you remember the last biennium we asked for an underfunding of salaries of $1 million. I'm going to ask for an under funding of $2 million. If you want to know how I got that figure, basically all I did was I took the vacant FTE's. There was 114 on the list and 40 got filled. All I did was take the remaining 74, took that and divided it by the general funds and did about half of that. It comes out to pretty close to $2 million. Same as always, that money is left up to the discrepancy of DHS how they want to do that. There were 2 $1 million deals.

Representative Ekstrom: In this current budget I know that we made up for underfunding issues. Can you tell me that number?

Brenda Weisz: For management and program policy it was $600,000. Then for everything else it was $2 million with a total of $2.7 million . There was a general reduction made to the

human service centers, anywhere between $800-$100,000. That wasn't said to be a salary underfunding but it was a general fund reduction. Can I ask a question on the vacancy map. With the 40 positions that were filled, did you remove the general funds associated with those filled positions then had a remainder of general funds?

Chairman Pollert: There are 114. I took out the 40. There were 2.136 that I took away from the 6.13 which left 3.970 of the 74 unfilled and I split it in half.

Brenda Weisz: The institutions are already underfunded by $1.3 million so that would double underfund them.

Chairman Pollert: I understand that.

Representative Wieland: This would be on page 7 of the green sheet. It refers to OAR's. It's the young adult transition services. One is for Southeast at $426,844. The other is for Westcentral at $750,000. I'm pretty sure the Westcentral is brand new. I'd like that in two separate amendments to discuss removal.

Chairman Pollert: So you want to have 2 separate amendments?

Representative Wieland: Yes. Those are two OAR's and I don't know why they would be separately listed on the back page of the OAR sheet. The other one is to put a pass through dollar amount for the workers at nursing homes. I would like to do the same things for DD's. I'm hoping we can work it out so the dollar pass through would be the

Chairman Pollert: So are you saying you are looking for the $2 added on?

Representative Wieland: We can put $2 in. I don't know if we can handle that much. We are getting numbers for 0.50, 1.00, 1.50, and 2.0.

Chairman Pollert: So we will have the same discussion with DD as we would for long term care. Do you have the maximum amount it would be?

Brenda Weisz: It's on the backside of the page. There is a DD provider increase. The general funds are $14 million. That is for $2. We are doing work on the other increases as well.

Chairman Pollert: So we don't need to ask for the amendments because we will just have that discussion as we get in and discuss these two amendments?

Representative Wieland: That is fine.

Brenda Weisz: We will still work the numbers.

Chairman Pollert: We will ask for those numbers before we get started. These have got to be separate amendments. We had this study on the reimbursement for hospitals, physicians, ambulances. I am going to ask for a discussion. The hospitals were put at 100% of the costs. Did that get into the Medicare level. What did that do again? It's 100% of the standardized cost reports. I'm going to ask Roxanne to get the information on 80% of that. It would be a 20% reduction, and also a 90%. I could go back to the sheet and tell you how much that would approximately be. That is going to have to come from Brenda, Maggie, and Roxanne to work out. If you take a look we have a good sheet to go off of. It was handed out earlier.

Representative Ekstrom: That's $8.1 million?

Chairman Pollert: Correct. I'm not talking the inflation factor. Beings we are on hospitals I am going to ask for the information on the rebasing of 15% physicians, based off of the 25%. On this report the rebasing was 25% of the costs of what they got. Currently, physicians are at 51% of costs. The Governor's budget put them at 64% of costs. I also want to find out on the same page, I want one at 50% of the report and 75% of the report. I'm saying there is $153,836 of general funds. I want to know what 50 and 75% of that is. I'm going to want an amendment on ambulances. I'm going to do the same thing as the chiropractors 50% of that report and 75%.

Representative Ekstrom: Since you have it in front of you can you give me that dollar amount?

Chairman Pollert: The general fund for ambulances was at $743,710. My notes show that it puts them at the Medicare rate. 50% might be a little strong. It showed that $743,710 general funds. I would want it as a general fund dollar amount. We did that last time. We said here is the money and the DHS has to be in contact with that dollar amount. If you take a look at the reports that were handed out, there were a couple of items at 114% handed out. I want them to stay intact where they are at. I don't want to re-reduce them. We would leave it up to them like what we did the last biennium's.

Representative Bellew: What I would like an amendment to read is put the dentists back to what the OAR request was. The OAR request was 214 general and 365 federal for a total of $580,000. The second part of that amendment says all the other rebasing entities are the 7&7. I'd like to do that at 0 and 7. It is on page 1 of the OAR. If I remember the testimony right it brings dental services to 60% of bill charges. The second part is since all the other rebasing entities were at 0&7, I want the dentists there too. In the bill they are at 0&7.

Chairman Pollert: That is a general fund amount on the ambulances. It would be a schedule thing. Then the dentists would be at 65% of bill charges and 70% of bill charges.

Representative Wieland: I would like to get up to date on those rebasing amendments. Could you run through those one more time?

Chairman Pollert: I'm asking for is the hospitals rebased at 100% of the standardized cost reports. I'm asking for 10% off of that and 20%. So it would be 80 and 90% of the cost reports. On the physicians it was based on 25%. I'm asking for 15% of that cost report and 20% of that cost report. Then on chiropractors they had a different format. I'm asking for 50% and 75%. Then ambulances were 60% of the cost report and 75%. Based on the general fund dollar that

they would be in conjunction with. Everyone was handed out the sheets for the inflators of 7&7 (Attachment C). Does someone want to have an amendment for everything out at 6 or 5%.

Representative Bellew: I would like to call for three amendments. I would like to see the 6&6, 5&5, and 4&4. I know we will have a good discussion.

Chairman Pollert: With what Brenda handed out, the information is on these sheets. I have also asked for information on what they think the CPI is going to be for the next biennium. It is in attachment C. If you did the averages out you could pull it out. There was about 8/10ths of a difference when I did the averages. Over the amounts, the average came out to 2.0 or something like that. I do have that number somewhere. The CPI was 2.8 when you averaged out the years in that form. I'm trying to get information on what the CPI is going to be.

Representative Ekstrom: Over the years we have seen the budgets have increased at particular percentages. I think I'd like to see some historic trend on how we have increased year to year. It is certainly variable depending how much money and revenue we have in terms of what we were able to do each year. I would like to see that perspective. If you are looking at this as a whole, if we do this at the particular rate, it is similar to what we have done in the past. It is reflective of what has been sustainable. I think that's a word that we are going to hear a lot of in the next few years. That is my biggest concern in this entire budget is as we do things, we know what happens when we come back here. We have the cost to continue. We have to make sure of that. I know the oil revenues are variable. I know that oil will go back up but when is the question.

Representative Kreidt: Following along on Representative Bellew's line on the 5&5 and 4&4 we might as well do 6&6.

Chairman Pollert: Yes he requested that.

Representative Kreidt: I thought he missed that one. I thought he only did the other two.

Chairman Pollert: I know some of us have meetings soon, if I'm correct did I say we could finish this in about a half hour, 45 minutes this afternoon?

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 2/4/09

Recorder Job Number: 8660

Committee Clerk Signature Morgan Bennett

Minutes:

Chairman Pollert: Opened meeting for the afternoon. If I'm correct we are asking for amendments for HB 1012. We will finish them today and I sure hope we will get to 1014.

Representative Bellew: This is on our green sheet, page 6. Its number 24. I would like that amendment to pull all of the general funds. I have another one on that same page. This is going to be very controversial but we are going to ask for the amendment anyway. Number 21, the Centers for Independent Living, with the increase of $800,000 general funds, I would like to remove $400,000 of the general funds.

Chairman Pollert: They had the one earlier this morning to add to it, now you are saying you want to go to where?

Representative Bellew: The total amount I would like to go to is $400,000 in the budget. Right now in the Governor's proposed budget there is $800,000. I would just like to remove $400,000 of the total.

Chairman Pollert: It's written at $980,000 on the sheet and you are saying that you are going to reduce that on half.

Representative Bellew: I'm going to request an amendment to reduce that in half.

Chairman Pollert: I know the green sheet says $980,000 but it would reduce the $800,000 to $400,000 in the Governor's Budget.

Representative Bellew: That is correct.

Representative Wieland: I have two proposed amendments that are really an option. One would be to address critical needs with enhanced apting which is OAR priority number 5. I'm not sure how that is worded or set on there. The amount is $3 million, but $1.168.183 is general funds.

Brenda Weisz: I think if you are listing on the OAR listings it is on the back page under provider enhancements. In the middle of that grouping there is one called DD staffing to meet critical needs. That is the OAR that is being referred to. The amount is a little higher on this sheet.

Representative Wieland: That is correct.

Chairman Pollert: You are talking the $2.3 general funds?

Representative Wieland: Actually I'm talking about 50% of that. It is ½ of the OAR. You are just taking 50% of that which is the $1.1 million of general funds. I have extra copies if you want them.

Chairman Pollert: We probably should have that. Its $1.1 general so about $3 million total?

Representative Wieland: Well yes. The total is $3.158,958. As an alternative to that with a connection to that this would represent one year of a loss to the Ann Carlson Center. This would be in connection with that. This would be the other option. To enhance critical needs with the enhanced staffing that would be $438,900 of general funds and a total cost of $1.186,857.

Chairman Pollert: We will discuss both amendments.

Representative Wieland: It would be one or the other.

Chairman Pollert: Brenda could you come up to the front? This is more of a discussion than anything else. On the green sheet ,the $3.5 million Bank of ND loan that was put in there in case we needed to access those funds, didn't have to happen? I notice on the green sheet it shows and addition of the $3.5 million for general funds. Then it shows a reduction. Its number 5 on page 5. It's 16 about halfway in the middle. I just want to have a discussion a little bit why would it be in the base budget?

Brenda Weisz:

So are you saying that we didn't have to access that. You are saying that we had to have to continue the costs for the DD. Because you have the authority to float between line items that is what you were doing. The case loads didn't go over but the costs did.

Brenda Weisz: When you prepare a budget you have to start and say what the total costs to total costs are. This time the

Representative Wieland: Explain to me that when you borrow money and pay it back, so you aren't paying it back with general fund dollars?

Brenda Weisz: We aren't borrowing any money, we don't need to.

Chairman Pollert: I thought we only needed the $3.5 million in case the DD didn't need the $3.5 million. My question deals with the language we put in the DHS budget bill last session dealing with the DD providers.

Brenda Weisz: This is a rough example. If we are talking current biennium and let's pretend for the DD program there is $100,000 cost to run the whole program. To fund it would cost $97,000 of federal funds. It would really need $3,000 of general funds but we took those general funds away and put a bank loan in its place. That is why it should say total, federal, general, and other. Now we are in to the next biennium. We have costs to continue of $3,000 which is a continuation of the year 2 inflation. Now when we develop the DD budget it costs

$103,000 for the DD budget. Let's say nothing changed with the federal funding. That is $97,000 of federal funding. Since we don't have a bank loan available, the rest would come from general funds. That is why you have the funding shift on the green sheet. It costs $103,000 to do the program. You only have $97,000 of federal. The remaining 6 has to come from somewhere and if we don't have a bank loan it comes from general funds.

Chairman Pollert:. You are saying that we had to have the $3.5 million to continue the costs for the DD and because you have the authority to float between line items that is what you are doing? If I'm correct the case loads didn't go over what we thought but the costs did.

Brenda Weisz: Right. For DD we won't actually need the full appropriation either because we didn't have to replace that $3.5 with general funds. That is attributed to the case load comment that you made. When you prepare a budget you have to start and say what the total costs for total costs are and you have to fund it with your funding sources available. This time the funding source that was depicted to be used for the match was the bank money for this biennium we are working on for 09-11. There is no bank money so you have to fill the difference that the federal government won't pay with general funds.

Representative Wieland: Explain to me that when you borrow money and have to pay it back, you aren't paying it back with general fund dollars?

Brenda Weisz: We aren't borrowing any money. We will not borrow money. We do not need to borrow money.

Chairman Pollert: They don't need to borrow the money. I'm questioning why the green sheet needed to have the $3.5 of general funds and the $3.5 out.

Brenda Weisz: It's a funding shift. That's all it is.

Chairman Pollert: I'm probably missing something. You didn't need it because of the case load but you still use the general funds from that $3.5 million to fund the DD because of the

increased costs?

Brenda Weisz: We are mixing apples and oranges. It's more of an authority issue. Right now for the DD loan fund, when we left the session last time we replaced general funds to the tune or $3.5 million. It was a replacement of general funds.

Chairman Pollert: I thought we only needed the $3.5 million in case the DD didn't need the $3.5 million.

Brenda Weisz: What happened in conference committee was that there was a disagreement on the case load and what the cost would be for DD. Instead of cutting the federal and general and taking both pieces out, there was a funding shift to say that we are going to take the general funds out and replace it with a bank loan if indeed that case load reaches your level. It wasn't a total reduction to the DD program it was a funding shift for the general fund part. In total for authority that was anticipated to be needed was $100,000. We broke down and did it whatever way was improved. We still need $103,000 of appropriation authority to fund our DD grants. This is how it breaks down. When you go from budget to budget you have 0 general funds making up authority but you need general funds for next year it is going to be an increase. If you have $3.5 million of other authority and to go forward it is a reduction. That is why it's showing up. We were both right last session. We didn't need the $3.5 but we needed a little. If you wouldn't have put the loan in we would need up to $1 million of that loan. Since we have turn back in other areas that is why we won't access the loan.

Chairman Pollert: So the case load is right but we did have some?

Brenda Weisz: We were down on the case load but it was pretty close.

Chairman Pollert: We still had some costs in there.

Representative Kreidt: We are using that $6,000 moving forward figure. To me it looks like we didn't access the $3.5 last time. We are going to access it this time?

Brenda Weisz: There is nothing in the other line that is a zero. We aren't accessing it.

Representative Wieland: My question remains then why do we need to keep it in the budget. If we aren't going to access it and not going to use it then why does it need to be in the part of the overall general? This to me is still general funds. It isn't called special funds.

Brenda Weisz: It was this biennium.

Representative Wieland: You have it listed on the green sheet under general funds.

Brenda Weisz: Right it was other funds this biennium.

Representative Wieland: In this coming biennium you have it listed under general funds but you aren't going to access it?

Brenda Weisz: I'm going to access general funds I'm not going to access the loan.

Chairman Pollert: You are going to access the $3.5 million because you need that because of the increase costs of the DD. It has nothing to do with case load utilization because that came out to what we thought. The costs were still higher. So did the authority for the bank of ND sunset at the end of June 30, 2009? Did we have that in statute that we could do that?

Roxanne Woeste: It does. The section that allows for the authority to get the bank loan is for the biennium in 2007-2009.

Chairman Pollert: Ok. Thank you.

Representative Kreidt: The way that it stands if you really wanted to tomorrow you could still access the $3.5 million?

Brenda Weisz: No I can't. I would have to go to the budget section.

Chairman Pollert: They are expecting turn back of $22 million of which a little over half is the Medicaid. They wouldn't need to do that.

Representative Bellew: On page 7 on the green sheet, I would like an amendment to remove the FTE for the program coordinator position for the Partnership Program at the Southeast Human Service Center. Its number 4. I don't think I have asked for that one yet.

Chairman Pollert: What does it pertain to?

Representative Bellew: It was an OAR, the 3rd on the sheet.

Chairman Pollert: Can someone explain to me what that is about?

Brenda Weisz: That was an addition because of the partnership case load at the Human Service Center at Southeast. It was in excessive of how the staff can handle that. We had to bring temporary on to handle children with serious emotional disturbances. It was to accommodate a case load issue at the center.

Representative Bellew: On the same page number 6 on the other FTE I would like to remove the position with the related operating expenses. I just have a few more. Also on the OAR list they have the option for personal care tier 3 for $1.21 million general funds. I would like the amendment to remove that.

Chairman Pollert: That is the one that I'm just going to say goes from 8 hours to 10 hours.

Representative Bellew: Right, that is my understanding too.

Representative Ekstrom: They had a specific number for how many individuals that would be able to come back out of a nursing home and back into their own homes, can someone answer that at all? What is the specific number?

Brenda Weisz: What we have in the budget is 27 individuals would qualify for the third tier. I think we talked about some of those would avoid nursing home placement but I don't know if we said how many would come out of a nursing home per se.

Representative Ekstrom: I will research that a little further. I remember specific testimony that said there was some number of people that would avoid nursing home care and the potential of some people coming back to the community.

Chairman Pollert: Would you have taken into consideration on the nursing home bed numbers tier 3 for personal care. If they were going to go under this program, would that have reduced the beds in the utilization case load numbers?

Brenda Weisz: Based on the timing of when the Oar is submitted and when the budget is submitted, we will check with Maggie as far as how many would come out of the nursing home. The OAR was added after the nursing home budget was submitted.

Representative Bellew: During the presentation I noticed the travel expenses have increased significantly, a total of $772,00 department wide. I want to allow half of the travel to $386,256. I know it is not all general funds either. To me that is an excessive amount of increase in travel.

Representative Ekstrom: There are a number of them where their travel costs actually went down. I have been doing some research on this as well. Do you only want to apply it to them ones that have increased?

Representative Bellew: Yes.

Chairman Pollert: Could it be said that instead of traveling expense that there is reductions in $386,000 somewhere else even though it will also hit. We will have the discussion because you asked for the amendment. When we talked about vacant FTE's they automatically look at the department's and how they want to spread that out.

Representative Bellew: In the administration overview they said they were going to give blackberry's to their employees. I'm not sure the state taxpayers should be funding blackberry's at this point. They didn't convince me that if we gave them their blackberry's that

they would reduce costs in any form or fashion. If I got the figure right the 16 blackberries would be $64,732.

Chairman Pollert: I'm not bringing this up to argue with you but we will have to have them come forward. Maybe we need to have them give us a discussion. I thought I heard them say that they aren't charging for the use of them or they have some that are per shared cost or something. We will have Brenda come explain that again. Are there any other amendments? I want to bring up case load utilization. We will get into explaining it. I don't know what your side looked at. We took a look at it. What we went through on the case load, what we are going to ask for on Medical Services when we look at case utilization it came out to about $9.6 million. I'm talking about inpatient hospitals, outpatient physicians, we did not touch drugs or SCHIP or dentists. Most of it we found. We are going to have to have a discussion on inpatient hospital and outpatient and physicians when you look at the case load numbers.

Representative Ekstrom: In that discussion as we move forward, they do have a review process in terms of utilization. There is an audit mechanism that allows them to say that this was an appropriate use of medical services or not an appropriate use. I want to have that discussion as well. We may need to hear from Chip Thomas or some of the others.

Chairman Pollert: On the whole long term care, case load utilization, if I have these figures off because I know they are going to change, I show about $5.6 million of case load utilization on nursing homes when looking at beds.

Representative Bellew: That's not just nursing homes but the whole long term care.

Chairman Pollert: Nursing homes, personal care, beds, basic care, age disabled, TBI waiver, TCM, and PACE. There will be one more amendment coming I just have to get my notes caught up. Representative Ekstrom are you going to want to have the same discussion on long term care?

Representative Ekstrom: Yes. It said the department has strict guidelines as far as eligibility for these services and how they proceed. I don't believe that we necessarily have many folks that are getting services that they should not. I think we have to see what the department has done to try to contain costs.

Chairman Pollert: Correct me if I'm wrong. We did not touch their increase in costs of the continuation of the 4&5. We did not touch the 7&7. On very few items did we touch their growth. It's perspective and very subjective when you look at the detailed of services. They knocked it down by the months. They had in highlighted areas which ones to use. We went and went through 12 months. We went through 9 months. Depending on which 9 month or 12 month those numbers are drastically different. I want to have a discussion. It has nothing to do with the 7&7. It has nothing to do with the 4&5. It has nothing to do with the growth you put in there. It is a discussion of how at the end of the last 9 months in patient hospital, their numbers have dropped drastically. We should have that discussion to see if that is correct or not. That is why it's there. It's not about the costs that you are asking about. Basically the numbers were given to us off the charts. On the DD grants line item, that is ISLA's, ICFMR's, day support's, MISLA's, Infant development, in home support, $2.746 million. It's all on case load utilization. The same thing, we didn't look at that. We honored the 7&7, we honored the 5 on most of the growth. We did look at the growth on the few of them. On the long term care and DD. We did not look at the growth or if there was anything as far as the medical services if I'm correct. Why those amendments are going to be brought forward, I know it's subjective as well. When we look at the turn back we have to have the discussion as far as how much the turn back is on Medicaid. When you look at the whole total budget it wasn't that much. When you look at the millions of dollars they go through but it's still a discussion we need to have. Having said that, any other amendments to HB 1012?

Representative Kreidt: Starting out as some information and an amendment to follow up, something that has come to my attention in regards to child support.

Chairman Pollert: Mike's not here so Brenda that will fall on you. Can you come forward on a question of Child Support?

Representative Kreidt: We are doing the amendments today. If I can't get the answer can I bring this amendment forward after we receive the information we need?

Chairman Pollert: You have every right to bring whatever amendment you want to bring forward.

Representative Kreidt: In regards to child support and over payments, it's my understanding that an individual makes a substantial overpayment on a child support situation due to some circumstance or through documentation or fact finding. It is identified that he has made an overpayment. My understanding is that the state is unable to pay that individual back that amount of dollars. That is my first question. If that is fact, that is where my amendment would follow up in regards to my question that we would be able to refund that individual that overpayment on his child support.

Brenda Weisz: I don't know the exact answer or circumstance. If they owed that might have some say as if it is overpayment.

Representative Kreidt: The understanding I have is that this person is owed this money. They know they owe him a considerable amount of money that he has overpaid. The system does not allow them to pay him back. They can take the money in but they can't spend it out.

Brenda Weisz: I will find out for you. It doesn't sound quite right.

Chairman Pollert: If you can get Mike Schwin to get a hold of Representative Kreidt to find out of there is a mechanism in place. He is being told by someone that it is not in place.

Brenda Weisz: Would you be able to talk specific to him. Maybe he knows something about the case itself.

Chairman Pollert: Is there any child support bills out there? I hate talking policy when we are dealing with money but this is kind of a policy thing too. If there is a problem, of course it would always be good to throw it on an amendment on a bill somewhere.

Brenda Weisz: Are you asking if there is any policy child support bills this session? There is. HB 1175 is a department bill. Can I ask a question about travel. You didn't state a general fund amount. A lot of the travel is federally funded, the increase is federal funds. Were you going to state a specific general fund amount or pro-rate it based on the percentage that is actually federal?

Representative Bellew: Pro-rate it. I don't know the specific general fund because I don't know what it is.

Brenda Weisz: For example, if 75% of that increase is federal, which predominately most of it is federal dollars. The increase then your reduction is 25% general, 75% federal.

Representative Bellew: Correct.

Brenda Weisz: We will look at the ratio.

Chairman Pollert: Any other amendments to HB 1012?

Representative Bellew: Hopefully this is the last question. The $900,000 increase for senior service providers, where exactly does that money go? That goes to the providers and the providers dish it out? It's not specifically for food though is it?

Brenda Weisz: It is actually specifically for food that goes to a provider. It's in our aging services budget area. We work with 8 regional contracts for the meal delivery across the state in the 8 regions. That money passes through to them to cover their costs for delivering their

meals, home delivered meals or congregate meals at the meal site. It goes directly to the cost of the meals.

Chairman Pollert: Some of them are for senior citizen centers and stuff like that?

Brenda Weisz: They are all basically through the senior centers except for some areas. I do know they contract with the restaurants that provide those meals without a center.

Chairman Pollert: Any other amendments for HB 1012? Committee I want to switch gears if these are all the amendments. We can still ask for more. We are going to have a long discussion. I show 46 amendments. Besides a discussion on the inflationary that we are going to have when we get on the wage and salary issue.

Representative Ekstrom: Just one question. This sheet that was provided to us as far as what the numbers are for the 5&6. That includes all services. In other words, it would also include long term care unless we decide specifically to leave long term care out of it.

Chairman Pollert: I would think that your assumption is correct. I have some questions as far as the 7&7 that go into some of these in human service centers. Some of it's not to brick and mortar.

Representative Ekstrom: All I'm saying is when this sheet was prepared it said that the numbers would sort of be applied equally across all of the places that we had the inflationary increase unless we specifically say?

Brenda Weisz: The way it is calculated is the assumption that everybody is at 7&7 and here is the scenario with everybody at 6&6, 5&5, 4&4, all across the board.

Chairman Pollert: Not that we would do that but we have the discretion to say that we might look at 5&5 and 6&6. We might say that we don't want to do anything. We could say that we are going to change rebasing and keep this 7&7 in place or whatever we want to do about what we could pick and choose if that's what we so desire.

Brenda Weisz: That is accurate.

Chairman Pollert: Are there any more amendments to HB 1012? If there are going to be further amendments showing up before we meet on Tuesday, I would ask that if they are going to come forward that it has be in writing because we are going to run into a time problem.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 2/10/09

Recorder Job Number: 9101, 9102

Committee Clerk Signature

Minutes:

Representative Bellew: Called meeting to order. Took roll and will stand in recess until Chairman Pollert gets back. Roxanne passed out amendments. : 30-2:27 blank

Chairman Pollert: Called the meeting back to order. This is going to be a slow process. I myself have two different copies that I'm going off of for amendments. I thought we would do the same as we did in the past and start with the Management Division. We will start on the top and go through. We will go page to page. We will not be talking on the inflators. I may decide when that becomes appropriate. The way it is there right now we will not talk to it in that agenda. What I plan to do instead of us asking for firsts and seconds. We will just take the papers, open the discussion and then take votes. We have to be out of committee this morning at 11:25. Some of us have a meeting today that we weren't aware of. Then we will come in shortly after floor session, 15 minutes after it's done. With that we will start on amendments. Are there any questions before we start? Starting on the first page where it says management subdivision. Right off the bat it comes with remove one new FTE add an executive budget to perform additional duties required by statement on auditing standards No. 112 regarding internal control matters which is amendment 1. If we want to bring DHS up to talk I have no problem doing that if we need a clarification. I do not want it opened up to public hearings so

we have this all over again. If there is something that DHS can't answer then I will permit that in a short time period. Is there discussion for the one FTE?

Representative Ekstrom: That was Representative Wieland's amendment. This person for managing the auditing standards would directly report to Brenda. The feeling from the department standpoint is this really is for internal controls. It is recommended by the state auditor. It is to comply with the accountancy board recommendations. This rose out of the Enron scandal where there were loose practices in regards to auditing. I think all of us recognize the hard work that Brenda and her department do. To short staff them in this area, I don't feel like we need to do that.

Representative Wieland: The reason I asked to have it removed was within the budget of DHS they have flexibility and they have so many vacant FTE's and they don't really need to have this position added because they can move one position over to another.

Representative Ekstrom: Indeed they have many vacant FTE's but we have another amendment to under fund to the tune of about $2 million. We have addressed that issue.

Chairman Pollert: Took voice vote. First amendment passed 5-3. Move on to second amendment which is reducing funding for salaries and wages department wide for anticipated savings from vacant positions and employee turnover in addition to the $1,917,041 reduction included in the executive budget. It has a general fund of $2 million.

Representative Ekstrom: These people have really worked hard. The department and all the people who work in human services have done a tremendous job. I don't think any of this is a reflection on anything they have done or not done. One of the things I wanted to mention in regards to this underfunding is that I asked for the deficiency appropriation that we had to come up with for the department this time through. In management it was $200,000 program policy, the state hospital was a little over $1 million, the development center was a little over $1

million. If you recall last time we underfunded the human services center $100,000 each which made it $800,000 total. We can go ahead and take this $10 million out and underfund because we have vacant FTE's. Please remember that we will come back next year and put the $2 billion back in.

Representative Bellew: The department is going to have a roughly $22 million turn back. This might be a little steep. Right now I think its ok. I would like it to stay the same for now.

Chairman Pollert: Any other comments? If I remember on the sheet that was handed out, it seemed to me it was around $22 million dollars. $12 million was on the Medicaid turn back and the other was distributed amongst basically the state hospital and human service centers. What that kind of tells me is we took a good hard look at the caseload utilization numbers the last session. It appears to me that maybe we should have looked at them a little harder.

Representative Ekstrom: I agree. We have the ups and downs in this budget all over the place. $2.6 billion is our budget so you are going to have that in a budget this size. One thing I would remind the committee about is last time the SCHIP program was changed substantially to allow children to come in and be qualified for the entire 12 month instead of on a month by month basis. That was done through Medicaid. In any event, we did see a shift of children away from the traditional healthy steps or SCHIP toward that Medicaid program and that did account for quite a bit of the money.

Chairman Pollert: Any other discussion? We all realize that this is the first period in a hockey game. I appreciate the work of the DHS. These discussions will continue into the second period. For now I am willing to except this for now. This is a revolving process this biennium. Took roll call vote on 2nd amendment. The amendment passes 5-3-0. Next is the 3rd amendment which removes funding for the handheld communication devices. Representative Bellew requested to take out his third amendment. I agree with your assumption especially

with the last amendment we passed because they are going to be looking for items in the budget and transferring them around. We will move on to the 4th amendment.

Representative Kerzman: This is my amendment to get the uniform eligibility assessment program started. I believe this would put on a couple of temporary people to start with and bring in about five people from the counties and help them organize the program. I would like to see this get started because it would be beneficial for our counties.

Representative Ekstrom: I received an email from the Mountrail county social services. Out of all the different programs she deals with, each process is a start over. This would create more efficiency in the department. We have to start some place. It's a very large item on the OAR's. This would let us get started.

Representative Wieland: I'm trying to remember what the total estimated cost of this project will be.

Chairman Pollert: It was on the OAR. I think it's about $18 million. I agree with you. I think the computer system needs to be done. Of course it was highly ranked on sytec. If I'm correct Brenda came up and said that this would speed up the project by 6 months. I sit back and look to the increases to the budget and yes I agree with you. I can fully support this to the next biennium for them to come forward with it in the budget. Right now I'm going to avoid the amendment.

Representative Kerzman: I think it would create so many efficiencies out there in the counties. It would pay for itself over and over. It would be easier for them to use and easier for them to trace back and get the programs on the correct page. I think for a little bit of money, $342,000 is not an awful lot. We may be able to slip some stimulus money in something like this as a new system starting up. Maybe one of the areas we might be able to utilize that.

Chairman Pollert: Brenda not only would be talk about this particular system but let's say that we know there is some sort of economic stimulus package going to happen we just don't know what it is going to be. My personal concern is that we can't depend on ongoing from the federal government, it's going to be one time. Could this be considered one of those one time projects that if this came through the whole computer system could be funded through to work on.

Brenda Weisz: The only thing really relative to technology systems and economic stimulus that I'm aware of is the Health IT. This in itself doesn't directly relate to Health IT in the manner that they are discussing it in economic stimulus. I think what it would do is help with some of the general funds which would free up general funds for this present.

Chairman Pollert: I agree that we need to do the project. I just have the time table problem.

Representative Kerzman: Just in response to the time table problem I think anytime we can start something we are going to save money. If you put it off two more years it will cost more money because of the way technology and construction have been going. If you take that $18 million times 20%.

Chairman Pollert: Is there any other discussion? If not we will take roll. The fourth amendment fails 4-4. We will move onto the 5th amendment which is to add a section to provide for a Legislative Council study of DHS child support enforcement program. Is there any discussion?

Representative Ekstrom: If you look at the other packet that was handed out this morning (handout A). What I was trying to get at is how other child support enforcement is done in other states and how they calculate interest. The other item that didn't get in the amendment has to do with the cost effectiveness of going after some of these. We have no mechanism to write off an arrearage that is uncollectable.

Chairman Pollert: Has there been any other of these studies done? Has this ever been studied before?

Allan Knduson: I can do checking but I don't recall any specific of what this study is looking at in the recent years.

Representative Ekstrom: The other thing that I recall is that Mr. Schwintz said that the department is really doing long term ongoing study. This is to direct that study even more in terms of what other states are doing.

Representative Wieland: I think the last study that was done on child support was whether to have the state take over the entire child support enforcement and remove the counties from their responsibility in regards to that. That was either two or three sessions ago.

Chairman Pollert: And that didn't include anything on arrearages?

Representative Wieland: Not that I recall.

Representative Metcalf: For some reason or other the DHS has a hard time letting go of any hold they have on many people even though it is long gone and a minute amount. . We carry things on the books that basically should have been dropped a long time ago. To me it makes a lot more sense when we are hearing the budget. When they say we have $10 million coming in. We know that they have $10 million coming in. Not only $17 million and $10 is collectable.

Representative Ekstrom: The arrearage now totals some $280 million. This figure has alarmed me for all the years I have been in the legislator. The other fact is that $275,000 per month is occurring in terms of interest. It is very difficult for us to see progress. That interest just keeps clicking away.

Chairman Pollert: It sounds like we need a bad debt write down because we are never going to collect that.

Representative Bellew: Is there money involved? Do we require an appropriation?

Representative Ekstrom: When I talked to child support they said that they are pursuing this. This is to direct the study that they are already planning to do. It's already in there.

Chairman Pollert: We will take a voice vote. The 5th amendment passes 8-0-0. We will move onto the 6th amendment which is decreasing funding for department travel.

Representative Bellew: That was my amendment. In their total budget it was like $760,000 total travel increase. The budget was prepared back in July or August when gas prices were very high. I just think the increase is a little excessive.

Representative Ekstrom: During committee discussion I asked if this would also apply to divisions that have seen a decrease in travel. I suggest that we don't decrease their travel further than what it is now.

Representative Bellew: That was my intent. I hope that can be ironed out.

Chairman Pollert: Any other discussion? We will take roll call on the 6th amendment. That passed 7-1. As we are going through the segments, is there anything on economic assistance? We will move onto the 7th amendment. The executive budget adds money to the medically needing. Everyone knows what that was in the budget. There are two alternatives, a and b. We are going to have a few of these especially in the medical services dealing with alternatives. What I will do is decide which way we are going to go. We will look at alternative B first. Does everyone understand the medical need in the medical needs program that deals with recipient s? Initially we talked about the SSI levels and found out if we did the SSI levels that this wasn't going to work. That is why that amendment wasn't brought forward. Is there any discussion?

Representative Kerzman: I will resist alternative B for sure. I think what is going to happen is we are basically going to force people to spend on the money faster and you don't allow them to have services like homemakers and things like that coming into their home quite as quick.

Basically you are going to move them faster towards long term care. I'm not sure the figures of what that would do but right now we are at about $500 and going to 83% would bring it to $720. I don't know what 65% would bring it to. I would sure prefer the Governor's recommendation on this one.

Representative Ekstrom: The income level was last changed in 2003. Food, clothing, rent and all the necessities have gone up by what is in the Governor's proposal. This is truly a catch up number. The increase translates to $33.95 a week. I don't know what you could do with $4.85 a day. I can barely pay for my lunch with that.

Chairman Pollert: Are you stating the increase would be in the Governor's budget and not the 65% you are talking about. Any other discussion? I agree partially about the Governor's budget proposal. I don't support alternative B but I do support A. We will take a voice vote on alternative B. It failed 0-8-0. Let's move on to alternative A.

Representative Ekstrom: Could we ask Brenda to tell us what this would take it from. In other words we know where we are right now but in terms of a monthly increase how much we would be talking about?

Brenda Weisz: 75% would bring the one family household to $650 . And the two family size to $875.

Representative Wieland: Concurrently?

Brenda Weisz: Yes the Governor's budget has a household budget of 1 at $720. The household size of 1 is $500. The household size of 2 is $516.

Chairman Pollert: We will take a roll call vote on the 7th amendment, alternative A. It passes 5-3. We will move to the 8th amendment. There were physicians, chiropractors, ambulances, and dentists all on one page. This might take just a little while. We will go to the rebasing of physicians. The question I have is on 80-90%, I understand that at 90% one of the hospitals

would receive less reimbursement. Under the 80% it was like 4 hospitals. I asked Legislative Council to have it as a hold harmless. Is that in these amendments? I mean as a hold harmless that I don't want to see them receiving less reimbursement then they did the year before. We all realize it is based off of standardized cost reports. We could have the argument but actually the hospital costs could be as much as 30% over these cost reports.

Maggie Anderson: You are correct. When we prepared the estimates with this amendment, it was done with holding those facilities harmless so that they would not go backwards. They would receive a no increase the first year and then receive the 7% inflation the second year.

Chairman Pollert: Yes because we haven't talked about the inflators and that is a discussion for later. With the rebasing of hospital rates, which hospitals do these work with? Is it all the critical access? Is it the big 5?

Maggie Anderson: The rebasing affected the non-critical access hospitals which would be the large facilities in Bismarck, Fargo, Grand Forks, and Minot.

Representative Nelson: I thought PPS hospitals were down quite low in the percentage of costs. Give me an example of how this one hospital of 90% is being paid over 90% of cost.

Maggie Anderson: Each facility is different in terms of what their cost structure is and how their facility is made up if they are integrated or stand alone. Costs are different. Those costs are relative to each facility. When we collected the information for the hospitals through the cost reports and did calculations, and when the amendment was requested that we look at 90% of that. There was one facility. It has to do with what is included in their cost and how they staff and run their facility.

Representative Metcalf: I only have one statement I would like to make. I think we all have to look at if we want the quality of service that we have been receiving from our hospitals. Knowing that they have in the past, cut back on staff to do what they have to do to come within

the reimbursement schedules. I think it is important for us to pay them to maintain the staff that we feel is necessary. If we don't want the MRI's and different things like that which they give at hospitals or any other expense, then I guess we should give them a lower level. I personally feel that we need the best medical service we can get. I'm going to resist both alternatives.

Representative Ekstrom: I'm having a little difficulty looking at this as a standalone rebasing. We aren't looking at the inflation factors as well. When we looked at hospitals we rebased their funding to 100%. The inflation factor was going to be 0 the first year and 7% the second year. I know we have terrible uncertainty with regard to the stimulus package but the point of fact is we know there is some money in there in terms of FMAP. How much it is, and it is one time. What I'm trying to do is get my arms around the whole thing. I think we should leave that base funding where it is and as far as the Governor's package for the rebasing. Leave it at 0 for that first year then come up with a number for the second year so that we insulate ourselves. Once that one time FMAP money drops off then we are insulated a little bit in the out years.

Chairman Pollert: I understand what you are saying but there are so many questions on the horizon of what is going to be what, where, and why. I don't want to say my opinion but I'll say it anyways. I don't support alternative b. I don't agree with that. I think that is too hard. I will support alternative A. I'm not bringing the inflator into this discussion at all. I understand we have to but I don't know how we bring the inflator discussion into this without bringing in everybody under the whole package that way. That is my opinion.

Representative Esktrom: The question I have is wondering if there will be any inflationary increase the first year. That is really where my difficulty lies.

Chairman Pollert: When we get on the inflators the 4,5, and 6's. We can vote as a section to whichever way we want to go. It would be a horrible thing to do but to look at that whole 7&7 or

whatever. I myself have a problem with the human service centers getting a 7&7. A lot of these places don't need that if they don't have brick and mortar.

Brenda Weisz: Some of the human service center providers are brick and mortar. They are residential facilities. As a policy branch you do have the ability to make a decision on what you want to offer.

Chairman Pollert: So depending on how the vote on alternative A goes can decide what you want to bring forward just because we don't have the amendment forward. We can have the discussion later on the inflator.

Representative Kreidt: As we go through the debate today and the numbers we are working with, I don't think we should be talking about the stimulus package now. That is far down the road and it looks like they may have something done by the middle of March. I don't think that should even enter into it. As we deal with these numbers today, we are in round 1. This hasn't gone to the Senate or conference committee. Lots of things could change as we go forward with this.

Representative Kerzman: In light of what Representative Kreidt said if we look at what we have today we have a Governor's budget that left a surplus in here yet. We have an economic forecast that is pretty healthy. I don't know why we should be cutting at a big budget as much as we are. When we look at human services and one party decides to take quite a bit of money out of there but leave the other budgets alone.

Representative Kreidt: I would agree with your statement to a point. The economic forecast that we heard yesterday, I feel that I'm a realist. Even sometimes what our Governor tells us in regards to the future and the economy of our state, I don't always agree with.

Representative Bellew: We aren't cutting anything. We are reducing the increases.

Chairman Pollert: I think the higher education budget is way overstated. I agree with you too that if the reductions in the DHS budget the way we are proposing, I have no problem with that. It's not fair that we in this section have to look at this budget like this and that higher education gets a free pass which I thought they did the last biennium. Is there any other discussion. We will call the roll on alternative B. It fails 0-8-0. We will now take the roll on alternative A. That passes 5-3-0. We will move on to amendment 9 which is the rebasing of physician rates. There are two alternatives to this amendment also. Is there any discussion?

Representative Ekstrom: I feel like I have a large family here that is doing their job every day. We aren't treating them equally. I think the department, and Governor tried very hard to be as fair as possible. I think we will have some that do considerably better than others. I think it is inherently unfair.

Chairman Pollert: Any other discussion? We will take the roll call vote on the 9th amendment alternative B. It fails 3-5-0. We will move on to alternative A.

Representative Nelson: If I remember right the last time physician rebasing took place was back in 1995. It was probably the same as hospitals.

Maggie Anderson: The physician rates have never been rebased. It was the hospitals that were rebased in 1994-1995.

Representative Nelson: If we treated everyone with a fair handle we wouldn't have to be here. This is an area where out in the field there is a critical need for physicians. There is a shortage in every part of the state. There is something like 400 physician openings. Probably half of them are family practice situations which get into this population as well as anybody. We aren't talking big money. It's $1 million. This is an area that I was hoping that we had some years like this where there were expectations and we had money that we could kind of do something for the priority items. This is one of mine. I'm voting no on this alternative a as well.

Chairman Pollert: We will take the roll call on the 9th amendment alternative A. That amendment passes 5-3-0.

Representative Bellew: I just want to remind the committee that what we do in subsection is to make recommendation to the full appropriations committee. If you do want to bring another amendment forward when we go to full committee you sure can do that.

Chairman Pollert: We will move on to the 10th amendment which is rebasing of the chiropractors. There are two alternatives to this one also. We will take the roll call on the 10th amendment Alternative B. That amendment fails 3-5-0. We will take the roll call on the 10th amendment Alternative A. That amendment passes 6-2-0. We will now move on to amendment 11, the ambulance payments.

Representative Ekstrom: I talked to some of the rural ambulance services. They were in dire need last biennium. Literally they are having bake sales to put oxygen and stuff into the bus. This is the first line of medical service that most people see when there is an accident or some other tragedy. A lot of these people are volunteers. The least we can do is to provide funding for them to make them as whole as we can. I'm going to resist both A and B.

Representative Wieland: Maybe I'm wrong but isn't there another bill out there that deals with first responders and ambulances. I know we had a bill in last session where were we provided $1.5 million. I thought there was a bill coming in this session but I haven't seen it.

Chairman Pollert: I know there is a bill. I think human services policy committee has it. I think it was 4 FTE's and 4 region and I think they reduced it down to 2. It's Rep. Uglem's bill. I know we had a sheet of paper that showed the different rates of amounts billed. Some of them are over 100% already. I think there is one or two items. I want to know if those one or two items were held harmless in that amendment. That was probably our thought.

Brenda Weisz: How the amendment was written up or how it was discussed was to do dollars and just work with ambulance providers.

Roxanne Woeste: I haven't found Rep. Uglem's bill but there is SB 2049 which does expand that current EMS operations grant program that is currently run through the state department of health. There is a bill in the senate that is expanding that program. It currently is at $1.25. The bill does expand it to $4.5. Many of the grants went to providing funding for on call, and that sort of thing.

Representative Wieland: Are ambulances included in that?

Roxanne Woeste: That is all ambulances, EMS.

Representative Wieland: First responders aren't really necessarily ambulance but that is why I'm wondering if it's first responders and ambulance.

Roxanne Woeste: It is worded EMS so I'm not sure if quick responder units would be included or not. I know the health department has rules established for the grant program. I believe it was targeted at what they considered critical access ambulances.

Chairman Pollert: It's not Rep. Uglem's bill but it was probably brought through public safety or one of the interim committees. That was a continuation from the last biennium of all the dollars and the programs that were brought forward by EMS last session. That is through one of the interim programs. That sets up FTE's for coordinating program or something of other. I do have the policy committee bills.

Roxanne Woeste: Perhaps it's HB 1571 that provides an appropriation to the state department of health for providing regional assistance to the EMS operations.

Chairman Pollert: Was that an interim committee?

Roxanne Woeste: No. Currently the bill is engrossed and it has a $273,428 general fund appropriation for 2 FTE's.

Chairman Pollert: Is there any questions? If not we are going to take a vote on the 11th amendment, alternative B. That fails -0-8-0. We are going to go right to alternative a and take a roll call. This one passes 5-3-0. We will move on to amendment 12 which is rebasing the dentist rates. When I first read this one I had some questions about it so if it rises up questions let's get them answered. We are rebasing rates to 75% of average bill charges and funding of $1.7 of which $641,000 is from the general fund. There are three alternatives for this bill also.

Representative Bellew: That says no change to inflation which means if they adopt that, it is a 7&7 inflation, is that correct?

Chairman Pollert: Right now if we change the 7&7.

Representative Bellew: I just wanted that understanding.

Chairman Pollert: If we need further explanation we will do that. The last session there was one for 75% of bill charges. The bill was amended down at the end of session to 65% of bill charges. Then it was amended further in the conference committee. Then it was at 75% of children's coverage. I don't have the wording correct but I do think it was something like that. What this is doing is 75% of bill charges straight across. We have all the alternatives here. Representative Bellew were you the one who asked about the 60% with the 0&7. Do you have figures for the other ones at 65 and 70% of bill charges?

Representative Bellew: I have some figures but I don't think I have those unless I am reading my sheet wrong.

Chairman Pollert: I have a number here. I thought you were asking about that information but maybe I didn't get that to you. We are actually going to have 5 alternatives to this particular part of rebasing the dentists. The sheet that was handed out (handout B) is that it is rebased on 65% of average bill charges and inflation of 0&7. The sheet below that is a rebase at the amount of 70% of bill charges and inflation of 0&7. Is it because the hospitals were at 0&7?

Representative Bellew: That is exactly why I requested that. The other rebasing services were all at 0&7 except when we get to long term care.

Chairman Pollert: I think this is what you were looking for. Is there any questions because we didn't have this information before.

Representative Bellew: I think we should have the discussion.

Representative Wieland: I still see the 7%. It may be 7% but in the event that it is changed I'm assuming that it can change whatever motion we pass but it can be adjusted with any motion we pass. It shows in here for the 65% and 0&7 inflation, if we are adjusting the inflators and we are going to make them equal would this reduce to 6 as well?

Chairman Pollert: It depends on what we do. If we look at all the inflators and move the inflators from 7&7 to 8&8 or 6&6. Unless we specifically say that the dentists would not be hurt by that that is what we would do. Anybody with the 0&7 we would have to have this specific language stated that it would not have effect.

Roxanne Woeste: That is correct. At the time which it is appropriate to discuss inflators you can decide at that time if you want it to be straight across the board or if there is going to be different numbers for different categories.

Chairman Pollert: to complicate the matter to move it to whatever, if we specifically don't' bring up the 0&7's they will go to 6&6 or 8&8.

Roxanne Woeste: At the time you want to discuss inflators and currently it is at 7&7 except for the rebased which are at 0&7. When you discuss inflators you can decide where you want to go.

Chairman Pollert: If we don't make that motion wouldn't it go to the motion to go from 0&7 to 0&6 then it has got to be stated. Otherwise wouldn't it go to the motion of a 6&6 or am I getting too technical?

Representative Nelson: It is pretty plain where this is going. When we ask for that study last session to create a level playing field, the results did that. Here is a situation where the last two issues that we have covered, we have gone to 75% of funding. Whether it is cost based or charged base. You can argue that all day. The one option that I would like to see if we are going down this path is the 75% of bill charges and then the 0&7. That is the only one that isn't offered. That would keep us on a level playing field of providers.

Representative Bellew: If you read those last two amendments it says 75% of which was proposed in the Governor's budget. That is something that we could talk about when we talk about the dentists going to 75% of what is proposed in the Governor's budget. I would be open to that discussion.

Chairman Pollert: You are talking about 75% of bill charges and 0&7. We don't have that alternative in front of us right? Do you have any numbers on 75% of bill charges and a 0&7?

Brenda Weisz: I would have to check upstairs. We may have run that back in the Governor's budget.

Chairman Pollert: Could you have that to us in 10-15 minutes?

Brenda Weisz: If it exists but if it doesn't it will take awhile.

Chairman Pollert: Since we are on this topic I don't want to go back. Would you be able to look that up if we take a break?

Brenda Weisz: Yes. If we don't have it run we will have someone bring it down when it's ready.

Deb McDermott: (Handout C) I set this up like your other spreadsheet. There is $4.2 million roughly in the executive budget. The rebasing amount at 75% is $2.4 million. The inflation at 0 is another $600,000. That brings a total to $3 million. The difference would be $1.2 million total to go to 75% with a 0&7 versus 75% with a 7&7.

Chairman Pollert: These two sheets would go hand in hand. We are going to stay on dentists. Is there any discussion? Took roll call vote on 12th amendment alternative A which failed 2-6-0. We are down to five amendments. We have in front of us alternative B that is 65% no change in inflator which would be 7&7. Alternative C is no change in the inflator and 70%. Then you can go to the new pages that are out there on the 65% of an 0&7 and a 70% of an 0&7 and 75% of an 0&7.

Representative Nelson: Are you looking for one we should choose and speed this up or how do we do this? If that is your wish I'll pick 75% and 0&7.

Chairman Pollert: That is the new sheet that was handed out by the department. We will take a roll call vote on the 12th amendment, alternative d with the 75, 0&7. It failed 3-5-0. We are down to the 65% amendment.

Representative Bellew: I would like to take a vote on the sheet the department gave to us. The rebased on 75% of bill charges.

Chairman Pollert: I'm trying to guess what the committee is thinking on which one they support. I'm trying to get some kind of a feeling of what alternative to look at. I will ask for a show of hands on who is in support of 7&7? (Noone). So I do this accordingly I am going to ask for a vote. I'm assuming from this vote that you are in support of the 0&7.

Representative Metcalf: But we do have the original bill too so we have three choices.

Chairman Pollert: You are right. If these both fail we are back to 75, 7&7. I am going to withdraw alternative B and C with the 65 & 70 and the 7&7. Do you want to vote on the 65, 0&7? We will vote on this. It fails 4-4-0. I will ask for the 70% 0&7 now. This one also fails 4-4-0. We are back to the Governor's budget. We will talk about the 14th amendment which is decreased funding for medical services projected caseload/utilization rates.

Representative Kerzman: I think that is a pretty heavy cut. I can't support that because of several reasons. I think we are going to be bumping up against our maintenance of effort and we are going to be leaving some federal dollars lay if you take the match at a 63% or whatever. It's a pretty good size hit to the department. I also hope that we aren't affecting any of the entitlements to the Medicaid program.

Representative Bellew: Something similar on that same line, we have a reduction of 9.6. Shouldn't there be a reduction of federal funds on those same lines? We went through utilization rates last biennium. We were fairly close. We did the same thing this biennium. Some of us believe we are fairly close again. I just wanted to bring that forward.

Chairman Pollert: I would remind the committee on the turn back. The last biennium we could have actually hit those numbers a little harder but we didn't. Any other discussion?

Representative Ekstrom: This is across the board. I think that if you look at things like the state hospital and the human service center which is being hit pretty hard with returning veterans with traumatic brain injuries and so forth, this is an awfully severe cut.

Representative Kerzman: Just a little bit on case load. I know out in the west we have difficulty providing some of the services because they are bumping up the oil filed rate salary. There were a lot of unfilled needs out there. That might be why utilization is down a little bit in some areas.

Chairman Pollert: I don't know if you guys looked at the utilization numbers and went through them. That is what we did and what we came up with. When we had the detailed reports the shaded areas, we went through the 9 months of the last year. Those numbers seemed awful similar. That is how we come up with the number as far as case load utilization.

Representative Kerzman: We realized that too and we looked at those. That is kind of surprising to me because of the aging population. I think we might experience a good spike. I would like to see us prepared for something like that.

Chairman Pollert: We were discussing the case load utilization.

Representative Bellew: If we come up with a specific spreadsheet then I think the department will have to follow that .If we just pick a number like this they still have the option of moving in between line items so they can work their budget to the best of their ability. I don't have a problem with this.

Chairman Pollert: I'm going to do all utilizations at the same time and hopefully everybody is going to be here. We will take a roll call vote on the 14th amendment. The 14th amendment passed 5-3-0. Now we will go to long term care. We will start on 15th amendment. Could you give us some breakdown of that?

Maggie Anderson: The OAR was built on an estimated number of Medicaid eligible individuals that would be living in assisted living. It was based on $1000 a month rent subsidy. It would be 100% general funds because CMS does not participate in room and board for anything other than their specifically identified institutions. The people would need to be Medicaid eligible and receiving personal care services. Then they could apply for this and it would be up to $1000 a month per person. It would be 100% general funds very much like the room and board that they provide for basic care.

Representative Nelson: I will give you an example. In assisted living is where the bar is being moved to. It is a great alternative for the residents who utilize that. I know the numbers in basic care have decreased because of the assisted living option being available. It is a less expensive alternative. I guarantee that we will do this. It may not be this year. It is good for the people who utilize that. I think its worthwhile exploring.

Chairman Pollert: We will take a roll call vote on amendment 15. It fails 4-4-0. We will move on to the16th amendment which adds funding to increase the personal allowance for individuals in the basic care facilities.

Representative Kreidt: That was my amendment. We will increase from $60-$75 a month. $60 doesn't go very far. The $75 would give another $15 a month to buy personal items to make life easier.

Representative Bellew: There would be no federal funds involved?

Representative Kreidt: Correct.

Representative Ekstrom: I'm sure you recall on public testimony where we saw the budgets of these folks down to the penny. I remember one individual in particular after getting the ride to church and giving a little donation to church she has $0.26 left at the end of the month. That's not dignity. For her to be watching pennies like that seems to be wrong.

Chairman Pollert: We will take a roll call vote on the 16th amendment. It passes 8-0-0. We will move on to the 17th which adds funding to nursing facility bed limits.

Representative Kreidt: This is my amendment. Many of you realize that our nursing facilities were mainly constructed in the late 50's, early 60's. We have a lot of construction going on with a number of new facilities being built. We continue to see increased costs as we move forward with these projects. This would allow the property costs for a single room to be $138. For most construction projects that are out there, this would allow them to stay under the limits. If you remember we are using the in general funds out of the healthcare trust fund to enable us to go ahead and do this. This will this attract over half a million in federal funds. I think we need to enable these facilities to move ahead with these products.

Started new job. Recorder quit.

Representative Kreidt: Most of the remodeling is going to fall along the lines because most of these facilities right now have single rooms. Most of the people out there don't want a double room they want to go to a single room. They want privacy and a better quality of life instead of having a roommate. Most of the remodeling and a new construction allows those facilities to have mainly single rooms for those facilities. That is the trend we are in. Even speaking for myself if I had to go to a facility I wouldn't want a roommate unless it was my wife.

Chairman Pollert: Let me ask you this question. In their rate structure aren't they able to do that with the proposed Governor's budget anyway?

Representative Kreidt: No. You have your cost categories that have limits set on those. There is a limit you can reach. If the construction project exceeds that then you ahead those costs.

Representative Bellew: This is a question for Roxanne. Do we need to have this specifically stated that it is coming out of the health care trust fund? It looks like to me that it is coming out of the general fund right now.

Roxanne Woeste: When you vote on the motion you can have it be that the funding can come from the healthcare trust fund and then it will be adopted there. The motion would be adopted and rejected in such a manner.

Chairman Pollert: I think that was your intention?

Representative Kreidt; That was in the amendment that I provided when we brought forth those amendments. I did state that the amount would come out of the healthcare trust fund.

Chairman Pollert: This is a huge budget. The amendment is that the money is to come out of the health care trust fund. We will take a vote on the 17th amendment. It passes 8-0-0. We will move on to the 18th amendment with basic care and nursing home facilities. We will move on to the 18th amendment. This is a breakdown because you are going to need these for the next

few items (Attachment D). It was asked for in the amendments about the $2 wage enhancements. Then it incremental down. You can see it is broken down between nursing homes, basic care, and the DD. That would be part of that particular amendment.

Representative Kreidt: There would be a division. Number one would be for individuals making $15 an hour or less. The other one would increase $2 an hour for everybody.

Chairman Pollert: On the next page if you look at the bottom it has to add a section of legislative intent regarding the funding for basic care and nursing home facilities, salary, and benefit increases. That would have to be put in when you are trying to work for the $15 an hour or less if I'm correct.

Roxanne Woeste: That is correct. There is just an accompanying language on your second set that kind of specifies that.

Chairman Pollert: It is on the next page under programs affecting program and policy.

Roxanne Woeste: It is the second paragraph in your second language packet of amendments.

Representative Kerzman: I guess I would prefer alternative B. My concern with Alternative A is when we talk about the $15 or less, out in the rural areas we have a little trouble attracting nurses. If we approve that attraction at all we need to raise it up a little bit. We basically are giving this to the lower services. They need that but I think we also need an adjustment to nurses.

Representative Metcalf: I guess it's a matter of who we pay and when. Do we pay that now based on the fact that contract nurses are at such a rate that it is going to kick this cost up way beyond whatever is in here. That is a personal feeling that is not a documented feeling. The fact is that if they can't get the nurses they need the first thing they need is to offer the wages there to go overtime. Many of them accept that overtime and will work whatever it takes. That

overtime costs money too and a lot of money. If they have to go into contract nursing then we will really know what the costs are. This will make this little bit here shrink down to nothing. In my opinion we have no alternative but to offer alternative B there for $2 an hour salary and benefits for the nurses and everyone on the staff.

Representative Kreidt: I think we realize where our real problem is. I do realize that there are outlying facilities that do have problems attracting nurses and keeping them on staff. Again, my feelings in regards to this using the $15 an hour and under is good. The situation is really the CNA's and where it comes into place. If we can get those people up to what I feel is a fair living wage to attract those individuals to come work at the facilities. That is where it really lays. We have a 7% inflator that is on the table. That 7% can also be used to increase nursing salaries .most of those individuals are at a higher rate than your other personal. If you are inflating a $20 salary at 7%, it is quite more substantial. If you are inflating a $9 salary at 70 cents. There is quite a difference if you are looking at that and putting that percentage inflator into effect. I thought this was a fair way to go and still be able to save about $4 million to use towards the inflator. That is kind of the reasoning that I use with the $15 and under and the $14 million figure.

Chairman Pollert: If the $2 passes for the $17 million then we have to take a long, hard look at the inflator. That is my opinion.

Representative Kreidt: I think you would be correct.

Chairman Pollert: Let's say we pass the $14 or $17 million. If this $2 passes you are advocating for a 4&4 on the inflator? I think this is a legitimate argument. I don't care if you are talking about long term care or DD. If this passes we have to have a long hard look about the inflator for everybody. When I say 7&7 I mean everybody, not just one segment.

Representative Metcalf: I understand exactly what you are saying. I'm not in favor of spending any more money then we have to. I'm going to talk about the nursing homes that are basically within 50-60 miles of Fargo, ND who are paying Fargo wages and still can't get the nurses that they need and have to hire contract nurses, this is going to go out. It's not going to be staying in there. It's going to be in our cost. We have got to be able to provide that service. I really feel that it would be nice to look at both of these individually but I think we need to look at them as a package. The 7&7 and the $2 inflator is the minimum of what we need to keep our nursing homes viable and by that I mean with the staff that they need to operate that home. I realize that economics say that we can take this out of the nursing staff and we don't have to pay them what they are worth or what the private industry thinks that they are worth. I really stand up against that philosophy and I would hope that we could support this amendment.

Representative Nelson: I think the bigger picture is what we do. There are some realities that we have to live with. In this case you look at the $15 an hour, there was a $3.6 million cost savings there. It was my feeling that whatever we do in this regard we have to be on the same level with the DD providers. There is a $3.6 is the number here. The DD providers, does everybody have a ball park figure for the people that are over $15 an hour. Are there any that would be affected in this regard?

Barb Murray: 10% are above that. 90% are under $15 an hour.

Representative Nelson: If we go down this road with nursing homes with the raise. The wage pass through is important. It gets to the employees sooner. It does raise the floor for the workers that are working at the lowest rate. The inflator will pick up the higher level employees. I don't have a problem doing this but I think we should do the same for DD providers as well.

Chairman Pollert: Does anyone know what the increase per cost of bed is in the Governor's budget. I know I'm just wondering if anyone else does. It is $8,139 per year increase per bed.

What I did was take the increase between the nursing homes and basic care of $55 million divided by $3,388 beds and divided that by 2. I come up with an increase per bed of $8,139. I myself find that a huge figure. I sit there and ask if we add $2 an hour and add $2,508 towards the cost of a bed per year, meaning each bed will go to $10,600 and some odd dollars. Now you know where I stand. To me, a lot of our costs are getting out of control. I fully understand that salaries need to be paid. When I see the $8,139 you just kind of go wow. I know there was information passed out that showed the average cost when we were looking at the inflator of 7&7. I think the average cost total for the nursing homes was 5.8% increase. This budget is showing a 14.1% increase for the nursing homes. That is why I'm bringing that forward. That's all I'm saying.

Representative Metcalf: I have one thing to say about that. I do not feel that we should provide salaries for our staff that leave them in the poverty level. I see that happening time after time. When 65% of your CNA's are being turned over every year because they are getting poverty level wages. I'm not saying that we should pay them a CEO's wages or anyone that is on a career path. I do believe that they are entitled to a living wage and get them out of the poverty level.

Chairman Pollert: We will take the roll call on the 18th amendment, alternative B. That fails 3-5-0. We will take the roll call for the 18th amendment, alternative A. That passes 6-2-0. We will move on to the 19th amendment.

Representative Nelson: I will further amend that to add the language after providers under $15 an hour.

Chairman Pollert: Does anyone have the numbers for under $15 an hour?

Representative Kreidt: If we are talking 90% you would get a pretty close figure by knocking 10% off with the figure we have there. That would get you a ballpark figure. It would reduce that by $150,000 or somewhere in that area.

Chairman Pollert: Can we get that further figure sometime today? Is that a possibility?

Brenda Weisz: We don't know how we would get that information. We don't do the rate setting that way. You could put intent language into your amendment that says that is forced to go and then we would have to work with the DD providers to find out that information.

Chairman Pollert: Ok.

Roxanne Woeste: I do believe Representative Kreidt is correct. For the purpose of this committee work I think the best thing would be to take 90% of that number. The general fund would be $12,775,059 which would be close. That is the general fund number.

Chairman Pollert: Is there any other discussion? If not we will take a roll call vote. That motion passes 6-2-0.

Representative Wieland: The reason I supported these last two increases in the budget. We have a $127 million increase and a $22 million turn back in the Governor's budget. I realize that the turn back isn't from everybody. Those kinds of numbers really aren't sustainable. We are going to run into trouble. I know everybody thinks that the report from yesterday from the forecast was rosy. That expelled caution to us. That is part of the reason that I have voted against new programs. That is the point I want to make. I feel that it is far more important to take care of the people we already have than start creating new programs. That is why I voted against new programs and I intend to continue to vote that way.

Chairman Pollert: I'm keeping a running tally as we are going here. I know we haven't talked about the inflator yet. Currently we are $10 million over the Governor's budget right now. When

you look at a 21.6% increase over the previous biennium I have a hard time with that. That is my opinion. We will move on to the 20th amendment.

JoeAnne Hoesel: The autism waiver is focusing on children from birth to five. It would have several tiers of services that would be directed by the parents but there would be a menu. It is intended to have a team of professionals that have enhanced training in this area so that the methods that we can impact their autism can be minimized. It is really based on the research your ability to impact and reverse the negative results of this kind of disorder have a better chance at this age instead of identifying this as an adult . This is identified for 30 individuals. There is a cap per individual. They do need to be screened to the ICFMR level of care. We are looking at children that need intervention. However, they do not need to have a mental retardation. It is focusing on a group of children that we currently do not service in the DD waiver.

Representative Ekstrom: I think it is fairly clear that if we can intervene with these children at an early age, we produce kids that are functioning and that's the difference between whether someone is going to be in a regular classroom or if we are going to have them in some other more intense situation. It's an investment just like vaccinations. If you put the money in right now you don't have to spend it later.

Chairman Pollert: I would love to support this. I look what we have done with the $2 an hour on the last two budgets and wonder where we stop. If we would have had $1 hour talk instead of $2 right away and ran it through, I could have understood he discussion. When I look at this I understand the long term care people. I understand the DD people. These people are living, working, and making a living. We are talking about kids who need our help. I think we lost focus. Any other discussion? We will take a roll call vote on alternative A. It fails 4-4-0. We will

move on to alternative B. All of these amendments can come forward again. This passes 5-3-0. We will be in recess until 15 minutes after floor session.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 2/10/09

Recorder Job Number: 9144

Committee Clerk Signature Morgan Pennell

Minutes:

Chairman Pollert: We will call the committee back to order. I don't have the title page but it is DD critical needs, alternative A and B.

Representative Wieland: I have a correction to make on alternative B. This would just change the one. The other one was OK. I'm going to pass these out right away.

Chairman Pollert: Before you start, this morning we did the personal use. We went from $60-$75. That is actually in the Century Code. It takes a statutory change. Roxanne is going to get the amendment ready. That one is one of the few that is in the statute. We do have to have that done. That is going to be coming forward. For some reason that one is in the statute.

Representative Nelson: That having been said, that was the personal needs. That is for basic care residents? We didn't discuss any amendments as far as personal needs allowance for ICFMR residents did we?

Chairman Pollert: We have not discussed that yet, if there is one coming. I thought there was one more coming but I don't remember for sure.

Representative Wieland: Again you had proposal A and proposal B. Proposal A does not change any when you come from the consideration. Proposal B has been changed because what it does is it corrects it so that it would be to the Ann Carlson Center and any other DD

facilities that need to be included. I wanted to make sure that the change would be noted in B. I plan on supporting B. You can do it how you wish. I don't have any suggested way in which to do this.

Chairman Pollert: We will take the roll call vote on the 21st amendment alternative B. That passes 8-0-0. We will take the roll call vote on the 21st amendment alternative A. If it passes would alternative a take precedence over alternative B? Is that correct? What I will do is take the vote and ask that it would be a substitute for the other. We will take the roll call vote on alternative A. That fails 3-5-0. We will move on to the 22nd amendment which is to remove funding included in the executive budget for the addition of a third tier of personal care that would allow a maximum of 1,200 unites of care per month. Everybody knows the fiscal? Any discussion?

Representative Ekstrom: I went about looking at this from the standpoint of how many folks we could conceivably bring back out of the nursing home. When I asked that of the department they estimated about 10 individuals could come back from a nursing facility back into their homes with the addition of these two hours more a day which would come up to 10 hours a week. If you take the number of $912,500 in the biennium, 10 individuals of approximately $125 a day times 365 days a year. That total is the $912,500 in the biennium. That is the savings to the state of ND. There are costs involved so you would have to offset the costs. Every individual that we keep out really does ultimately save us.

Chairman Pollert: Is there any more discussion? I think this dealt with going from the 8 hours to 10 hours. We will take the roll call. The vote fails 3-5-0. I'm going to reconsider. I did mean to vote yes. I have to ask for a reconsideration. The roll call vote is 5-3-0.

Representative Ekstrom: Again I want to say that taking those 10 people out gives us the $1 million that we would be spending in general fund dollars in this biennium.

Chairman Pollert: Is there any other discussion? We will take the roll. This passes 5-3-0. Moving down the line to decrease funding for long-term care projected case load/utilization rates. What I will say is that we went through the detailed reports again and that is what the amendment called for if I'm correct. We will call the roll. This passes 5-3-0. Going down again, the decrease funding for DD grants. Any discussion?

Representative Ekstrom: I'd like to hear the rationale in terms because there seems to be push in this committee to reduce the population at Grafton. These are the folks that would be coming out into the community and would add to the case load. They are the most severely disabled. They are the ones who are the most difficult to take care of. They are the most challenging cases. I would submit that we need this money. I would agree to a decrease but not this big of a decrease.

Representative Nelson: I can assure you that when we went through these numbers that they are specific as to the new residents coming out of Grafton. They were considered in the decrease utilization. They were added in. That wasn't part of the greater number.

Representative Kerzman: How many did you figure would come out of Grafton? 30?

Chairman Pollert: 115 to 97 I thought was their projection. You have to remember the discussion the last biennium when we had the same discussion on case load utilization. I remember it. You would have sworn we were kicking everyone out in the streets. When you see the turn back on the DHS budget, the Medicaid budget showed about a $12 million turn back. That tells me that the case load utilizations that we looked at actually were correct and we could have went a little further. If it's specific, I don't have the figures in front of me. Those are the numbers our side came up with. I will remind the committee that DHS does have the flexibility of moving around which they did. The last biennium, a lot of our case loads came out long or short. They came out what we thought except for SPED. Those numbers did increase.

You will see that we aren't doing anything with SPED. We are agreeing with those numbers. Those increases I agree with.

Representative Ekstrom: The $22.4 million turn back, $2 million was human service centers because of staff turnover and difficulty filling the position. State hospital was $2.7 including the $1.3 million unspent one time capital project. Long term care was $4 million primarily from nursing facilities. Medical drug was an estimated $1.6 million and Healthy Steps, because we changed the eligibility requirement for SCHIP or whatever we are calling that now is half a million. There is a traditional grants turn back of $12.6 which was in the November reports that generated from the old MMIS indicate a utilization and cost data that needed further analysis. It goes on. This is page 2 of Brenda's testimony.

Chairman Pollert: You are talking about the discussion of the turn back sheet that was given to us. If I'm on our side of the table, we did not touch the turn back in any of our figures we did not touch SCHIP. Please correct me if I'm wrong. We definitely did not touch the nursing facilities to the extent that we did last session. We could have touched them a lot harder but we didn't. We didn't get close to that number. It was 40 or 50 beds I think. We will take the roll call on the DD grant utilization. That passes 5-3-0. On the next page on the aging services program, I'm withdrawing that amendment. Moving over to our Children and Family Services program. This increases funding by $200,000 from general funds to $300,000. Representative Metcalf you asked for that, is that correct?

Representative Metcalf: I dropped it down by $385,000. You should be happy with that so now we should just put a yes on what we requested. This program is one that is being run by Lutheran Social Services. It is basically working with our children up to age 3. They have seen a considerable improvement in the children that they have worked with. To this point not only will that $200,000 be brought back in my opinion but they are expanding this facility into

Burleigh and Morton Counties which they feel are right for the use of this program. I really feel that the request is justifiable and I hope this committee will approve it.

Representative Wieland: Is that an OAR?

Representative Metcalf: It is an OAR. It is the second to the last one.

Chairman Pollert: It's a different figure from the original figure that Representative Metcalf was asking for. If no further discussion we will take a roll call vote. It fails 3-5-0. The next line is to decrease funding for a new FTE position and adding a budget for background checks. If I'm correct isn't that just a difference of opinion between Office of Management and Budget and the green sheet. That is just a straightening out?

Roxanne Woeste: The executive budget did add $323,921 for this activity. The amount reported by the department is the $308,000. We are talking about the same funding. The higher number includes the 5&5. The $308 reported by the department would be the base salary for that new position. For all the agencies that we do green sheets for, when the Governor's budget adds positions we include the total funding including for that position including whatever the compensation package is. If a committee so chooses to remove one of those positions we would agree to move all that funding. I don't think you would want to include extra salary dollars for a position that is not funded.

Representative Wieland: I don't understand. If you hire someone at a figure you give them a raise immediately? That is what we are talking about. They would get a raise then or on the first of August. I assume that they are going to be hired about the first of July or August. You are saying that they immediately get a 5% increase in pay?

Roxanne Woeste: The way the budgets are built when they add a position, the position is added whatever the base salary is. When the Governor's compensation package runs, it will increase the salary for that position. They will get the increased funding so the department can

work with whatever the dollar provided is for that position. I'm not saying the department is going to hire someone then give them a raise that first day. They will look at the money available for that position and decide what the appropriated starting salary is for that position, knowing that they have to fund that position for 24 months. If that person is showing favorable performance they would have to give them an increase on July 1 of the next fiscal year. The committee can decide if they want to keep all of the funding in or part of the funding out.

Chairman Pollert: Basically we are just talking about removing $15,921. That is what this would do .It's not removing the FTE.

Roxanne Woeste: This does not remove the FTE just part of the funding.

Representative Nelson: It would help me to know is the $15,921 is that the increase in the second year of the biennium? The performance increase or is that a 5% on each year?

Roxanne Woeste: I believe it's a 5% on each year in health insurance package.

Representative Nelson: So the health insurance isn't part of the base salary?

Roxanne Woeste: Do you want the position in or out? You could always decide to partially fund it.

Representative Kreidt: You've got $308,000 you can work with that number. You can delete the $15,921 and use that $308,000 for that position.

Representative Bellew: My concern is that I'm not sure what this person is doing in the human services budget. I think it should be in the Attorney Generals budget.

Chairman Pollert: Is there any other discussion? Would we rather just remove it? Let's eliminate the 27th amendment. We will move on to the next amendment.

Representative Ekstrom: That was my amendment. I think we heard in public testimony from a number of individuals that have had mental health issues. I just can't get over the fact that you would stand up and be willing to publicly testify. The stigma of mental illness is often great

in this society. This would create jobs for people who have had mental issues. They would partner with other people who are not so far along in their treatment. These folks make a difference in terms of making sure that these folks are getting up in the morning, going out, shopping, getting a job, and being productive members of society. I know it's a lot of money and I'm as hesitant as anyone else to add money where we have not had it before. I do think it's an important program and I put it in there.

Chairman Pollert: Was that on an OAR? I was just looking for it.

Representative Ekstrom: Yes it was a partially funded OAR and what I suggested is that we would fully fund it.

Chairman Pollert: Is there any other discussion? If not we will call the roll. The amendment fails 3-5-0. We will move on to compulsive gambling. The Governor's budget had an increase of $300,000. This amendment would reduce that to an increase of $100,000. Currently there is $400,000 in the Attorney General's. I won't go to that specific part. This comes out of DHS.

Representative Kreidt: That is my amendment. My amendment was that there was $300,000 from general funds. I did reduce that to $200,000.

Chairman Pollert: You reduced it to $100,000 increase over the Governor's Budget.

Representative Kreidt: Yes so they would have $500,000 to go forward. I feel that is a fair amount. I'm sure we will be looking at this again in two years. Let's see what kind of results we get out of this.

Representative Metcalf: I guess this particular aspect is something that I have been very concerned about over my years in service here at the legislature. Since we added lottery and other gambling services into our state processes, which I don't think should be in here as far as gambling is concerned. When you see the damage that is being done to families because of gambling. We don't realize it. The problem is for the people that will not admit they have a

gambling problem and before they know it have lost everything they have had in their careers. We don't want to spend a few hundred dollars that we make off the profits that the state makes to ensure that we can minimize the losses that these people are incurring. I feel that we should leave it the way it was. What is more important, to have an extra $200,000 in the surplus that the state will carry forward or is it more important to take care of our people who are being injured during this process. I hope we can kill this amendment and give these people a chance of living a good life.

Representative Nelson: Although I don't disagree with much of what Representative Metcalf said about the addiction of gambling, I'm guessing we are still over the Governor's budget. This money isn't going to the state treasury. We are still on the plus side of the ledger. That seems so unfair to me is that much of this comes from casino gambling. The state of ND is making an effort to decrease gambling. The tribes of the state are not. They have a voluntary contribution that hasn't grown as I can tell since the original compact. They should be partners in this as well. That is where much of the addiction comes from. We certainly contribute to it but this should be a partnership. I think that is one of the faults of the gaming compact with the tribes of the state.

Representative Metcalf: I don't think it's fair to consider the tribes versus what we would say the white people or the other people. To me we are all people and we all deserve that. I cannot change the agreements that have been made between the Governor and the tribes. I can change what we can do for our people who need this service. When you hear what people say and how they have had this problem for years, they fight it continuously. They will say that if they didn't have the help that they did that they would succumb to it again. It is a constant pressure. It's the same as if you would have an alcohol problem. If you don't have the help it is difficult to overcome. I would hope that we could leave that $200,000 in there. It won't be that

much of a cost to the state. They will end up making money because of the continued employment of the individuals.

Chairman Pollert: What if I made a substitute motion instead of the $200,000 to reduce it $150,000. The Governor's budget was $300,000.

Representative Metcalf: I would like you to make that motion. Whether I support it or not is something else. There are certain things that we don't know. I would bet that there are families in this room that someone in their family has had a gambling addiction. I know I have in my family.

Representative Wieland: I'm going to support doing this. I'm going to tell you why. One of the most successful addiction programs that we have anywhere is AA. The State of ND contributes nothing to AA. They do it all on their own. They have their own program and did their own thing. They didn't ask for any dollars from the state. We are giving them $400,000, now we are trying to go higher? I just don't see why we need to increase that program that much. I just can't support that.

Representative Metcalf: I just want to bring to mind the fact that the state of ND doesn't sell booze but we are selling lottery tickets.

Representative Kerzman: AA is merely a support group and doesn't get into a lot of the addiction problems. Treatment is a different thing.

Chairman Pollert: I'm going to ask the clerk to vote on the $200,000. It fails 4-4-0.

Representative Nelson: I would move to the motion that you were going to make. The removal of $150,000.

Representative Ekstrom: I second that.

Chairman Pollert: Basically we are reducing the increase in spending by 50%. We will take a roll call vote. That motion passes 7-1-0. We will move on to amendment 30 which removes funding for Governor's Prevention and Advisory Council grants. Is there any discussion?

Representative Ekstrom: This goes directly to the voice of the people and what they said they wanted. I don't know exactly what removing this funding would do to that council. I would need some clarification.

JoeAnne Hoesel: The council was formed in the last legislative session. It was given $100,000. In our current biennium is located in the Governor's office. This council is represented in all of the agencies in the state that have any prevention funding. It also has some local representation from some treatment providers and from the higher education and also from a school prevention officer. What their task is, is to take a look at prevention programs in the state of ND and make sure that there isn't duplication of services, and also put in place a prevention plan. It is prevention of substance abuse and prevention of also high risk behaviors. This currently funded $100,000 went 100% out to 6 grants in the state. We issued a request for proposal. From that, we received proposals from around the state and ultimately funded 6 of them. All of them are at the local level providing prevention services to the group that was identified. They were 5-8 years old. We took a look at the prevention data in the state which shows that children in ND are starting to use alcohol younger and younger. The plan was to put money targeting it toward that age group.

Representative Ekstrom: This has nothing to do with Measure 3.

Chairman Pollert: When information came out there was like $97 million between alcohol, drugs, and tobacco rehabilitation programs. I'm just wondering if there wasn't a double up there. I would have to believe in the DHS budgets that you must have some prevention programs going on. I would have to believe that. I'm just wondering if this is a double.

JoeAnne Hoesel: The task of this council is to assure that there isn't a duplication of efforts. You can take a look at the other departments. They all target different areas. These grants are not duplicated. That's one of the tasks of this council is to assure that it is the case. The funding that you are referring to is federal funding. This is general funds. I believe the general fund is like $199,000 total in general fund versus the $9 million that would be federal.

Representative Wieland: You said this was funded in the Governor's budget in the last biennium? Why didn't it stay there?

JoeAnne Hoesel: My understanding is that this reflects the fact that the division of mental health and substance abuse was reviewing all of the information anyways since the Governor's office typically doesn't fund and operate grants. The division of mental health and substance abuse does .My understanding is that they just put the money there because we were managing the grants anyways .

Chairman Pollert: Any further discussion? The amendment passes 5-3-0. We will move on to the 31st amendment. Alternative A increases funding by $1.09 million and alternative B is to decrease the funding for centers for independent living by $400,000.

Representative Ekstrom: Later on this afternoon, I know we are going to talk about the ADRC and we know what is pretty much going to happen. The centers for independent living could be an ideal vehicle for us if we were serious about doing single point of entry. They have established centers around the state. What this additional funding would do would allow them to have more sites. I don't know where this committee came down. The discussion on the floor with regard to the dementia bill mainly does not address single point of entry. When I ask the other committee members from human services policy division that was never discussed during that testimony. They had no rebuttal. They had no one coming in and saying that they

didn't want single point of entry. Everyone who testified was in favor of it. I think that is a discussion we should have here.

Chairman Pollert: I know one of your amendments is coming up when we go down further on program and policy. They could also be related.

Representative Bellew: Policy committee doesn't like it when we add stuff back in that they killed on the floor. They really don't like it.

Chairman Pollert: That discussion is going to happen anyways.

Representative Ekstrom: I am aware of that and I know how angry they get when we do that. I think we have a unique situation this year. I don't know how many bills were stripped away. From policy appropriations, I agree that the policy needs to be debated. I also know that our responsibility is the money. I have watched almost every one of those bills that became stand alone go on to die. I'm not saying that there is a conspiracy or anything else, I just know that there is an urging coming from the other side of the aisle to reduce this budget. I can be in agreement with a lot of that. I really have a lot of difficulty with the way the process was worked.

Chairman Pollert: I have to correct myself. The increase in the Governor's budget was $980,000. I am wrong on that it was $800,000.

Representative Ekstrom: I think from a philosophical standpoint that there is a place for nursing homes but there is also a great place for community based services. I think that we did hear a debate on the floor where very intelligent people that said their family went through a great deal of grief trying to find services. I have heard this from my constituents. I think we have an ideal vehicle to get this up and running.

Representative Nelson: I wish we would have had the opportunity. The county social service directors have been left out of this discussion. I really would like to hear from them and let

them defend what they do. I'm not so sure that they don't do a better job. I think that some point in time in this session, in the Senate, or in the interim that it should be part of the discussion to see where the bar is at. We can see if that is the appropriate place before we start going to a different direction. Their voice has not been heard in my opinion.

Representative Wieland: I have talked to several social service directors and they have indicated to me that they do provide that information. You had one person who said to go to the yellow pages. I would have fired that individual in a minute. That is total incompetence for them to do that. I have some experience here because my mother is 97 years old. She lived in an independent apartment until she was about 95. We could see some problems. We went to the social services in Cass County and we got terrific help from them. They gave us all kinds of options. It was our decision. If they expect that someone is going to make the decision for them and the ADRC that is not what they are going to do. They are just going to tell them that this is what they have and this is what their options are. There is assisted living and other things that you can do. There are options that they told us about. I agree with Representative Nelson that the social service directors are getting a bad rap here. I think we have 53 of those facilities out there. If we are going to do a single point of entry maybe there is some training that needs to be done to allow them to do that and for us to set up an additional 2 now and who knows how many later just doesn't work. I think we are barking up the wrong tree.

Representative Kreidt: Just going back we heard on the floor today and now Representative Ekstrom said something. Single point of entry wasn't established to keep people out of nursing homes. That isn't the intent of that. The majority of residents coming into nursing homes usually come from the hospital. They aren't looking for additional services.

Chairman Pollert: Is there any further discussion on alternative A? If not we will take roll. It fails 3-5-0. Is there any further discussion on alternative b?

Representative Ekstrom: Is there a rationale for the decrease?

Chairman Pollert: In the last biennium wasn't there $250,000 or $280,000 put in the communities of independent living. What this would be doing is half of the $800,000 in the Governor's budget. This motion passes 5-3-0. We will move on to amendment 32 that relates to the health care trust fund that provides moneys in the fund will not be included in drafts and appropriation bills introduces as part of the executive budget.

Representative Kreidt: That is my amendment. This is the health care trust fund. This is money that is generated on an annual basis by interest and repayment of loans to health care facilities that receive money out of the health care trust fund a number of years ago. This money will keep coming in probably for another 15-20 years with the repayment of those loans. This is money that is generated by nursing homes, basic care facilities, some assisted living facilities were also involved with those loans. My personal feeling is and has been that the money should e used for ongoing basis for a healthcare facilities either in salary incentives or an inflator usage and that it should be appropriated by the legislator when we are in session. That is what the amendment would do.

Representative Ekstrom: This is tying the hands of the Governor and any future Governor. I don't know the process is broken so why do we need to fix it.

Representative Bellew: It is the legislature that does the appropriations, not the governor. That is in the constitution.

Representative Ekstrom: All I'm suggesting is that as the executive branch puts forward a budget that the money is available to play into the budget.

Chairman Pollert: Any other discussion? We will call the roll. This passes 6-2-0. We will move on to the 33rd amendment. Is there any further debate?

Representative Metcalf: Basically you will be surprised that I understand where Representative Wieland is coming from. One of the problems that we have as far as our county social services is the name that they are social services. People attribute to that name as being welfare. This is one of the reasons why they don't like to go that way. If there was some way that they can change that name and I'm sure they could provide all the services that we need. As citizens of this state. It is that stigma that goes along with that name that is hurting the whole program. That is my opinion.

Representative Ekstrom: Just one other piece. I think you all know that I work at a funeral home. At a daily basis I do pre-planning services for folks that are mostly well over 70. They talk to me often about the process of trying to decide how to get services. It is very confusing and there is a stigma about going to the county. They perceive it as being welfare.

Chairman Pollert: Any more discussion? If not, we will take the roll. This amendment fails 2-6-0. We will move onto SCHiP which is the 33rd amendment.

Representative Bellew: I believe we have to have an amendment to take this out.

Roxanne Woeste: That is correct and now might be a good time to do that. HB 1012 does include as it stands $600,000 as it stands for aging and disability resource. It may be a good time to proceed with an amendment.

Representative Bellew: I will make that motion to remove that $600,000.

Representative Wieland: I second that.

Roxanne Woeste: I believe the funding is in the aging services program. The policy has already been removed.

Chairman Pollert: We will vote on this motion. It passes 6-2-0. The SCHIP bill authorization and funeral set aside have not hit the floor.

Representative Ekstrom: For purposes of time saving I will withdraw those amendments but I would like to have in the record that I have serious problems with the way this process was carried out in terms of taking these out and making them stand alone. I understand the changes in policy but there were plenty of other things that were within HB 1012 that were policy changes that never went to a policy committee.

Representative Bellew: Another clarification from Legislative Council that is if it's changed on the policy committee we have to remove the funding.

Roxanne Woeste: That is true. We do need to wait to finalize this budget 1012 to marry it with the two policy bills.

Chairman Pollert: That is correct and I'm sure hoping that the votes on the floor come up. The SCHIP bill hasn't been on the 6th order yet and the funeral bill is going to go in front of the whole appropriations.

Roxanne Woeste: We have a couple issues we need to clear up before we can finalize 1012.

Chairman Pollert: Moving on to the bottom of that page to the 36th amendment. I need a little explanation on that.

Representative Nelson: If you remember the overview this was the monitoring systems that were sent. This is currently used in Cass County. That is one area that I remember. Quite honestly there are variable to monitor whether it is blood pressure, heart, or that type of things from homes. It would actually save money with mileage. There is no need for an appropriation as I see. This might be something that would become very useful in rural areas as well, rather than having a nurse come and visit or the patient go to the clinical setting. I think its one good use of technology and it provides healthcare delivery in the home.

Chairman Pollert: What would this legislative intent mean?

Roxanne Woeste: This is the best language we could come up with. What the legislative intent would be is that the department should consider any changes they need necessary to implement reimbursing for home tele-monitoring visits at the same rate as inpatient visits. I didn't have the pleasure or time to discuss with the department if there are current practices for reimbursing at different rates for these visits.

Maggie Anderson: Off the top of my head I do not know what the difference in our reimbursement rates are. I do know with the tale-monitoring sometimes it is the equipment piece as well. The initial equipment that they need in the home to actually do the monitoring. If I understand this intent it would require us to pay the same for a tale-monitoring visit as we do for a home health visit. I don't have those rates with me off the top of my head. We have not done any kind of fiscal analysis or impact for this.

Chairman Pollert: Any other discussion? If not we will call the role. It fails 3-4-1. The next page is the state hospital. The top of the page has amendment 37.

Representative Nelson: That was mine. We funded about half of the extraordinary repairs. If we want to do both of them in one we can. We had no intention of taking the resurfacing and paving out. The reason that is included in a separate motion is with the uncertainty of the economic stimulus money. We thought that it may qualify for that. That is the reason. If it doesn't qualify for that we would be more than prepared to put that back in.

Chairman Pollert: Is there any other discussion?

Representative Ekstrom: I showed you an amendment that I had, I don't know if we plan to bring that up this afternoon? Can I make a suggestion that we will hold that one for full committee until we get our ducks in a row? The one that deals with more than just the $300,000.

Chairman Pollert: I haven't had time. I know our discussion on the $300,000 which is a small figure as to what might happen with the federal stimulus package. The million dollar was just a priority list. I'm trying to justify the $300,000. I know it's needed. We did half last biennium. I'm just trying to get a comfort level of what we are doing here. Do we put the $300,000 or leave it out, or wait and make that decision when we have a better idea from the Senate. The way it sounds to me is that the $1 million won't make any difference. The $300,000 might. Maybe it's all mute .

Brenda Weisz: We won't know with the economic stimulus. We don't know if that can pave the road. Last year during appropriations you did remove money for resurfacing. I'm not sure that we got half of it done with that change. I don't know when we will know if the economic stimulus will allow for resurfacing work or will the economic stimulus package call for roads that are unsurfaced on this point and those are the ones that are actually included in the roadwork of economic stimulus or what.

Chairman Pollert: It's kind of strange because we are trying to work with this budget and keep it in line.

Representative Nelson: I would just say that at the end of the day that this biennium is going to be a good time to resurface that project and get it done because of the economic situation. I don't really think it hurts to pull that money out now. By the time the senate gets this bill, it is certainly one that could be flagged. There might be answers. If not we can put it back in then.

Chairman Pollert: Any other discussion? We will take a roll call vote on the 37th amendment. It passes 5-3-0. We will move on to amendment 38. I have one more question for Brenda. If you throw something out thinking you are going to throw it back in, we don't even know what the economic stimulus package is going to say. If we say we are going to do something that is what I'm struggling with.

Brenda Weisz: Alex clarified as well that we did no resurfacing this biennium.

Chairman Pollert: I think it was $600,000 and we approved half of it.

Alex Schweitzer: We didn't do any resurfacing at all during this biennium.

Chairman Pollert: Would we have put it in as one time and you would have decided where you would have needed it at maybe?

Alex Schweitzer: In my recollection it was pulled out completely. It was basically using chip asphalt.

Chairman Pollert: How much would that have been?

Alex Schweitzer: We didn't deal with any parking lots or anything. We used what we had in dealing with chipped asphalt and did some work with the gravel in one of the parking lots. We were asked not to do any asphalt.

Chairman Pollert: Yes last year says reduce capital improvements from $3.362 million to $3.062 million in reduction of $300,000.

Alex Schweitzer: Right. That was in general. It was basically a general reduction in capital. We didn't have the additional money to do the resurfacing.

Chairman Pollert: Was that number one on your priority?

Alex Schweitzer: It is a high priority because the fact is that we have the prison. It is number one if you look at the capital improvement list by the way.

Representative Nelson: Does that hamper you if this is held over until the senate hears the bill? I know it's a long shot but we don't want to hamper you either.

Alex Schweitzer: I don't have an issue because we won't be bidding on this until the middle of summer. The important thing is that it was listed as the number one priority. That is a key thing.

Brenda Weisz: The economic stimulus package is very clear from the federal government that

you can't replace general fund dollars with stimulus dollars. They are putting their piece on that too.

Chairman Pollert: We will call the question. Amendment 38 fails 1-7-0. Do we want to have the discussion on global health initiative all the way through or do you want to do it in one swoop.

Representative Metcalf: We want one swoop.

Chairman Pollert: I'm the one who asked for the amendment. It gets split down with the divisions all the way through. I'm going off of memory. It is like $4 point some million dollars and 11 FTE's. It's not that I don't like it. There is some of it that I could probably take but there is some I can't. I don't know if that means that the discussion goes on further which it will in the Senate.

Representative Bellew: It is 11 FTE's. The general funds are $4,324,776.

Representative Ekstrom: My amendment is under the Southeast human service centers. There is a separate amendment dealing with Cooperhouse.

Roxanne Woeste: It would work if you take it in one removal. If it would be ok with the committee members you could address Representative Ekstrom's whose would be an add back for the Cooperhouse contract staffing.

Chairman Pollert: Representative Ekstrom is that ok with you?

Representative Ekstrom: Yes.

Chairman Pollert: Any other discussion? We will take a roll call. It passes 5-3-0. We will move to the next page and the Developmental Center. The 40th amendment is to decrease one time funding for extraordinary repairs.

Representative Nelson: Again that was about one half of extraordinary repairs with the

highest priority given to the completion of any roof projects. That is kind of where we left at is that all those roof projects would be completed with this funding.

Chairman Pollert: Any more discussion? If not we will call the roll. It passes 5-3-0.

Roxanne Woeste: If you have your packet that deals with language changes, I believe it is the third page in which is the copy of the statutory changes that we are looking at here.

Alex Schweitzer: The amendment is pretty simply. It changes statute to require that anyone admitted or readmitted to the developmental center requires a screening and approval by the center for them to be admitted. We use our cares team for that purpose. The reason for that is that I heard pretty clearly from that committee that they would like to see the population reduced then. We cannot do that if we continue to have readmissions and admissions to the facility. It is similar to what we do in the state hospital. It is one of the key reasons why we have been able to place people in appropriate settings. That is a part of it too. People want to be places in appropriate settings. That is a higher cost facility. It has been an effect of the state hospital that we hope will be very effective at the developmental center. The screening process, if we felt that the individual needed to be served at the developmental center we would admit them. It is to make sure we wouldn't be admitting people that would be inappropriate.

Chairman Pollert: Any further discussion? If not we will call the role on the 41st amendment. It passes 5-3-0. If I'm correct there are no changes on the Northwest Human Service Center. The next items would be the North Central Human Service Center. The first one on that we would have taken in one swoop with the global health initiative. The one item on that page is to remove funding in the executive budget for providing additional oversight and monitoring of DD cases. Is there discussion?

Roxanne Woeste: To assist with the committee work there are 4 of these positions spread amongst the human service centers, north central, northeast, southeast, Westcentral. This is also one if you care to do all in one motion instead of.

Chairman Pollert: You are talking about page 7 on the green sheet, right? That would be the numbers that I would have figured

Roxanne Woeste: That is correct.

Chairman Pollert: There is 4 positions of $58,793. If we want we can do it as one swoop or keep it. There is 4 FTE's in here. You heard it from Northcentral, Northeast, Southeast, and Westcentral. If there isn't discussion we will take the roll on amendment 43. It passes 5-3-0. We would move on to the Southeast human service center. Alternative A is out and now we need to talk about alternative b which is Representative Ekstrom's amendment.

Roxanne Woeste: I believe Representative Ekstrom's amendment would be to maintain the contract staffing at the Cooperhouse for 24/7 coverage. It is different than how it looks in the paper amendment. It is $236,520 from the general fund with a total of $315,360 total funds.

Chairman Pollert: That is down on the amendment sheet.

Representative Ekstrom: If the committee remembers as we were discussing this initially one of the questions that the chairman and several others had was the commitment of other funds that have already been brought to bear on this project. If you look at page 2 you will see that there is $4.1 million that has been committed. I've got letters verifying those facts that are behind that first sheet. The city of Fargo has made a significant commitment to this project. Demolition has already taken place on the site. We have heard from our chief of police as well as state's attorney's and others that indicate that this would begin to stop the chronic homelessness. We cannot put these folks into one of Ann Carlson's' buildings. We have talked to Rep. Carlsen about that. This is not a Fargo bill. The folks that we are dealing with, most

have come from out of state coming to Fargo in search of their programs. Sometimes they are looking for work and they are not getting it. We all know where homelessness comes from. I would ask the committee to give us a yes on this one.

Representative Wieland: I'm not sure exactly what to do about this particular thing. I had a discussion with a member of the city and asked him some pretty pointed questions about this facility. I got some things that kind of concerned me a little bit. One of them is that a lot of the people would be residents here and would not accept residency and halfway houses or other existing facilities. The second thing is that this reminds me an awful lot of a onetime proposed wet house. I know there is not supposed to be any drinking done in this facility but they expect the individual that is hired through this fund to do something about that. The only thing that this individual would be able to do is call the police department who would respond to that. I'm kind of concerned. We don't have any idea what the FTE's requirements will be. We are just told that it is someone that is supposed to check people in and out. I'm not so sure that it is all they are being asked to do here. I have some concerns. I don't know that it's a bad program. They said that over half of the homeless are in Fargo. That indicates to me that there is going to be someone else that is going to come in and ask for funding of a particular thing. I realize that they have gone a long ways here. I wish they provided us with a little more information about what this individual that would be hired would really be doing. This kind of concerns me. If you are going to deal with a drunk, sometimes those people are hard to handle. They get awnry sometimes.

Representative Nelson: There has been no ground breaking yet?

Representative Ekstrom: That is correct. All I'm suggesting is to say to remove the structure that is down there. Demolition has happened.

Representative Nelson: So we are sitting here. They have the letters of support to build the building. If we don't fund this position is that a deal breaker for the whole project?

Representative Ekstrom: They have indicated to me that without state support that it is going to put it in severe jeopardy. That is as far as I can give you assurance many of the folks that have committed money have said that we need to see some state support on this.

Representative Wieland: Is the amendment in this packet here?

Chairman Pollert: It is but I'm going to get a clarification here so that I get the right vote for everybody. Roxanne, if we want to fill this back in with what Representative Ekstrom wants to do we vote yes. Am I correct?

Roxanne Woeste: Perhaps we will just reword B to say add funding for contract staffing at Cooperhouse of $315,360 on which $236,520 is general fund. A yes vote will be to add the funding and a no vote would be to not add the funding.

Chairman Pollert: So the general funds would be a positive $236,520. The total funds would be a positive $315,360.

Roxanne Woeste: Correct.

Chairman Pollert: So does the committee understand this? We will call the role for the 46th amendment. It passes 5-3-0. That amendment adds back in $236,520. The next amendment was removed in the swoop. The next one is removing funding for young adult transition services. I also think there is another amendment in the west central human service center that deals with that as well. If you look at west central a couple pages in, that is for $650,000 for the young adult transition services. If I'm correct the dollars are different but they are a similar program. Do you want to do them separately or both?

Representative Ekstrom: These are the young adult crisis beds. The beds would keep these kids out of more expensive crisis beds, emergency rooms, and inpatient hospitals. This is a

less expensive approach to transitioning these young adults into the community. I think we heard that they aren't ready for Primetime. They need this additional support to ease them into the community so that they are workers and taxpayers.

Chairman Pollert: Is there any other discussion. I'm asking for this for one vote on the 48th and 54th amendment. This motion passes 5-3-0. We will move to the 49th amendment which is to remove funding and FTE position added in the executive budget for the partnership program. Is there discussion? If not we will call the roll. It passes 5-3-0. On the next page the Southcentral human service center, remove funding and FTE position added in the executive budget to complete vulnerable adult protection services. Any discussion? If not we will take the roll. This passes 5-3-0. The rest of the amendments were the global health which were struck out in one swoop. We had our discussion on hospitals and a hold harmless on that rebasing of the hospitals. On that particular hospital what would it take to get the inflationary. There is a 0&7 the first year of the biennium. With the rebasing I think one of the hospitals got affected by the 90%. Is there any way to get what that figure would be at 7&7 or 3&7?

Maggie Anderson: Are you just asking for the one that is being held harmless or the other ones? For example just because they aren't held harmless at 90% they might be sitting right at 91%. Would you just want the one that is held harmless?

Chairman Pollert: Would the 0&7, do we have that figure?

Maggie Anderson: For the hospitals? At 90%.

Chairman Pollert: If we did the first year at 7%, and of course the 7 is already in the second year. Do you have what that figure would be?

Maggie Anderson: We should be able to get that to you.

Chairman Pollert: While you are at it, why don't you just give me what the 7&7 would be for

that one hospital. With that we will be in recess until 7:30 tomorrow morning. (114:30 done),

the recorder was kept on after that but no recordings after 114:30.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 2/11/09

Recorder Job Number: 9150

Committee Clerk Signature Meghan Pollert

Minutes:

Chairman Pollert: Called the meeting to order and took roll. Every member was present. We are going to continue working on HB 1012. I want to talk the inflators this morning. When you look on the revised sheet, page 3 on the amendments that we looked at yesterday, you will see it says alternative A, B, and C. Of course the Governor's budget is at 7&7. Looking at the sheet, if there is a call to go to 5&5 or 6&6, if I'm correct does that mean that the hospitals would go to 0&6 and the nursing homes would too? Long term care also has an effect on hospitals, am I correct?

Maggie Anderson: The way the sheet was comprised was 7&7 is the way the Governor's budget was built, or 0&7 for those providers. When you go to 6 the same assumptions apply. That it is 6&6 across the board except for those that were singled out for 0&7, now become 0&6. The same goes for 5. That is how that methodology was carried forward in the inflation scenarios.

Chairman Pollert: I want to talk the inflators.

Representative Bellew: If we do anything with the inflators and this is just me talking, the ones that were rebased and are at 0&7, I would like to leave them at 0&7 if that is acceptable

with the committee. I'm just bringing that up for discussion to see what you think. If we go 6&6 or 5&5, leave them at 0&7.

Chairman Pollert: The reason I bring that up is because of what inspired yesterday with the $2 increase with long term care and DD. My feeling is that the inflators have to change and not go up. At the same time if you remember what we did with the amendments on hospitals and standardized cost reports, hospitals were put at 90 of that cost report instead of 100. Because of what happened with the long term care, I don't think that should be that way for the hospitals. My feeling is that they shouldn't be affected by going down to 6&6, is that what you are talking about, and ambulances, chiropractors, and the other three.

Representative Bellew: That what I was talking about, except for the dentists because they remain the same as the Governor's budget. The four I was talking about was hospitals, physicians, chiropractors, and ambulances.

Chairman Pollert: Is the committee comfortable with the $2 raise to long term care and DD?

Representative Kreidt: I did a little recalculating last night and had some long thoughts about our action yesterday. My personal feeling is that I don't want to jeopardize the inflators for nursing facilities. If we move ahead with the $2 we are going to lower the inflators. I want to reconsider the amendment I made yesterday.

Chairman Pollert: You are talking about the $2 for nursing homes?

Representative Kreidt: Correct. We were handed out a sheet yesterday. It was a little late to take a look at, not saying I couldn't have figured this out before that. You can see on there that $0.50, $1.5, and the $2 salary increase using dollar amounts there. I don't know how to get rid of the $2? I have to reconsider it and plug in a new number.

Chairman Pollert: Your amendment yesterday was $2 an hour.

Representative Kreidt; We used a dollar number.

Chairman Pollert: You talked about $10-$15 but someone who is making $15.02 they get nothing.

Representative Kreidt: You have to remember that with the salary increase we are looking at July 1 that would go into effect. Those individuals that are above that probably would have seen some increase when the facility gives salary increases when they receive the 5% inflator. Those individuals would have probably moved up %5. It depends because it is up to the facilities discretion. Again as I mentioned yesterday if we have high end people who got a 5%, if they were making $20 they got $1 raise. If you had a $9 person they got a 45 cent raise at 5%. I still think we are inflating those with the bottom people July 1. That is where the critical need is that we see some significant turnaround in the number of people leaving their employment or trying to attract more people at the lower level. That is the critical area.

Chairman Pollert: I don't disagree with that. When I look at this sheet, the $2 at $17.6 million, your amendment was at $14 million.

Representative Kreidt: That is correct. We are looking at the lower 75% of that pay scale.

Chairman Pollert: When I look at this then, what are you thinking about doing?

Representative Kreidt: What I was looking at doing is using the dollar range. There are general funds of $5,950,451. Again, subtracting $1 million out of the Health Care Trust Fund. We would be expending not quite $5 million to cover about $1 raise. If the committee has problems with using the $15 and under and want to open it up, let them all scramble for it. I'm just trying to maintain as much money as I can for those lower level people.

Chairman Pollert: I'm not arguing that at all. Yesterday you were at $17.6 but the amendment was at $14. I'm trying to get the $5.95, are you trying to have that read the same? Do you see what I'm getting at, the correlation between the $17.6 and the $14? Are you doing that correlation or are you just saying it is going to be $1 increase at the $5.9.

Representative Kreidt: I would like to use a dollar amount. Let's not say $1 an hour let's just use a figure to give to the facilities.

Chairman Pollert: So they will just have the leverage of how they are going to do it?

Representative Kreidt: Right. They get the dollar amount. They could give the raises.

Chairman Pollert: It's not that I'm disagreeing with you. I'm just saying that the amendment was for $14 million which is different than the $17.6 I didn't know if you were trying to do the same ratio.

Representative Kreidt: If the facility wanted to do a $1 raise, I just assume give them a dollar amount.

Chairman Pollert: We would have to reconsider our action.

Representative Kreidt: I'm moving that we reconsider our action of yesterday of the $15 million figure with $1 million coming out of the Health Care Trust Fund.

Representative Nelson: I second that.

Representative Kerzman: I resist that. I have a little bit of a problem of just putting the money to the facilities. I think we want to give it directly to the people who need it. The main reason I'm voicing my opposition is because do we want to reconsider all of our action we did yesterday or are we just picking parts of it? I came here this morning with the understanding that we are just going to work on the inflators. I have a couple things that I would reconsider too.

Chairman Pollert: Well if you are going to bring it forward then we will bring it forward. If I do it for one I'll have to do it for all. If that is what you want that is what I'll do. I don't have a problem with that.

Representative Kreidt: I would like to see the nursing homes have this dollar amount. I realize that the inflators are very critical. We are talking salaries here. Would this enable the

low end people to still get some money? The cost of nursing facilities, regardless of the economy, seem to go up. To be able to cover the cost categories with the higher inflator, I can see if we pass the $2 out which we did. I see that going down in flames. I am also taking the chance on the inflators going with it. I'm trying to protect the inflators. As I said yesterday I am kind of a realist and I know where this would go in full appropriations.

Representative Ekstrom: I have the inflationary increase compared to the consumer price index.

Chairman Pollert: We have that. Did you want to discuss that?

Representative Ekstrom: I could. I know we aren't talking about the inflators at the moment. If you look at that chart in regard to that hospital and related services, with fiscal year July 1, 2008 their increase was 6.8%. Now the overall CPI for that same period was 5.6%. I think it is relevant to the discussion as we move forward with this.

Chairman Pollert: If you look at the average of the 12, the average was 2.78. The average on what the legislator has done is about 2.07, 2.08. There was a discussion that CPI could be 2.1. I went through the numbers and it would show you the 7&7 would be more if we added to what we were told. We would be paying on an average for the last 14 years if we go 7&7. If we go 6&6 it is pretty close to the CPI. I looked at them and did some simple math.

Representative Ekstrom: I'm a business manager for a company that employs very few people. We just took a 17% hit on BCBS. We have been told to expect that again.

Chairman Pollert: We will take a roll call vote to reconsider the motion. It passes 5-3-0.

Representative Kreidt: Then I would like to come forward with a new amendment using the dollar amount. If the committee feels more comfortable saying they have to give $1 to these individuals then I could include that in the motion. I would just assume to leave it as a dollar figure.

Chairman Pollert: Roxanne, are we going to have to have language to go to the full appropriations. We sure aren't going to have that here this morning. Do we need it as a whole committee before we approve the budget?

Roxanne Woeste: Yes.

Chairman Pollert: Basically what you want to do is give the authority to the nursing homes. The problem I have is that it might go to the executives.

Representative Kreidt: Using $4,950,451 out of the general fund, $1 million out of the Health Care Trust Fund to be provided for salary increases for the lower 75% of individuals working in nursing facilities or whatever language we need to get that properly put together, I would so move.

Representative Bellew: I second that.

Chairman Pollert: Is there discussion? I would assume this also includes the appropriate federal dollars to move forward? The motion passes 6-2.

Representative Wieland: Yesterday we also passed a motion allowing $2 salary benefit increase for DD providers. It had been my hope under $15. It had been my hope that the inflators is where we would find some of those dollars. From what I'm sensing is that the inflators are not going to be reduced much, if any at all. Certainly not down to the level that I had hoped for. With that in mind, I was on the prevailing side. I would like to bring back that motion for the $2 salary on the DD providers. I will make a motion to do so.

Representative Kreidt: I second that.

Representative Metcalf: I understand your need to bring this back. I would hope that we can somehow keep these two married together so we aren't having these continuous fights within the town that is tearing them apart. We don't want employees moving from one place to

another. I don't favor any reduction in this $2. We have to make sure we keep it at the same level.

Chairman Pollert: I understand your concern as well. It is going to be different in everybody's district. We have the state hospital in our district. With the $2 increase we were going to have a huge discrepancy. They would be moving from the state hospital to long term care and DD. It just would happen. It all depends on what the state employee raises are going to be too. That is a legitimate point.

Representative Nelson: I would just like to add something to that discussion. You are using a gross comparison as far as the inflator. Understand that if I was a state employee versus a DD provider, you have to realize that those two people have to pay their fringe packages out of their pockets. The health insurance had a 28% increase for the state worker. That is an added benefit. That comes out of the pocket of the nursing home or DD provider. That would very likely take the difference of that inflator increase.

Chairman Pollert: I will ask for the motion for reconsideration. We will take a roll call vote. It passes 5-3-0.

Representative Wieland: In light of that I would like to amend or make a new motion to resend the previous action on which we had $2 per hour salary or benefit increase and change that to $7 million general funds and whatever federal funds are involved. That is approximately the $1 an hour area.

Representative Kreidt: I second that.

Chairman Pollert: Is there discussion?

Representative Ekstrom: The sheet we have has some $8 million. Where did the $1 million go?

Representative Wieland: It is $15 an hour or less so there is actually only $90%. It is $14 million for the $2. I don't know why it wouldn't be half of that.

Chairman Pollert: We will take a roll call vote on this motion. It passes 6-2-0. Representative Kerzman would you like to bring any back for reconsideration?

Representative Kerzman: I would like to reconsider our action where we inadvertently left out the DD clients and going from $60 a month that they can retain to $75. We did it for the long term care people and I think we should also include the DD people in there.

Chairman Pollert: Is that on the revised sheet? Could you tell me what page?

Representative Kerzman: I'm on the third page.

Chairman Pollert: We passed that yesterday. We have to have statutory language to put that in the budget. For some reason that is one allowance that is in the century code and we don't know why. We just found that out so we have to have that put in. That is at 75.

Representative Bellew: Isn't Rep. Kerzman talking about the DD?

Chairman Pollert: I'm sorry this is basic care. Do you have what that amount is by any chance?

Representative Kerzman: No I don't. I just assume that they were included in there.

Representative Bellew: On page 3 of our green sheet, about ¾ of the way down. It says add funds to increase the personal needs allowance from $30-$50 a month for individuals in an institutional setting who are SSI only and receive their personal needs allowance from social security. It has $148,000 general fund increase there. I thought that was what Rep. Kerzman was talking about.

Maggie Anderson: There are a couple personal needs allowance in the Governor's budget. One of them is for all individuals that are in an institutional setting. That could be a nursing home or an ICFMR or even a psychiatric residential treatment facility for children. Those are

the three institutional levels that CMS recognizes. What you just read about the SSI is for everyone in the facilities. They are currently getting $30 from SSI and the Governor's budget would increase that to $50. Also in the Governor's budget is an increase specifically for individuals that are in an intermediate care facility going from $50 to $60. Currently what Rep. Kerzman is asking for does not exist in the Governor's budget or in any of the amendment action that you have taken.

Brenda Weisz: The amount to do the increase would be $155,520 in total.

Chairman Pollert: Could you tell me what that's for again?

Brenda Weisz: General funds would be $57,511. That would be for the DD providers and ICFMR's to go from the Governor's budget from $60-$75 to be equal with basic care according to the request of Rep. Kerzman.

Chairman Pollert: Rep. Kerzman is that what you are asking for?

Representative Kerzman: Yes. I will make that into a motion that we include the DD clientele in there.

Chairman Pollert: For the $57,511 total $155,520?

Representative Ekstrom: I second that.

Representative Kerzman: I don't think $60 is enough for the needs nowadays to buy a little bit of the personal things. It would give these people a little self esteem and it would allow them to have a little more. We should keep them fair with the rest of the people out there.

Representative Kreidt: I thought we had done that. I wasn't aware that we had left them out. I am in favor of that.

Chairman Pollert: Is there any other discussion? We will take a roll call vote. It passes 8-0.

Representative Kreidt: I have one last reconsideration. If you remember yesterday we kind of got going on the dentists. In the end we went nowhere. I would like to bring forward a motion in

regards to the dentists to rebase at 70% of the average bill charges with an inflation at 0 and 7. That would be my motion.

Representative Bellew: I second that.

Chairman Pollert: I'm going to just state the figures. It's the bottom of the 2 on the handout that is done. It would show the executive budget was at 75, 7&7, which would be $4.1 million, $1.5 general. This would reduce the total funds by $1,955,935 and reduce the general funds by $722,547. That was handed out yesterday. We will take a roll call vote. It passes 8-0-0.

Representative Bellew: I will bring this up. I still think the 7&7 is way too high. I'm afraid this budget at 7&7 is just not sustainable into the future. I would personally like to see a 5&5. I don't think I would get that passed so with that I am going to make a motion that we go to a 6&6 inflator and we keep all the rebased services that were at 0&7 at 0&7. That does include the dentists in this motion.

Chairman Pollert: I will ask for a second or do you want the information first?

Representative Wieland: I will second the motion for purposes of discussion.

Chairman Pollert: There is a motion and a second from dropping the inflators from all the long term care continuum basically to 6&6. Everybody except for the hospitals, physicians, chiropractors, and ambulances but the dentists would have to be in there with the actions we just did. The trouble I have is that we need information. This sheet is based off of 7&7. If we go to 6&6 that drops the five down to 0&6. You are trying to go 0&7.

Brenda Weisz: Handout A. What this is, is the first number is the savings when you go from what you said from a 7&7 and the rebase of 0 to 7. The savings on that sheet you held up was the top row of numbers. If you keep those that were rebased and keep them at the level of the Governor's budget at 0&7 and 7&7 for the dentists, your net savings to go from what the

Executive Budget is right now would be a savings of $5,484,000 from the general fund. For the dentists going from 70% of bill charge from 75%, the inflation will be minimal.

Chairman Pollert: But we went to 0&7 instead of 7&7.

Brenda Weisz: That will take me another half hour if you want that.

Chairman Pollert: We reduced off of a sheet that was handed out previously. When it shows that you have the inflator of 0&7, it showed it would reduce the general fund $722,547. It shows a rebasing at the 70% and an inflation of 0&7 would have been a reduction of $197,704. Would you take the $197,704 of general funds and take it off of the $5.4 or add it on to the $5.4 making it about $5.2 or something. Do you see where I'm getting that figure?

Representative Nelson: You probably don't want to complicate this even more. It has come to my attention that the hospitals at the 0&7, there is one facility that won't see any increase quite possibly in the next biennium. I don't know if there is a method that we can address that issue. I want to make you aware that it is a probability.

Chairman Pollert: I got here at 6:15 this morning and have been having discussions on that. You are probably going to see something happen in full appropriations. I don't know that for sure but I wouldn't be surprised. I have no idea right now. All I know is that I can't get the information for you in that short of time frame.

Brenda Weisz: With the sheet in front of you to go with the amendment you just adopted with dentists at 70% of bill charges, 0&7, you would have an additional savings of 4$42,214, from this sheet from the Executive Budget.

Chairman Pollert: Tell me the number. From the $5,484,468 million. That is what you are saying when we go to 6&6. If we do the 0&7, that number is going to change?

Brenda Weisz: Add to it the change that you had with the dentists. 70% of average bill charges at 0&7. Then you need to add additional savings to the sheet I handed to you of $280,333. These are general funds. You should have a total savings of $5,764,801.

Chairman Pollert: What that does, 6&6 on everything but the hospitals, physicians, ambulances, chiropractors, and dentists. Those stay at 0&7. That is the motion. We will now take a roll call vote. The motion passes 8-0-0. Is there anything else?

Representative Ekstrom: I had an amendment, did you get a chance to talk about that? It doesn't matter because we can deal with that on the Senate.

Chairman Pollert: I'm sorry let me talk to the chairman so we are ready for whole appropriations. Are there any other amendments to HB 1012? We will be in adjournment until the call of the chair.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☐ Check here for Conference Committee

Hearing Date: 2/13/09

Recorder Job Number: 9431

Committee Clerk Signature

Minutes:

Chairman Pollert: Called the meeting to order and took roll. Every member present. Handed out Attachment A. We should go through and compare the two. If there are questions we will discuss them.

Representative Ekstrom: Just procedurally how do we SCHIP and the funeral set aside out there?

Chairman Pollert: SCHIP and the funeral set aside are still out there.

Representative Ekstrom: How do we melt those back?

Chairman Pollert: If you take a look on page 2 of the amendments, page 4 replaces line 10 through 30. That is the ADRC's. This language is replacing that. Of the amendments that were adopted. If I'm correct Representative Kreidt is going to bring amendments forward about the language on the dollar for long term care and the DD's. They have talked to Legislative Council about that. There will be paper amendments coming forward. They aren't changing the dollar figures just wanting a little better language. As far as the funeral set aside, until something happens those stay in the bill. Chairman Svedjan might wait with this budget until we find out the action on the floor. Is that how that would be done?

Allan Knudson: Those other two bills are out there still with the funeral. The money is still in the budget. I would think you want to hold this before taking action in full committee until you know what happens on the floor. You could certainly send it out of the subcommittee.

Representative Bellew: Could we not remove the funding and if it passes out the floor put it back in at that time? Would that be ok or how would you recommend.

Allan Knudson: You can do it either way. You can take the money out and add it back once they pass it or they could leave the money in and take it out if they don't pass.

Chairman Pollert: I will have that discussion with Chairman Svedjan. If he is trying to push this thing out of here by Tuesday so it is on the floor by Thursday then we will have to ask for the paper amendments at that time. It is a little quick for us to ask for that right now at the moment .We should wait a couple of days.

Representative Metcalf: Looking on page 5 for the compulsive gambling, it was $200,000 and it dropped down to $150,000. The wording on here does not indicate that it is $150,000.

Allan Knudson: We will have to check on that. It looks like it should be $200,000 instead of $150,000.

Representative Metcalf: No it should be $150,000 but the language is wrong.

Representative Nelson: On page 4 of that same area, the second to last column under the Ann Carlson center with the definition of, I was asked to add after the second line after "medically fragile" to add "and behavioral challenged".

Chairman Pollert: For the paragraph? You are talking just in the language portion. Or do we have our amendment?

Representative Nelson: On page 4 it says "provide funding for increase the payment rates for children who are severally medically fragile". They would like to see "and behaviorally challenged" added there too.

Chairman Pollert: Is that needed? With what you are asking for, this isn't language in the bill. If I'm correct don't you have language coming in HB 1012?

Allan Knudson: This is the only area where that is referred to. I don't know if that definition makes any difference for the department as far as the reimbursement levels and those kinds of things whether it says medically fragile alone or medically fragile and behaviorally challenged. That makes a difference then you might want to adjust it.

Representative Metcalf: My question is if the changing in the word has any effects on the benefits provided. That is my concern.

Representative Nelson: I don't think it does. It just clarifies the types of individuals.

Chairman Pollert: You have to make a correction in wording for the other part as far as the $150,000 for compulsive gambling. Is that a problem?

Representative Bellew: Is this only about the Ann Carlson?

Chairman Pollert: No it goes to all facilities. If you remember the language Representative Wieland brought forward that is all facilities.

Representative Wieland: I think we should add that language.

Chairman Pollert :Do we need to have that as an official motion?

Representative Nelson: I will make that motion.

Representative Wieland: I second that.

Chairman Pollert: So in that particular portion it would say medically fragile and behaviorally challenged. We will take a voice vote. It passes 5-2-1. Do we have to have the same thing done about the compulsive gambling?

Allan Knudson: No that was just an error in the amendment. We will just fix that.

Representative Metcalf: The only reason I opposed that is because I don't know what it means. Does this give the Ann Carlson center more advantage over the other ones?

Representative Nelson: I would also like to add in that same area after children, add "and adults". I would move to do that.

Chairman Pollert: I want to get it all in one motion so we have to rescind what we just did. Is there a motion on the floor?

Representative Metcalf: I second that.

Representative Bellew: Why do you want to add adults too?

Representative Nelson: That is the clientele that they are serving. There are children and people over 18 years old that are classified as adults. That is their mix of patients. It just represents the people that they are serving.

Representative Wieland: I understand if we are talking between the ages of 18-20. I think over the ages of 21 there are different programs. I'm not so sure of the wording. I don't have a problem extending it up to add some of the adults. I'm just wondering if we are including 64 year old adults in this too.

Chairman Pollert: I need to have a better definition.

Brenda Weisz: The reason for the request to add the adults is because there are children in the facilities who are medically fragile or behaviorally challenged. What happens is those two types stay in those facilities and don't generally leave. If you don't add adults, when they turn 18 then money shuts off for that facility. They still are medically fragile but the money would shut off. If you add adults it will stay with that facility as long as that individual is with that facility no matter if they are 18, 19, and 32. It travels with the client.

Chairman Pollert: All those in favor raise your hand and it is unanimous. Now it is going to read medically fragile and behaviorally challenged residing at the Ann Carlson center for children and adults.

Representative Nelson: I think you would want to add and adults in the first line after children. That would read better.

Representative Bellew: The total reduction is on page 2 of the explanation. What we did was $26,711,414 in general funds . That is still a 19.7% increase over last biennium. I took the figures from the bill and not the green sheet.

Chairman Pollert: Is that number on the green sheet correct? The general fund is off on the green sheet compared to the bill budget.

Allan Knudson: That is correct. On the bill the one time funding is backed out. On the green sheet we show two separate amounts. The top number includes the one time. If you look down below it is the ongoing and one time broken out separately.

Chairman Pollert: Can you give me those figures? On the green sheet as the $721,512 that is the figure I've been using whenever I talk about a 21.5% increase in spending.

Allan Knudson: That is the amount of general fund appropriation.

Chairman Pollert: So if I take the $721,512,545 deduct off the $26,711,414 that gets to $694,801 just like it says. If I take that figure and divide by $593 it says it's a 17% increase.

Allan Knudson: That would be correct. The reason that Representative Bellew's would be higher is that the number in the bill does not include the one time funding from last biennium so that would be a lower figure. One time funding is backed out of the 07-09 amounts in the bill. That is why his amount would be higher. Then you are comparing the ongoing funding from last biennium to the total funding of this biennium.

Chairman Pollert: Are there any other questions or discussions about the amendments? We need to have a motion if we are accepting these amendments. There has to be a motion for accepting the amendments to HB 1012.

Representative Kreidt: I move that motion

Representative Wieland: I second that.

Chairman Pollert: If there is no discussion we need to vote on the amendments. These pass 5-2-1.

Representative Bellew: I move HB 1012 as amended.

Representative Wieland: I second that.

Chairman Pollert: Is there any discussion? I still have repercussions about the bill too. There are things I like about the bill and things I hate and things that I am neutral. We have to get it out of the committee. Whatever happens in full appropriations happens. I'm the same way but I still plan on voting for it.

Representative Nelson: I think we are all in that boat. I think we have done some very good things. In this whole process the department brought forward some very good programs that would help people in the field. We were charged with doing some efficiencies and I'm always frustrated in this committee because we end up having to be the brunt of the full committee's work. Yesterday was a good example of that frustration. I think again the human services have taken a much bigger portion of the efficiencies that we are expecting to get.

Chairman Pollert: I understand your frustrations. There are certain items I like and don't like. That is my opinion. We will all have those discussions amongst ourselves again before the conference committee. Any other discussion? HB 1012 passes as amended 5-2-1. I will carry this bill to full appropriations.

2009 HOUSE STANDING COMMITTEE MINUTES

HB 1012

House Appropriations Committee

☐ Check here for Conference Committee

Hearing Date: February 17, 2009

Recorder Job Number: 9649

Committee Clerk Signature Holly N. Stanek

Minutes:

Chm. Svedjan turned the discussion to HB 1012.

Rep. Pollert distributed and reviewed amendment .0105 (Attachment A). Rep. Pollert asked another Section member to discuss the nursing facility bed limits. (Page 4, Attachment A)

Rep. Kreidt: This amendment was to increase the asset limit for facilities under construction and we did not use any federal funds. We used the Healthcare Trust Fund using $324,506 and $553,012 of federal dollars to come up with that amount. When facilities are under construction we have an asset limit that sets the rate and develops the property cost. With costs going up we felt it was necessary to raise those limits for a private room and a single room additional asset limit under construction and there will still be some projects that are going to go over these limits. When that happens, they're going to be eating that cost in their rate. This is going to help them a little. (16:04)

Rep. Kempenich: Does this include the cost of the beds? (17:36)

Rep. Kreidt: No.

Rep. Pollert continued his testimony on p. 4, Attachment A. (17:47)

Rep. Berg: What was the rationale for that reduction? I think we had some of that discussion in our interim and I think we are spending about $400,000 or $500,000 on advertising for the lottery.

Rep. Pollert: If I had had my way all $300,000 would have been in the Attorney General's budget because it should not be a DHS problem. I think it's an Attorney General issue through the lottery but I know that it all goes to the general fund. We felt that $300,000 was too high – not unanimous. That's why we put it at $150,000. I have not heard any complaints.

Rep. Metcalf: I was one who didn't want to change that. I wanted to leave it at $300,000 plus the $400,000 because of exactly what was brought up. We are advertising. The state of North Dakota is advertising and enticing people to gamble and here we're not willing to help change their needs as they go along. (22:42)

Rep. Pollert continued on p. 5, Attachment A. (2317)

There are 17 FTEs that have to do with the Global Health Initiative. We removed almost every reference to GHI and removed the funding for the FTEs and the programs. (See footnotes at the bottom of p. 6, Attachment A)

Rep. Ekstrom: On this point with regard to the State Hospital. They came in with statistics that were showing they were at 104 percent of capacity and they were at 85 percent staffing. These particular FTEs were to address that critical shortage. They have a very serious situation because they all have the civilly committed. I think the Committee should seriously look at this. (25:44)

Rep. Pollert continued his review of amendment .0105 on p. 7, Attachment A. As was done with the State Hospital, the Section asked them to rank their priorities of one-time spending. (26:30) Rep. Pollert moved on to p. 8, Attachment A and explained that in the North Central Human Service Center House changes, they removed four FTEs spread through the Human Service Centers dealing with the Developmental Disabilities caseload. On page 9, Attachment A, Southeast Human Service Center, Fargo has remodeled an apartment building and they are

trying to take care of the homeless. This provides staffing for the Cooper House for $236,520.

Rep. Pollert continued on p. 10.

Rep. Pollert moved amendment .0105. Rep. Bellew seconded the motion.

Rep. Ekstrom: Regarding the Global Health Initiatives at the various Human Service Centers, there are two factors as we move toward the Senate, that we need to consider. We have returning veterans returning with traumatic brain injuries who are hitting our Human Service Centers all across the state. That is creating the need for these positions that the Department was asking for. The other factor I think we continually forget is that the Human Service Centers are the next step in the road for folks coming out of prison and the best way to keep folks out of prison is to provide community-based care. The other amendment that did not make it into play was an additional OAR that Jim Kerzman put forward. That amendment dealt with an eligibility computer system. That wasn't OAR (30:51)

Rep. Pollert: $685,000 general fund dollars.

Rep. Ekstrom: Right. That's what we were proposing. No. We had I think we had $343,000 general fund, $343,000 federal funds, but I might be wrong.

Rep. Pollert: The SITAC (State Information Technology Advisory Committee) rating for the computer eligibility was number five on the SITAC. I had a discussion with the agency asking them why it was not put in the Governor's budget and they said basically that because of the work they are doing on MMIS, they want to continue that project before they go on to the next one. The eligibility would cost about $18 million for the OAR. Rep. Kerzman brought forward an amendment for $685,000 to start the planning process. That was not approved by the

Section as well. That would have upped the completion date of the eligibility system by about six months.

Rep. Ekstrom: And the reasoning behind this really had to do with the conversations we've been having with the counties. The counties are seeing that as folks are being processed in with needing various services there is a great redundancy in terms of forms. It's creating a lot of extra work for folks coming into the system. On the medic needy, the Governor had this at 83 percent of poverty and it was reduced to 75 percent. It's been a very long time since these folks were increased. They have been running at a very low level and we really need to do some adjustment upward. Also, there was a personal care tier 3 which deals with basic care. Right now there is a limit of 8 hours per day that are allowable. In the Governor's budget we've taken it to ten hours per day. We were told this would bring as many as ten people back out of the nursing homes back into community care. The savings on that for the biennium would be $912,000. By increasing that Tier 3 to ten hours we could save money.

Rep. Wald: Can you expand on the supplemental payments of Developmental Disabilities? (p. 4 of Statement of Purpose of Amendment, 4th item from the bottom) (34:41)

Rep. Pollert: The $7 million? It's for people making under $15 per hour. That costs $7 million of General Funds for all DD providers. It was felt by the Section, and this wasn't unanimous. The first motion was a $2 per hour increases for all long-term care and all DD providers and it was intended to keep it at 7 and 7. Then it was reconsidered the next day and put at a $1 increase for all long-term care and all DD providers with the intent language that when we did that we moved the inflators from 7 and 7 to 6 and 6. The $2 per hour would have cost $27 million General Fund over the Governor's budget. What this did with the $1 is it increased – I'll say $5.9 million for $12 million. The 6 and 6 was about $5.5 million so the net increase was

$6.5 million increase over the Executive Budget for long-term care for wage pass-throughs (net). (35:00)

Rep. Nelson: The reason that we made that a priority was that basic care and DD providers probably lead the state in turnover. I think it's over 50 percent. By passing a wage pass-through that money can now get to the employees faster than the inflator. (36:53)

Rep. Kreidt: This would not be for all employees. We're looking at the lower $15 per hour and under because that's where the problem is in this situation. I went by a fast food place the other day and they had a sign up that they were paying $14 an hour to hire people to flip burgers. We've got a critical situation now. (37:26)

Rep. Hawken: I've gotten the most mail on that $15. These people are so nice and work so hard and we pay them so little. Every year we say we're going to do better and now when we could do better we're still not. I mean, we are. But we're not doing what we maybe could. What do we do with the person who makes $15.05 and works next to the person making $15 per hour? (38:10)

Rep. Kreidt: The way the formula works, what will happen here, and we have an amendment coming forward that's probably going to take a little bit of that situation off, but we also have the six percent inflator that also can inflate salary line items so if you've got a CNA making $9 per hour and we can move her to $10 per hour but you've got a nurse making $20 per hour and she gets a 7 percent raise, she's going to get a $1.40 per hour increase where the CAN making $9 per hour is going to get a $.60 raise. The facilities will have to use the percent to compensate those salaries.

Rep. Nelson: This is a different industry. When you look at a 6 and 6 inflator you have to realize the operations of the facility have to be considered in this too. It's not like state workers

or some of the other salary lines where it all goes to salary. This goes into operations as well. The 6 and 6 won't equate to a 6 percent increase in salaries. (39:46)

Rep. Pollert: Just so the Committee doesn't think we just went and slashed everything out of the budget. The congregate mills in the Executive Budget had a $900,000 increase plus the from the Senior Citizen mill levy payment they're going to get another $300,000. We did not touch that. What we found out in caseload utilizations from the last biennium, basically what we as a Section last on DD on long-term care beds, we were right. We were about right on on DD. If you remember the loan for the $3.5 million. They said the world was basically going to come to an end. The caseloads came in pretty close to what we thought. And on the long-term care beds we were correct. We were even correct on the inpatient hospital. We take a good look at them. We did not play with SPED. There was an increase in the sliding fee schedule to SPED. There was an increase in the ISLAs. We did not touch that because the caseload utilizations from the last biennium did increase. That we were off on. We fully funded that in the Executive Budget. (40:16)

The motion to adopt amendment .0105 carried by voice vote and the amendment was adopted.

Rep. Bellew distributed and reviewed amendment .0107 (Attachment B). This amendment decreases the funding related to the funeral set aside. In the Governor's Budget there was a $2,000 increase. This amendment reduces that by $1,000 to what was passed on the House floor today. (41:57)

Chm. Svedjan: It reduces it?

Rep. Bellew: By $1,000.

Chm. Svedjan: So it brings it back to $5,000?

Rep. Bellew: No. It brings it back to $6,000. In the Governor's Budget it's at $7,000. We have to have this amendment to lower that to $6,000 because that's what was passed on the House floor.

Rep. Delzer: Rep. Pollert, what is the spending level on TANF? How are we doing compared to . . .

Rep. Pollert: It's going to come down to in the 09-11 biennium; we'll have $1 million left on the TANF. We will be deficit spending and have to go to General Funds to fund TANF in the next biennium. So we've got to avoid spending any money out of TANF.

Rep. Bellew reviewed the Statement of Purpose of Amendment to .0107. (43:47)

Rep. Bellew moved amendment .0107. Rep. Pollert seconded the motion.

Rep. Ekstrom: Does procedurally that bill have to come back to Appropriations or will the money just automatically go to it? (44:37)

Chm. Svedjan: No. That bill doesn't have to come down here.

Rep. Ekstrom: O.K. But the money is matched up with it?

Chm. Svedjan: Yes. It will be matched up.

The motion to adopt amendment .0107 carried by voice vote and the amendment was adopted.

Rep. Metcalf distributed amendment .0106 (Attachment C).

Rep. Metcalf moved amendment .0106. Rep. Ekstrom seconded the motion.

Rep. Metcalf explained that amendment .0106 is nothing but a Legislative Council Study of Long-Term Care costs. There has been a concern of the prices and the inspection services from the Department of Health.

The motion to adopt amendment .0106 carried by voice vote and the amendment was adopted.

Rep. Pollert distributed amendment .0109 (Attachment D).

Rep. Pollert explained .0109. The Executive Budget had it at 200 percent of net. The bill today on the floor was passed at 160 percent of net. When we did that it we have to pass this amendment. It decreases the funding by $725,025. It also removes 1.5 FTEs.

Rep. Pollert moved amendment .0109. Rep. Bellew seconded the motion. The motion carried by voice vote and the amendment was adopted.

Rep. Pollert distributed amendment .0111 (Attachment E). Rep. Pollert explained that this amendment takes out $4,090, 893 of Special Funds to correlate with the General Funds on the vacant FTEs. I was reminded of this from Legislative Council yesterday, that after our work done yesterday about the vacant FTEs, it's going to affect the DHS budget. (50:34)

Rep. Pollert moved amendment .0111. Rep. Kreidt seconded the motion.

Rep. Ekstrom: How does this relate to the critical funding pool in terms of percentage? Obviously DHS is . . . is this a 4 percent? (51:34)

Rep. Pollert: I think it's 4 percent. Actually DHS is a lot better off doing it this way than they are the other way because you look at $600 million, you take 4 percent it would be $24 million.

The motion to adopt amendment .0111 carried by voice vote and the amendment was adopted. (52:24)

Rep. Hawken: The amendment .0107 where we changed the money, the HB number is wrong. It's 1477, not HB 1377. (52:34)

Rep. Pollert: You're right.

Roxanne Woeste: That will be taken care of once we roll all these amendments into one. No need for the Committee to worry.

Rep. Pollert distributed amendment .0112 (Attachment F) and amendment .0103 (Attachment G).

Rep. Pollert explained amendment .0112. With the floor action on the Childhood Services Advisory Board that was passed on the House floor yesterday for $20,776, that's what this amendment is for. It's bookkeeping.

Rep. Pollert moved amendment .0112. Rep. Berg seconded the motion. The motion carried by a voice vote and the amendment was adopted.

Rep. Pollert explained amendment .0103. This amendment deals with the economic stimulus package. This language was drawn up. Rep. Ekstrom had an amendment and I took that with Legislative Council's amendment and these are put together to make .0103.

Rep. Pollert moved amendment .0103. Rep. Ekstrom seconded the motion.

Rep. Kaldor: I'm curious if the department in the past has had authority to receive federal funds without our appropriation process. Do we in every case appropriate every federal dollar that the Department of Human Services receives? (56:12)

Chm. Svedjan: This in effect is an appropriation. It addresses the authority to receive.

Rep. Kaldor repeated his question to Rep. Pollert.

Chm. Svedjan: I really doubt it. We have seen language like this before. This is intended to handle that situation when we're expecting to receive federal funds. There are instances also when we receive federal funds that we didn't know were coming. Then we have the Emergency Commission and the Budget Section to handle that process. In all cases the appropriation is there. (57:10)

Rep. Kaldor: The title of the section does not speak to an appropriation. It speaks to the acceptance of and limitation on expenditure. My point is instead of going through the budget section, because we don't exactly know what's coming and when it might come, will it require all of us to assemble?

Rep. Pollert: I think there have been bills or motions already made about that if I'm correct.

Chm. Svedjan: Yes, there have been. This will all be reconciled. We got a good read on the stimulus package today. I think in the second half we're going to see all this reconciled.

Rep. Ekstrom: One of the things I was specifically concerned about was FMAP and that is definitely in the stimulus package.

The motion to adopt amendment .0103 carried by voice vote and the amendment was adopted.

Rep. Pollert distributed document 99714 (Attachment H). In the discussion about the amendments I was going through with the Human Service Centers, I mentioned that the apartment complex called Cooper House was the only part of the Global Health Initiative that had made it through the section. This removes the staffing. It deals with Fargo and the homeless. (60:29)

Rep. Pollert moved to adopt 99714 as an amendment to HB 1012. Rep. Bellew seconded the motion.

Rep. Ekstrom: Cooper House is part of a ten-year initiative by the Governor to try to eliminate homelessness in the state of North Dakota. The city of Fargo has put together a consortium of folks both private and public to provide funding to build this shelter. It will be at the old Cooper Tire building. They have gotten commitments from grants, the city and the one part they needed was a commitment from the state to help with the staffing. We can either do this here or we can do this in the Senate, but I would ask for a roll call vote on this one. (61:31)

Rep. Berg: We put this in in the amendments, right? (62:27)

Chm. Svedjan: This is being moved as an amendment.

Rep. Berg: This was part of the main amendments that we adopted.

Chm. Svedjan: The main amendments included this funding.

Rep. Pollert: In the section we attempted to remove all Global Health. This is the one that was removed. The persuasive discussions from Rep. Ekstrom brought it back in.

The motion to adopt 99714 as an amendment to HB 1012 failed by a roll call vote of 9 yeas, 14 nays and 2 absent and not voting.

Rep. Kreidt distributed and explained amendment .0110 (Attachment I). This addresses the $15 increases for the DD and LTC and Basic Care facilities. We are using the same dollar amount that we did to accomplish the $15 and less for those entities but we're changing the $15 to a percentage. This will give the facilities more flexibility. We are not increasing funding. We'll be using the 80th percentile of the salary range at each facility for the biennium beginning July 1. For the DD we'll be using a 90th percentile beginning July 1. I think this is a better way to handle this. (65:30)

Rep. Kreidt moved amendment .0110. Rep. Wieland seconded the motion. The motion carried by a voice vote and the amendment was adopted.

Chm. Svedjan distributed document 99719 (Attachment J).

Chm. Svedjan: I am requesting your favorable consideration of restoring some of what was reduced from HB 1012. This would restore the hospital rebasing back to 100 percent. To help pay for part of that it would be to decrease from the Executive Budget the inflationary increase that was granted to hospitals, physicians, ambulances and chiropractors in the second year of the biennium – to decrease it from 7 percent to 6 percent. Over the years I know we have

rebased nursing homes more than once. That's good. It helps keep their reimbursement more current. We have done quite a lot for Developmental Disabilities (DD). In HB 1012, a case could be made that to help do some of what we're doing for DD might have been taken from what was in the Governor's budget to bring hospital payment rates up to 100 percent of cost. It has been many years since rebasing has been done for hospitals. It is the major hospitals in the state that handle the bulk of Medicaid patients, with a couple of exceptions. With the major hospitals, in 2007, their operating margin was in the negative. In 2008, it's in the negative to an even greater extent. With the funds we have available, my hope was we could help shore up some of those programs that we have avoided in the past biennia and one of those is hospitals. We have to be very concerned about our hospitals. Very few are not struggling. I would guess that most are. Hospitals are doing many things to address the situations. Given the fact that there hasn't been a rebasing for hospitals for many years and hospitals are paid about 42 percent of cost, we need to bring them up to 100 percent of cost so we don't have to run the risk of hospitals ever turning Medicaid patients away. Not that I think that is going to happen, but it's getting to the point that selectivity could become a part of that picture.

Rep. Kempenich moved document 99719 as an amendment to HB 1012. Rep. Berg seconded the motion.

Rep. Bellew: If we do this for hospitals should we not do it for the others that were reduced? If you look in the Human Services budget, if you count the rebasing of hospitals and the other services there are actually three increases in the HS budget. They have a new contract cost, rebasing increase and they have an inflationary increase. In the budget they are getting treated very well as far as I'm concerned. I will resist this motion. (73:02)

Chm. Svedjan: I hear what you're saying, but there was a reason why the last legislative session authorized a rebasing study of hospitals and those results came in and we're in a position now where I think it's time to shore these up.

Rep. Nelson: This is exactly what you talked about. The study done during the interim was meant to rebase at a level playing field. We are not doing that in this budget. I have concern with the inflator going down for the other providers, but the one group being left out of this that wasn't rebased at what the Governor put forward either was physicians. That's an important link too. If we start down this road, it would only be appropriate that physicians would get some consideration too because through all the stuff we talk about nobody gets well unless there is a doctor. (74:08)

Chm. Svedjan: This is not in deference to physicians. My understanding is that 80 percent of our physicians are employed by hospitals. It's a very high percentage. For us to do something to help the hospitals will in effect help physicians as well. Going from 7 percent to 6 percent, I don't like doing that either because I think that inflationary increase is probably more as well. What you've seen in the rest of the budget is that the inflationary increases were adjusted to 6 percent. I did that to try and keep some consistency.

The motion to adopt document 99719 as an amendment to HB 1012 carried by a voice vote and the amendment was adopted.

Rep. Pollert moved a Do Pass as Amended to HB 1012. Rep. Kreidt seconded the motion. (76:24)

Rep. Bellew: If this bill passes the cost to continue is going to be in the $60 to $70 million General Fund range. (76:38)

Chm. Svedjan: $65 million.

The Do Pass as Amended motion carried by a roll call vote of 17 yeas, 6 nays and 2 absent and not voting. Rep. Pollert will carry the bill.

Chm. Svedjan thanked the Committee for their work and adjourned the meeting until the call of the Chair.

FISCAL NOTE

Requested by Legislative Council
01/06/2009

Bill/Resolution No.: HB 1012

1A. **State fiscal effect:** *Identify the state fiscal effect and the fiscal effect on agency appropriations compared to funding levels and appropriations anticipated under current law.*

	2007-2009 Biennium		2009-2011 Biennium		2011-2013 Biennium	
	General Fund	Other Funds	General Fund	Other Funds	General Fund	Other Funds
Revenues				$3,626,268		$3,800,613
Expenditures			$1,950,909	$5,577,177	$2,039,188	$3,800,613
Appropriations						

1B. **County, city, and school district fiscal effect:** *Identify the fiscal effect on the appropriate political subdivision.*

2007-2009 Biennium			2009-2011 Biennium			2011-2013 Biennium		
Counties	Cities	School Districts	Counties	Cities	School Districts	Counties	Cities	School Districts

2A. **Bill and fiscal impact summary:** *Provide a brief summary of the measure, including description of the provisions having fiscal impact (limited to 300 characters).*

This is the appropriation bill for the Department of Human Services. Sections 5, 6 and 7 contain statutory changes and only the impact of those changes are contained in this fiscal note.

B. **Fiscal impact sections:** *Identify and provide a brief description of the sections of the measure which have fiscal impact. Include any assumptions and comments relevant to the analysis.*

Section 5 directs the Department to plan and implement an Aging and Disability Resource Center (ADRC) for the State.
Section 6 increases the pre-need funeral set aside for Medicaid eligible clients from $5,000 to $7,000.
Section 7 - changes eligibility for the State Children's Health Insurance Program. Currently the Department provides health insurance coverage for children up to 150% net of poverty. This bill increases coverage to 200% net of poverty. It is estimated that an additional 1,158 children will receive coverage. It is also estimated that an additional 1.5 FTE will be needed to process the increase in applications.

3. **State fiscal effect detail:** *For information shown under state fiscal effect in 1A, please:*
   A. **Revenues:** *Explain the revenue amounts. Provide detail, when appropriate, for each revenue type and fund affected and any amounts included in the executive budget.*

The Other funds revenues are attribute as follows:

Section 6 will result in an increase in federal revenue of $356,703 from the Centers for Medicare and Medicaid.

Section 7 will result in an increase in federal revenue of $3,269,565 from the Centers for Medicare and Medicaid.

B. **Expenditures:** *Explain the expenditure amounts. Provide detail, when appropriate, for each agency, line item, and fund affected and the number of FTE positions affected.*

Section 5 - Estimated cost of $600,000 to establish an ADRC as a pilot. All funds from the general fund.

Section 6 - Estimated expenditures of $566,000 with $209,297 from the general fund and $356,703 from federal funds.

Section 7 - Estimated expenditures of $4,411,177 with $1,141,612 from the general fund and $3,269,565 from federal funds.

C. **Appropriations:** *Explain the appropriation amounts. Provide detail, when appropriate, for each agency and fund affected. Explain the relationship between the amounts shown for expenditures and appropriations. Indicate whether the appropriation is also included in the executive budget or relates to a continuing appropriation.*

House Bill 1012 contains funding for all three sections. No additional appropriation authority is needed.

2A. **Bill and fiscal impact summary:** *Provide a brief summary of the measure, including description of the provisions having fiscal impact (limited to 300 characters).*

This is the appropriation bill for the Department of Human Services. The sections that previously required a fiscal impact were removed and included in separate bills, thus no fiscal impact from those statutory changes.

B. **Fiscal impact sections:** *Identify and provide a brief description of the sections of the measure which have fiscal impact. Include any assumptions and comments relevant to the analysis.*

3. **State fiscal effect detail:** *For information shown under state fiscal effect in 1A, please:*
   A. **Revenues:** *Explain the revenue amounts. Provide detail, when appropriate, for each revenue type and fund affected and any amounts included in the executive budget.*

   B. **Expenditures:** *Explain the expenditure amounts. Provide detail, when appropriate, for each agency, line item, and fund affected and the number of FTE positions affected.*

   C. **Appropriations:** *Explain the appropriation amounts. Provide detail, when appropriate, for each agency and fund affected. Explain the relationship between the amounts shown for expenditures and appropriations. Indicate whether the appropriation is also included in the executive budget or relates to a continuing appropriation.*

Phone Number:	328-2397	**Date Prepared:**	02/23/2009

FISCAL NOTE

Requested by Legislative Council
04/16/2009

Amendment to: Engrossed HB 1012

1A. **State fiscal effect:** *Identify the state fiscal effect and the fiscal effect on agency appropriations compared to funding levels and appropriations anticipated under current law.*

	2007-2009 Biennium		2009-2011 Biennium		2011-2013 Biennium	
	General Fund	Other Funds	General Fund	Other Funds	General Fund	Other Funds
Revenues						
Expenditures						
Appropriations						

1B. **County, city, and school district fiscal effect:** *Identify the fiscal effect on the appropriate political subdivision.*

2007-2009 Biennium			2009-2011 Biennium			2011-2013 Biennium		
Counties	Cities	School Districts	Counties	Cities	School Districts	Counties	Cities	School Districts

2A. **Bill and fiscal impact summary:** *Provide a brief summary of the measure, including description of the provisions having fiscal impact (limited to 300 characters).*

Appropriation bill for the Department of Human Services containing statutory changes or Legislative intent language to support the STATEMENT OF PURPOSE OF AMENDMENT - LC 98013.0209 FN 4. There is no fiscal impact beyond what is included in the appropriation bill with Senate amendments.

B. **Fiscal impact sections:** *Identify and provide a brief description of the sections of the measure which have fiscal impact. Include any assumptions and comments relevant to the analysis.*

3. **State fiscal effect detail:** *For information shown under state fiscal effect in 1A, please:*
   A. **Revenues:** *Explain the revenue amounts. Provide detail, when appropriate, for each revenue type and fund affected and any amounts included in the executive budget.*

   B. **Expenditures:** *Explain the expenditure amounts. Provide detail, when appropriate, for each agency, line item, and fund affected and the number of FTE positions affected.*

   C. **Appropriations:** *Explain the appropriation amounts. Provide detail, when appropriate, for each agency and fund affected. Explain the relationship between the amounts shown for expenditures and appropriations. Indicate whether the appropriation is also included in the executive budget or relates to a continuing appropriation.*

General Discussion 1-19-09 Attachment A

98013.0101
Title.

Prepared by the Legislative Council staff for
Representative Carlson
January 14, 2009

PROPOSED AMENDMENTS TO HOUSE BILL NO. 1012

Page 1, line 2, remove "; and to amend and reenact sections 50-06-29, 50-24.1-02.3, and 50-29-04 of"

Page 1, remove lines 3 through 5

Page 1, line 6, remove "insurance program"

Page 4, remove lines 10 through 30

Page 5, remove lines 1 through 31

Page 6, remove lines 1 through 10

Renumber accordingly

STATEMENT OF PURPOSE OF AMENDMENT:

This amendment removes Sections 5, 6, and 7 relating to the establishment of an aging and disability resource center, the exempt amount of designated preneed funeral service contracts in considering eligibility for medical assistance, and eligibility under the state children's health insurance program.

Prepared by the North Dakota Legislative Council
staff for Representative Pollert
February 2009

PROPOSED MOTION TO FURTHER AMEND HOUSE BILL NO. 1012

It was moved by _____ and seconded by _____ to further amend House Bill No. 1012 as follows:

	General Fund	Other Funds	Total
Basic care and nursing care facilities - Salary and benefit supplemental payment			
Remove funding for a salary and benefit supplemental payment for individuals employed by basic care and nursing care facilities currently making $15 per hour or less. (Of the $14,739,128, $4,950,451 is from the general fund, $1,000,000 is from the health care trust fund, and $8,788,677 is from federal funds.)	($4,950,451)	($9,788,677)	($14,739,128)
Provide funding for a salary and benefit supplemental payment of $1 per hour for individuals currently making less than $10 per hour and a payment of $0.75 per hour for individuals currently making between $10 and $15 per hour. (Of the $14,166,699, $4,552,546 is from the general fund, $1,000,000 is from the health care trust fund, and $8,614,153 is from federal funds.)	4,552,546	9,614,153	14,166,699
Increase (decrease)	($397,905)	($174,524)	($572,429)
Developmental disabilities providers - Salary and benefit supplemental payment			
Remove funding for a salary and benefit supplemental payment for developmental disabilities providers currently making $15 per hour or less	($7,000,000)	($11,929,151)	($18,929,151)
Provide funding for a salary and benefit supplemental payment of $1 per hour for individuals currently making less than $10 per hour and a payment of $0.75 per hour for individuals currently making between $10 and $15 per hour	5,901,579	10,057,258	15,958,837
Increase (decrease)	($1,098,421)	($1,871,893)	($2,970,314)
Total increase (decrease)	($1,496,326)	($2,046,417)	($3,542,743)

Prepared by the North Dakota Legislative Council
staff for Representative Pollert
February 2009

Page 4, line 6, replace "$3,000,000" with "$4,324,506"

Page 4, replace lines 10 through 30 with:

"**SECTION 5. LEGISLATIVE COUNCIL STUDY - CHILD SUPPORT ENFORCEMENT.** During the 2009-10 interim, the legislative council shall consider studying the department of human services' child support enforcement program. The study should include the review of arrearages in terms of total owed and interest accrued and child support enforcement activities in other states. The legislative council shall report its findings and recommendations, together with any legislation required to implement the recommendations, to the sixty-second legislative assembly.

SECTION 6. SUPPLEMENTAL PAYMENTS - BASIC CARE AND NURSING HOME FACILITY SALARY AND BENEFIT INCREASES. The funding appropriated in subdivision 2 of section 1 of this Act includes $14,739,128, of which $4,950,451 is from the general fund, $1,000,000 is from the health care trust fund, and $8,788,677 is from federal funds, for providing supplemental payments to basic care and skilled nursing care facilities to allow for a salary and benefit increase for individuals making $15 per hour or less employed by basic care and nursing care facilities, for the biennium beginning July 1, 2009, and ending June 30, 2011.

SECTION 7. SUPPLEMENTAL PAYMENTS - DEVELOPMENTAL DISABILITIES PROVIDER SALARY AND BENEFIT INCREASES. The funding appropriated in subdivision 2 of section 1 of this Act includes $18,929,151, of which $7,000,000 is from the general fund and $11,929,151 is from federal funds, for providing supplemental payments to developmental disabilities providers to allow for a salary and benefit increase for individuals making $15 per hour or less employed by developmental disabilities providers, for the biennium beginning July 1, 2009, and ending June 30, 2011.

SECTION 8. AMENDMENT. Section 25-04-05 of the North Dakota Century Code is amended and reenacted as follows:

25-04-05. Qualifications for admission to state facility - ~~Temporary~~ Screening required prior to admission or readmission - Educational or related services without charge for persons twenty-one years of age and under.

1. The superintendent may admit a person to the developmental center at westwood park, Grafton when all of the following conditions have been met:

   a. Application for admission has been made on behalf of the person by a parent or guardian or the person or agency having legal custody, or by the person seeking admission, in accordance with procedures established by the department of human services.

   b. A comprehensive evaluation of the person has been made within three months of the date of application, a report of which has been filed with the superintendent and which, together with such other information or reviews as the department of human services may require, indicates to the superintendent's satisfaction that the person is eligible for admission to the developmental center at westwood park, Grafton.

   c. The person may be admitted without exceeding the resident capacity of the facility as specified in the professional standards adopted by the department of human services.

2. ~~The superintendent~~ No person may ~~admit~~ be admitted or readmitted to the developmental center at westwood park, Grafton, ~~temporarily for the purposes of observation, without commitment,~~ unless that person has undergone a screening process at the developmental center to determine whether the admission or readmission is appropriate. Length of stay criteria may be established under rules as the department of human services may adopt~~, any~~. Any person who is suspected of being able to benefit from the services offered at the center~~,~~ may be screened to ascertain whether or not that person is actually a proper case for care, treatment, and training ~~in~~ at the ~~state facility~~ developmental center. If in the opinion of the superintendent the person ~~temporarily admitted to the developmental center at westwood park, Grafton~~ screened under this subsection is a proper subject for institutional care, treatment, and training at the developmental center, that person may remain as a voluntary resident at ~~such~~ the center at the discretion of the superintendent if all other conditions for admission required by this section are met.

3. Notwithstanding any other provision of this chapter, no handicapped patient, twenty-one years of age or under, or the estate or the parent of such patient, may be charged for educational or related services provided at the developmental center at westwood park, Grafton. Except as provided in subsection 4, the department of human services has prior claim on all benefits accruing to such patients for medical and medically related services under entitlement from the federal government, medical or hospital insurance contracts, workforce safety and insurance, or medical care and disability programs. For purposes of this subsection, "related services" means transportation and such developmental, corrective, and other supportive services, as determined by the department of public instruction, as are required to assist a handicapped patient to benefit from special education. The cost of related services other than medical and medically related services must be paid by the developmental center at westwood park, Grafton, the school district of residence of the handicapped

child, and other appropriate state agencies and political subdivisions of this state. The department of public instruction, the department of human services, the school district of residence, and other appropriate state agencies and political subdivisions, as determined by the department of public instruction, shall determine and agree to that portion of related services, other than medical and medically related services, for which each agency and political subdivision is liable. The department of public instruction may adopt rules necessary to implement this section.

4. Parents of a handicapped patient, twenty-one years of age or under, are not required to file, assist in filing, agree to filing, or assign an insurance claim when filing the claim would pose a realistic threat that the parents would suffer a financial loss not incurred by similarly situated parents of nonhandicapped children. Financial losses do not include incidental costs such as the time needed to file or assist in filing an insurance claim or the postage needed to mail the claim. Financial losses include:

   a. A decrease in available lifetime coverage or any other benefit under an insurance policy.

   b. An increase in premiums or the discontinuation of a policy.

   c. An out-of-pocket expense such as the payment of a deductible amount incurred in filing a claim unless the developmental center pays or waives the out-of-pocket expense.

SECTION 9. AMENDMENT. Section 50-24.5-04 of the North Dakota Century Code is amended and reenacted as follows:

50-24.5-04. Services provided - Limit on cost. Services provided under this chapter must be treated as necessary remedial care to the extent those services are not covered under the medical assistance program. The cost of the services provided under this chapter to a person residing in a basic care or adult family foster care facility for which the rate charged includes room and board is limited to the rate set for services in that facility, plus ~~sixty~~ seventy-five dollars, less that person's total income.

SECTION 10. AMENDMENT. Section 50-30-02 of the North Dakota Century Code is amended and reenacted as follows:

50-30-02. North Dakota health care trust fund created - Uses - Continuing appropriation.

1. There is created in the state treasury a special fund known as the North Dakota health care trust fund. The fund consists of revenue received from government nursing facilities for remittance to the fund under former section 50-24.4-30. The department shall administer the fund. The state investment board shall invest moneys in the fund in accordance with chapter 21-10, and the income earned must be deposited in the North Dakota health care trust fund. All moneys deposited in the North Dakota health care trust fund are available to the department for:

   a. Transfer to the long-term care facility loan fund, as authorized by legislative appropriation, for making loans pursuant to the requirements of this chapter.

   b. Payment, as authorized by legislative appropriation, of costs of other programs authorized by the legislative assembly.

   c. Repayment of federal funds, which are appropriated and may be spent if the United States department of health and human services

determines that funds were inappropriately claimed under former section 50-24.4-30.

2. The department shall continue to access the intergovernmental transfer program if permitted by the federal government and if use of the program is found to be beneficial.

3. Moneys in the fund may not be included in draft appropriation acts under section 54-44.1-06."

Page 4, line 6, replace "$3,000,000" with "$4,324,506"

Page 4, replace lines 10 through 30 with:

"**SECTION 5. LEGISLATIVE COUNCIL STUDY - CHILD SUPPORT ENFORCEMENT.** During the 2009-10 interim, the legislative council shall consider studying the department of human services' child support enforcement program. The study should include the review of arrearages in terms of total owed and interest accrued and child support enforcement activities in other states. The legislative council shall report its findings and recommendations, together with any legislation required to implement the recommendations, to the sixty-second legislative assembly.

SECTION 6. SUPPLEMENTAL PAYMENTS - BASIC CARE AND NURSING HOME FACILITY SALARY AND BENEFIT INCREASES. The funding appropriated in subdivision 2 of section 1 of this Act includes $14,739,128, of which $4,950,451 is from the general fund, $1,000,000 is from the health care trust fund, and $8,788,677 is from federal funds, for providing supplemental payments to basic care and skilled nursing care facilities to allow for a salary and benefit increase for individuals making $15 per hour or less employed by basic care and nursing care facilities, for the biennium beginning July 1, 2009, and ending June 30, 2011.

SECTION 7. SUPPLEMENTAL PAYMENTS - DEVELOPMENTAL DISABILITIES PROVIDER SALARY AND BENEFIT INCREASES. The funding appropriated in subdivision 2 of section 1 of this Act includes $18,929,151, of which $7,000,000 is from the general fund and $11,929,151 is from federal funds, for providing supplemental payments to developmental disabilities providers to allow for a salary and benefit increase for individuals making $15 per hour or less employed by developmental disabilities providers, for the biennium beginning July 1, 2009, and ending June 30, 2011.

SECTION 8. AMENDMENT. Section 25-04-05 of the North Dakota Century Code is amended and reenacted as follows:

25-04-05. Qualifications for admission to state facility - ~~Temporary~~ Screening required prior to admission or readmission - Educational or related services without charge for persons twenty-one years of age and under.

1. The superintendent may admit a person to the developmental center at westwood park, Grafton when all of the following conditions have been met:

   a. Application for admission has been made on behalf of the person by a parent or guardian or the person or agency having legal custody, or by the person seeking admission, in accordance with procedures established by the department of human services.

   b. A comprehensive evaluation of the person has been made within three months of the date of application, a report of which has been filed with the superintendent and which, together with such other information or reviews as the department of human services may require, indicates to the superintendent's satisfaction that the person is eligible for admission to the developmental center at westwood park, Grafton.

   c. The person may be admitted without exceeding the resident capacity of the facility as specified in the professional standards adopted by the department of human services.

2. ~~The superintendent~~ No person may ~~admit~~ be admitted or readmitted to the developmental center at westwood park, Grafton, ~~temporarily for the purposes of observation, without commitment,~~ unless that person has undergone a screening process at the developmental center to determine whether the admission or readmission is appropriate. Length of stay criteria may be established under rules as the department of human services may adopt~~, any~~. Any person who is suspected of being able to benefit from the services offered at the center~~,~~ may be screened to ascertain whether or not that person is actually a proper case for care, treatment, and training ~~in~~ at the ~~state facility~~ developmental center. If in the opinion of the superintendent the person ~~temporarily admitted to the developmental center at westwood park, Grafton~~ screened under this subsection is a proper subject for institutional care, treatment, and training at the developmental center, that person may remain as a voluntary resident at ~~such~~ the center at the discretion of the superintendent if all other conditions for admission required by this section are met.

3. Notwithstanding any other provision of this chapter, no handicapped patient, twenty-one years of age or under, or the estate or the parent of such patient, may be charged for educational or related services provided at the developmental center at westwood park, Grafton. Except as provided in subsection 4, the department of human services has prior claim on all benefits accruing to such patients for medical and medically related services under entitlement from the federal government, medical or hospital insurance contracts, workforce safety and insurance, or medical care and disability programs. For purposes of this subsection, "related services" means transportation and such developmental, corrective, and other supportive services, as determined by the department of public instruction, as are required to assist a handicapped patient to benefit from special education. The cost of related services other than medical and medically related services must be paid by the developmental center at westwood park, Grafton, the school district of residence of the handicapped

child, and other appropriate state agencies and political subdivisions of this state. The department of public instruction, the department of human services, the school district of residence, and other appropriate state agencies and political subdivisions, as determined by the department of public instruction, shall determine and agree to that portion of related services, other than medical and medically related services, for which each agency and political subdivision is liable. The department of public instruction may adopt rules necessary to implement this section.

4. Parents of a handicapped patient, twenty-one years of age or under, are not required to file, assist in filing, agree to filing, or assign an insurance claim when filing the claim would pose a realistic threat that the parents would suffer a financial loss not incurred by similarly situated parents of nonhandicapped children. Financial losses do not include incidental costs such as the time needed to file or assist in filing an insurance claim or the postage needed to mail the claim. Financial losses include:

   a. A decrease in available lifetime coverage or any other benefit under an insurance policy.

   b. An increase in premiums or the discontinuation of a policy.

   c. An out-of-pocket expense such as the payment of a deductible amount incurred in filing a claim unless the developmental center pays or waives the out-of-pocket expense.

SECTION 9. AMENDMENT. Section 50-24.5-04 of the North Dakota Century Code is amended and reenacted as follows:

50-24.5-04. Services provided - Limit on cost. Services provided under this chapter must be treated as necessary remedial care to the extent those services are not covered under the medical assistance program. The cost of the services provided under this chapter to a person residing in a basic care or adult family foster care facility for which the rate charged includes room and board is limited to the rate set for services in that facility, plus ~~sixty~~ seventy-five dollars, less that person's total income.

SECTION 10. AMENDMENT. Section 50-30-02 of the North Dakota Century Code is amended and reenacted as follows:

50-30-02. North Dakota health care trust fund created - Uses - Continuing appropriation.

1. There is created in the state treasury a special fund known as the North Dakota health care trust fund. The fund consists of revenue received from government nursing facilities for remittance to the fund under former section 50-24.4-30. The department shall administer the fund. The state investment board shall invest moneys in the fund in accordance with chapter 21-10, and the income earned must be deposited in the North Dakota health care trust fund. All moneys deposited in the North Dakota health care trust fund are available to the department for:

   a. Transfer to the long-term care facility loan fund, as authorized by legislative appropriation, for making loans pursuant to the requirements of this chapter.

   b. Payment, as authorized by legislative appropriation, of costs of other programs authorized by the legislative assembly.

   c. Repayment of federal funds, which are appropriated and may be spent if the United States department of health and human services

determines that funds were inappropriately claimed under former section 50-24.4-30.

2. The department shall continue to access the intergovernmental transfer program if permitted by the federal government and if use of the program is found to be beneficial.

3. Moneys in the fund may not be included in draft appropriation acts under section 54-44.1-06."

STATEMENT OF PURPOSE OF AMENDMENT:

This amendment decreases funding for the state children's health insurance program by $2,809,222, of which $727,025 is from the general fund, including the removal of 1.5 new FTE positions. The House version provides funding to increase the state children's health insurance program from 150 percent to 160 percent of the federal poverty level in accordance with provisions of House Bill No. 1478. The executive budget included funding of $4,429,649, of which $1,146,392 is from the general fund, for increasing the eligibility for the state children's health insurance program from 150 percent to 200 percent of the federal poverty level and to add 1.5 new FTE positions.

Page 4, replace lines 10 through 30 with:

"**SECTION 5. LEGISLATIVE COUNCIL STUDY - CHILD SUPPORT ENFORCEMENT.** During the 2009-10 interim, the legislative council shall consider studying the department of human services' child support enforcement program. The study should include the review of arrearages in terms of total owed and interest accrued and child support enforcement activities in other states. The legislative council shall report its findings and recommendations, together with any legislation required to implement the recommendations, to the sixty-second legislative assembly.

SECTION 6. LEGISLATIVE COUNCIL STUDY - LONG-TERM CARE. During the 2009-10 interim, the legislative council shall study long-term care services in the state. The study must include a review of the department of human services' payment system and a review of the state department of health's survey and inspection programs and processes. The legislative council shall report its findings and recommendations, together with any legislation required to implement the recommendations, to the sixty-second legislative assembly.

SECTION 7. ADDITIONAL FEDERAL FUNDS - AMERICAN RECOVERY AND REINVESTMENT ACT - ACCEPTANCE - LIMITATION ON EXPENDITURE. If the department of human services receives federal funds made available to the state from the American Recovery and Reinvestment Act or other federal action to stimulate the national economy or to address state fiscal recovery in excess of the federal funding appropriated by the sixty-first legislative assembly for any major program, the department of human services may accept the additional federal funds, but may not spend the funding until appropriated by the legislative assembly for the biennium beginning July 1, 2009, and ending June 30, 2011.

SECTION 8. SUPPLEMENTAL PAYMENTS - BASIC CARE AND NURSING HOME FACILITY SALARY AND BENEFIT INCREASES. The funding appropriated in subdivision 2 of section 1 of this Act includes $14,739,128, of which $4,950,451 is from the general fund, $1,000,000 is from the health care trust fund, and $8,788,677 is from federal funds, for providing supplemental payments to basic care and skilled nursing care facilities to allow for a salary and benefit increase for each employee earning a salary that is less than the eightieth percentile of the salary range at each facility, for the biennium beginning July 1, 2009, and ending June 30, 2011.

SECTION 9. SUPPLEMENTAL PAYMENTS - DEVELOPMENTAL DISABILITIES PROVIDER SALARY AND BENEFIT INCREASES. The funding appropriated in subdivision 2 of section 1 of this Act includes $18,929,151, of which $7,000,000 is from the general fund and $11,929,151 is from federal funds, for providing supplemental payments to developmental disabilities providers to allow for a salary and benefit increase for each employee earning a salary that is less than the ninetieth percentile of the salary range of each developmental disabilities provider, for the biennium beginning July 1, 2009, and ending June 30, 2011.

SECTION 10. AMENDMENT. Section 25-04-05 of the North Dakota Century Code is amended and reenacted as follows:

25-04-05. Qualifications for admission to state facility - ~~Temporary~~ Screening required prior to admission or readmission - Educational or related services without charge for persons twenty-one years of age and under.

1. The superintendent may admit a person to the developmental center at westwood park, Grafton when all of the following conditions have been met:

   a. Application for admission has been made on behalf of the person by a parent or guardian or the person or agency having legal custody, or by the person seeking admission, in accordance with procedures established by the department of human services.

   b. A comprehensive evaluation of the person has been made within three months of the date of application, a report of which has been filed with the superintendent and which, together with such other information or reviews as the department of human services may require, indicates to the superintendent's satisfaction that the person is eligible for admission to the developmental center at westwood park, Grafton.

   c. The person may be admitted without exceeding the resident capacity of the facility as specified in the professional standards adopted by the department of human services.

2. ~~The superintendent~~ No person may ~~admit~~ be admitted or readmitted to the developmental center at westwood park, Grafton, ~~temporarily for the purposes of observation, without commitment,~~ unless that person has undergone a screening process at the developmental center to determine whether the admission or readmission is appropriate. Length of stay criteria may be established under rules as the department of human services may adopt~~, any~~. Any person who is suspected of being able to benefit from the services offered at the center~~,~~ may be screened to ascertain whether or not that person is actually a proper case for care, treatment, and training ~~in~~ at the ~~state facility~~ developmental center. If in the opinion of the superintendent the person ~~temporarily admitted to the developmental center at westwood park, Grafton~~ screened under this subsection is a proper subject for institutional care, treatment, and training at the developmental center, that person may remain as a voluntary

resident at ~~such~~ the center at the discretion of the superintendent if all other conditions for admission required by this section are met.

3. Notwithstanding any other provision of this chapter, no handicapped patient, twenty-one years of age or under, or the estate or the parent of such patient, may be charged for educational or related services provided at the developmental center at westwood park, Grafton. Except as provided in subsection 4, the department of human services has prior claim on all benefits accruing to such patients for medical and medically related services under entitlement from the federal government, medical or hospital insurance contracts, workforce safety and insurance, or medical care and disability programs. For purposes of this subsection, "related services" means transportation and such developmental, corrective, and other supportive services, as determined by the department of public instruction, as are required to assist a handicapped patient to benefit from special education. The cost of related services other than medical and medically related services must be paid by the developmental center at westwood park, Grafton, the school district of residence of the handicapped child, and other appropriate state agencies and political subdivisions of this state. The department of public instruction, the department of human services, the school district of residence, and other appropriate state agencies and political subdivisions, as determined by the department of public instruction, shall determine and agree to that portion of related services, other than medical and medically related services, for which each agency and political subdivision is liable. The department of public instruction may adopt rules necessary to implement this section.

4. Parents of a handicapped patient, twenty-one years of age or under, are not required to file, assist in filing, agree to filing, or assign an insurance claim when filing the claim would pose a realistic threat that the parents would suffer a financial loss not incurred by similarly situated parents of nonhandicapped children. Financial losses do not include incidental costs such as the time needed to file or assist in filing an insurance claim or the postage needed to mail the claim. Financial losses include:

   a. A decrease in available lifetime coverage or any other benefit under an insurance policy.

   b. An increase in premiums or the discontinuation of a policy.

   c. An out-of-pocket expense such as the payment of a deductible amount incurred in filing a claim unless the developmental center pays or waives the out-of-pocket expense.

SECTION 11. AMENDMENT. Section 50-24.5-04 of the North Dakota Century Code is amended and reenacted as follows:

50-24.5-04. Services provided - Limit on cost. Services provided under this chapter must be treated as necessary remedial care to the extent those services are not covered under the medical assistance program. The cost of the services provided under this chapter to a person residing in a basic care or adult family foster care facility for which the rate charged includes room and board is limited to the rate set for services in that facility, plus ~~sixty~~ seventy-five dollars, less that person's total income.

SECTION 12. AMENDMENT. Section 50-30-02 of the North Dakota Century Code is amended and reenacted as follows:

50-30-02. North Dakota health care trust fund created - Uses - Continuing appropriation.

1. There is created in the state treasury a special fund known as the North Dakota health care trust fund. The fund consists of revenue received from government nursing facilities for remittance to the fund under former section 50-24.4-30. The department shall administer the fund. The state investment board shall invest moneys in the fund in accordance with chapter 21-10, and the income earned must be deposited in the North Dakota health care trust fund. All moneys deposited in the North Dakota health care trust fund are available to the department for:

   a. Transfer to the long-term care facility loan fund, as authorized by legislative appropriation, for making loans pursuant to the requirements of this chapter.

   b. Payment, as authorized by legislative appropriation, of costs of other programs authorized by the legislative assembly.

   c. Repayment of federal funds, which are appropriated and may be spent if the United States department of health and human services determines that funds were inappropriately claimed under former section 50-24.4-30.

2. The department shall continue to access the intergovernmental transfer program if permitted by the federal government and if use of the program is found to be beneficial.

3. Moneys in the fund may not be included in draft appropriation acts under section 54-44.1-06."

Program and Policy - House changes:	FTE	General Fund	Other Funds	Total
Economic Assistance Policy Program				
Reduce funding for salaries and wages for anticipated savings from vacant positions and employee turnover		($48,462)	($99,126)	($147,588)
Child Support Program				
Reduce funding for salaries and wages for anticipated savings from vacant positions and employee turnover		(68,787)	(140,700)	(209,487)
Medical Services Program				
Decrease funding for department travel		(21,830)	(17,306)	(39,136)
Reduce funding for salaries and wages for anticipated savings from vacant positions and employee turnover		(44,010)	(90,020)	(134,030)
Decrease funding added in the executive budget for medically needy to reflect income levels of 75 percent of the federal poverty level (The executive budget included funding of $5,520,859, of which $2,041,614 is from the general fund, to increase medically needy income levels to 83 percent of the federal poverty level.)		(376,947)	(642,379)	(1,019,326)
Decrease funding added in the executive budget for inflation increases for hospital payment rates from 7 percent to 6 percent for the second year of the biennium		(793,420)	(1,389,355)	(2,182,775)
Decrease funding added in the executive budget for rebasing physician payment rates. The House version provides $10,600,000, of which $3,919,880 is from the general fund, for rebasing rates to 20 percent of the amount needed to rebase to 100 percent of cost. The executive budget included funding of $13,250,000, of which $4,899,850 is from the general fund, for rebasing physician payment rates to 25 percent of the amount needed to rebase to 100 percent of cost.		(979,970)	(1,670,030)	(2,650,000)
Decrease funding added in the executive budget for rebasing chiropractor payment rates. The House version provides $312,000, of which $115,377 is from the general fund, for rebasing rates to 75 percent of the cost report. The executive		(38,459)	(65,541)	(104,000)

budget included funding of $416,000, of which $153,836 is from the general fund, for rebasing rates to 100 percent of cost.				
Decrease funding added in the executive budget for rebasing ambulance payment rates. The House version provides $1,508,336, of which $557,783 is from the general fund, to provide funding equal to 75 percent of the funding provided in the executive budget. The executive budget included funding of $2,011,114, of which $743,710 is from the general fund, to rebase ambulance payment rates to Medicare rates.		(185,927)	(316,851)	(502,778)
Decrease funding added in the executive budget for rebasing dentist payment rates from a minimum of 75 percent of average billed charges with inflation increases of 7 percent each year to a minimum of 70 percent of average billed charges with inflation increases of 0 percent the first year and 7 percent the second year		(722,547)	(1,233,388)	(1,955,935)
Decrease funding added in the executive budget for inflationary increases for all services except the rebased services to provide 6 percent per year increases		(111,048)	(561,337)	(672,385)
Decrease funding for medical services to reduce projected caseload/utilization rates		(9,600,000)	(16,359,978)	(25,959,978)
Decrease funding for the funeral set-aside for Medicaid recipients by $283,000, of which $103,922 is from the general fund, to provide for an increase in the set-aisde from $5,000 to $6,000 as provided for in House Bill No. 1477. The executive budget included funding of $566,000, of which $208,571 is from the general fund, to increase the funeral set-aside for Medicaid recipients from $5,000 to $7,000.		(103,922)	(179,078)	(283,000)
Decrease funding for the state children's health insurance program by $2,809,222, of which $727,025 is from the general fund, including the removal of 1.5 FTE positions. The House version provides funding to increase the state children's health insurance program from 150 percent to 160 percent of the federal poverty level in accordance with provisions of House Bill No. 1478. The executive budget included funding of $4,429,649, of which $1,146,392 is from the general fund, for increasing the eligibility for the state children's health insurance program from 150 percent to 200 percent of the federal poverty level and to add 1.5 new FTE positions.	(1.50)	(727,025)	(2,082,197)	(2,809,222)
Long-Term Care Program				
Add funding to increase the personal needs allowance for individuals in basic care facilities from $60 to $75 per month (funding provided is for a January 1, 2010, effective date)		112,320	0	112,320
Add funding to increase the personal needs allowance for individuals in an ICF/MR facility from $60 per month as recommended in the executive budget to $75 per month (funding provided is for a January 1, 2010, effective date)		57,511	98,009	155,520
Add funding to increase nursing facility bed limits in the formula for nursing home payments from $138,907 to $169,098 for single rooms and $92,604 to $112,732 for double rooms (Of the $877,518, $324,506 is from the health care trust fund and $553,012 is from federal funds.)		0	877,518	877,518
Add funding of $14,739,128, of which $4,950,451 is from the general fund, $1 million is from the health care trust fund, and $8,788,677 is from federal funds, to provide a salary and benefit supplemental payment for individuals		4,950,451	9,788,677	14,739,128

employed by basic care and nursing care facilities earning a salary that is less than the 18th percentile of the salary range at each facility				
Add funding to provide for a salary and benefit supplemental payment for developmental disabilities providers currently earning a salary that is less than the 19th percentile of the salary range of each provider		7,000,000	11,929,151	18,929,151
Remove the new FTE position added in the 2009-11 executive budget relating to the implementation of a home and community-based care waiver to provide support for children who have a diagnosis of autism spectrum disorder	(1.00)	(66,872)	(66,871)	(133,743)
Provide funding for increasing the payment rates for children and adults who are severely medically fragile and behaviorally challenged residing at the Anne Carlsen Center and other developmental disabilities providers experiencing losses		438,900	747,957	1,186,857
Remove funding included in the executive budget for the addition of a third tier of personal care that would allow a maximum of 1,200 units of care per month		(1,021,922)	(1,741,524)	(2,763,446)
Decrease funding added in the executive budget for inflationary increases for all services except the rebased services to provide 6 percent per year increases		(4,544,584)	(7,103,292)	(11,647,876)
Decrease funding for long-term care to reduce projected caseload/utilization rates		(5,600,000)	(9,543,320)	(15,143,320)
Decrease funding for developmental disabilities grants to reduce projected caseload/utilization rates		(2,476,000)	(4,219,511)	(6,695,511)
Aging Services Program				
Remove funding for a pilot aging and disability resource center		(600,000)	0	(600,000)
Decrease funding for department travel		(3,506)	(10,464)	(13,970)
Reduce funding for salaries and wages for anticipated savings from vacant positions and employee turnover		(3,350)	(6,852)	(10,202)
Decrease funding added in the executive budget for inflationary increases for all services except the rebased services to provide 6 percent per year increases		(15,200)	0	(15,200)
Children and Family Services Program				
Decrease funding for department travel		(1,054)	(2,652)	(3,706)
Reduce funding for salaries and wages for anticipated savings from vacant positions and employee turnover		(7,754)	(15,860)	(23,614)
Decrease funding added in the executive budget for inflationary increases for all services except the rebased services to provide 6 percent per year increases		(436,192)	(823,013)	(1,259,205)
Mental Health and Substance Abuse Program				
Decrease funding for department travel		(15,842)	(45,715)	(61,557)
Reduce funding for salaries and wages for anticipated savings from vacant positions and employee turnover		(7,940)	(16,241)	(24,181)
Decrease funding for compulsive gambling services by $150,000 from the general fund, from $700,000, of which $300,000 is from the general fund and $400,000 is from special funds from lottery proceeds, as provided for in the executive		(150,000)	0	(150,000)

budget to $550,000, of which $150,000 is from the general fund and $400,000 is from special funds from lottery proceeds. The 2007-09 legislative appropriation for compulsive gambling services is $400,000 of special funds from lottery proceeds.			
Remove funding for Governor's Prevention and Advisory Council grants	(200,000)	0	(200,000)
Decrease funding added in the executive budget for inflationary increases for all services except the rebased services to provide 6 percent per year increases	(21,237)	0	(21,237)
Developmental Disabilities Council			
Decrease funding for department travel	0	(4,446)	(4,446)
Developmental Disabilities Division			
Decrease funding for department travel	(7,536)	(32,975)	(40,511)
Reduce funding for salaries and wages for anticipated savings from vacant positions and employee turnover	(3,455)	(7,067)	(10,522)
Decrease funding added in the executive budget for inflationary increases for all services except the rebased services to provide 6 percent per year increases	(27,199)	0	(27,199)
Vocational Rehabilitation			
Decrease funding for department travel	(17,096)	(56,242)	(73,338)
Reduce funding for salaries and wages for anticipated savings from vacant positions and employee turnover	(2,666)	(5,453)	(8,119)
Decrease funding for centers for independent living by $400,000 from the general fund, from $2,144,539, of which $1,330,958 is from the general fund, as included in the executive budget to $1,744,539, of which $930,958 is from the general fund	(400,000)	0	(400,000)
Total House changes - Program and Policy	(2.50)	($16,892,577)	($25,107,472)	($42,000,049)

Other changes affecting Program and Policy programs:

Add a section of legislative intent regarding the funding for basic care and nursing home facility salary and benefit supplemental payments

Add a section of legislative intent regarding the funding for developmental disabilities providers salary and benefit supplemental payments

Amend North Dakota Century Code (NDCC) Section 50-30-02 relating to the health care trust fund to provide that money in the fund may not be included in drafts of appropriation bills introduced as part of the executive budget

Amend NDCC Section 50-24.5-04 to increase the personal needs allowance for individuals in basic care facilities from $60 to $75 per month

Add a section to provide for a Legislative Council study of long-term care services

"**SECTION 5. LEGISLATIVE COUNCIL STUDY - CHILD SUPPORT ENFORCEMENT.** During the 2009-10 interim, the legislative council shall consider studying the department of human services' child support enforcement program. The study should include the review of arrearages in terms of total owed and interest accrued and child support enforcement activities in other states. The legislative council shall report its findings and recommendations, together with any legislation required to implement the recommendations, to the sixty-second legislative assembly.

SECTION 6. LEGISLATIVE COUNCIL STUDY - LONG-TERM CARE. During the 2009-10 interim, the legislative council shall study long-term care services in the state. The study must include a review of the department of human services' payment system and a review of the state department of health's survey and inspection programs and processes. The legislative council shall report its findings and recommendations, together with any legislation required to implement the recommendations, to the sixty-second legislative assembly.

SECTION 7. ADDITIONAL FEDERAL FUNDS - AMERICAN RECOVERY AND REINVESTMENT ACT - ACCEPTANCE - LIMITATION ON EXPENDITURE. If the department of human services receives federal funds made available to the state from the American Recovery and Reinvestment Act or other federal action to stimulate the national economy or to address state fiscal recovery in excess of the federal funding appropriated by the sixty-first legislative assembly for any major program, the department of human services may accept the additional federal funds, but may not spend the funding until appropriated by the legislative assembly for the biennium beginning July 1, 2009, and ending June 30, 2011.

SECTION 8. SUPPLEMENTAL PAYMENTS - BASIC CARE AND NURSING HOME FACILITY SALARY AND BENEFIT INCREASES. The funding appropriated in

subdivision 2 of section 1 of this Act includes $14,739,128, of which $4,950,451 is from the general fund, $1,000,000 is from the health care trust fund, and $8,788,677 is from federal funds, for providing supplemental payments to basic care and skilled nursing care facilities to allow for a salary and benefit increase for each employee earning a salary that is less than the eightieth percentile of the salary range at each facility, for the biennium beginning July 1, 2009, and ending June 30, 2011.

SECTION 9. SUPPLEMENTAL PAYMENTS - DEVELOPMENTAL DISABILITIES PROVIDER SALARY AND BENEFIT INCREASES. The funding appropriated in subdivision 2 of section 1 of this Act includes $18,929,151, of which $7,000,000 is from the general fund and $11,929,151 is from federal funds, for providing supplemental payments to developmental disabilities providers to allow for a salary and benefit increase for each employee earning a salary that is less than the ninetieth percentile of the salary range of each developmental disabilities provider, for the biennium beginning July 1, 2009, and ending June 30, 2011.

SECTION 10. AMENDMENT. Section 25-04-05 of the North Dakota Century Code is amended and reenacted as follows:

25-04-05. Qualifications for admission to state facility - ~~Temporary~~ Screening required prior to admission or readmission - Educational or related services without charge for persons twenty-one years of age and under.

1. The superintendent may admit a person to the developmental center at westwood park, Grafton when all of the following conditions have been met:

   a. Application for admission has been made on behalf of the person by a parent or guardian or the person or agency having legal custody, or by the person seeking admission, in accordance with procedures established by the department of human services.

   b. A comprehensive evaluation of the person has been made within three months of the date of application, a report of which has been filed with the superintendent and which, together with such other information or reviews as the department of human services may require, indicates to the superintendent's satisfaction that the person is eligible for admission to the developmental center at westwood park, Grafton.

   c. The person may be admitted without exceeding the resident capacity of the facility as specified in the professional standards adopted by the department of human services.

2. ~~The superintendent~~ No person may ~~admit~~ be admitted or readmitted to the developmental center at westwood park, Grafton, ~~temporarily for the purposes of observation, without commitment,~~ unless that person has undergone a screening process at the developmental center to determine whether the admission or readmission is appropriate. Length of stay criteria may be established under rules as the department of human services may adopt~~, any~~. Any person who is suspected of being able to benefit from the services offered at the center~~,~~ may be screened to ascertain whether or not that person is actually a proper case for care, treatment, and training ~~in~~ at the ~~state facility~~ developmental center. If in the opinion of the superintendent the person ~~temporarily admitted to the developmental center at westwood park, Grafton~~ screened under this subsection is a proper subject for institutional care, treatment, and training

at the developmental center, that person may remain as a voluntary resident at ~~such~~ the center at the discretion of the superintendent if all other conditions for admission required by this section are met.

3. Notwithstanding any other provision of this chapter, no handicapped patient, twenty-one years of age or under, or the estate or the parent of such patient, may be charged for educational or related services provided at the developmental center at westwood park, Grafton. Except as provided in subsection 4, the department of human services has prior claim on all benefits accruing to such patients for medical and medically related services under entitlement from the federal government, medical or hospital insurance contracts, workforce safety and insurance, or medical care and disability programs. For purposes of this subsection, "related services" means transportation and such developmental, corrective, and other supportive services, as determined by the department of public instruction, as are required to assist a handicapped patient to benefit from special education. The cost of related services other than medical and medically related services must be paid by the developmental center at westwood park, Grafton, the school district of residence of the handicapped child, and other appropriate state agencies and political subdivisions of this state. The department of public instruction, the department of human services, the school district of residence, and other appropriate state agencies and political subdivisions, as determined by the department of public instruction, shall determine and agree to that portion of related services, other than medical and medically related services, for which each agency and political subdivision is liable. The department of public instruction may adopt rules necessary to implement this section.

4. Parents of a handicapped patient, twenty-one years of age or under, are not required to file, assist in filing, agree to filing, or assign an insurance claim when filing the claim would pose a realistic threat that the parents would suffer a financial loss not incurred by similarly situated parents of nonhandicapped children. Financial losses do not include incidental costs such as the time needed to file or assist in filing an insurance claim or the postage needed to mail the claim. Financial losses include:

   a. A decrease in available lifetime coverage or any other benefit under an insurance policy.

   b. An increase in premiums or the discontinuation of a policy.

   c. An out-of-pocket expense such as the payment of a deductible amount incurred in filing a claim unless the developmental center pays or waives the out-of-pocket expense.

SECTION 11. AMENDMENT. Section 50-24.5-04 of the North Dakota Century Code is amended and reenacted as follows:

50-24.5-04. Services provided - Limit on cost. Services provided under this chapter must be treated as necessary remedial care to the extent those services are not covered under the medical assistance program. The cost of the services provided under this chapter to a person residing in a basic care or adult family foster care facility for which the rate charged includes room and board is limited to the rate set for services in that facility, plus ~~sixty~~ seventy-five dollars, less that person's total income.

SECTION 12. AMENDMENT. Section 50-30-02 of the North Dakota Century Code is amended and reenacted as follows:

50-30-02. North Dakota health care trust fund created - Uses - Continuing appropriation.

1. There is created in the state treasury a special fund known as the North Dakota health care trust fund. The fund consists of revenue received from government nursing facilities for remittance to the fund under former section 50-24.4-30. The department shall administer the fund. The state investment board shall invest moneys in the fund in accordance with chapter 21-10, and the income earned must be deposited in the North Dakota health care trust fund. All moneys deposited in the North Dakota health care trust fund are available to the department for:

   a. Transfer to the long-term care facility loan fund, as authorized by legislative appropriation, for making loans pursuant to the requirements of this chapter.

   b. Payment, as authorized by legislative appropriation, of costs of other programs authorized by the legislative assembly.

   c. Repayment of federal funds, which are appropriated and may be spent if the United States department of health and human services determines that funds were inappropriately claimed under former section 50-24.4-30.

2. The department shall continue to access the intergovernmental transfer program if permitted by the federal government and if use of the program is found to be beneficial.

3. Moneys in the fund may not be included in draft appropriation acts under section 54-44.1-06."

STATEMENT OF PURPOSE OF AMENDMENT - LC 98013.0113 FN 3

A copy of the statement of purpose of amendment is on file in the Legislative Council Office.

2009 SENATE APPROPRIATIONS

HB 1012

2009 SENATE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

Senate Appropriations Committee

☐ Check here for Conference Committee

Hearing Date: March 3, 2009 am

Recorder Job Number: 10056

Committee Clerk Signature Rose Laning

Minutes:

Chairman Holmberg called the committee hearing to order on HB 1012 which is an appropriation for the Department of Human Services. Roll call was taken.

Subcommittee members will be: **Senator Fischer, Senator Kilzer, Senator Krebsbach, Senator Warner, and Senator Mathern.**

Chairman Holmberg asked those who are presenting testimony to be extremely precise about the words "requested", and "OARs" (Optional Additional Requests). Our starting point is what is in the budget that the House passed. If it's something that you asked for and it's in the budget, don't use words like "requested" because then we think you are requesting for us to make some change.

Also don't spend time talking to the committee about reductions in salary from the five and five. The Senate had a position both on salaries and equity.

(4:37)

Carol K. Olson, Executive Director, North Dakota Department of Human Services

Written attached testimony # 1.

Chairman Holmberg said that new FTE (Full Time Equivalent) positions were hard to come by. Was this part of an overall strategy in Human Services also that all new FTEs were denied? Or will we see some sprinkled in as we go?

Carol K. Olson: In the area of Behavioral Health, we had 11 FTEs identified as an increase. Six of them were at the State Hospital, four at Southeast Human Service Center, one at SC Human Service Center. They were to meet the increased need both in the community and state hospital. When we put the budget together, instead of putting all the emphasis on the state hospital which had been operating at about 103% capacity which by the way, 40 % of our admissions to the State Hospital in 2008 were first time admissions as opposed to repeat. We decided to spread it out community based services. In other words, instead of putting everything in the State Hospital, we decided to spread it around. We met throughout the interim with our private providers and they were concerned about how many people are coming thru the doors and how long the patients are staying and how much they are being reimbursed for the care.

Senator Warner asked if there were any infrastructure costs associated with FTEs in terms of space. And there were none.

(22:04)

Chairman Holmberg: We always seem to use the number "family of four". Isn't the date indicating that in many cases, we're talking about a family of two or three, often a women with one or two children? What are the numbers for 200% of poverty levels for a standard family of four? What number is that and what is the 160 number - roughly? Or will we be getting that from Maggie?

Carol K. Olson: A family of four at 200% would be $42,400 and a family of four at 160% would be $33,920.

Senator Krauter: Single parent family of two or three at 200%?

Carol K. Olson: I can get that figure, but I do have the 160% number which is $28,160.

(24:00)

Chairman Holmberg: Is that scenario accurate that there is a lot that the family of four, but three is what we always use when we're discussing this issue. Is this not the norm?

Carol K. Olson replied that the make-up of the family has varied, but one is not pre-dominant.

Senator Fischer asked about a chart that showed the number of children that have dropped off significantly since July of 08. When you re-calculated these numbers, you took that into consideration? Is the trend going to continue?

Carol K. Olson: Yes.

Senator Warner: Funding services, children could continue to live in a foster family and transition out or institutionalize. What is the decision making process for leaving children in foster care and providing support there or creating another institution.

Carol K. Olson: What we're really looking at is the concern that we have for these children either way, who have been in foster homes or an institution. When they turn 18, they are suddenly on their own and are supposed to know how to support themselves, managing their lives when their lives have been managed for them for a good part of their 18 years. They need a little additional assistance and coaching and they'd have a much better chance for achieving further education, job placement, or self sufficiency in apartment living. This is where we see a real gap in services foster care.

Chairman Holmberg reminded everyone that this issue was before the Senate and they killed SB 2302, but the subcommittee can look into the area of foster care area if they wish.

Senator Krauter asked about the federal stimulus money and Carol Olson said we still don't have final numbers of stimulus package. We have various entities that supply them to us, but want to make sure they are real numbers.

(32:40)

Brenda Weisz, Chief Financial Officer, Department of Human Services

Testified in favor of HB 1012. Written attached testimony # 2.

Chairman Holmberg: The House removed the equity funding and underfunded salaries. Is the equity and salaries together, the $6.1M, or is equity separate? Where is that number?

Brenda Weisz: Attachment D walks through all my House changes. Combining that $11.1 M equity and the underfund, that is what the House amendments did. If you add the $1.3M, then we're looking at over $12M.

Chairman Holmberg: But that was your choice.

Brenda Weisz: We did come in knowing at the State Hospital that we would have turnover, and we did try to accommodate that.

(Continuing on page 6) (45:50)

Senator Krauter asked about the rebasing wondering if it was still in place and wasn't changed by the House.

Brenda Weisz: Are you talking for all the rebased providers? And **Senator Krauter** said yes. Brenda continued that the inflation that was brought forward when they looked at the reports by the vendor that did the work for the hospitals. The inflation they used to bring their costs up was near 22%.

Senator Krauter: What is the date of MMIS (Medicaid Management Information System)?

Brenda Weisz: May of 2010.

V. Chair Bowman: On the $4.3 M to state hospital – you said that is now referred to as global behavioral health. What was that referred to before and where was the money at that this is replacing?

Brenda Weisz: This is how Global Behavioral Health came to be. When we were preparing our budget for submission to OMB and the executive office, we recognized capacity issues.

And those capacity issues stand to repeat themselves in the communities and also our occupancy problem at the state hospital. With the system we have, as far as submitting our budget to prioritize your OARs, and all of this was a priority so we lumped it together and to title the OAR, we called it Global Behavior Health because it spanned the states.

V. Chair Bowman: That $4.3 M didn't come out of another budget that it used to be in.

Brenda Weisz: It wasn't in a separate budget. It's actually increased capacity. It's an increase to our current budget to say that our current capacity was not covering the needs that existed out there. So this was an increase to address the needs that were presenting themselves in the community as well as the state hospital, as far as capacity and staffing. It's just our grouping of the same issues, statewide, calling it global.

V. Chair Grindberg: Could you provide us with maybe the last three bienniums; go back to 2000 if you will, to show that historical on inflationary. And then if we could get the percent increases in general fund in the major budgets, in the major divisions so that we can kind of see the historical general fund increases percentage wise, as well as the inflation increase and if that could be done in a concise way, I think that would be helpful.

Brenda Weisz: Just to clarify – The major increases by those same program areas and go back a couple bienniums.

V. Chair Grindberg: Yes.

Senator Krauter: This is probably the first time in four bienniums that I see such a dramatic emphasis on reduction in caseloads utilization- almost entirely across the board. What are your thoughts there, because this is the first time I've seen program after program (inaudible).

Brenda Weisz: Each area is set independently and individually and statistically and so we always do come forth with a budget that is representative of the trend. Some of the areas where there's a decrease, isn't necessary that there's a drastic increase in the program, but

there's a decrease from where we thought 07-09 would be. So our caseload isn't coming in at the same level as 07-09, so it's not a drastic increase per se maybe specifically in the numbers, but how the budget was built for certain areas.

(85:50)

Brenda Weisz, CFO, Department of Human Services.

Written attached testimony #3. Gave an overview of the Administration / Support Area

This area of the budget includes the Executive Office, Legal Advisory Unit, Human Resources, and Fiscal Administration. This budget area also includes centralized costs for department-wide expenditures.

Senator Krauter asked about the audit fees and whether it is an increase or a fee.

Brenda Weisz: The fees didn't go up, but the hours went up, but it is a combination of both. Their rates would be up because of the salary.

Senator Robinson: Go back to page 3, the 31 % rate increase for attorney general. Is that based on something so usual that we have not had a rate increase for some time? We look at salaries and wages in our package. It's certainly not anywhere close to that.

Brenda Weisz: When we prepare our budget, there is a document that goes up and OMB does publish it on their website for budget instructions. It's all the internal service agencies that do services. They do report to us what they anticipate a rate increase would be and how to build your budget based on their hourly rate.

Senator Krauter: On the increase in auditors and attorney generals fees, there is a standard listing that is prepared by agencies to use when they build their budgets?

Lori Laschkewitsch, Fiscal Analyst, OMB: Yes, there is a link on website to fees.

Senator Krauter: Could you print one out please? It keeps coming up when we work on all these agency budgets.

Senator Warner asked if the fiscal audits and performance audits were federally mandated.

Brenda Weisz: We have not been subject to a performance audit for a couple of years, but they do a federal audit as well. They do an agency audit, they do CAFR (Confidence of Annual Financial Report Audit) - the federal, CAFR, and state agency audit. Generally the come through the legislative audit and fiscal review committee.

Senator Wardner: When they set rates at attorney general's office and the auditor, are you involved in any of those or is that an internal thing where they set them.

Lori Laschkewitsch: Those agencies do their own rate settings. We just ask them to provide us with the information so we have lists available to the agencies.

Senator Fischer: Attorney Generals. The attorneys that are within the agency, they're not employees of the agency, they are assistant AGs?

Brenda Weisz: Some of the attorneys within the department have a special designation.

Senator Fischer: So is that part of this increase?

Brenda Weisz: No. That is not part of the increase. This is actually the billing we will receive from the AGs office for the additional work they do for us.

(Continuing on page 5)

Senator Robinson: I have a question on page 3, what type of dollars do we pay in total for AG fees in the course of a biennium?

Brenda Weisz: Currently, our budget is estimated to have about $420,000 paid per biennium to the attorney general's office.

Senator Robinson: What would it cost if we put another fulltime attorney on to the department to reduce the costs? At some point, the department will have that decision to make, would we not?

Brenda Weisz: I don't think we've ever exercised the option. There are some things that the AG office is designated to do.

Brenda Weisz: handed out a **billing rates form – see attached #4.**

(103:48)

Jennifer Witham, Director, Information Technology Services, Dept. Human Services

Written attached testimony # 5.

Senator Warner: When you refer to information technology department, that's the state's agency?

Jennifer Witham: Yes, the state's information technology department.

Senator Warner: Is that the only place the distinction needs to be made between your department and the state agency?

Jennifer Witham: Yes, that $4M is the increase in what we're paying to the information technology department for their services.

Senator Seymour: On top of page 4 when you talk about the increases in rates of senior development and project management staff, what were the increases?

Jennifer Witham: I can give you a detailed breakdown, but they went from $63/hour to $75/hour for senior developers and for the project management staff. There was also an increase that went from $58/hour to $63/hour.

Senator Fischer asked about the cost of MMIS trying to understand the decrease to support the Medicaid Systems project.

Jennifer Witham: The decrease is the cost of the project itself that is continuing through this biennium so that's a onetime cost for development and implementation. There is also the cost of the ongoing maintenance of the system in the 09-11 budget.

Senator Krauter: What additional costs of development are we still to pay?

Jennifer Witham: The entire cost of the project will not change even thought the schedule hasn't been developed. We'll be asking carryover funds that haven't been expended.

Senator Warner: Are there any anticipated low impact costs that aren't on the schedule, like implementation and training? Everything's included in the price we have on the list.

Jennifer Witham: I do not anticipate any additional cost.

(116:54)

Tove Mandigo, Director, Economic Assistance Policy Division

Written attached testimony # 6.

No questions.

Maggie Anderson, Director, Division of Medical Services, Department of Human Services

Written attached testimony # 7.

Senator Krauter asked about the salaries and deductions for families of 3 & 4.

Maggie Anderson: A household of three at 200% is $35,200. A household of three at 160% (where the budget currently is) is $28,160. A household of 4 at 160% is $33,920, and a household of four at 200% is $42,400.

Senator Krauter: Can you give us your definition of net?

Maggie Anderson: The definition technically of gross income is before deductions and net is after. The income level is not gross or net. The income level is what you can deduct to get down to the income level. For example, a family of four at $42,400 at 200%, they could be earning above that, and then with their deductions, we look at the $42,400 as the ceiling of what they could be earning in order to qualify.

Senator Krauter: You say deductions, you mean payroll deductions?

Maggie Anderson: We have mandatory payroll deductions, mandatory retirement plan deductions, expenses, reasonable childcare expenses. If the individual is engaging in necessary employment or training, non-voluntary child or spousal support payments is actually paid. We allow a $30 work training disregard- that means people who are working or in school, they are automatically allowed a $30 disregard.

Senator Christmann asked $30 how often?

Maggie Anderson: $30 per month. And then the cost of premiums for health insurance for other members of the family, so if the children are receiving their healthcare coverage through SCHIP or through Medicaid, the parents have coverage somewhere else and paying for that, then the cost of those premiums can be deducted. And then for necessary medical expenses or remedial care.

Senator Christmann: Non-voluntary child support payments?

Maggie Anderson: Non-voluntary child support and spousal support payments that were actually paid.

Senator Christmann: What's the definition between non-voluntary and voluntary?

Maggie Anderson explained the difference between court ordered and not court ordered.

Senator Fischer asked fiscal year questions.

Senator Warner: What is the base number for immunization before we increased it?

Maggie Anderson: The current fee schedule for an initial injection type of administration is $9.21. Then if they receive a second injection at that same time, we pay a lower fee and that is $6.33. In this scenario, the first injection would receive the $13.90 and then we'd add the $4.69 to the fee schedule of the $6.33 today, so they'll receive that increase on top of the second immunization and they'll receive that same increase on the third injection.

Senator Warner: Do you have an audit process in place to make sure that they're not inflating the claims that they give to the government over those that they charge to private industries.

Maggie Anderson: We don't have a specific audit process for that. We have federal rules as well as state policy that indicate they have to bill at their usual customary fees. If we found someone was not doing that or if we noticed a trend change that was occurring because of some payment methodology that we would identify that. The other thing about this particular area is that we used the estimates from the most recent completed state fiscal year (2008) to establish that average. If the fee schedule would not be re-based annually to that; it's the rebased and then inflated forward.

Senator Kilzer: Why are you rebasing on such a wide variety of things. Could you just put together a chart that shows what the funding or costs would be if you did it at the Medicare rate?

Maggie Anderson: For some services, that may be possible, for example, with ambulance. It's a fairly straight forward comparison. With physicians, there's a conversion factor that's used by Medicare and by Medicaid. For hospitals, we have different methodologies. For Medicare and Medicaid we have different clients. We pay for a lot of births in Medicaid. Medicare doesn't. The waiting factors and restrictions are somewhat prohibitive in doing that; and certainly with dental as well. So comparing to Medicare, it isn't a reliable comparison for many of our services.

Senator Kilzer: I think I'd disagree with that. They all have code numbers that take into consideration all these other things. If you go by code numbers, it should be easy to determine.

Maggie Anderson: We could do that with Physicians and practitioners and also with Medicare. But for hospitals, we have different payment methodology. They don't provide

dental. We probably could do it for chiropractors if they pay off of a conversion factor. We would have to altar some of our payment methodology in addition to looking at changes in the fee schedule.

Senator Kilzer: I think we should look into that.

Chairman Holmberg: We need to caucus at noon. Is there a period we can put here and come back?

Maggie Anderson: I'm in the middle of page 13 and we can stop there.

Chairman Holmberg closed the hearing on HB 1012.

2009 SENATE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012 - continuing

Senate Appropriations Committee

☐ Check here for Conference Committee

Hearing Date: March 3, 2009 - pm

Recorder Job Number: 10092

Committee Clerk Signature Rose Laning

Minutes:

Chairman Holmberg called the committee back to order.

Maggie Anderson, Director of Medical Services, Department of Human Services

Continuing with written attached testimony #7 – starting on page 13.

(14:02)

Senator Kilzer: Of the Funeral Set Aside funds, could you give a historical picture of the funeral set aside has been – about 10 years back?

Maggie Anderson: We can certainly do that.

(15:20)

Senator Warner: Could you provide an executive summary of methodologies for re-basing – is there a short summary of payment methodology?

Maggie Anderson: We can take a look and see what we can pull together on that. Each of the provider groups was done differently, because their payment methodologies were different. When we released the request for proposal on that we actually ended up awarding three separate contracts. Because providers are paid differently, there are different methodologies.

(17:20)

V. Chair Bowman: The budget continues to a skyrocket. Are the numbers of people who are taken care of going up in proportion to the budget? Or is it fairly steady?

Maggie Anderson: If I could have you look at Attachment C. This is a comparison of our eligible and our recipients. The highlighted lines are the number of people who have received at least one service during that particular month. There is a low of around 38,000 and a high around 44,000. Some of that is timing of the year as in flu and cold season when we may have more claims or immunizations for kids going back to school. We'll see some trends as far as payment for those services. We are monitoring the aging population, but nothing specific in terms of the data in front of you.

Senator Robinson: Are there any national norms, surveys or statistical information that would give us a picture of how ND ranks per capita in the area of assistance with the region and the nation.

Maggie Anderson: I'm sure there is some information out there, but every state has different eligibility levels.

Senator Kilzer: A year and half is too short of a period to really answer Senator Bowman's question? Your graph only goes back a year and a half or so.

Maggie Anderson: We could go back farther than 1 ½ years – probably a couple bienniums. (20:50)

Senator Fischer: Could you also supply is with the eligibility for Medicaid and Healthy Steps. I hear different figures and it would help to know how we are in comparison with other states.

Maggie Anderson: You want income eligibility levels for children and adults on Medicaid as well as SCHIP?

Mike Schwindt, Director, Child Support Enforcement (CSE) Department of Human Services

Testified in favor of HB 1012. Written attached testimony # 8.

Senator Fischer: How do you get by with $13,000 for equipment?

Mike Schwindt: We replaced two copiers and trying to be very frugal.

Maggie Anderson, Director, Medical Services, Department of Human Services

Written attached testimony # 9.

She gave overview of the Long-Term Care Continuum budget.

V. Chair Grindberg: Is PACE program similar to Elderberry program where it's a local community initiative? We had some presentations on that about four years ago.

Maggie Anderson wasn't that familiar with that particular program.

Senator Warner: Clarify the term periodically when speaking of MDS (Minimum Data Set)? Is that a quarterly assessment?

Maggie Anderson: The MDS is done upon admission within 14 days, within 14 days of re-admission from a hospital stay and then it's done every 3 months after that.

(66:20)

Senator Robinson: In this category and next, what kind of numbers are we looking at in terms of clients.

Maggie Anderson: We are estimating around 25 individuals and 25 for next as well.

(Continuing on page 11)

Senator Robinson: We heard the budget for the Department of Public Instruction last week and they noted a significant growth in Autism. You have a number of 30. What can you tell us about this age group? Are the numbers increasing?

Maggie Anderson: One of the primary reasons we have it in the executive budget and we prepared a request for this is because through our stakeholder meeting, we've heard about the autism spectrum and the parents concerns. We try to intervene early on with the children.

Senator Robinson: Why all of a sudden we see such a spike in autism.

JoAnne Hoesel: We are identifying more children with developmental delays. We can have more of an impact if we have an earlier intervention.

(72:45)

Maggie Anderson – Continuing page 13 –

Senator Kilzer: A session or two ago, we had a waiting list for SPED (Service Payments for Elderly and Disabled) services and we caught up, how has it been the last year?

Maggie Anderson: There was a freeze placed on the SPED program and then that was removed with a bit of a slow growth after that time period. During the current biennium, we have definitely seen an increase in our SPED numbers and a consistent growth in the number of people receiving services.

(86:44)

V. Chair Bowman: On your implementation date for Home Delivered meals, is that going to be like Meals on Wheels only they're going to take them to more people or is this a completely new program that starts from scratch? If so, how is it going to be paid for?

Maggie Anderson: The Home Delivered meals were first added in the 07-09 budget, so we added those during the current interim. That does look a lot like Meals on Wheels. It's a different population. These are individuals who are Medicaid eligible and they're being served through our Home and Community based waiver. Others who are receiving Meals on Wheels aren't necessarily Medicaid eligible or receiving services through our waiver. This implementation of January 1, 2010 is for the increase in the number of meals. What we implemented this biennium was 3 meals per person per week and this changed that to 7 meals per person per week – and that would be Medicaid funded.

V. Chair Bowman: But who prepares the meals to deliver them and who is responsible for paying for the delivery?

Maggie Anderson: The cost of the delivery would be included in what we reimburse for that meal. We are trying to use the existing Older Americans Act providers who are already preparing and delivering those meals so we can be efficient about it.

V. Chair Bowman: Our county just received a hefty little bill from Meals on Wheels because they were short. Is this 100% funded for the cost or are the counties going to be responsible for picking up part of that?

Maggie Anderson: I can't say that our reimbursement rate is covering 100% of the cost. It's the fee that had out there for that. We think it's covering it very close.

(Continuing on bottom of page 18)

(90:09)

Senator Warner: Elaborate on technology waiver.

Maggie Anderson: These are individuals who are eligible for nursing home level of care but they are receiving services in their home and they are ventilator dependent for 20 or more hours per day and medically stable. The goal of the waiver is to keep them in their home.

Senator Warner: Could you elaborate on costs serving them in the nursing homes or in their own homes.

Maggie Anderson: One of requirements of a Medicaid waiver is that you prove that it's cost effective for the waiver and so we have to look at the cost of that service in the aggregate. Individuals who are on a ventilator are generally in your highest cost category in a nursing facility. We use that category when we establish what the rate would be should someone choose to receive the services. That's the maximum that we'll pay for the services.

Chairman Holmberg any questions.

Andrea Peña, Executive Director, North Dakota State Council on Developmental Disabilities

Written attached testimony # 10.

She gave an overview of the Council's budget request.

V. Chair Grindberg: Assuming you're new director and you'd like your money back?

Andrea Peña: Yes.

V. Chair Bowman closed the hearing on HB 1012.

2009 SENATE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

Senate Appropriations Committee

☐ Check here for Conference Committee

Hearing Date: March 4, 2009

Recorder Job Number: 10162

Committee Clerk Signature Rose Laning

Minutes:

Chairman Holmberg: Called the committee hearing to order on HB 1012 which is an appropriation for the Department of Human Services. Roll call was taken. All committee members were present.

Carol K. Olson, Executive Director, North Dakota Department of Human Services: Handed out a Glossary of Terms and Acronyms – see attached # 11.

Linda Wright, Director, Aging Services Division, Department of Human Services: Written attached testimony # 12. Additional information was provided about Aging and Disability Resource Center (ADRC) – attachments A-H.

Chairman Holmberg: The budget does include some additional money for the meals program but there is a concern about the formula you use. I am hoping the subcommittee will take a hard look at that formula and equalization, so some of the numbers that we see between regions gets resolved. We don't want to take money from someone else within the program. We need to get that resolved this session.

Linda: I will be happy to provide you with the formula we use. She continues with her written testimony.

Senator Robinson: I've been concerned about the demography and what's happening in the state. We will be in need of thirty percent more medical professionals in the next twelve to

fifteen years. We'll soon be in a situation where there are not enough human resources to care for are elderly. We have programs in place and a number of agencies that are working on these issues. Is there an agency that is being proactive to coordinate the long term or are we going to be in a situation where we are not ready. Where are we as a state, do we have a model out there or best practices that we can emulate? There are many areas of our state that are in impossible situations to sustain are rural culture and viability.

Linda Wright: The Olmstead Commission has established a work group that is looking at a direct care workforce for the needs of now and the future. So we have a broad based committee. We are coordinating are efforts with Job Services, with the colleges that are offering opportunities for older students. We've also joined with MFP, the Money Follows the Person programs, and with that we will be able to access the national technical institutes. We're looking at what other states are doing.

V. Chair Grindberg: When you look at your 2020 map, Sioux County and Grand Forks County are manufacturing younger people. Are you engaging the County Commissioners with stakeholders meetings with this type of data? So every biennium we come in and appropriate and fund programs.

Carol Olson: Yes we do include the county commissioners at local level during are stakeholders meetings. We need to make sure that services are available, but have to make sure we have the availability of the services that they need. We've seen more of our rural citizens are moving into the urban areas. It's something that we've talked about for a number of years. They have more resources available to them. We have a 2020 project that we are working on that should give us some answers to some questions. We know the services they need, the challenge is how to provide them. There are so few people living out there. What's

the answer? How are we going to deal with this in the future? We are trying to come up with solutions.

V. Chair Bowman: To tie the net between what's available, every time there is a new program started, a web page should be available to the counties, so people would know how take care of that need. There are always changes to these programs and the webpage should change with what is available and what the programs are designed to do. Then those at the county level would know what is available to take care of that person.

Linda Wright: Some of that is already available through the Aging Website. You can search by County or Service. It could be expanded beyond what it currently is. Some states even have their assessment documents on line.

Senator Mathern: I've been looking at this website on services. There isn't any agency that wants to take this on?

Linda Wright: Many agencies have developed over a long period of time and because of that there is a lot of ownership among the agencies, organizations and associations. There are some positive things that have happened in rural Cass County with the community care program. We've gotten some people together to serve the rural communities in Cass County. In some of the larger areas they have community services network meetings. There needs to be an incentive to get the agencies to work together.

Senator Mathern: Why don't we have something together right now? We know what the problem is and the solution, why don't we just put it in place?

Linda Wright: It takes resources and a very concerted effort to get it done. It needs to be the local people making that decision and getting together. Linda goes back to her written testimony, starting on page seven.

Senator Robinson: If it wasn't for these centers, we'd have everyone in nursing homes at a higher cost. How active is the partnership with our senior providers and public health in terms of referrals and really being a watchdog for the needs of our senior citizens across the state?

Linda Wright: Our outreach program focuses on people over the age of 60, but also low income, minority or frail. They are coordinating with the public health entities. We do fund across the state the maintenance services such as, foot care, blood pressure, etc. Linda concludes her testimony.

Senator Mathern: In terms of the House decrease, if that were to stay in place, could we eliminate the website services, or would that still be in place and we just won't have the staffing services?

Linda Wright: We want to enhance the aging services. We have voice mail, but if they call on Saturday, they just have to leave a message. If assessments were on website it would be helpful to the individuals, so they could determine what they are eligible for.

Senator Mathern: What are we losing by not funding the 600,000?

Linda Wright: We're losing cost efficiency and effectiveness. We are continuing with some duplicate efforts in information referral. We'd be more efficient and keep more people at home.

Senator Mathern: Doesn't this provide information and referral?

Linda Wright: It does but no benefit and option counseling, and can only provide phone numbers, but they still have to go to several agencies to get the services they need.

Tara Lea Muhlhauser, Director, Children and Family Services, Department of Human Services: Written Testimony # 13.

Senator Fischer: Under the Foster Care, I had parents who had a question; they had a child for 1 to 1 ½ years and they got the child back on track. The child was then placed for adoption and when the procedure started the foster parent wasn't allowed to comment about anything. Can you comment on that and where we should go with that?

Tara Lea Muhlhauser: Those situations can often get very complicated. I would be willing to look into that case. We believe we work as partners with the foster parents. What I hear often is that they don't have any say in the decision, they sit in as a member of the team, but the people in charge of the child will ultimately make that decision. We like to believe that we are good partners with the foster care parents and they are invaluable to us.

Senator Fischer: This person didn't want to be in the room when decisions are being made, but they aren't contacted to be interviewed about the child. Maybe there are laws that should be changed.

Tara Lea Muhlhauser: It is our policy to involve the foster parents into the transition. I'm not sure why it didn't happen in this case. They move from a county manager, to a case manager and they are involved with foster parents. If we didn't do this in this case, I'd be willing to look into it.

Senator Fischer: She didn't expect anything to change at all. Then during the adoption and post adoption they continue to check on the child, when does the state get out of this kid's life?

Tara Lea Muhlhauser: When the child is adopted, we are done. The reason we are involved in post adoption services is we have learned that the children come with a lot of trauma, and

behavior problems. The adoptive parents need someone to connect with to assist them in becoming new parents. Tara continues with written testimony.

Senator Mathern: Before we get off these numbers, the number of children in foster care, is this a reduction?

Tara Lea Muhlhauser: Yes, we see a decline in the number of children in foster care. We ran the percentage of foster kids against the full child rate in ND. It was an interesting piece of research. There was a large rate in children going into foster care in some urban areas than others. Tara goes back to written testimony.

Senator Mathern: On this program is there any plan to put this in the budget once the Bush Grant is over?

Tara Lea Muhlhauser: Yes we do have dollars in the budget. The Villages' hope that this was an enhance service in our budget.

Senator Mathern: It would reduce if there is no longer any Bush money?

Tara Lea Muhlhauser: We would be able to maintain what we have now.

Senator Lindaas: Can you tell us what was lacking in achieving conformity?

Tara Lea Muhlhauser: The Federal IV-E audit? The court wants specific findings on removal and during any judicial activity. This is not a new issue, and we have been working hard to provide training to make sure everything is taken care of. It was all a matter of court order language. Tara goes back to written testimony.

Senator Fischer: What is a RCCF/GH?

Tara Lea Muhlhauser: RCCF is residential child care facility and GH is group home.

Senator Christmann: When there are suspicions of child abuse, how do they get those children to the right specialists to see if there is a problem or severity?

Tara Lea Muhlhauser: There is CPS- Child Protective Services staff in each county. They are well trained and also have 7 specialized projects that are built for rural counties. Dakota Central has two full time positions that go through the entire county. Burleigh has a person stationed in Bismarck but drives. The county and provides services to counties that aren't able to handle case load. These individuals are well trained to both read and engage in some questions to access the kinds of needs that are there when they get a child abuse and neglect report.

Senator Christmann: In the instance when specialized attention is needed do we have contracts with those specialists if they are going to help out for so many dollars per year? How do we work with those specialists?

Tara Lea Muhlhauser: We have five hundred thousand dollars in the budget for those specialized contracts with child advocacy workers. That's the only costs the county would bear would be that of driving in to be a part and hear the interview.

Senator Christmann: Your department oversees who is responsible for those advocacy centers?

Tara Lea Muhlhauser: We don't oversee them we write the contracts. Their oversight comes from the accrediting body the national children's advocacy center. We do contract oversight when we provide them those dollars. But mine is not that deep as far as program quality. Tara finishes with her written testimony.

Senator Kilzer: Under child protective services you list child fatality review, could you explain that?

Tara Lea Muhlhauser: It's a multi-disciplinary team that we bring together. It includes people from health department and the state forensics examiners and we also work with a forensic pathologist from UND. We have high level medical specialties on that team as well as citizen input to review all child deaths that have a potential systemic input.

JoAnne Hoesel, Division Director, Department of Human Services:

Written attached testimony # 14.

Senator Christmann: I don't understand the numbers of soldiers coming back with TBI.

JoAnne Hoesel: The first number is National Guard soldiers and next number is all the returning Vets.

Senator Krauter: Are there any net costs to the state or is it one hundred percent funded through the VA for the services that you are providing?

JoAnne Hoesel: This is a services grant for implementation and for looking into the future in terms of what we need. We're anticipating a 2nd wave – they first have to access services through the guard and VA. Then we have individuals who don't want to access VA because of the stigma that still comes from the services. They access their private insurance and they also come to the centers.

Senator Krauter: Is the department concerned that you will see an increase in cost as well?

JoAnne Hoesel: We do anticipate a shift because it will come from the service. It would show up in our budget, not in this budget.

Senator Fischer: Is there federal money that flows with these veterans?

JoAnne Hoesel: There are some grants available. And they can get help through the VA. There are additional grants available and some come with matches.

Senator Fischer: We're hoping there will be help from the federal government. Have there been any grants issued?

JoAnne Hoesel: This last summer I believe ten were issued.

Senator Krebsbach: The screening for TBI, what process do they go through or what indication do you have?

JoAnne Hoesel: I'm not sure of the exact screening process, but there is a trained individual from UND that processes the information that they look for. JoAnne continues going over her written testimony.

Senator Warner: Do you correlate your numbers with the corrections system, so we know how many are being treated in the sphere of the two budgets? How serious is the problem in our state?

JoAnne Hoesel: We work very closely with corrections and they would be treated in the prisons. Everything else would be accessed through the human service centers. The numbers would reflect those coming out of the prisons on parole or probations or those under supervision of the department of corrections. JoAnne continues with written testimony.

V. Chair Bowman: You've given us the numbers of the amount of people that have a problem, but what is cost to treat an individual one time the program?

JoAnne Hoesel: That would show up in two places. The actual treatment dollars appear out of the Human Service Centers and then in the last session I did provide you with information of what we came up with what North Dakota's average cost per person is. I can provide that to you again.

V. Chair Bowman: Do you have ballpark figure?

JoAnne Hoesel: No.

Senator Christmann: When people choose to get treatment on their own, do most insurance policies pay for this?

JoAnne Hoesel: North Dakota has a law that requires a level of coverage to mental health and substance abuse services, so if it's a group policy there needs to be a level of substance abuse and mental health that they would cover. If it's a single policy it would be what that policy states as covered. Was your question if they choose who covers them?

Senator Christmann: No, if they're incarcerated, do we get stuck with the bill.

JoAnne Hoesel: It is important to know that human services operates on a sliding fee scale so depending on the persons income that would correlate on how much they pay for their treatment if they do not have insurance.

V. Chair Bowman: We have a young group of people in here and if they can associate and see what that person has done to themselves and all of us are paying for this. Maybe it would be a deterrent to them, knowing what it costs to treat someone. I appreciate what Senator Robinson said, it is treatable but it is a path to struggle through that treatment.

Senator Robinson: We were privileged to hear two young people tell of their story. When you see that, it's more than touching.

JoAnne Hoesel: Research shows that it is an investment into these individuals and society and treatment is a return of $7 for every $1 spent. JoAnne returns to written testimony.

Senator Robinson: I want to encourage the subcommittee to look at education prevention and intervention. In a very short period of time, good things have happened. This eliminates duplication. We have a serious problem in our culture, that beer is ok. The trends aren't getting better, they are going off the charts.

Senator Seymour: With your advisory group is that those who have gone through experiences that are the best advisory members?

JoAnne Hoesel: We do have a recovery counsel that actually pulls in a group of people that you are talking about, that are in recovery and they are providing guidance to us and other agencies on how we can give those people a stronger voice. JoAnne returns to testimony.

Senator Krauter: Do you know where it is located and what the rent on that is?

Joanne Hoesel: Yes, $14.05 per square foot at Prairie Hills Shopping Center.

V. Chair Grindberg: Is that triple net or is it gross?

JoAnne Hoesel: Yes, utilities are included.

Senator Robinson: Can we get a print out on who we are renting from, square footage, locations and the amount of square footage.

JoAnne Hoesel: Going back to testimony.

Senator Robinson: With the increase in compulsive gambling, you are going to reduce that by $150,000? How much are we spending on compulsive gambling?

JoAnne Hoesel: We currently stand at $550,000.

Senator Robinson: We're spending about eight to nine hundred thousand dollars in promotion of the lottery and we're spending half that amount dealing with compulsive gambling. I don't know if that's the message we want to send. We're spending twice as much on promoting gambling than we were in dealing with the affects of gambling. How do you defend that?

Senator Christmann: I felt it odd that the House took out all the grants for the advisory council. There was grant money last biennium but it was through the Governor's office. If they

have no money to give out what is the purpose for the counsel? Can you give me an example of a couple of grants they gave out?

Joanne Hoesel: The grants were to Northern Lights in Hillsboro, Western Family Resources in Dickinson, United Tribe Technical Center in Bismarck, Casselton Youth Task Force in Casselton and the Sunrise Youth Force in Dickenson.

These agencies and those that are on the advisory council continue to have federal dollars that come in and we don't have to adjust what we do because the council has always had this hundred thousand dollars to work with and to support what the direction of the council is. Are next meeting is in April. The advisory council needs to decide how to make that adjustment. So I can't tell you where will end up on that but regardless it is important that there is focus on prevention in North Dakota.

Senator Lindaas: I have a bill about the delivery of alcohol to minors. The alcohol lobby mounted quite a campaign against that in the last session. I think we have to realize those entities benefit from are misfortune in regard to alcohol to minors. In fact, the Center for Disease Control says age youth 12-20 consume eleven percent of alcohol in US. So naturally they are out to protect their interests. Do we do anything within your department to counteract the advertising done within alcohol industry? Or is anything effective?

JoAnne Hoesel: We have a specific Federal Grant, it's for enforcing underage drinking laws. We have a campaign with the Attorney General's office where every school aged child's parent will be receiving something in the mail this week, we are also doing media and the kids will be receiving posters and some other things. We are doing this in preparation of Prom season and other things that are coming up this spring. It's to educate people about the server laws in North Dakota that it is illegal to give underage kids alcohol of which we all know happens in our

state and what can happen with an educational campaign. We feel the parents are the key. The First Lady is involved and the money comes from that grant. We contract with the highway patrol to do underage drinking enforcement activities. We need to get more specific on how to handle underage drinking.

JoAnne Hoesel, Division Director, Department of Human Services:

Written attached testimony # 15.

Nancy McKenzie, Vocational Rehabilitation Division, Department of Human Services:

Written attached testimony # 16.

Senator Robinson: Several of these divisions, travel has been reduced by 50%. Did you project travel costs based on the new rates?

Brenda Weisz: They looked at the travel overall. It was across the board eight percent.

Senator Robinson: Where are your projections?

Brenda Weisz: Our projections based on additional meetings that we needed to go to. We need to get out there and we had an increase in travel.

Nancy McKenzie, Statewide Director, Regional Human Service Centers (HSCs):

Written attached testimony # 17.

Senator Robinson: How extensive is our problem in the area as far as funding, payments for services, the lack of Medicad dollars. What type of dollars are we looking at annually for the centers and the hospital in particular?

Nancy McKenzie: I would have to have Brenda address that.

Brenda Weisz: It would be just over five million at the state hospital.

Senator Mathern: Have we ever penciled out what the net difference would be if we took the entire budget at the state hospital and parceled it out to the 8 regional centers?

Nancy McKenzie: We have not. We certainly believe there is a need for the state hospital.

Senator Mathern: I am assuming you could incent local providers to say they can meet the needs.

Nancy McKenzie: It would mean a change in treatment philosophy and approach in terms of having to have a vote. It would require infrastructure changes. Nancy continues with her written testimony.

Senator Krauter: I would like the subcommittee to spend some time on looking at the regional centers, with staffing, dual management that we have between regions is this really working?

Alex C. Schweitzer, Superintendent, ND State Hospital and ND Developmental Center, Department of Human Services:

Written attached testimony # 18.

Senator Mathern: The original budget before the House made changes didn't have enough in it to pay for your staff?

Alex Schweitzer: No that was put in because you get that many vacancies during the biennium, we get that much salary roll off. We're running 95-100% range and staffed at 85% and that's why we need additional FTEs.

Senator Robinson: The sexual program there, you mentioned there have been some releases and those folks who were not released are they going to be there long term?

Alex Schweitzer: Interesting things happen with the growth of the program. We've been doing a lot more paper reviews than when we started. We're not bringing as many people in for

evaluation because we are discovering that the referrals that are being made to the program, those people can easily be treated as an outpatient. We have the individuals who are the most sexually dangerous in our group. Because of that we are seeing less referrals.

Senator Robinson: When we read in the papers that a sexual predator has moved into community, it might be that he spent time in your program, but there are also individuals that are coming out of other programs, correct?

Alex Schweitzer: Yes, they may be in rural programs and we have the high end offenders. There are more restrictions on the evaluation process.

Additional testimony was handed out:

Marilyn Rudolph, Director, NW Human Service Center, Williston and North Central Human Service Center, Minot:

Written attached testimony # 19 in favor of HB 1012.

Kate Kenna, Director, Lake Region Human Service Center, Devils Lake and Northeast Human Service Center, Rolla:

Written attached testimony # 20 in favor of HB 1012.

Candace Fuglesten, Director, Southeast Human Service Center and South Central Human Service Center:

Written attached testimony # 21 in favor of HB 1012.

Tim Sauter, Director, West Central Human Service Center and Badlands Human Service Center:

Written attached testimony # 22 in favor of HB 1012.

2009 SENATE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012 - continuing

Senate Appropriations Committee

☐ Check here for Conference Committee

Hearing Date: March 4, 2009 PM

Recorder Job Number: 10206

Committee Clerk Signature Rose Laning

Minutes:

Chairman Holmberg called the committee hearing back to order on HB 1012.

Chairman Holmberg: Alex was up there saying, "In conclusion....."

Alex C. Schweitzer, Superintendent, North Dakota State Hospital and North Dakota Developmental Center

Continuing on with written attachment # 18 – page 10, the Developmental Center.

Senator Mathern: Is there a corresponding increase in the department's budget that relates to plans to decrease the residents?

Alex C. Schweitzer: Yes there is, in the DD (Developmental Disabilities) budget.

Subcommittee members: **Senator Fischer, Senator Kilzer, Senator Krebsbach, Senator Warner, Senator Mathern.**

JoAnn Ferrie, Director, Professional Home Care, and member of ND Association for Home Care

Testified in favor of HB 1012. Written attached testimony # 23 & map legend # 24

Senator Warner asked how we address the remote areas that don't have home health care.

JoAnn Ferrie answered saying they also have tele-health monitors for remote areas. There could be a scale, blood pressure cuff, monitor breathing all over the phone. Travel is not reimbursable for QSPs (Qualified Service Provider).

Senator Mathern asked if there were some folks receiving QSP services that already have a job and **JoAnn Ferrie** replied that QSPs provide personal care and sometimes homemaking to individuals who can be physically challenged and with a little bit of help every morning with their personal care, they are able to go to a job.

Jo Burdick, Executive Director, MeritCare Home Care, North Dakota Association for Home Care

Written attached testimony # 25 – tele-health.

Beverley Adams, Executive Director, Health Policy Consortium

Testified in favor of HB 1012. Written attached testimony # 26.

41 50

Senator Mathern asked about hospital capital costs and **Beverley Adams** explained the reimbursement structure through Medicaid.

Senator Krauter: Maggie Anderson presented percentages of increase for the re-basing. I think those percentages were in the executive budgets percentages and wondered if she could get us the percentages from house Amendments, so we can correlate.

Al Stenehjehm, Problem Gambling Advisory Committee, Mental Health Substance Abuse, ND Department of Human Services

Testified in favor of HB 1012. No written testimony.

We have some questions after **JoAnne Hoesel's** testimony. We worked with the Governor's office and had an additional $300,000 put into the budget over the $400,000 for a total of $700,000. The House cut out $150,000 of that increase. The problem it creates is that we have no marketing dollars. We put money into marketing in the lottery, but we don't have any dollars. There are services available to people who have a gambling problem. We asked for $300,000 dollars to put a campaign together to promote and advertise that there is treatment

available. The casinos are unique; they come together and put in money to treat problem gamblers. Through that program, anyone who comes in and represents the fact that they have at least 50% of their problem is associated with casino gambling, they get the treatment covered. We used to cover 8 treatment sessions, now we do 16 because 8 are not enough. (47:00)

Lisa Vig, Gambling Addiction Counselor, Problem gambling Advisory Committee

Testified in favor of HB 1012. Written attached testimony # 27.

(51:52)

Brian Arett, Executive Director, Fargo Senior Services

Testified in favor of HB 1012. Written attached testimony # 28.

Chairman Holmberg: The number of meals in your area that was provided in 2007 was roughly 296,000 meals in region 5. One of the things that there has been concern expressed is the formula that is used to disperse the money. We would welcome your input as we work on this portion of the budget. We want to look at both the money and the formula.

Brian Arett: We would certainly be willing to provide our perspective on that.

Senator Mathern: How many other organizations provide meals that are not on your list?

Brian Arett: The entities that are not listed on this list that provide would probably be the Native American reservations. Every entity is listed, but our request would be for them as well.

Additional written testimony -

Pat Hanson, Executive Director, South Central Adult Services

Written attached testimony # 29.

2009 SENATE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012 – Public Testimony

Senate Appropriations Committee

☐ Check here for Conference Committee

Hearing Date: March 4, 2009

Recorder Job Number: 10209

Committee Clerk Signature Rose Laning

Minutes:

Chairman Holmberg called the committee hearing back to order on HB 1012 with the purpose of providing public testimony.

Dianne Sheppard, Executive Director, The Arc of North Dakota

Testified in favor of HB 1012. Written attached testimony # 30.

Developmental Disabilities in North Dakota: 2009 – attachment 30 A

Closing the ND Developmental Center: Issues, Implications, Guidelines – attachment 30 B

Chairman Holmberg: I have a question relating to critical mass. We are at a 130 or so and the goal in 2011 is to get to 67. At what point does number of residents reach a stage where it's just silly to keep it open. Is it 67, is it 30. Any research on that?

Dianne Sheppard: That number would've probably been 240. When the ARC of ND did the research, we thought it would become apparent that people can and do live in the communities. ND is going to be one of the last states to have institutions for people with developmental disabilities.

Senator Mathern: Section 10 of the bill. Do you have specific wording suggestions for that concern you raised?

Dianne Sheppard: We'd be happy to make some recommendations on that language.

Senator Mathern: What is your opinion as to the continued pressure to keep the developmental center open? Where is that energy coming from?

Dianne Sheppard: It comes from a variety of different areas. Perhaps some of it is good-hearted intentions to keep people safe. It's a safe haven and people have dignity. You're going to need bridge funding to close the developmental center and get the people out into community. The developmental center will have to be funded while you're moving people out and providing community resources. This movement has been going for 30 years.

Senator Lindaas: It's been some time since I've been to the developmental center, my observation was that there were some folks severely affected and required 24 hour/day care. Are you suggesting that could be taken care of out in community?

Dianne Sheppard: Yes, people can be served in their home communities or near a medical facility. They could have their own home, maybe shared with another person. If they have 24 hour staff at the developmental center, they could have 24 hour staff in their own communities living next to friends and family.

Senator Lindaas: There are economies of scale. There are services that can overlap from one person to another that would add to the efficiencies.

Dianne Sheppard: That is exactly why we had an institution that housed over 3500 people - one of the biggest institutions in the country and then we take out human dignity and the quality of life issues.

(18:50)

Janell Regimbal, Sr. Vice Pres., Children & Family Services, Lutheran Social Services of ND

Testified in favor of HB 1012. Written attached testimony # 31 and included attachments A-F.

Senator Mathern: Have you ever heard about Pierre the Pelican? There was a program about 30-40 years ago where we thought every young family should just kind of support. (?) Evidently it all went away.

Shari Doe, Director, Burleigh County Social Services

Written attached testimony # 32 in favor of HB 1012.

Constance J. Keller, Program Services Manager, Prevent Child Abuse North Dakota

Written attached testimony # 33 in favor of HD 1012.

Jean Schafer, Principal, Fort Lincoln Elementary, Mandan, ND

Written attached testimony # 34 in favor of HB 1012.

(27:50)

Larry Bernhardt, Director, ND County Social Service Director's Association

Testified in favor of HB 1012. Written attached testimony # 35.

Need to develop one computer system that works across all lines.

Senator Krauter asked about the issue of the case workers in the county having to enter 4-5 systems and wondered how many bienniums they have talked about this.

Larry Bernhardt: We have talked about it in the last three bienniums, but there have always been other computer needs that have taken priority over that, most recently the MMIS system. MMIS (Medicaid Medical Information System) was terribly antiquated and needed to be fixed.

Senator Krauter: What system does SCHIP go thru? And Larry Bernhardt said that some of it is in text and some is in vision, and when they get the new MMIS system, some of it will be in there.

Senator Mathern asked about the MMIS system and whether it would "talk" with the other systems.

Senator Warner: Just a comment. It seems that we've spent enough money on computer systems for Human Services in the last few years, and I know we've passed the cost of Memorial Bridge, and we're also rapidly closing in on the replacement cost of the capitol building. It's an astonishing amount of money. We had the judiciary budget in the first half of the system. To replace the entire software and computer system of the entire judicial branch of government was only $6 M dollars. It's an astonishing amount of money that I can hardly get my head around it.

(43:00)

Barbara Murry, Executive Director, North Dakota Association of Community Providers

Testified in favor of HB 1012. Written attached testimony # 36.

Dan Howell, Chief Executive Officer, Anne Carlson Center, Jamestown, North Dakota

Testified in favor of HB 1012. Written attached testimony # 37– also

Issues Overview – Critical Needs Staffing - # 37 A

Anne Carlson Statement of Need book - # 37 B

Sandi Zaleski, Regional Program Supervisor, The Village Family Services Center

Testified in favor of HB 1012. Written attached testimony # 38

Chairman Holmberg: This is one that wasn't included in the Governor's Budget. It wasn't removed by the House, is that correct?

Sandi Zaleski: Right.

Senator Mathern: The funding for this service. It is funded in the budget at the level that the Foundation was funding the program.

Sandi Zaleski: I know they have three positions in their base budget, but don't know anything more than that.

(58:25)

Amy B. Armstrong, Project Coordinator, ND Medicaid Infrastructure Grant at the ND Center for Persons with Disabilities at Minot State University.

Testified in favor of HB 1012. Written attached testimony # 39 and also handed out brochure- At a Crossroad, A Brief Overview of the ND Home and Community Based Services Report – attached #39 A

Mark Weber, President, North Dakota Emergency Medical Services Association

Testified in favor of HB 1012. Written attached testimony # 40.

Senator Krauter: We asked earlier for information on the rebasing for those 5 entities ask if you could present it now with the House amendments, what percentages of increase would you need.

Maggie Anderson: I don't have the information with me, but I can provide that.

(71:22)

Carol Watrel, Advocacy Volunteer, AARP North Dakota

Testified in favor of HB 1012. Written attached testimony # 41.

Lynn Fundingsland, Executive Director, Fargo Housing and Redevelopment Authority

Testified in favor of HB 1012. Written attached testimony # 42.

Senator Mathern: We have $19 M in the last stimulus package, and we had testimony from Dept. of Commerce saying they didn't have enough projects to work on and wanted to carry it over to the next biennium. It seems a project like this would fit that area. If it did, can you transfer any of this building money to operations? If the Department of Commerce could give you a million or two million to help with this project, beyond what's in there already, are you able to use some of this for operation or is this just not possible?

Lynn Fundingsland: My understanding is that none of those dollars are available for operational funds. So if we were constructing this project, those dollars could go into that. We can build it. We just can't staff it.

Senator Mathern: Could you take out some of these dollars and put it into staffing and then figure out how to put more money into the building.

Lynn Fundingsland: We can put the money together from these various sources specifically for purchasing order, but none of the figures for operations.

V. Chair Bowman: When you were deciding to build this home, why didn't you pursue the funds to take care of it before you decided to build it? It seems to me like you're building the building and then coming to the state for money to run it. Was the state involved in your building this or deciding to build this building first? Did they say that the appropriate place to come for the operating money was here?

Lynn Fundingsland: It all needs to happen concurrently. We involved Human services from day one in the planning process and the intention was to be here today to make this request.

Jon Mielke, foster parent, Burleigh County

Testified in favor of HB 1012. Written attached testimony # 43.

Carroll Burchinal, foster parent 1 29 09

Testified in favor of HB 1012. No written testimony.

Proposed increases in foster care payments.

Senator Krauter : In the budget, there is a 23-26% increase in foster care depending on the age group and placement, is it still certain that both of you are speaking in support of the governor's budget or in addition to.

Carrol Burchinal: We studied the report and the amount in there doesn't meet the need.

Senator Mathern: What does a foster family get? $440/month is the old rate.

Carrol Burchinal: The new rate would be $584/ month.

(93:20)

Rodger Wetzel, Director, Northland PACE Senior Care Services Program

Testified in favor of HB 1012. Written attached testimony # 44 and PACE brochure # 44 A and

PACE Fact Sheet - # 44 B.

Chairman Holmberg closed the hearing on HB 1012.

2009 SENATE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

Senate Appropriations Committee

☐ Check here for Conference Committee

Hearing Date: March 9, 2009

Recorder Job Number: 10530

Committee Clerk Signature Rose Laning

Minutes:

Chairman Holmberg called the committee hearing to order on HB 1012 in regards to public testimony for the Human Services bill.

Senator Mathern, District 11, Fargo

Testified in favor of HB 1012.

Last week, we had testimony from **Sandi Zaleski** of the Village in Fargo talking about the service they provide for family decision making. There was some testimony that was a little bit unclear as to whether or not the full funding was in HB 1012 or just partial funding. Neither Sandi, nor other members of the Village staff were able to be here today, so I am offering this information for the committee and it basically clarifies that the amount of money that is in HB 1012 would only be enough to continue this program at 2.6 FTEs for the program is actually more like 15 staff persons. This is something the subcommittee will need to work on.

Presented written testimony from

Sandi Zaleski, Statewide Child Services Agency, The Village, Fargo

Written attached testimony # 45.

Matt Schwarz, parent of daughter with Myotonic Muscular Dystrophy.

Testified in favor of HB 1012. Written attached testimony # 46.

Bruce Murry, Lawyer, North Dakota Protection & Advocacy Project

Testified in favor of HB 1012. Written attached testimony # 47.

Senator Mathern: You begin 2nd paragraph saying you support governor's budget, but then the testimony suggests a lot of changes. I would encourage you to clarify those. I'm afraid when that gets into subcommittee, we don't have the things that are clearly not part of budget probably won't make it.

Senator Fischer: On the $40,000, wasn't there $40,000 that was put into petition for guardianship, isn't that what it was for?

Bruce Murray: Exactly, Mr. Senator, that is correct. The requested appropriation we did in the 2005 bill was $780, 000. And the times having been rather tough in 2005, we decided that only $40,000 was available for (inaudible).

Senator Fischer: But wasn't $40,000 adequate for that service?

Bruce Murray: The $40,000 would be adequate for petitioning only. We still see situations where it's difficult to find somebody willing to be the guardian because there's no funding for outgoing expenses.

Senator Fischer: Exactly what Senator Mathern is saying is important for that piece of wealth is that you have to separate those two pieces before we'll work on them. This would be confusing and won't be considered.

Bruce Murray: I'll plan to submit a follow up, maybe a chart that would help.

Senator Krebsbach: In regards to the guardianship, are these court ordered or un-court ordered?

Bruce Murray: These are all court ordered proceedings. If somebody uses a non-court proceeding, like a power of attorney, that is considered a less restrictive alternative.

(15:47)

Carlotta McCleary, Executive Director, ND Federation of Families for Children's Mental Health

Testified in favor of HB 1012. Written attached testimony # 48.

Rob Hasse, President, ND Chiropractic Association

Testified in favor of HB 1012. Written attached testimony # 49.

(24:25)

James Moench, Executive Director, North Dakota Disabilities Advocacy Consortium (NDDAC)

Testified in favor of HB 1012. Written attached testimony # 50.

(31:45)

Lee Erickson, Hillsboro, State Coordinator, ND SADD (Students Against Destructive Decisions)

Testified in favor of HB 1012. No written testimony.

Carrisa Hirchert, New Rockford, SADD Student of the Year

Testified in favor of HB 1012. Written attached testimony # 51 - Effects on Thinking Tasks.

Jessica Roscoe, Junior at New Rockford Sheyenne High school, Northern Lights Advisory Board

Testified in favor of HB 1012. Written attached testimony # 52 – Funding Prevention Makes Economic Sense, Researchers Say

Matthew Perdue, Senior Ray High School, Member Northern Lights Advisory Board

Testified in favor of HB 1012. No written testimony.

Janet Sabol, President & State Coordinator, National Alliance on Mental Illness

Testified in favor of HB 1012. Written attached testimony # 53.

Leanne Johnson, AASK Director, ND Catholic Charities

Testified in favor of HB 1012. Written attached testimony # 54.

Jon Larson, Executive Director, Enable, Inc., ND Association of Community Providers (NDACP)

Testified in favor of HB 1012. Written attached testimony # 55.

Senator Mathern: In terms of staff, are we getting to a situation where we maybe don't have people? If we increased your money, are you comfortable that we'd have staff to attract. Or is it basically a situation where it's not just money anymore in terms of having adequate staff and less turnover? I'd appreciate your comments.

Jon Larson: North Dakota may be a little unique in this as have a limited workforce and we compete with the other workforce that we have. I believe that the people that are out there if they could make this a career because we're competing with everyone else. Our agency has had on average 6-8 positions open for the last five or six years. Whether that's only a wage issue or not, I'm not sure, but I do know if we could pay people more, we could hopefully attract quality persons who end up staying for a long period of time.

(73:35)

Shelly Peterson, President, North Dakota Long Term Care Association

Testified in favor of HB 1012. Written attached testimony # 56 and Attachment A-E.

Senator Fischer: Talking about staff, they use FMAP money and stimulus money, how do we sustain that in the two bienniums?

Shelly Peterson: Sustainability of the Medicaid budget is a big issue for every state. It can go down to 50 % matching, and if it would ever get that low, we would be in a difficult situation. When we are sustaining it, if we didn't provide money to enhance wages, we will have facilities close and there will be a lesson of burden to the budget. We think with the stimulus money,

assuming it does reach North Dakota, that it is an opportunity. If we had more people in the state that we could recruit from Michigan, we'll have more of a tax base. When we look at our aging population, it puts fear into everybody that we're going to lose a big tax base.

Senator Fischer: Do you think that will offset the money that we invest in wages and will bring people to fill spaces.

Shelly Peterson: I could dream that, but probably not. It's going to cost us money, but it's a good investment that will have some dividends.

Senator Fischer: Do you want a large increase in wages for the care givers and then the first year of the second biennium have to cut it?

Shelly Peterson: No, I would never want to do that. That was the fear in 2001 when you divided $1.15. We dropped turnover 30% when you did that and our turnover cost a lot of money. Right now we're spending a lot on overtime and contract agency staff. If we invest in that workforce as well as recruit, it will create a better future for us.

Senator Fischer: If we fund at a more reasonable rate, quite a bit less or somewhere more in the middle, wouldn't we have a better chance to work within our own budget than rely on the stimulus because we'd be more likely to sustain that than if we get excited about a onetime expenditure.

Shelly Peterson: I don't disagree with you. I'd love to see that stimulus put in, the Healthcare trust fund or another fund. And for Medicaid in the future, I think we need to see something like that. I think there are a number of options that we can do, but as long as we have a safety net and poor people and people that run out of funds, we're going to have a need for Medicaid. The thing that's great about ND is that we have one of the lowest populations of people on Medicaid in nursing homes. We are in the top 5 in the nation for people that don't access Medicaid in nursing homes.

Senator Fischer: I'm not picking on you. I'm talking about all the providers in other agencies.

V. Chair Grindberg: I had a question at a Legislative forum on Saturday. The numbers showing that nursing home enrollment is declining and requests for QSPs to keep people at home is increasing. What if your numbers continue to decline? Do you have any projections for in five years? Or ten years, based on the increasing number of folks eligible by demographic profile? Clearly if we came back in 5 years and there was a 30% reduction in nursing homes, then people would say that is a good thing. How do you balance the escalating budgets versus what the trends are indicating?

Shelly Peterson: When you look at the ten year trend of nursing facility utilization is going down. We are discharging many more people back home, but cost per day is continuing to increase every year. We have people who have high medical needs, but we have good use of long term care. Hopefully with early intervention, we are able to care for people with fewer needs for longer periods in their community and home. When you look at demographics of how we are all aging and we live a long time, and the loss of our younger population through a variety of reasons, it is kind of scary. As we look into the future, we will see a decrease in numbers because technology will help keep people at home. Drug therapy and drug research is helping keep people at home. When you look at the CMS data, people are going into institutional care in far less numbers than they were, even in 2002.

V. Chair Grindberg: What are your expectations with Michigan? I'm a skeptic as far as a thousand families moving from Michigan to ND. I'm not sure what it is you're referencing with the Michigan example?

Shelly Peterson: We have two facilities that just received funding from the Office of Rural Health; Bowman and Watford City. They are going to test this model. They are specifically going to Michigan to recruit families to move to ND and offer them good jobs. There doing

housing inventories so that we have available housing. People looking for jobs are looking for comparable wages. (Explains Michigan recruitment).

V. Chair Grindberg: If it's successful, Governor Granholm will call Governor Hoeven and express her displeasure.

Shelly Peterson: To have that many people unemployed, they are looking for any opportunity to other states, but hoping eventually they will come back home. So we want to make this so attractive that when they move here, it's not temporary, but they'll stay here.

Senator Krauter: The concept of recruiting is a challenging one, but when I look at a specific sector of the economy, and the needs that level and the skill sets that are there. I think there is some opportunity. But I want to get back to the question Senator Fischer asked, if you adjust the salary and benefits, what will workers do with that money?

Shelly Peterson: They pay their bills. They maybe go on a family vacation. They buy a car that's not broken down. These are the people that spend that money.

Shelli handed out testimony from:

Kurt Stoner, Administrator, Bethel Lutheran Home, Williston, ND

Written attached testimony # 57.

Jane Strommen, Director, Community Care

Testified in favor of HB 1012. Written attached testimony # 58.

(102:14)

Arnold Thomas, President, North Dakota Healthcare Association

Testified in favor of HB 1012. Written attached testimony # 59 -also presented testimony from:

Bruce Levi, Executive Director, North Dakota Medical Association

Written attached testimony # 60.

Senator Krauter: When the rebasing study was completed, do you know what the recommendation from the study was?

Arnold Thomas: The charge for the study to the research group was directed to 100 % of cost. The recommendation that was brought to the legislature after it went through the development process was 26% which would raise the reimbursement to 64% of cost. I'll try that again. The study was directed to 100% of cost to provide medical service for the Medicaid population. The number from that study was forwarded to OMB. The bill that was introduced to you was part of the governor's recommendation to recommend that doctors be reimbursed at 64% of their cost based on that study. That amount of money in the general fund was approximately $4.9 M which the governor included in his recommendation. They identified the amount and in the testimony, if you're interested in how much additional general funds would be needed to move Medicaid from 64% to 100% of physician cost, that amount of money is also in there.

Senator Mathern: I don't believe that study was to fund at 64%.

Arnold Thomas: No, it did not. The study was not to recommend. The study was to identify a number. The recommendation that was brought forward to you was a budget recommendation. The hospitals tell us what the costs are relative to what the current payment schedule, we did not ask the consultants to give a recommendation. We wanted to make sure we had a defined number. The recommendation that's before you came through the budget development process.

Senator Kilzer: This is more of a comment, but it seems kind of strange that we did receive the actual costs of various providers, including the hospitals, and yet when we get the executive recommendations, they are all over the place including the dental. The dental was by percentage of billed charges which is ancient. Then we have the hospitals coming in at

100% of rebase. To me it doesn't make sense. In my own mind, I'm trying to think, should we try to bring everybody up to 100% - ambulance drivers, optometrists, or should we do like the House has done or even be a little bit more harsh. I think those are the alternatives that we have. They're going to take a little bit more study and a little bit more action, but I really can't make much sense out of what is being presented to us in either the House or executive conclusions.

Arnold Thomas: When we came to you in last session, we made the case which you accepted and which you funded – that mainly there was a discrepancy between the cost of rendering service and what Medicaid was paying for those services. We made the case, as did others that a study could identify what the gap was between what cost abilitive care versus what we were paid would be of value to you as you went through the appropriations cycle and subsequent sessions of the legislature. You funded that request and outside consultants were hired. They were not the same consultants for each provider group. There are some provider groups that have easier time in laying out their cost information than other provider groups and I believe a previous testifier here representing chiropractic association referenced some of those interactions that were required in order to have that aspect of the study done for them. The manner in which bill came in from the governor's recommendation was not 100% for all of the study groups relative to the gap difference between payment and cost. That is a decision that the private sector did not make nor were they privy to the manner in which the criteria were applied that brought the bill from the House too. And I agree, it does appear rather helter skelter or random. But the numbers you have before you are a product of what you funded in the last biennium to give you a number that you could feel comfortable with by an external source. These methodologies map suspect and these results are not tinged by any manner other than the sciencing in which they were produced. It will give you an estimate of how the

gap is between what you currently pay as a state by policy versus what it is to cost to render that service regardless of the provider group that's concerned.

V. Chair Grindberg: How do we determine cost again? Is that an approval process with the provider submitting their costs and it's approved by the state to achieve that level of certainty that these are legitimate costs? Also, with other states, are we apples and apples as to how costs are defined?

Arnold Thomas: Yes, we are apples to apples. That's why we went with an outside firm. This firm has done these kinds of studies across the country. In terms of whether the documents that are submitted, I can only speak for hospitals. The hospitals submit annually to the federal government or audited financial statements of their income & expenses. Those documents were used in terms of analysis by this outside firm to determine our costs just like they determine our costs for Medicare in terms of what's paid us. And then link that to what the current fee schedule is that is used by the State of North Dakota. The information that is submitted is objective in terms of what we use to define our costs. It's not what we're paid however.

V. Chair Grindberg: Does that presume then a certain rate of reimbursement? That audited financial statement being submitted, does that presume then that there is a gap in revenue because of shortage of state support for reimbursement to get your true calculation?

Arnold Thomas: What that would say is that if it costs me a dollar to render that service and I'm paid $.70 by the state of North Dakota for having rendered that service, there's a $.30 gap.

V. Chair Grindberg: And that shows up on audited financial statements?

Arnold Thomas: And that is where we came up with the recommendation on the rebasing and that translated into how much general funds would be needed to pay hospitals 100% cost and if I'm not mistaken, the governor's budget was $8.

V. Chair Grindberg: And so that information, that gap, is reported on certified financial audits.

Arnold Thomas: Yes. It's the only way that information can stand up to any kind of scrutiny. It's the same information that we submit to all payers.

Senator Krauter: This is a really convoluted issue that I think OMB needs to give us some rationale why some rebased on 100%, some are rebased at 25% and some that rebased at a fee schedule of a minimum average of every bill charged. There is so much mishmash in here. We'd like to think that after we fought this from last session and we agreed to go ahead and do this study, that we'd come out with something that calms the water and this is not going to calm the water. This is going to be rougher water than we had before.

Cathy Schmidt, Director, Valley View Heights Assisted Living, Bismarck, ND

Testified in favor of HB 1012. Written attached testimony # 61.

Many run out of money personally and have to go from Assisted Living to nursing homes because its Medicaid funded.

Joe Sitchie, ND Dental Association

Testified in favor of HB 1012. No written testimony.

Handed out additional information:

Dennis Sommers, Dentist, President, ND Dental Association

Written attached testimony # 62.

Royce Schultze, Director, Dakota Centers for Independent Living

Testified in favor of HB 1012. Written attached testimony # 63.

Tom Alexander, Project Director, ND Medicaid Infrastructure Grant with the ND Center for Person with Disabilities at Minot State University

Testified in favor of HB 1012. Written attached testimony # 64 and attached #64-A

Peer Support services Initiative

Charmaine Yvette Boehler, Bismarck resident with disabilities.

Testified in favor of HB 1012. Written attached testimony # 65.

Tonia Johnston, Dakota Center for Independent Living

Testified in favor of HB 1012. Written attached testimony # 66.

Karen Larson, Private Citizen

Testified in favor of HB 1012. No written testimony.

Her mother has to leave independent living and go into nursing home and on Medicaid.

Sheree Spear, Grant Manager, Cass County Justice & Mental Health Collaboration Project

Testified in favor of HB 1012. Written attached testimony # 67.

Patricia Patron, Executive Director, Family Health Care Center

Written attached testimony # 68.

Leontine Gabel, Utilized services of Quality Service Provider.

Written attached testimony # 69.

Randy Solem, Chairman, Mental Health Planning Council, Department of Human Services

Written attached testimony # 70.

Nancy Kopp, North Dakota Optometric Association

Written attached testimony # 71.

Chairman Holmberg closed the hearing on HB 1012.

2009 SENATE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012 subcommittee

Senate Appropriations Committee

☐ Check here for Conference Committee

Hearing Date: March 11, 2009

Recorder Job Number: 10730 (3:44)

Committee Clerk Signature Rose Laning

Minutes:

Senator Fischer called the subcommittee hearing to order on HB 1012.

Subcommittee members **Senator Fischer, Senator Kilzer, Senator Mathern, Senator Warner** were present and **Senator Krebsbach** entered later.

Senator Fischer informed the committee members that if they need other documents from the department, we should give them a list. There will be more information coming on the funding from the prior biennium budget and executive recommendations, House adjustments and into the Senate all into one document.

Brenda Weisz, CFO, Department of Human Services presented:

1) Percentage increase by major areas of the DHS budget since the 2001-2003 biennium.
2) Inflationary increases granted to provider groups since 1997.
3) Write-offs for the Department for the fiscal year ended June 30, 2008.
4) Status of the MMIS project.
5) Department of Human Services OARs. (Optional Adjustment Request)
6) DHS Comparison of Current 2007-2009 Budget to the 2009-2011 Budget to the Senate.

See attached 1-6.

Senator Fischer reminded them of the red covered booklet that was an Analysis of Changes to the Governor's Budget. HB 1012 starts on page 21 and has the executive budget, the House changes and the House version.

Senator Kilzer said that it doesn't have the present biennium in it.

Senator Fischer: The new one does.

Senator Kilzer said that we have to be careful because we have two red folders. He would also appreciate the two documents that you just showed; the OARs (Optional Adjustment Request) and the summary of the present biennium.

Alex C. Schweitzer, Superintendent, DHS presented:

1. The Average Length of Stay at the ND State Hospital (Fiscal 2008)
2. The Occupancy levels compared to Baseline nursing staffing levels at the State Hospital for calendar years 2006, 2007,and 2008.

See attachments 7 & 8.

TaraLea Muhlhauser, Director-CFS, ND Department of Human Services presented:

1. Foster Care data requested during the Children and Family Services budget presentation. See attached 9.

Senator Mathern reviewed all of the requests that have come to the committee asking for amendments on HB 1012. He presented a partial list of 53 items.

1. Amendment requests by person.
2. List of proposed changes to engrossed HB 1012.

See attachments 10 & 11.

Senator Mathern would like to restore the Governor's budget.

Senator Fischer: Because of several situations that are arising out of this session, is that we go back to the Governor's budget, amend it back to there, and send it back to the House. Otherwise we are going to be discussing amendments and there are some things that we'd like to do also. There may be some amendments or other adjustments that will be made before we send it back. This discussion just started this morning, is that we're going to be discussing all these things with them anyway. The stimulus package is an unknown, so that could come into play piece by piece. So rather than have two discussions over where to fund everything in this budget, and at what level, and what to put back that the House took out, what to take out that the House put in (I think that would be a short meeting). Rather than go through all of that, we'd just put it back there and then go over and have the discussion with them. We've got all the notes of what they took out and then we can take it back out if we feel it's justified or our argument to leave it or the opposite. We've all got some things that we'd like to look at. We'll set up incremental meetings next week, maybe 4 or 5. I want to finish it up so we can move it sometime late next week and put things in the order that we want.

Senator Kilzer: I'd like to have OMB listening because my own one out of five votes comes close to the executive budget. Particularly since we're going to be addressing the stimulus package, in order to make it most effective and to have money the next biennium beyond the one we're talking about. Staying close to the executive budget for the present time and then dealing with the stimulus package will be the best way to approach this. Most of this will occur in the conference committee. There is one question mark very much in my mind and that is the provider reimbursement. It seems to be all over the map so I would like from OMB the explanation, if there is one, of how this came to be, how the rebasing was done and I'd like to see that before I go too much further.

Lori Laschkewitsch, Analyst, OMB: Maggie Anderson would probably be able to give the best explanation as to why the different provider groups have their rebasing calculated in a different way. Our understanding was that a lot of it was based on the way the cost information was provided through the survey. I think the dentists were one of those things brought up the other day. Why that was based on their actual billable charges as opposed to costs. Again that has to do with the cost data that was provided to the committee.

Senator Kilzer asked to see what is available. If it isn't available and is just kind of random, I will put together, with any sources I can find, will be of the quality that I have material available. I do want to work along those lines.

Lori Laschkewitsch: I believe there is very documented information as to how we put this together and it was not in a random manner. There is actual documented substantiated information that explains why and how all of those rebasing calculations were done the way they were for each particular group.

Senator Kilzer: I hope to see them.

Brenda Weisz, Chief Financial Officer, Department of Human Services

If you look at each provider group, the increase from the current biennium to what you saw in the governor's budget, percentage-wise varied quite a bit. That is what makes it look haphazard. When we started last legislative session, the predominant conversation circled around hospitals. The hospitals themselves have a cost report that is standard. They complete that every year. They're required to complete a cost report. As we moved through amendments as they went through the session, other provider groups were added to the rebasing study. Many of the providers that we pay under Medicaid, many of them aren't based on a cost basis at all. They are based on a fee schedule. We took a situation where there was no cost data available and not cost report generated and turned it into a situation where they

had a cost report when no such mechanism existed. As we worked with the consultant that was hired through the money that was provided through the budget, they had to work with these groups to come up with what would be a documented way to pull cost data together when you've never pulled cost data together before. Except for the hospitals, they've had a very standard cost reporting mechanism. Because of that, most of these providers are based on a fee schedule or something different than cost. It was creating a whole another methodology for them to be reimbursed. That's why the costs are all over the board as far as percentage increases. It took what used to be a B schedule and they were paid an X amount based on the fee schedule that was inflated, and instead said we'll pay you a different way. That's why the changes were so different. The cost reports all came in to show providing, except dentists, because they did not have a reporting mechanism to go to cost. And the process to pull that together wasn't able to be accomplished in such a short time frame. There was no cost rebasing report for dentists. Instead, they were part of the study, they were part of the intent language. We looked at another way in which to change their rates to compensate them at a higher level. That's why the percentage of bill charged was used as an average. That's their normal mechanism of pay – as a percentage of bill charges, an average. So that's how the dentists were done. We looked at different scenarios. Last session you raised how the children's services were reimbursed or paid at 75% of average bill charges. The governor's budget recommended that for essentially all services under dental average bill charges. The rest of the report, the vendors came in and they were able to work with those groups and develop a cost report where one never existed before. Then what was the total cost to move them to a cost basis rather than a fee schedule. Those were the OARs that were brought forth is to bring them to the level of cost based. The hospitals in that group were the

only ones who truly had a cost report. So that's where it came from and how everything was developed, so it changed their methodology in which they were currently paid for Medicaid.

Senator Kilzer: Is that how you came up with your rebasing then?

Brenda Weisz: Yes, that's how the rebasing came up. It was taking what used to be a fee schedule and say Now we're basing on your cost.

Senator Kilzer: So when you talk about 100%, you're talking about the actual cost.

Brenda Weisz: Yes.

Senator Kilzer: The second part of the reimbursement is the different percentages. Did your consultant advise the schedules that you have?

Brenda Weisz: Are you talking about the current schedule we have in Medicaid?

Senator Kilzer: Not the current one, but the proposed one. Some providers you had at 25%, some you had at 100%.

Brenda Weisz: No, the consultants only provided to us what would be the dollars needed to move this provider to a cost at reimbursement. When we submitted those optional adjustments in our OARs, OMB and the governor's office reviewed that and looked at the dollar value of the total cost.

Senator Kilzer: Does the 25% figure or the 100% figure, does that come from the governor's office?

Brenda Weisz: Yes, they did decide. They looked at all of what we requested. They looked at the information of total cost. They also looked at various scenarios. The governor's office put everything in his budget at 100% of the cost report that was generated, except for physicians, they put that in at 25% and then ambulance. With the ambulance providers, that was funded at a percentage of Medicare reimbursement. The reason for that was the

methodology and the numerous changes that would be required in order to pay them based on cost. It was a methodology they were familiar with.

Senator Kilzer: And you said the governor's office made this decision?

Brenda Weisz: In consultation with us as to what it would cost. What does it take to go to 25%?

Senator Kilzer: I don't think ambulances are any easier to figure out percentages and actual costs than any other provider, but yet you did that?

Brenda Weisz: We did not parade them at a percentage of cost. We changed their fee schedule to be a percentage of Medicare rather than accept the cost report.

Senator Kilzer: Why didn't you do that for other providers? Because Medicare does have an RVRVS system, you know. They've had it for 25 years.

Brenda Weisz: I think in looking at the budget for DHS and then also the governor and OMB having to look at the priorities for the entire state. When you look at the total value of what it would cost out of pocket to move all of them to 100%. Then also taking a look at all the other priorities.

Senator Kilzer: I would hope you wouldn't do that, because if you have a large group that you don't want to pay 100% to, and then you have a small group that your total outlay isn't a lot because it's a small group. That parallels a situation of you guys, what the House did to you, instead of 5 % like the treasurer's office gets for their increases, you guys, because there's 2200 of you, what did the House propose for you, a 2 % raise?

Brenda Weisz: We did turn in a 100% cost base report for all of them.

Senator Kilzer: I'm very skiddish about coming to conclusions that way based upon the size or what the total outlay may be. I think you've got to keep a procedure.

Brenda Weisz: Just remember there wasn't a cost report generated so there was no way to do an OAR at cost.

Senator Warner: I'd like to see some figures from the department indicating what the cost would be to bring them up the Medicare level of reimbursement. I'm not entirely comfortable with the way it was done either.

Senator Mathern: I also think it's a matter of money how much we are willing to spend. Basically there is this elephant in the room – the federal stimulus package. I am willing to work on an amendment that basically restores the governor's budget, address the House issues, and then send it back. In conference committee, as more and more information becomes available, we'll be better able to decide how much more we want to go.

Senator Fischer: I support **Senator Warner** and **Senator Kilzer** because if we do some amending here such as Senator Kilzer is talking about and others that may want to add amendment that aren't in the governor's budget, if we put them back here to the level that we want them, we got more leverage in conference.

Senator Mathern: I think you're correct and many of those things we will address when we actually see what the bill will look like. If we have the governor's budget, and the House additions, we're going to address some of these things, but not all of them.

Senator Fischer: If there is anything that anyone wants, today is the day to ask them for it so we can proceed with not putting them in, putting them in, whatever we feel is right, and then bring it back to the governor's budget, take it over there and argue with them

Senator Warner: I'd like to see information on DD, CNAs and QSPs. I'd like to see some sort of a baseline to see what they are actually getting paid and if there are inequities within the spectrum. A few years ago, there was discussion that there were considerable discrepancies within the QSPs depending on when they assigned contracts. I don't know if

that was resolved or not, but I'd at least like to have someone talk me through that process. And then if we could see some cost analysis of the $1raise and the $2 raise.

Senator Krebsbach: I think I mentioned yesterday what I wanted and that would have been from the council. We had a lot of additional requests over and above what was in the initial governor's budget. I see the information is here. Senator Mathern has already gotten it.

Senator Mathern: I'll continue working on it. That's just 54 of them. There's more and I'll have them done by tonight.

Senator Warner: I'd like to address the kids aging out of foster care system. Seems like we have a couple of paradigms working through the session; we have the creation of halfway houses, if I understand right, is in the governor's original budget which I think the House did not fund. And then we have another initiative which I think is in policy right now to create a more wrap around process or independent living to be supported as well. We can discuss that as we go forward which of the two paradigms we like best. I really want to see some help for these kids. I think we have much better outcomes by doing some relatively minor things. I would hope that we can have some discussion on which of the two paradigms make more sense.

Brenda Weisz: I think it's HB 1140 is where the policy is. That one is expecting the department to develop rules. Initially it had an appropriation of $700,000 and then it was amended out.

Senator Warner: I'd like to ask to deal with the policy bill, but I suppose if there is no appropriation, we'll never see the policy bill.

Senator Mathern: I think it might still come here. But if we move this way about the executive budget, the money would be there. Having the money is probably more important than having

the correct wording in the policy. We can have the correct wording, but if the department doesn't have any money, it's just a smiley face.

Senator Fischer: Maybe we should get that bill over here because it won't be here. There's no money in it. Get a copy of it so we can look at it.

Senator Fischer: One request I have is Continuous eligibility. Whatever information you have on that, how many counties are cooperating? How many counties are looking for base to base to pump up their budget? The other thing, I'd like to get to the bottom and see why SCHIPS is acting the way it is. The decline in children's health insurance happened within one year after the last Back to School. And Back to School has always shown an increase. I'd like to get some information on that.

Senator Fischer adjourned the hearing.

The subcommittee will meet again on Monday.

2009 SENATE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012 subcommittee

Senate Appropriations Committee

☐ Check here for Conference Committee

Hearing Date: March 19, 2009

Recorder Job Number: 11245

Committee Clerk Signature Rose Laning

Minutes:

Senator Fischer called the subcommittee hearing to order on HB 1012. Rather than go thru page by page, we'll let committee members get the information they need and ask the question they have.

Subcommittee members: **Senator Fischer, Senator Kilzer, Senator Krebsbach, Senator Warner, Senator Mathern** were all present.

Those in attendance from Human Services: Brenda Weisz, Maggie Anderson and JoAnne Hoesel and Lori Laschkewitsch from OMB.

Senator Mathern: Would like to encourage us to make some decision on how much money from the stimulus package will be used for the bill. The information we got earlier this week was helpful in terms of understanding what is available. I would encourage the committee to go through that list and provide some direction as to what we would like to put in this bill from the Federal Stimulus package.

Senator Fischer The stimulus package and how it relates to the following biennium and what we can do and still maintain funding at hold even budget for the following biennium. I asked Brenda if she could give us some insight into it.

Senator Warner had asked for information on Direct Care providers and DD(Developmentally Disabled).

Brenda Weisz handed out two sheets of information:

Wage Comparison – (Benefits are not included) 2009-2011 Biennium – see attached # 1

DD (Developmental Disabilities), Nursing Home, Basic Care and QSP(Quality Service Providers) Salary Scenarios – see attached # 2

Question on how many agencies and individuals enrolled QSP

Maggie Anderson: 139 agencies currently enrolled. 1,579 individuals enrolled as of January 2009.

Discusses salaries

Senator Mathern Is the Department looking at equalizing?

Maggie they are becoming more equal but we still leave that up to the policy makers.

Senator Fischer What is the percentage of nursing home beds being utilized or occupied? Compared to two years ago, are we seeing more usage of QSPs and are there any trends you can relate.

Maggie: The number of clients receiving services is up. We haven't run any data but we can do that. We know that people are accessing those services.

Maggie: If it's easier Attachments A & B of her testimony we show you the licensed beds under the Medicaid occupied beds. It has been fairly consistent and it is trending down a little. The percentage of Medicaid occupied bed has been around 54%. Total occupied beds have been around 5900 and as of August it was down around 5800.

Senator Warner: Is the rate we pay DD providers is that uniform across the system or is there some differential built in for medical fragile?

Maggie; There is a differential for medical fragile and behaviorally challenged.

Senator Warner Can you identify geographically where those clients are?

37% are in the Anne Carlson Center.

Brenda There is money in the governor's budget for at home care also.

Senator Warner Do we compensate due to severity of conditions?

Brenda: They set the money accordingly.

Senator Fischer Within agency is there different rate of compensation based on severity.

Brenda: Currently we don't pay based on the severity of each individual one of the five different levels.

Joanne HB 1556 would address that very thing it is a study on changing reimbursement process to an acuity level for medically fragile and behaviorally challenged.

Senator Warner Differential between agency QSPs and individuals QSP is large. Is there a way of addressing just the individuals and bring them up to a closer level. They don't get any health insurance.

Brenda: That is why the agency QSP number was higher. This was looked at last session.

Senator Warner Are they eligible for Medicaid?. A group that's likely underinsured.

Brenda They have to be eligible and follow into one of the criteria's.

1.5 eligible for FMAP

Discussed the governor's budget and stimulus money that is available (62:30)

Senator Fischer Calculate FMAP 2008 and how much of a reduction.

Brenda: This FMAP was a $10 M impact. ND is still doing better than other states so we believe FMAP will drop, (**Federal Medical Assistance Percentage).**

Senator Warner Were the House changes on utilization based on any projections?

Brenda: On the house side, we looked at projections on how we use to build a budget. They looked at utilization and they thought that some of the nursing home programs were high. SPED was not high. They thought DD, MMIS, were high. We have a hard time getting utilization numbers for physicians.

Senator Fischer You're painting a rosy picture then.

Brenda: Looking at the numbers and the executive budget, it's getting better.

Senator Fischer You can't tell what will happen in the nation over the next few years.

Brenda In North Dakota we seem to ride the storm a little better. Our dips aren't as low as the others but our highs aren't as higher either. Food stamp increased but that is a federal program. We will probably see more people coming forward for food stamps.

Senator Fischer: Staying with Medicaid... Does the department project how many more people will be utilizing nursing homes.

Brenda said that they do look forward and try to project the needs. We don't have a crystal ball.

Senator Warner There has been concern about Job Service taking on ongoing obligations. Do you see any areas in Human Services where we might be taking on an ongoing obligation tied to the stimulus package?

Brenda: Not with our programs. Our sustainability is what this budget is decided to be. SNAP is inflated every October. We have not seen anything similar to that program.

Senator Kilzer: This weekend I spent time looking at medical service providers: Hospital inpatient and outpatient; physicians service; chiropractic services; ambulance service; optometric, I was attempting to find the real cost bases of the services that those providers give. Came up with cost basing for rebasing up to the year 2010. However, it looks like in the budget the request is put in at 100%. That is not what came out of the executive budget. If you make an honest attempt to do rebasing you should follow the results rather than picking winners and losers. I would request that we be given a list of what the 100% rebasing would be and how much it would cost. If the total comes out much higher than what was in the executive budget we need to lower the total let's make the pain kind of equal across the board.

Would someone who knows how to deal with proportions give us the grand total of costs with 100% rebasing and the amount that matches the executive budget in the end?

Brenda: We have colored sheet that shows rebasing 100% for everybody. We also looked at 25% and what would be 90% and 75% for all of them

Senator Kilzer an honest effort was made to rebase equally and I think we should follow the requested study.

Brenda: We will do that.

Senator Mathern: Haven't we been moving towards the ideal, aren't we getting closer to a percentage of costs?

Brenda: In some regard we would be but in some regards that was the purpose of the section that was added to the appropriation bill last time. We wanted to take a look at some increases and inequity. Rates aren't necessarily rebased.

Senator Fischer Is there anything else you want to talk about on the stimulus package?
I would like to talk about Children's health insurance.

Brenda Do you want Maggie to walk through S-CHIP?

Handed out S-CHIP Scenarios – see attached #3.

Senator Fischer In August of 08, there was a drop in children's health insurance and no one seems to know why. It was one year after the last back to School effort or it was also one year after a lot of kids enrolled and you re-enroll once a year. If someone in family needs healthcare and has no insurance, they fall under Medicaid. S-CHIP took 200% net hit to 160%. We were at 140 and last session we changed it to 150. The governor put in 200% and House put it back to 160%.

Brenda: The growth we thought would occur when we moved from 140 to 150 didn't occur. Brenda explained what happened. (35:00)

Maggie negotiated a contract with the blues and a premium number in October. We built a budget on $243.93 and that is what the Blues gave us back in August. The Dept. came in with a final premium of $228.71. Part of the savings would be based on the premium savings.

Senator Warner is the blues number actual cost plus administration?

Maggie it is proprietary.

Senator Kilzer: This is a competitive bidding process and it is proprietary. Have there been any other bids?

Brenda IT would cost the state more if we did the bidding every two years. The Blues have been the only bidders.

Senator Fischer Do you think if the numbers would be greater that someone else would bid on it.

Lori: I don't know if they get more bidders than the Blues but others would have difficult bidding because the Blues have the provider groups.

Brenda: What if there's not enough money put in. Some of the options are: We could fund S-Chip budget at the 200% that the governor recommended and stay with the House numbers just in case the economy changes or numbers come forward. Leave the numbers the same and change the level? more options (29:10)

(27:59)Senator Mathern Wouldn't another contingency be keeping the money the same and permitting the eligibility level to move up to use those recourses? If we use the governor's. budget at 200% and if costs are such that we have more resources we could move up to the Federal level without any more appropriations. Does that work?

Brenda Every time you have a change in Medicaid level, you have to have policy . We want a caseload and cost of implementing that.

Senator Mathern Is the scenario in the executive budget already approved in the federal government. If we're going to do it anyway, why not do it at same time. Just make the request once.

Brenda: That will require an approval from the federal government. I don't think the federal government will let you have a floating level.

Senator Mathern Have we ever requested it and they denied it.

Maggie: We haven't requested that specifically. We are currently at net income but when you go to a gross income test certain children would fall off the program. So we have had those conversations and sent some draft language to CMS and they said absolutely not. You have to pick one eligibility level and any changes to that would require statement changes.

Senator Fischer explained what they did the last biennium . And there was some discussion on another amendment that may come this biennium.

Maggie Anderson: I am going to hand out information that you have requested that will be the background for the Medicaid and SCHIP for children.

Handed out

Income Eligibility Levels for Children's Separate SCHIP programs by Annual Incomes and as a Percent of Federal Poverty Level, 2009 – see attached # 4.

Income Eligibility Levels for Children's Regular Medicaid and Children's SCHIP-Funded Medicaid Expansions by Annual Incomes and as a Percent of Federal Poverty Level (FPL), 2009 – see attached # 5.

Health Steps Outreach Statistics – see attached # 6.

Continuous Eligibility for Medicaid – see attached # 7.

Senator Kilzer: Did you say MN included childless adults?

Maggie: That is correct. It is a very small percent and they have to faze some of those programs out.

Senator Mathern: MN has an online eligibility. Does ND have anything like that?

Maggie: We don't currently have anything like that available but the forms are out there. That is something we are hoping to include in the future. It will have to be state specific.

Senator Mathern asked a question on MN and how they cover. Some discussion followed. Family doesn't really know where money comes from. State takes advantage of funding.

Maggie: MN does have a one stop application. It is similar to ours, where we test for other programs.

Maggie played a piece on her computer as an outreach for the SCHIP program and explained the Healthy Steps program. Attachment #6 Many times we follow up with a form after talking with them and send information. Also send information to schools, clinics. We did have television and radio ads totaling about $45,000 that were aired during the months of August and September. We also used billboards.

Senator Warner Do you have access to data base at DPI for free and reduced lunch.

Maggie We don't because of confidentiality. HB 1478 has amendment for legislative intent to improve outreach efforts.

Discussed eligibility.

Senator Fischer adjourned.

2009 SENATE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012 subcommittee

Senate Appropriations Committee

☐ Check here for Conference Committee

Hearing Date: March 24, 2009

Recorder Job Number: 11508

Committee Clerk Signature Rose Laning

Minutes:

Senator Fischer called the subcommittee hearing to order on HB 1012. **Senator Fischer**, **Senator Kilzer, Senator Krebsbach, Senator Warner**, and **Senator Mathern** were all present.

Brenda Weisz handed out a sheet on wage comparisons – see **attached # 1.**

Brenda Weisz also handed out a sheet addressing **Senator Warner's** concerns on the wages of QSPs and also a sheet on rebasing which explained the rebasing costs at varying percentages – see **attached # 2 and # 3.**

Senator Mathern: I'm wondering if we could take the data we have today and make some decisions on them. I'm hoping we could go thru the bills that affect this budget. The first item that Brenda brought to our attention, the different ways of these different groups. I would recommend we send a bill over to the House giving every group here a $2 increase, and that we would take away the requirement about what we spent on that percent of people under the 80%. Then we'd put some wording in there that would direct the Department of Human Services in the interim to consider the ramifications in the next budget, but making all five of these groups so in the future they'd look at one salary for these five different groups.

Senator Fischer: You mean the providers?

Senator Mathern: Right. These providers that are listed on her sheet here, we can rationalize how to equalize all of them because there are a lot of variables that went into this. But I think we could move ahead with the amount of raise that we recommend to everyone and the wording that we want the department to work on during the interim so there would be someway of making sure that in future budgets we make it the same for all four of these.

Senator Fischer: I think we'll have that discussion; however, the thing is to get to the budget itself. Why don't we take divisions and start working through them, whether we start with this one or not is really immaterial. I like to get through the budget and then deal with considerations. **Senator Kilzer** has done some work on the provider and analysis. So until he's done, I'd like to wait on that because he's gotten all the studies from the department so there will be more input that we'll have to consider.

Senator Mathern handed out Listing of Proposed Changes to Engrossed House Bill No. 1012 – see attached # 4).

Discussion then followed going over Senator Mathern's list on children' health insurance and eligibility, FTEs and equity, dental costs and rebasing, and stimulus money.

There was no action taken and the subcommittee will meet again later.

2009 SENATE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012 subcommittee

Senate Appropriations Committee

☐ Check here for Conference Committee

Hearing Date: March 25, 2009

Recorder Job Number: 11531

Committee Clerk Signature Rose Laning

Minutes:

Senator Fischer: Called the subcommittee hearing to order on HB 1012.

Subcommittee members **Senator Fischer, Senator Kilzer**, **Senator Krebsbach, Senator Mathern** and **Senator Warner** were all present.

Senator Kilzer: Went over attachment # 3 on rebasing from the 3-24-09 meeting. If you averaged everything out across the board, it would be about 65%.

Senator Mathern: I am wondering if it might be a good idea to ask legislative council to prepare an amendment for us to consider that would put all providers to 100% - for our consideration and then going over to the House. I would encourage us to consider an amendment.

Senator Kilzer: That would be one of our options. It would be above the executive budget recommendation. To do that it would be eighty million eight hundred and thirty two thousand four hundred and sixty four and that is well above the executive budget. If we're going to do that, I think we need to think about it awhile.

Senator Mathern: I think now is the time to consider the window of opportunity at looking at the rebasing process across the board. We're having things happening in this budget cycle that probably won't be happening in any other budget cycle.

Senator Warner: If it is policy that we need to bring these people up to par, in order to promote public policy and provide public access this is a time to do it. We need to provide payment for providers at par whatever that costs are.

Senator Mathern: I have some amendments for this issue. Handed out Amendment number 99819: Listing of Proposed Changes to Engrossed House Bill No.1012 - see attachment: # 1. I feel that we need to be prudent about the resources that are available to us. I would like to have us to consider this list of proposed changes. We need to take each and every item regarding the stimulus package and amend that into 1012.

Senator Kilzer: Are some or all of these onetime spending or is there a separation someplace that lists the one time spending items?

Senator Mathern: Most of these are continuing programs. It's adding to the programs we have in place. We could identify these as onetime spending.

Senator Fischer: My concern has always been the first year of the following biennium or the following biennium because these supplemental funds if used improperly will get us into trouble. We don't want to have to cut the budget later to continue in the following biennium.

Senator Mathern: I understand but I would suggest in those programs where there is a concern we make it part of the bill. I think we can identify those things that we believe are one time funding.

Senator Kilzer: The first item is FMAP and there is nothing like FMAP in education.

Sheila Peterson, Fiscal Analyst, and OMB: I just wanted to point out that further direction that we've received recently from federal Health and Human Services Department is that any freed up general fund dollars because of the enhanced FMAP we will have to on a quarterly basis, report where those dollars were spent. We are still trying to sort through all of the details on that. We're hoping that it could be used to fund the 7 and 7percent inflation for the

providers, the rebasing, and those types of things that were in the Governor's recommended budget. As we understand it, it's not even limited to Human Services it could be any general government spending but it will have to be reported, this and the next biennium as well. We'll have to work through that.

Senator Fischer: This is the piece that has confused me the most. Where can we put it and how do we supplant you don't have a pat answer for that.

Sheila Peterson, Fiscal Analyst, and OMB: The guidance is very limited, it recognized that every state will have freed up general fund dollars because of the 6.2 enhanced FMAP. There is an expectation that on a quarterly basis states must report where they spent that freed up money.

Senator Fischer: So if we report that we've used the freed up dollars from FMAP for DOT and we report that can we be in trouble with the FEDS and they say you must send some of that money back.

Sheila Peterson: Right now it appears to be general fund money. They want to make sure we spend it and not saved it. At some point they want to know where we spend the freed up dollars. Before you leave on your 80th day, we have to know where the money is going.

Senator Mathern: The best strategy for the Senate is to include all dollars through the stimulus through HB 1012. Then as more details come and we go to conference, we may have more answers. To go into the conference committee, we should have as much information as possible.

Senator Fischer: We go into the conference committee with the bill the way we want it and not go in to negotiate it based on either inflated of short.

Senator Mathern: Handed out a Listing of Proposed Changes to Engrossed House Bill No. 1012 (#99798) – see attached #2.

Senator Fischer: Are these all OARs?

Senator Mathern: No.

Senator Fischer: Are they in the budget?

Senator Mathern: No they are not in the budget. Maybe everyone is I took them from the people who came to the podium. The original spreadsheet of 100 items is whittled down to this.

Brenda Weisz, Chief Financial Officer, and Department of Human Services: This would be the planning or starting phase.

Senator Mathern: It would be sad if we finish MMIS and then we start on this other project and find out that there are ways that they could be talking together that would be helpful to the staff. If we could find that out early, maybe we could still do something about that. It would be better now rather than a couple years down the road.

Senator Fischer: Where did the numbers come from?

Brenda: It was through a request that we start planning for 2010.

Senator Mathern: A lot of these needs really could be addressed. It could be that some of this could be part of the stimulus package; it doesn't have to be all.

Senator Fischer: OK we'll take it under consideration. Is there anything anyone wants to go over? We're adjourned till Monday. Thank you, Senator Mathern.

2009 SENATE STANDING COMMITTEE MINUTES

Bill/Resolution No. 1012 Human Services subcommittee

Senate Appropriations Committee

☐ Check here for Conference Committee

Hearing Date: 04-03-09

Recorder Job Number: 11733

Committee Clerk Signature

Minutes:

Senator Kilzer opened the subcommittee hearing on HB 1012. We need to get this bill out next week.

Senator Mathern explained his amendments dated 3/31/09 listing of proposed changes to engrossed bill 1012. He asked that the committee consider the proposal before they do the details. The proposal is that we adopt this package and in this package we accept the House additions to the Dept. of HS budget, that we restore most of the executive budget, that we incorporate the Federal Stimulus dollars, and that we add items that I believe there is support for in the full committee for this department. In summary of what I said should be a savings of 17 Million dollars of general funds from the executive budget. He further explained the amendments on where all this fit together.

Senator Kilzer what are the eligibility of enrollees.

Senator Mathern didn't have that information here. He believes they are talking about an increase of about 1000 children we are at 3 or 4000 at this point.

Senator Kilzer asked for those numbers from HS.

Brenda it is the green sheet handed out and the increase is 1158 children.

Senator Mathern: It gives us the BCBS data and we have learned that the premium will be $211 per child per month instead of $228. So that is a decrease from original quote.

Senator Warner is Chips reimbursed the same way.

Brenda we pay a premium and I am not sure how they pay out but they give us an updated premium.

Senator Kilzer as I recall the chips is put out on bid. The Blues have their own fee schedule.

Senator Mathern I requested a comparison of Medicaid rates between chips and BC and the payment is higher in chips in Medicaid. Gave an example where you could compare the exact same service and that too demonstrated that the reimbursement was higher? So I think the providers are reimbursed better under chips than under Medicaid.

Senator Kilzer there are no fee schedules lower than Medicaid?

Senator Mathern and the data supported that. He continued explaining his amendments.

Senator Kilzer are these all House cuts or are there some that you did not restore.

Senator Mathern my intent was to restore them all except minor ones. I did review all these items with leg. Council and the dept. to make sure they are correct. The second group of amendments relating to stimulus funds are on page 3, items #1 through 12. I believe all the stimulus money should be spent but I didn't believe that I would get that through the committee so I considered what the governor's office recommendations were to OMB and HS and added stimulus dollars here with what we would have paid for with general funds. (15.3) describing his proposed changes relating to federal fiscal stimulus funds.

Senator Kilzer tell us what option A and B are. Are they two different ways of using the money?

Senator Mathern yes there are different ways of using the stimulus money. There is no change in the program. We will use it as an enhancement to the existing program or use it so they can put some of the general funds aside for future years.

Senator Kilzer What is the difference in the A or B approach?

Senator Mathern the A approach gives the state of ND about 70 million to use at a future time and use stimulus money instead. The A approach uses stimulus fund to what we thought we would spend general fund for.

Senator Kilzer A is playing it close to the book.

Senator Mathern said he thinks it is taking a risk. The federal government may want us to spend it all. This is moving forward and hopefully there wouldn't be any problems.

That combination of items in that section including the adjustment to recognize the general fund turn back of 30 million dollars provides us in general fund dollars about 100 million. So essentially we have those dollars to work with that we didn't anticipate before.

Senator Kilzer: You are thinking of the 66 ½ million plus the 30 million.

Senator Mathern I imagine the 30mil would have been anticipated at one time, it is a moving target, the closer we get to the biennium the closer the amount will be.

Brenda this is tied to the economic stimulus package.

Senator Mathern because of that we have this extra turn back.

Senator Mathern two sets of amendments left on page 4, 16 items. He continued the explanation of other proposed funding enhancements in hopes of preventing family destruction.

Senator Kilzer Why didn't you include this item in your first series in the cuts made by the house?

Senator Mathern I asked leg. council it was my attempt to keep it all together in one place. If it is in the 1st part, there is money that I wasn't aware of. If I made a mistake we have another $400,000.

Roxanne It is a duplication we missed.

Senator Mathern Item #6 program contracted out to Lutheran Social service where mothers at risk are identified. In the testimony to us this actually reduces women that are turned in for abuse and neglect.

Senator Kilzer this was in another bill. Is that bill alive anywhere else?

Senator Mathern there was a bill called a family support act and I don't know if it is alive.

Roxanne it was defeated today in the House.

. 30.27)

Senator Mathern #7 money will go to disability providers. #8 is applying the same 2 dollar per hour increase in reimbursement to quality service providers. #9 supporting what the counties and the dept. needs to move forward toward the 5 eligibility computer programs.

Question for Brenda on the programs.

Brenda (33.24) we did have a OAR and we did propose that this time around. That is our next priority in the dept. and we will bring that forward again next session.

Senator Kilzer in regard to timing where are we at now.

Maggie Anderson Medical Services Division, MIAS roll out May 2010 that will require a round of training and we will begin that in Sept. of this year. Enrollment will happen in Nov. and about that time we finish with that training we will do a second round of training. She explained the MIAS system.

Senator Kilzer I assume you have your countdown to MIAS training. This is bigger than that?

Maggie we have a plan in place and people working in that ... 37.06

Senator Warner everyone has access.

Maggie it is web faced and we will encourage electronically filed claims.

Senator Mathern continued with item #10 providing money for aging services.

Item #11 address children and family services by the county social services staff.

Item 12 addresses long-term care by putting more money into assisted living and this is a way to keep people out of nursing home care.

Item 13 medical services, taking physician payment to 100% of cost. This would go beyond the executive's request and because the executive's request didn't have the 100%.

Item 14 medical services for pregnant women. We passed that bill out of here. It was defeated in the House so this is putting the money in. it was passed by the Senate.

Item 15 is the peer support program, more in the Northwest, with peer program supports people with mental illness.

Item 16 puts additional funding for guardianship services. All items #1 through #16 are above the funded part of the executive budget. They are all items we heard about in committee and I think they are important. I hope the subcommittee will agree that these are the items we can add to this budget.

Other proposed changes (42.31) page 5. This amendment would permit the providers to make that decision as to how that money is spent. But it would limit it from being available to administrators, contracted employees and the Director of nursing. That language was brought to me by Rep. Kreidt and he talked to Senator Fischer so I put it in here.

Senator Fischer joined the committee.

Senator Mathern continued on item 2 regarding leg. Council doing a study on the impact of veterans who are returning from the Iraq and Afghanistan wars and their families.

Item 3 was my attempt to address Senator Kilzer's concern on method of provider payment changes.

Item 4 was a 2.2 million dollar request on the part of the family health care center in Fargo. I didn't put any dollars in this because there was no hearing on this matter before the appropriation committee.

Senator Fischer this is to build a new building. He was told yes.

Senator Mathern if there is extra money. The amendment is intent not appropriation.

Senator Fischer what will happen to the buildings there. They are in the Cass county health department. They need every bit of that. The goal is that this be build down town, most of the people there are low income.

Senator Kilzer is this the old family practice place.

Senator Fischer it is the Fargo Cass Co health in the same building.

Senator Mathern said that this is a private clinic that serves people of low income and they have a relationship with Merit Care and they use common services and common equipment.

Maggie (can't hear)

Senator Fischer has to do with the residency. They provide services there.

Senator Mathern item 5 is a study on salaries and wages.

Item 6 relates to prior screening. Senator Fischer has an amendment to that.

Senator Fischer put on the agenda.

Senator Mathern #7 on reimbursement. #8 reporting to the budget section. This came to me from the ARC they wanted it in the HS bill. The goal was to make sure it would happen.

Item 9 the FMAP changed again. So we were anticipating the rate which means if we were to fund that we would have to put in 60.69%. Small discussion on this. (19:00)

Senator Fischer they are not in favor of it going down. The average income in the state is going up.

Brenda we got the preliminary number in April and they will finalize it in the Sept.

Senator Mathern just as a recap, this entire package I can summarize this way. Reinstate the House cuts to executive budget, retain the House enhancements, and add the stimulus money, while keeping out 70 million dollars, adding these new items. Adding the intent items

and all those things together translate into a savings of the executive budget of 17million of the general fund. We can do this whole package and tell the House the budget is 17 million less than the governor recommended.

Senator Fischer you are talking about using the stimulus money. You are taking 100 million of stimulus money.

Senator Mathern yes, to the degree OMB and I believe the dept. of HS believes stimulus money needs to be spent or lose it. So that general fund dollars aren't used. That would be the summary of this plan. I heard some other things today, we found another $400,000 that was duplicated and I also recall a conversation with Mr. Schweitzer at the state hospital wherein item 23, 5 staff instead of 6 that is another savings we can place. This is going to be a moving target as we learn more about the stimulus package and the needs in our state. If we adopt this we will be in a good position to negotiate with the House. Our colleagues on the appropriation committee would be delighted if they found we took off 17 million in general funds.

Senator Mathern you will note that these amendments are not in the final style, we hoped that they would be easier to understand.

Senator Fischer I appreciate that

Senator Warner I think this has been quite an adjustment.

Senator Fischer there are almost as many red envelopes on my desk as yours.

We will look at all of these on Monday. We need to start the process.

Senator Mathern we found a few mistakes here, I would like to take out that staff person item 23, at state hospital. Ask leg council how much that saves.

Roxanne $83,508 savings.

Senator Mathern I would have one other suggestion on items on 2nd page, # 2, 3, and 5, there is an option to use stimulus money or increase the program.

Senator Fischer OMB is not ready to answer questions on the stimulus money.

Lori we are hoping to have that tied down soon.

Senator Fischer will they be ready the first of the week?

Lori maybe.

Senator Mathern I took these numbers by what is considered ok with stimulus dollars.

Brenda we will have a child support number on Monday.

Discussion on how much of the stimulus money should be used.

Senator Mathern are you oriented toward using as much stimulus money as possible. They all said yes. I would ask Roxanne in items 2, 3, 5 use the option where we are using the stimulus dollars and that settles that issue.

??Some of those numbers might change.

Senator Fischer I fear we will put in the increases, and then all of the sudden the rug gets pulled.

Senator Mathern I wonder if we don't need a fancy amendment to address that.

Discussion followed on how to do that.

Senator Mathern asked Brenda and Roxanne to work on that and get some workable language.

Senator Warner KEEP THIS AWAY FROM THE BUDGET SECTION if possible.

Senator Fischer dismissed the hearing.

2009 SENATE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012 subcommittee

Senate Appropriations Committee

☐ Check here for Conference Committee

Hearing Date: April 7, 2009

Recorder Job Number: 11773

Committee Clerk Signature Rose Laning

Minutes:

Senator Fischer: called the committee hearing to order on HB 1012. Subcommittee members **Senator Fischer, Senator Kilzer, Senator Krebsbach, Senator Warner** and **Senator Mathern** were present.

Senator Fischer: proposed an amendment that has to do with the Westwood Park in Grafton.

Roxanne Woeste: Legislative Council: It's exactly the same wording as in the bill.

Senator Fischer: Then we'll leave it.

Senator Mathern: The amendment I handed out earlier changes it and that was the reason it was handed out earlier.

Senator Fischer: I'm really happy with this one.

Senator Mathern: I think we have other people on this committee looking at the issue of admissions and readmissions. And would suggest another amendment, involves a screening process of local and regional staff.

Senator Mathern: moved amendment "23-04-05"

Senator Warner: seconded.

Senator Kilzer: Why would you want it that way? So the Developmental center would or would not be forced to take patients.

Senator Mathern: I think the opposite; some of these individuals could be cared for in these communities.

Senator Kilzer: Don't you think the Developmental center do that, rather than the outlying areas?

Senator Mathern: These Centers have excellent staff but should have other input. It doesn't give authority differently, but includes more people choice.

Senator Kilzer: Who do you propose the local people be? Local who?

Senator Mathern: I think the wording on page two, item two of "25-04-05", Proposed Amendment to House Bill No. 1012 – " language of the bill was discussed"

"**23-04-05**" – see attached # 1.

Voice vote on Mathern amendment. Amendment failed.

Senator Krebsbach: Considerable jump in audit fees brought up administration support and audit fees.

Senator Kilzer: monitor FTE and oversees financial statements for OMB.

Senator Krebsbach: I wanted justification for large increase. And haven't had time to do the math. Want to move that the money of $129, be reinstated.

Senator Mathern: (Directed at Leg. Council) is this in the governor's budget or reduction?

Roxanne Woeste: I don't know what audits you are referring to.

Brenda Weisz: (discussed her previous testimony)

Senator Mathern: This is currently in the bill?

Brenda Weisz: Yes.

Senator Kilzer: Is this an additional FTE?

Brenda Weisz: No, It was removed. (Explained reason)

Senator Mathern: I am concerned about the FTE. I am satisfied with audit fees and standards. There were internal controls that were brought up by the auditor. (Directed to Senator Krebsbach) Are you saying you want the fee and staff person?

Senator Krebsbach: I'm not sure the staff person is included. This is just the fees from the auditor's office.

Senator Mathern: I would agree with the fees, the increase makes sense.

Senator Krebsbach: The other question we had was the four FTEs for the Human Service centers and the one FTE for the State Hospital. As we visited, we determined all 4 of those positions should be put back.

Senator Kilzer: This says the administrative code says they need 1 case manager for 60 cases.

Senator Mathern: If that is a move to restore those to the budget, I would second it.

Senator Warner: Move to restore FTE for state hospital.

Senator Mathern: Seconded.

Voice vote passed.

Discussion continued with regards to case managers for the State Hospital in the Global Behavior area. (22:00-

Senator Krebsbach: these are case managers.

Senator Kilzer: they want 5 case managers for health centers. This is acute care at the State Hospital in the Global Behavior area.

Senator Krebsbach: When is the Cooper House going to be up and running?

Senator Mathern: There are people working on it, but it's not running yet.

Senator Krebsbach: It's not connected through the Service Center?

Senator Mathern: It is a separate entity.

Nancy McKenzie: Vocational Rehabilitation, Department of Human Services –

This is a collaborative program – housing, apartments to try and prevent homelessness. It's not a licensed treatment facility; it is a housing program for Fargo. We know that because it was designed for individuals who are homeless or at risk of homelessness, many of the individuals do in fact have very serious mental illnesses and/or substance abuse problems. We have been asked to bring those services these individuals will need to help maintain them in those housing units. These are human service employees who live at the center. Addiction staff and employees assigned to case workers.

Senator Krebsbach: How many patients would 5 FTEs take care of?

Nancy McKenzie: The housing facility is 42 units, so 42 individuals, couples, or small families who are living there.

Senator Krebsbach: Motion to restore 5 FTE positions.

Senator Kilzer: Seconded.

Voice vote passed.

Senator Krebsbach: The House reduced $1M of salaries and wages from general fund and then House removed $2 M from general fund.

Senator Mathern: I presume that's the amendment we've been doing in other bills – basically restoring salary and equity?

Senator Krebsbach: Moved to restore $2 M.

Senator Mathern: Seconded.

Voice vote passed.

Senator Krebsbach: Page 5 of green sheets (see attached #2) #15? – Bottom line – what the House removed. . Personal care option – if they can get an extra person to help they can keep those individuals in their homes longer.

Senator Kilzer: This increases personal care from 8-10 hours.

Senator Krebsbach: Moved to restore the House deletions in personal care.

Senator Mathern: Seconded.

Voice vote passed.

Discussion continued between Sen. Krebsbach and Sen. Fischer with regards to nursing homes and long term care.

Senator Krebsbach: long term care for nursing homes. House decreased this from 7 to 6%.

Senator Fischer: I have notes to keep everything

Shelley Long: Why House went from 7 & 7 to 6 & 6, and $1?

Senator Fischer: On page 4 of green sheets (# 9 & 10), inflationary increases to 6%. More importantly, the House increased money for long term care by $15M of which $5.6M from the general fund to reduce projected caseload utilization. When we were discussing this, how do they project caseload utilization, is it based on the past or numbers looking into the future?

Shelley Long: It has been historically based on past caseloads and historical data which we then project forward. The House had budget targets to reach and this was a way to do it.

Senator Fischer: The department put the number in and the House took it out based on methodology?

Shelley Long: Unless the Department could explain to me otherwise, I believe that was their motive.

Senator Kilzer: Question I have. A 7% increase on inflationary changes of itself; is rather high. Is this really caught up rather than inflation?

Shelley Long: Last summer we were running in double digit inflation, so at that point in time, we made a request to the Governor's office to provide 7% annual inflation for current inflation (summer of 2008), then when we went back and looked when inflators were provided in the previous year of 4% in 07 and 5% in 08, inflation was running higher in both those years, so "Yes" Senator Kilzer it was issue of catch up and inflation was at a higher rate than it is today.

Senator Mathern: I think we should take the governors recommendation when we go to House. As we move to conference committee, let's go back to governor's budget.

Senator Fischer: Gov budget was 7-7-2 and was too much. If we do the 6-6-1 we'll just have another argument in conference committee.

Senator Fischer: Can nursing home capacity.

Shelley Long: We 17% stopped admissions because we don't have staff.

Senator Fischer: You have 4 & 5. 6-6-1 would be good. That is a pretty significant increase

Shelley Long: We'd appreciate anything you can give us because we can't get help.

Senator Krebsbach: moved to stay with House at 6-6-1 for basic care and nursing facilities.

Senator Kilzer: Seconded.

Senator Mathern: That's already in bill.

Senator Krebsbach: I guess we don't need a motion.

Senator Mathern: I move we go to 7-7 for all providers to total $16,208,752, which calculates to a 7% increase across the board.

Senator Warner: seconded.

Voice vote – failed.

Senator Krebsbach: House had done something with the 80th percentile which would not affect all. If we bring it to 100%, it would be $2.9M more dollars in general funds, with that an additional $4.9M federal funds. Can someone explain what the 80th percentile is?

Shelley Long: The 80th percentile limit requires each facility to rank salaries highest to lowest and take 80%. If you have 100 employees, arrange them in highest to lowest and take person #80. Salaries need to be adjusted across the board. What we found wrong with this formula in practice was those with longevity weren't getting raises. To follow up on Sen. Krebsbach's question: To provide $1 to everyone to except administrators, contract employees.

Senator Mathern: We have wording about formula. Formula would say this money is available to all except administrators, and contract employees.

Shelley Long: You don't negotiate with contract employees.

Senator Mathern: I'm ok with leaving that out. Policy question – do we have agreement?

Brenda Weisz: handed out Salary Scenarios. – see attached 3 and explained the $1 increase in salaries.

Senator Kilzer: Is the 80% or 95% reflected in these figures?

Brenda Weisz: IGT is the same as Health Care Trust Fund. There is $50,000 in the fund.

Senator Mathern: I suggest that we do this only using general fund. Would you be interested in going to $2? There is need and we're going to close down a bunch of nursing homes in ND.

Senator Mathern: moved $2 increase in salaries.

Senator Warner: seconded.

Voice vote – failed.

Senator Krebsbach: From the standpoint of avoiding compression and being fair, we should look at 100% and so **I move $1 change.**

Senator Mathern: seconded.

Senator Warner: People at bottom don't get very much and we should make the $1 change.

Senator Kilzer: need to go to source of funding. Some of these funds are anemic and dry because 80% of it has to go to tobacco on measure 3. Money in community health is not there.

Senator Mathern: I view the motion as coming from general funds.

Voice vote – passed.

Senator Kilzer: Various providers have been rebased with projections to June 30, 2010. I reviewed them and they are about as good as you can get. The goal should be to cover costs rather than others making up the difference. Legislature should take some blame because there has been no attempt to pay basic costs. I propose to have a goal of reaching 100% of rebasing costs. Recommend that the hospitals at 100% as in executive budget and all other providers at 75% with the goal of reaching 100%. What can you pay for service and how many people are eligible?

Discussion pertaining to INTENT ensued

Senator Mathern: Wording you are talking about – Roxanne has developed that wording already. Item # 3 of page 5.

Senator Kilzer: Need to have a goal of rebasing to 100% as a goal or there's no purpose in having it done.

Senator Fischer: increases are across the board at 75%

Senator Krebsbach: House left hospitals at 100%. And basically we're restoring back to governor's budget and that was to go to Medicare rates.

Senator Kilzer: proposing everything outside of hospital to go to 75% of rebased figure.

Senator Mathern: Now rebase hospitals and physicians at 100%.

Senator Kilzer: Physicians are paid at 51% of cost. To maintain access, it's better to go this route.

Senator Warner: Is problem that physicians are self employed and not associated with network

Maggie Anderson: We use national, state data.

Senator Mathern: Pay according to cost.

Senator Kilzer: All third party payers have a fee schedule.

Senator Mathern: Move to increase provider rates of physician to 100%. We could take advantage of this data, establish base and it would bring in about $40M to state.

Senator Warner: Seconded.

Voice vote – failed.

Senator Kilzer: moved to 75% of rebased rate. Medicare rates of ambulances are close to 100% of rebasing which are Medicare rates.

Senator Warner: If Medicare rates go up, to have stop loss to keep them from taking advantages rebased to Medicare and then 75% of billable costs, not less than Medicare rates.

Roxanne Woeste: I have hospitals at 100% physicians at 75% and chiropractors at 75%, and restore ambulances to the Medicare rate.

Senator Warner: Moved to add chiropractors to 100%

Senator Mathern: Seconded.

Voice vote – failed

Senator Krebsbach: Where are chiropractors today?

Maggie Anderson: Currently they are all paid at same rate. They are at $19.68. We only cover three codes. With rebasing reports – anywhere from ½ to

Senator Kilzer: Motion to rebase physicians to 75%

Senator Krebsbach: Seconded.

Voice vote – passed.

Senator Kilzer: restore average bill charges to 75%

Senator Warner: Seconded.

Voice vote – passed.

Senator Krebsbach: Moved to restore ambulances to Medicare rate as in executive budget.

Senator Kilzer: Seconded.

Voice vote – passed.

Senator Fischer: Has to do with hospitals that have a high rate of Medicaid reimbursement.

Arnold Thomas: Asked legislature to rebase hospitals at cost. We rebased 33 hospitals up to cost. There was interim study. Based on language put in the amendment before you is for one facility that is high provider. We suggest direct appropriation that triggers threshold.

All this not to be addressed until the new MMIS system is installed.

Senator Kilzer: Was this part of hearings or is this something new? When the department appeared before the whole appropriations bodies in both the House and Senate. Why are we just seeing it now?

Arnold Thomas: There is no federal, state – it's just a matter of timing.

Senator Mathern: The problem was addressed of reimbursement of lab services but no solution was brought forward.

Arnold Thomas: critical access level brought out. Said there was a work in process.

Senator Warner: Moved that the Thomas amendment be approved

Senator Mathern: Seconded.

Roxanne Woeste: This would be $400,000 general fund to department and they'd have to provide grant to facility.

Maggie Anderson: I don't think we can; it would be nice to clarify it over night. We'd have to look into. Federal regulations say one must accept Medicaid payment in full and can't target specific facility. Reading language, I'd need to study this and seek input from CMS. You're looking at a supplemental facility making a payment.

Senator Fischer: We'll table this till morning.

Senator Krebsbach: Move to restore funding for salaries and equity to the Dept. of Human Services which were removed from the House.

Senator Mathern: Seconded.

Voice vote – passed.

Senator Mathern: #7 on page 4. Moved to approve

Senator Fischer: How is daily rate calculated?

Cal Rolfson: Anne Carlson Center: There many levels of disability and this would provide additional funding for developmental disabilities. (This is OAR #5 and didn't make it into governor's budget) (Discussed the different levels)

Senator Warner: If we were to adopt this, how many tiers of severity would there be?

Maggie Anderson: I don't know how this looks with HB 1556 which is a study to study the tier of rates in nursing homes. (Discussion continued)

Senator Warner: This would likely be a provisional solution.

Senator Krebsbach: Move to adopt item # 7 on the Mathern sheets # 99829.01- Long term care

Senator Mathern: Seconded.

Voice vote – passed.

Senator Mathern: Moved- page 2, items 19, 20, 21 of Mathern handouts # 99829.01.

(Read and discussed various minor items left off the executives budget)

Senator Kilzer: Adds up to $1.3 M?

Senator Mathern: This is the House decrease restored and not anything additional. Item #'s 21, 24, and 25 on green sheet.

Roxanne Woeste: – House removed general funds.

Senator Kilzer: Another affected by tobacco money.

Senator Kilzer: Community Health Trust Fund takes 80%

Senator Mathern: Moved to restore compulsive gambling at $100,000 instead of $150,000 as governor budget had. (#25 on the green sheet)

Senator Warner: Seconded.

Voice vote – passed.

Senator Mathern: Moved to restore $150,000 instead of $200,000. This is $50,000 for the Governor's Prevention & Advisory Council grants (#24 on the green sheets).

Senator Warner: Seconded.

Voice vote –failed.

Senator Fischer: Restore $10,000 to Governor's Prevention & Advisory Council grant as in budget.

Senator Kilzer: Seconded.

Voice vote passed

Senator Mathern: Moved Centers for Independent Living to $400,000 of governor's budget. (#21 in green sheet)

Senator Warner: Seconded.

Voice vote –failed.

Senator Fischer: Moved to $150,000 for Centers for Independent Living. (#21 in green sheet)

Senator Kilzer: Seconded.

Voice vote passed.

Senator Fischer: Senior and aging wait until tomorrow because there may be stimulus money.

Brenda Weisz: This takes everything -------NDCC The century code has to be amended. It's not worded correctly. Need this before we can get grants. It gives the department the ability to apply for grants.

Senator Fischer: How much?

Brenda Weisz: We requested $600,000

Roxanne Woeste: Right now there is no funding available. The CC needs the language changed regardless of the funding.

Senator Mathern: Moved amendment – draft # 03122009 – see attached 4.

Senator Krebsbach: Seconded to get language in code.

Voice vote passed.

Senator Fischer: (#5 page 7 of green sheet) onetime funding for extraordinary repairs

Senator Mathern: Moved

Senator Krebsbach: Seconded.

Voice vote passed.

Senator Fischer: (#3 on page 7 of green sheet).

Senator Mathern: Moved funding for 6 FTE positions at State Hospital

Senator Krebsbach: Seconded.

Voice vote passed.

Senator Fischer: Moved to 200% of poverty level

Senator Mathern: Moved to adopt funding for S-CHIP bill.

Senator Krebsbach: Seconded.

Voice vote passed.

Roxanne Woeste: The money is in 1043, but language in 1012.

Senator Krebsbach: Moved to adopt language for HB 1012 that Roxanne proposed – amendment 98013.0205 – see attached 5.

Senator Mathern: Seconded.

Voice vote passed.

Senator Fischer: page 3, paragraph above #7 on green sheet – to restore the medically needy income levels to 83 % of the federal poverty level. Governor's budget level.

(Discussion ensued regarding poverty levels at various income levels)

Senator Mathern: seconded.

Senator Fischer: stepped out of the room

Discussed Senator Mathern page 8 - # 5 green sheet (adult transition residential services)

Talked about stimulus money

Tabled until tomorrow.

2009 SENATE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012 subcommittee

Senate Appropriations Committee

☐ Check here for Conference Committee

Hearing Date: April 8, 2009 am

Recorder Job Number: 11776

Committee Clerk Signature Rose Laning

Minutes:

Senator Fischer called the Human Services subcommittee hearing to order. All subcommittee members were present: **Senator Fischer, Senator Kilzer, Senator Krebsbach, Senator Mathern** and **Senator Warner**.

Senator Fischer asked if there was anything yet from the green sheets that needed to be addressed. One was the family group conferencing initiative.

Senator Mathern: The case load projection from the House - $9.6 M and then the proper funding of FMAP change (Federal Medical Assistance Percentages).

Senator Fischer: We need to do something about the FMAP. The utilization - the rationale is one of the things I would like to know the methodology they used.

Brenda Weisz, Department of Human Services: They did what they had to spend down, but they didn't necessarily agree with our caseload and projections, but in our executive budget, they had already taken into account the decreases in utilization in nursing homes and Medicaid. We reflected those reductions in the budget we brought forth to the House and they felt the utilization was too high, so they brought it down further.

Senator Fischer: When they talk utilizations, are they talking all programs – or for example, you never did access the $1.5 M loan at the bank?

Brenda Weisz: We did not.

Senator Fischer: Did they use that kind of rationale when talking about that. And yet talking to providers, they were in the 90s which would tell me that wouldn't you need that $1.5 M or did you transfer from somewhere else?

Brenda Weisz: We did not transfer it. We had some group homes that didn't open. A group home we had planned to open in the Rolla area didn't open this biennium.

Senator Fischer: And that was included in the appropriation?

Brenda Weisz: Correct. If that had opened we would have cashed part of that loan fund. The discussion about that was more we were right about our caseloads by putting it in a loan fund. We didn't need it. Then our projections for the DD caseloads, we showed them the growth. We showed them the growth in each one of our programs and they felt that $2.476 M of general funds was the number they were going to adjust for caseloads in DD. The same for Medicaid; they looked at our spend down tables for the major areas of spend in hospital physicians. We had done reductions in the executive budget for those areas in utilization, and they reduced the utilization further by $9.6 M general funds. Then when we went to the other area of long term care, we provided them the spend downs and how things were trending. For example, in nursing homes, we reduced our executive budget, which already had a reduction of 94 nursing home beds/month, that we brought forward and they made an additional reduction of $5.6 M general funds to utilization for all services and long term care, except SPED.

Senator Fischer: So you had trend monies on everything?

Brenda Weisz: Right.

Senator Fischer: And you looked into the 09-11?

Brenda Weisz: Right. And that's how we prepare a budget. Based on what we're seeing happening right now, and seeing that trend going down in nursing home beds, for example, we

built a budget and worked with long-term care associations for our bed count to see if we were both seeing things the same way and then brought that forward in the executive budget recommendation.

Senator Mathern: (explained House differences) By all these decreases, the House says they know better than the Department of Human Services. I believe that the DHS numbers are probably correct. If it's a major stumbling block of getting this bill out, maybe we should take those three areas and reduce them somewhat from what the department says, but not go the whole way that the House says we ought to go. That would still give us an opportunity to negotiate. If we just take the House numbers, then what they've got is probably a done deal. That would be $17.6 M taken out. There are actually more people going into the nursing home than allocation.

Senator Fischer: That's the one area there may be less, but the other program that we've developed, that's the one area that could be less people – admissions.

Senator Fischer: Roxanne, if we were to make it contingent dollars, if they should run out. How does that reflect in the budget? As money that's appropriated, no matter what the language is?

Roxanne Woeste: In most cases, we do reflect contingent general fund appropriations and budget status because we assume that they will be spent. There are a few cases where we don't; when they're tied to additional fund revenue growth above and beyond what the legislature is projecting from total general fund revenue growth.

Senator Mathern: That also includes the fact that if the House is correct, then the money isn't spent. It's not permitted to be spent for other areas, or is it?

Roxanne Woeste: That is correct. If contingent appropriation is not accessed, it would be considered turn back at the end of the biennium.

Senator Mathern: It's not like we would lose this money if we put it in and it was not needed. It would come back.

Senator Fischer: It's not a premium, it's only used when there's a case that is eligible and accessed. Roxanne, how was the loan treated last session? There was $1.5 M in available loan to the department. When that was written in, was that loan considered in the budget?

Roxanne Woeste: The loan from the Bank of ND – I do believe we provided the authority for the department to go to the bank and get a loan. And we had to provide them with special fund authority to spend those loan proceeds. Then we had to add in language that if they took out loan, they would need to ask a deficiency appropriation to repay that loan. The Bank of ND loan increases the department's special fund authority because they need authority to spend this. This is considered special funds, but we do need to provide for a way to pay back that loan, so that's the language we add. They have to ask in their budget request for the next biennium, money to pay back that loan. In most cases, that would need to be general fund dollars, unless there's another creative funding source available.

Senator Fischer: If you accessed the loan then, you couldn't match it?

Roxanne Woeste: No. It could be a match with federal dollars, it's just not a general fund appropriation, it's special funds. If the money was accessed, we'd have to figure out how they were going to pay for it.

Senator Mathern asked about the numbers of Developmental Disabilities (DD).

Senator Fischer: The trend lines over the US show that DD is running over 90%. The long term care, with an increase in funding, have fallen in numbers.

Brenda Weisz explained the long term care continuum. .

Senator Mathern: I would suggest that we restore those items that we feel fairly comfortable on and reduce others, and then cut the ones where there are questions.

Senator Fischer: Rather than discuss with Chet Pollert, we can just argue with him.

Senator Mathern moved to put $17 M back in the general fund that they took out. When you're in a conference committee, then the House can explain why they took it out.

Senator Kilzer: Of the $17 M, what is it from the present biennium? How much of a difference? How much difference was it from the present biennium to the executive budget?

Brenda Weisz: The total changes for Medicaid only are $30M in general funds.

Senator Kilzer: So the governor increased his budget by $30 M?

Brenda Weisz replied yes and explained more changes.

Senator Fischer: Thoughts?

Senator Mathern: Let's go one at a time: DD, Long term care, medical services. On DD one, the departments projection of use, we'd need to add $2,476,000. (Green sheet page 6, 1st paragraph, #16) – see attached # 2, dated April 7, 2009.

Senator Warner: DD, long term care, and medical services are all a blend of entitlements?

Brenda Weisz: All of Medicaid funded programs are entitlements.

Senator Mathern moved developmental disabilities services to $2,476,000 (green sheet, page 6 - #16)

Senator Krebsbach seconded.

Discussion – **Senator Krebsbach** said that the department has done a good job and we should support this vote. **Senator Kilzer** agreed.

Voice vote – passed.

Senator Mathern moved to restore long term care to $5,600,000 of general fund. (Green sheets, page 4 - # 10) to reduce projected caseload/utilization rates. The only way this goes down is if people died.

Senator Warner seconded.

Senator Kilzer: Is this skilled care?

Roxanne: It's in #9 and #10 but would restore the money.

Voice vote passed.

Senator Krebsbach: Page 3, item 6.

Senator Mathern moved to restore funding to $9.6 M funding for medical assistance grants.

Senator Warner seconded.

Voice vote passed.

Senator Mathern: One thing not addressed were the things outside of the governor's budget and was not brought by the House. I have list that brought it back to 16 and now it's down to 8.

Senator Mathern presented Listing of Proposed Changes to Engrossed House Bill No. 1012 (99829.01) - see attached #1. He explained the 8 items.

Page 4 - #3, 4 and 6.

Page 5 - #9, 11, 14, 15, 16.

They are important items and have broad support in Senate. If there are others, I would be supportive of that **and I move those 8 items.**

Senator Krebsbach – In #16, are those ordered through the court system?

Senator Mathern: This would not go into effect until a court ordered guardianship would be put into place.

Senator Krebsbach: Do you know if the department has had money available for this in the past?

Senator Mathern: Generally, no. This would just be building on $40,000 that we've tried before to do this or that and $40,000 hasn't really provided the service that is needed. They've had $40,000 and this is requesting $350,000 to actually pay the bill.

Senator Warner: I think what we've had in the past was an amount of money sufficient to establish the framework and the parameters of the equation. It's had a successful test and now it's time to launch.

Senator Krebsbach: If we have a resolution into to study this issue on guardianship because it's a very confused area. The counties are the ones that basically fund it now. It's a question whether it should be funded through the court system or through the Human Service or where it's all at. I'm hoping the study can bring to life what and how we should deal with this because it is becoming a real problem in the state. I'm going to rely on the study to tell me what we should be doing.

Senator Mathern: I support the study, but we've had it before us for a number of bienniums and the need has been demonstrated that the $40,000 that we have put in it so it continues that investigation and continues to support the fact that this is needed.

Senator Fischer: I have to leave and meet with the Lt. Gov., but providing additional funding for family group conferencing initiative, and that's the one where they monitor expectant mothers even from prenatal and decide.....

Senator Mathern: That would be #6, and they're doing that already.

Senator Fischer: I can't support that. It's very intrusive. You're going to ask somebody that knows how to live your life better than you do, and I don't care for that. Somebody has to decide; if you aren't wearing the proper clothing when you come in for prenatal care, someone is going to decide that they need help. My vote would be no.

Senator Mathern: Do you want to exclude that item from the list?

Senator Fischer: My vote would be no, and I think you need to do them one at a time.

Senator Mathern withdrew the motion for the eight items.

Senator Warner moved (# 14 –page 5 on Mathern handout 99829.01) medical assistance benefits for pregnant women.

Senator Krebsbach seconded saying that the language and dollar amount would have to be added to the bill.

Voice vote – passed.

Senator Mathern moved (# 3 – page 4 on Mathern handout 99829.01) adoption services.

Senator Warner seconded and commended people taking on adoption.

Voice vote – failed.

Senator Mathern moved # 4 – family group conferencing.

Senator Warner seconded.

Senator Krebsbach: I could support it if it was at a reduced amount.

Senator Mathern withdrew motion and moved to change #4 to a general fund appropriation of $1.2 M.

Senator Warner: Are we jeopardizing a match?

Brenda Weisz: Those should be ok.

Senator Kilzer: How much money do they have in the budget prior to adding this on?

Senator Mathern: I believe there was a million dollars in this program from a foundation that has ended.

Brenda will check and the item is tabled.

Senator Mathern moved #6 – page 4 of handout 99829.01 (Lutheran Social Services) Healthy Families. They are not judgmental in this approach and this is for people who voluntarily want this service. It's a matter of providing support where requested.

Senator Warner seconded.

Senator Krebsbach: I think this was in SB2396 to expand this program to other communities and it was defeated in House. The $200,000 appears to be to continue the program in Burleigh and Morton Counties.

Senator Mathern: Correct, so that other bill was an expansion which did pass the Senate, but was defeated in the House. This amount of money was not part of that bill.

Voice vote passed.

Senator Mathern moved #9 – page 5 of Mathern handout 99829.01 - information technology program

Senator Fischer would oppose this because I think we need to get MMIS up and running in t the planning and get it in place. Unless the department can tell me how they're going to do this so we're sure that it will match with MMIS. I don't mind doing it, they can start planning on their own and we can fund next session.

Senator Mathern: MMIS is going to go down this track and the hope is that all of these programs will in fact connect; however, this is really trying to bring these programs together.

Brenda Weisz explained eligibility system of counties to start planning process and how they will integrate.

Senator Krebsbach: Is this premature until we get our system up and running?

Brenda Weisz: We had it as an OAR and it was listed. The most we can do is start the planning.

Senator Mathern: My goal would be to spend the $342,500 to get a federal match.

Senator Mathern: I would move item #9.

Senator Warner seconded.

Senator Warner: The cost is part of the state's responsibility, correct?

Brenda Weisz: The replacement of it would be a state expense.

Senator Warner: 100% of the money we are talking about in the next biennium would be a state expense?

Brenda Weisz said they can draw down federal funds at a 50-50 match, but yes, it would be a state expenditure.

Senator Fischer: You're saying this is an obligation to the state at some time or another?

Brenda Weisz: Right. We will have to do something with the systems at one time or another to help with consolidating the number of systems and determine eligibility.

Senator Fischer: At this amount of money?

Brenda Weisz: The OAR was at $18.9 M and this would be the preliminary planning.

Senator Krebsbach: I'm confused. It looks as though we're going to use $685,000 for planning?

Brenda Weisz: Right.

Voice vote – failed.

Senator Mathern: #11 is children and family services. Parent Aide services provided by the county staff. This was brought to us by the counties.

Sandy Bendewald, County Director, Stutsman County Social Services: There are a lot of counties that do not have parent aide services at this point. The funding is limited. It's helping keep kids out of foster care and returning them quicker. It's cost effective by helping to train parents to actually parent their children. It's mostly for expansion to counties.

Senator Warner: Can you distinguish between this and the Healthy Families Initiative that we spoke of a few minutes ago – which is run by a private agency rather than counties?

Sandy Bendewald: The Lutheran Social Services is not a parent aide at all. That's not sending a person actually into the home. Typically it's for kids that are not in foster care yet. We have a social worker that is working with them. One of the tools they have is to send in a parent aide who is the person who actually goes in and teaches them how to get their kids up and go to school. Help teach them how to put together healthy meals, to play with them – and all those skills. So they usually go in three times a week.

Senator Krebsbach: I could probably go with a third of it at $350,000. I don't know.

Senator Mathern moved #11 (page 5 of handout 99829.01) at $350,000.

Senator Warner seconded.

Senator Fischer: Is this new or is this an existing program funded by?

Brenda Weisz: There are no federal funds available. To increase the program, it would have to come from state general funds.

Voice vote – failed.

Senator Mathern moved peer support program (# 15) at an amount of $600,000.

Senator Warner seconded.

Senator Mathern: We need to be open to new programs and keep people out of hospitalization services not only for their benefit, but also for the cost of hospitalization. This peer program has a creative approach to helping.

Senator Krebsbach: I see great value in this program. It sounds good, but not at $600,000.

Senator Mathern moved to substitute $300,000 for the peer support program.

Voice vote passed.

Senator Mathern moved (#16) which was additional funding for guardianship services and moved the amount to $200,000.

Senator Warner seconded.

Senator Warner: Did **Senator Krebsbach** say there was language in another bill?

Senator Krebsbach: I feel this area definitely needs to be funded, but I think I would prefer to hold off until after this interim to see what the study produces.

Senator Mathern: There is great need for this. People are getting many more services because this is not available. One example is to help someone remember to take their medication.

Senator Fischer: We already have those services.

Senator Mathern: Correct, but they don't have full faculties to make that decision and this lets court to help appoint guardian.

Voice vote – failed.

Senator Mathern asked if they want to work on legislative intent language – page 5, #2 & 4.

Senator Fischer: We'll continue this afternoon.

2009 SENATE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012 subcommittee

Senate Appropriations Committee

☐ Check here for Conference Committee

Hearing Date: April 8, 2009 pm

Recorder Job Number: 11795

Committee Clerk Signature Rose Laning

Minutes:

Senator Fischer opened the subcommittee hearing on HB 1012 and all committee members were present.

They want to address the items on the Priorities List passed out by **Senator Fischer** – see attached #1.

Brenda Weisz, Chief Financial Officer, Department of Human Services: Brenda explained the funding that concerns the family group conferencing and the federal funding needed.

Senator Mathern was concerned about the language intent of the bill. Page 5 & 6 on handout #99829.01 – see attachment # 1 (dated 4/8/09 am).

#2 – Returning veterans and their families. Asking the Department of Human Services to come back next legislative session and tell us what kind of impact there is.

#4 - Family healthcare centers and providing legislative intent for the family healthcare centers. The facility in Fargo was asking $3.2 M. I put no dollars in this, but it was intent for the department to work with them if there were some resources, but it directs them to move forward and make direct application for stimulus money. There are no dollars in this wording.

#5 - A study of salaries and wages for employees at basic care and nursing home facilities and employees of developmental disabilities providers to bring them to the same payment level.

#7 – Reimburse home health agencies for home telemonitoring services under the Medicaid program at the same rate as skilled nurse visits. This would be intent language.

#8 – Developmental Center Transition Plan. The DHS shall report to the budget section during the 2009-10 interim on the status of the developmental center's transition plan.

Senator Fischer: They have a plan for that already. In fact, it's updated every biennium. All we'd have to do is ask for it.

Senator Mathern: Would like to cover #2, #4, #5, and #7.

Senator Fischer: Don't we already have a bill or something for returning veterans?

Senator Mathern: That was the agreement that we would put it in this bill. Senator Krauter had wanted another bill and there was a separate amendment to do that. We decided instead to put it into a study format.

Senator Krebsbach: When was the last time we studied the salaries? Home health care, DD, providers.

Brenda Weisz: We've looked at them individually and made adjustments but each legislative session is different.

Senator Kilzer: If we're going to do a study, it should be in coordination with Human Resources because they do a lot of studies.

Senator Krebsbach: Human resources doesn't touch this area. This is outside.

Senator Kilzer: You mean outside of this area.

Senator Mathern: I believe we came up with this wording because as a Senate Appropriations committee, we were getting messages about one person was paid $10/hour or in a different industry it was $12/hour; a different one $13/hour and there were some sense that the level should be about the same for all three groups. But that seemed kind of complicated to really put in a bill and maybe it shouldn't be. It's more of a study.

Senator Kilzer: If we're going to do a study, then we should probably coordinate between instate government and outside of state government through the Human Resources.

Roxanne Woeste, Legislative Council: SB 2044 as amended by the House does provide for a legislative council study and it looks like it's a mandated study referring to the state's long term care system, including geographical boundaries for determining capacity, the need for home and community based services and methodology to identify areas in the state which are in need of additional skilled nursing facility beds, access workforce reimbursement and payment incentives.

Senator Fischer: Everything but disabilities.

Brenda Weisz informed the committee that HB 1556 has rate methodologies.

Senator Krebsbach: Is there a difference in pay by region rather than methodology?

Senator Fischer: There is in everything else. (Gave some Job Service statistics)

Senator Mathern: What would be the changes necessary to establish consistent salaries and wages among the groups? I think that's what the committee was zeroing in on.

Senator Fischer: How do you compare someone in DD as opposed to someone in QSP?

Senator Mathern: When we tried to make those changes to make them all the same thinking it would be fair for everybody. We came to the conclusion that you're coming to that there are some different issues there. So we decided to put it into a study and not to actually make it across the board the same. Some of them get paid windshield time. Some don't. It's a complicated thing. Instead of making all the salaries the same, it seemed like a study would be more appropriate to start out with.

Senator Fischer: How do you put that together?

Senator Mathern: That's why we hire people with a master's degree.

Senator Krebsbach: Roxanne, are you aware of any studies that have been requested of veteran's returning home from service? Roxanne replied that she was unaware of any.

Senator Warner: The language sounds so negative and makes it look like an emerging problem. If we could have a more affirmative description of the services, perhaps the opportunities to provide services, and I think any study should involve some examination of the federal or veterans administration components so we'd see what services are there. Then we can work toward filling in the gaps and bringing a more wrap around approach rather than trying to reinvent the entire process. If we could look at what will be coming from the federal government, in response to their return, and then ways that the state can provide services rather than look at them as an emerging problem.

Senator Fischer: Some of things they are dealing with at Veteran's Home now is different than the Korean War vs. Viet Nam vs. Desert Storm. They all become different because of road side bombs vs. different things. They're having more cases that are specific to different conflicts.

Senator Krebsbach: Senator Warner is on the right track and maybe we should work up something.

Senator Fischer requested Roxanne put some language together to adopt a study for the veterans' issues. Roxanne said she would incorporate it if someone could put it in writing.

Senator Warner: "Shall consider" or mandatory study.

Senator Fischer: "Shall" consider is probably what we want.

Senator Krebsbach: I don't think we should limit it to just those two. It should be all those returning from wars and their families within the system.

Senator Krebsbach moved to changes proposed in #2 (returning veterans and families) – page 5 (#99829.01) in Senator Mathern's handout.

Senator Mathern seconded.

Voice vote carried.

#4 page 5 - Legislative intent – grant- family healthcare center.

Senator Mathern moved #4 in handout # 99829.01.

Failed for lack of second.

#5 page 6 of handout # 99829.01 – Study for salaries and wages

No motion. Dropped.

#7 page 6 of handout # 99829.01 - Reimburse home telemonitoring services.

Senator Krebsbach moved approval.

Senator Warner seconded.

Voice vote passed.

#8 of handout # 99829.01 - Developmental Center Transition Plan

Roxanne Woeste informed them this was already in place.

Senator Warner asked to consider #29 on page 3 Mathern's sheets or #5 on page 8 of the green sheet. To restore funding for an FTE position.

Senator Krebsbach moved to approve #5 on page 8 of green sheet – the young adult transition residential services.

Senator Warner seconded.

Senator Kilzer questioned Brenda. Can you tell me the definition of Medicare disabled is then? If these people don't qualify, who does?

Senator Warner: I would think a good share of these people are fully functional and have employment eventually. That's why it's called transitional.

Senator Kilzer: Under TANF laws isn't there a 5 year maximum eligibility?

Brenda Weisz: But these wouldn't be TANF eligible. We don't know the criteria for disabilities for Medicare.

Discussed the youth transitional homes and providers that work with the youth. This was determined to be a new program. There would be 2 eight bed units – one in Bismarck and one in Fargo. There would be 24 hour staffing. Human Services provides the treatment, but have no place for them to stay.

Senator Fischer said it would be about $50,000 a bed.

Senator Krebsbach said since this is a new program she amended her motion to put in half the money $417,311 and let them decide which location – Fargo or Bismarck.

Alex Schweitzer, Developmental Center of DHS: said they started a transitional program at the state hospital and it's very cost effective.

Senator Warner seconded.

Senator Fischer: Before we vote, add amendment to report back and give a process report.

Voice vote passed.

#4 page 8 of green sheet – restore FTE position. Care coordinators with large caseloads to work with children.

Senator Warner moved the motion.

Senator Mathern seconded.

Senator Mathern this would be support for parents who care for their child at home.

Voice vote –failed.

Senator Fischer's Priorities List – see attached #1.

Roof leak at state hospital - #3 on Priorities list

Senator Warner: Didn't we have a million dollars somewhere else for extraordinary repairs?

Senator Fischer: This was discovered later.

Senator Mathern moved adoption.

Senator Krebsbach seconded.

Voice vote passed.

FMAP drop - #2 on Priorities list - see attached # 1

Senator Fischer: Can stimulus take care of FMAP?

Brenda Weisz: You'll have to offset it. The FMAP money will come in as current servicing. After the economic stimulus goes away, the FMAP will drop even lower than what the current budget is. You'd have to do an offset because we will be short.

Senator Fischer: If we put this in, can we offset it with stimulus?

Brenda Weisz: You can use the general funds that are in the transition column.

Roxanne Woeste: You may talk about transition dollars, it is simply a funding source change from increasing general funds, decreasing special for $9.5 M. When we talk about stimulus

and we talk about a funding source change the other way due to the enhanced FMAP where we're going to decrease the general fund and increase special funds. The two kind of offset one another.

Senator Krebsbach approve FMAP change and have Roxanne draft it properly.

Senator Kilzer seconded.

Voice vote passed.

Aging services – ADRL (Aging and Disabled Resource Link) - #1 on Priorities list – see attached #1.

Brenda Weisz - Yesterday we added the amendment language for that. The executive budget has $600,000 dollars for that purpose and then it was moved into HB 1476 which failed in the House side. There is no money to do this at all. The money started in HB 1012 and it was taken out after 1476 failed and so in order to do this there would have to (inaudible). And regardless of what money is put in, the Century Code would need to be changed based on how it was written.

Senator Krebsbach: So you need language?

Brenda Weisz: The language you took care of yesterday. So we took care of the language and now it's the decision on the money – whether or not you want to put any money in here.

Senator Krebsbach: But you can go after grants?

Brenda Weisz: Yes, with the change.

Senator Krebsbach moved to approve and take $300,000 to get the project off the ground, but wanted to know chances of putting it back in the bill after the House removed it.

Senator Mathern seconded.

Voice vote passed.

Senator Krebsbach moved $100,000 for community of Care project.

Senator Mathern seconded.

Voice vote passed.

Rolla hospital -

Roxanne Woeste read Allen Knudson's draft legislation. Discussion over definition of small hospital.

Arnold Thomas, ND Healthcare Association explained Medicaid reimbursement costs for hospitals and Rolla is just one of many. It's special legislation, there is no other institution eligible and suggested they put a sunset clause on it?

Senator Krebsbach: Is there a way to tie funding to any money that may be received?

Senator Mathern: I don't think relief will come that soon.

Senator Mathern moved for Roxanne to complete amendment with Allen Knudson's help and to figure appropriate money.

Senator Warner seconded.

Voice vote passed.

Brenda Weisz handed out 2009-2011 Selected General Fund Increases – see attached #2.

Roxanne Woeste: Discuss how general fund dollars are going to be used after FMAP. We need a motion to appropriate those dollars. This will be in a separate section of bill and adopting this plan puts money in transitionary and should respect the stimulus money intent.

Senator Kilzer asked about the 7-7 and **Brenda Weisz** said if budget passes out as 6-6-1 then we'll be ok.

Senator Mathern moved the amendments to permit the legislative council to adopt this schedule of use of federal stimulus dollars and to make it consistant with regular requirements with OMB. (#3 page 3 of Mathern handout)

Senator Krebsbach seconded.

Voice vote passed.

Page 5 #10 on Mathern sheets. Older Americans Act meal service providers.

Senator Fischer: I understood there would be stimulus money for this and was told yes.

Roxanne Woeste: In previous motion, you reduced general fund, so if use stimulus money, you need a motion.

Senator Mathern moved to add additional $485,000 dollars.

Senator Warner seconded.

Voice vote passed.

Senator Fischer handed out Proposed Amendment to Engrossed House Bill No. 1012 – see attached #3.

Maggie Anderson: Children would qualify for SCHIP but not Medicaid. The match is higher under SCHIP and explained changes in the bill.

Senator Warner moved the adoption of amendments given by the Department.

Senator Krebsbach seconded.

Voice vote passed.

Senator Mathern brought up item 5 – page 3 on Mathern sheets.

Allows influx of stimulus money to be available for this biennium for independent living. This money will be ending after stimulus money is gone.

Senator Mathern moved to accept Brenda's amendment.

Senator Krebsbach seconded.

Voice vote passed.

Travel expense –

Senator Krebsbach: The House removed $153,344 for travel expense for the department.

I moved to restore 50% of that.

Senator Mathern seconded.

Voice vote passed.

(160:00)

Senator Fischer handed out amendment 98013.0204 by **Senator Christmann** – see attached **#4**.

Senator Krebsbach moved to consider the Christmann amendment.

Senator Kilzer seconded.

Discussion followed on audio or video recording alleged or neglected child abuse cases.

Senator Mathern moved Do Not Pass.

Senator Krebsbach seconded.

Amendment failed.

Senator Fischer closed the hearing on HB 1012.

2009 SENATE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

Senate Appropriations Committee

☐ Check here for Conference Committee

Hearing Date: April 10, 2009

Recorder Job Number: 11817

Committee Clerk Signature Rose Laning

Minutes:

Chairman Holmberg called the committee hearing to order on HB 1012. Roll call was taken.

Amendment 98013.0206 was handed out – see attached 1. Roll call was taken.

Chairman Holmberg said we'll look at these amendments and also any others.

Senator Fischer moved the amendments .0206.

Senator Krauter seconded.

Senator Fischer began explaining the .0206 amendments reading from the amendment.

Senator Kilzer explained the medical services section of the bill.

Voice vote passed.

Roxanne Woeste, Legislative Council: To increase the funding for rebasing the physician rates to 75%, the increase need from the House version is $29.1 M of which $10.8 M is from the general fund.

Senator Mathern: The options of bringing the physicians up to the same as the hospitals at 100% of cost would be $14 M. That was an option that was considered by the subcommittee, but not adopted. If we went to 100%, we'd have the biggest providers then on an even basis in terms of going forward over the next couple decades. I suspect this budget will be used to consider increases over the next two decades, and rebasing doesn't happen that often, so this would be an opportunity to put those the same.

Senator Christmann: Questioned House's rebasing figures.

Senator Warner: Just a comment. Chiropractors are very small provider group and the difference between 75% and 100% is only $38,000.

Senator Christmann: Is anyone getting slashed?

Senator Fischer: No. (continuing with explanation of amendments)

Senator Kilzer: Situation at Rolla hospital - 31% of total annual revenue is from Medicaid – the only hospital with over 25% of their revenue from Medicaid. Federal CMS will not reimburse outpatient lab and anesthesia services. It's a request for $450,000 – this allows them to stay on their feet.

Senator Warner: I think we need to look at this as temporary expedient. We need to have a series of conversations with the federal delegation, particularly in the area of Indian Health Services.

V. Chair Grindberg: There's a different interpretation with CMS of out Chicago or CMS out of Denver with coding and what is the acceptable cost of reimbursement. There are administrative differences that our national delegation could be of assistance.

Senator Fischer: We could also put a sunset clause on this? Otherwise we will be back here. There has to be help to get these things covered. The hospital administrator said she would love to have any help.

Senator Mathern: Note to committee that there is additional language in this section to make sure Medicaid uses dollars first in this area. In case something would be worked out, those provisions protect the state and make the greatest use of federal dollars.

Senator Fischer read on Section 14 – Developmental Disabilities - $5.13 M Anne Carlson school.

Senator Krauter: Why do we need Section 14 language if it's for all facilities?

Senator Fischer: It's only for the facilities that care for those folks. The only difference between that and developmental disabilities is for the medically fragile and behavioral challenged.

Maggie Anderson, Department of Human Services: Section 22 is related to 2007 HB 1453 that the legislature increased the Healthy Steps model to 150 and authorized the movement of Medicaid from 100 to 133.

Senator Mathern: Can we make a minor change in that section. There are concerns among some families that the movement between Medicaid and S-CHIP is actually a decrease in benefits. Generally they are an increase in resources for a family, but there are families right in the middle of these two programs who have a medically fragile child or a special circumstance. Hopefully we can come up with some language that we could come up by next Monday that would solve that narrow problem with the small number of families. It's a small unintended consequence.

Chairman Holmberg: There may be a few other amendments offered down here and there will be an amendment or two on the floor. We want to button this up so the Council can complete the bill this weekend.

Senator Fischer: I agree there are unintended consequences and some of the things in the Medicaid buy-in with disability children. I think that could be easily fixed.

Brenda Weisz, Department of Human Services: We don't know of any specific case of someone in this situation.

Senator Fischer: Restored the salaries and equity and was told this would be a point of discussion.

Senator Krauter: Section 2?

Senator Fischer: That's stimulus funds.

Allen Knudson, Legislative Council: Section 2 appropriates the stimulus dollars and section 3 is a concern on OMBs part because it says they need to report on use of all stimulus money to the federal government. There are provisions that none of the general fund savings from the FMAP change can be put in rainy day fund. The provision from section 3 indicates that the state treasurer and OMB cannot use any general fund savings resulting from the FMAP change if in this biennium it will be going to the budget stabilization fund. And that amount is $30M. That will show up as an additional general fund turn back.

Senator Krauter: How get $30M?

Allen Knudson: That's the department's estimate of the general fund savings from the FMAP change.

Senator Krauter: Does that include the increase that FMAP is going to experience now in 2009? Wasn't there an increase- or is that in 2012?

Allen Knudson: There's another change in here that adds in general fund dollars for that anticipated change. This just deals with the 07-09 biennium. The remainder of it, OMB also wants to indicate to the federal government where the state is going to use the general fund savings from the FMAP change to the 07-09 biennium and the 09-11 biennium, and the 09-11 biennium is about $66 M. These are where the general fund savings are going to be spent.

Senator Fischer: Continuing explanation of amendments - page 2 in Statement Of Purpose

Senator Krauter: Want to understand rebasing in relation to amendment that was added. The goal should be 100% but we're rebasing physicians to 75%. We're still not providing 100%.

Senator Mathern: The intent is to move to that level in the next biennium

Chairman Holmberg: We set the goal and went three quarters of the way and said next session the department should be looking at that as what the legislature says they should be doing. Then hopefully their budget request to the governor will be at the 100%.

Senator Mathern: Correct.

Senator Fischer: Long term projected caseload/ utilization rates – wherever you see that, we put that in because we don't know the methodology or why the House took those out. We want to get those into conference committee and ask them their rationale for doing that. Same with Developmental disabilities, in talking to providers, they're running at over 90% and we don't know why they took those two out, so there may be changes in those two line items, but we'd like to know why they did it.

Senator Fischer: There are things in here that we need info on. There are also a couple things in here to debate, to like and to take a shot at.

Chairman Holmberg: They must have used a formula. We have gone through these now and it's not perfect, at least it's a step in the right direction. Is it appropriate to pass these and then do amendments and changes to them so we have that basic document? I know there is going to be some discussion on the hospital and a few other things.

Voice vote approval of .0206.

Chairman Holmberg: We have adopted the amendments.

Senator Mathern: I would summarize the presentation by Senator Fischer and we basically did four things. We moved toward governor's budget. We restored items. We verified the federal stimulus and added legislative options and we created intent policy language. The whole thing here is really just four things. I would just suggest that we have a few corrections. One would be S-CHIP that I think we understand.

Chairman Holmberg: That's the one you're going to work out the language with the department and if we have to, we'll do a floor amendment whenever it comes to the floor. A floor amendment with the support of everyone is not a big deal.

Senator Mathern: In the item of legislative initiative - We had a request of $2.3 M for a program called family group conferencing. This is a program that essentially is contracted out to a private agency, the Village Family Service Center. The request was for $2.3 M, however, in our negotiations, it went to $1.2 M at the request of the majority. It was unclear in the amendment process, so it was difficult for Legislative Council to put that amendment in. If majority would agree, I don't' see amendment in there. I think it was the intent of the entire subcommittee to have it in and you'd agree, I'd suggest we move that item in, so legislative council has it. That would be an item under children's family services.

Chairman Holmberg: What page are you looking at?

Senator Mathern: It's not in the notes. It would be placed under the children and family services section and it would be $1.2 M of general funds.

Senator Krebsbach: We intended for that to be included in that at the $1.2M level and I so move.

Senator Mathern seconded.

Voice vote passed.

Senator Mathern: One item we never discussed. After going through the minutes of the folks who testified here - was personal care allowance. That is the number of dollars available for people to have for their personal needs and this is for people most dependant where they have no income. If they are clothing dependent and money that comes to them as gift or money through a benefit program, how much of that money are they able to keep without it being

counted against their eligibility? Going out to eat, going to a movie, buying clothing, paying on potential burial, getting a ride to church. All of this fits under personal care allowance.

I would suggest that we raise that to $100. There was supposed to be an amendment drafted specifically to that effect to bring up here, but it didn't get translated between me and the department correctly. I could bring it up Monday or we could act on it now. The House is at $75 and I think we go with $100 across the board and I suspect we'll negotiate it down the middle when we get it over to the House.

Senator Krebsbach: The initial amount in there was $50/month. The governor had raised it to $60/month and the House amended it to $75/ month which is where we, on this side of the aisle, decided to leave it at the House rate.

Senator Mathern moved we increase to $100 in personal care allowance.

Senator Warner seconded.

Senator Mathern: This is for those who have no means of income. This would provide personal care like hair being done and eating out once a month. I'd like to see that at $100. IF we negotiate to the middle we'd be about the same as MN.

Senator Krauter: It's my understanding that not every individual has $100. Some may have $20, some maybe $30. So say that everyone is going to max out at $100. That's not the scenario. It is not that tough of a dollar amount that we can't negotiate.

Senator Mathern: That would be up to that amount and it's matched by federal dollars. This would be putting in general fund dollars and the federal dollars would then flow into that to make the entire amount.

Voice vote – failed. Motion did not carry.

Senator Robinson: – page 5 of notes in back. I would like to propose for our efforts going in to conference committee that for the Governor's Prevention and Advisory Council, we should go back to the level that was funded in the governor's budget and we use general fund dollars. We're talking the difference of $190,000. I have the privilege of serving on this council. We had enabling legislation two years ago. It's all about prevention and intervention in alcohol and substance abuse across the state. There are grants to communities and organizations that work to provide programming to try and reverse the negative trends we've been experiencing. The group is very broad based; Human Services, Highway patrol, judiciary, higher education. These dollars are an investment in the kids of our state. If we can impact the lives of one or two people, we have more than offset the cost of this program. I commend the active involvement on the part of the First Lady and she has done a lot in the area of tobacco and other substance abuse. Let's go into conference at the governors level – statement that the Senate is behind this program.

Chairman Holmberg: Is that a motion?

Senator Robinson: Yes. $200,000 – general funds.

Chairman Holmberg: Is that $200,000 in addition to the $10,000?

Senator Robinson: No. I would move $190,000 in addition, but the funding source would be general fund dollars.

Chairman Holmberg: Where's the other $10,000 coming from?

Senator Kilzer: That comes from the community health trust fund.

Roxanne Woeste: These grants are currently, for this biennium 2007-09, from the community health trust fund. There will be no money in that fund for 09-11 for this particular program. The governor recommended $200,000 from the general fund. That money was removed by the

House. The Senate subcommittee added back in $10,000 and the motion back on the floor is to add back in $190,000 to get to $200,000 recommended by the governor's budget.

Chairman Holmberg: All in favor of the amendment say "Aye".

Voice vote carried.

Senator Christmann asked about global behavioral health.

Brenda Weisz: Labelled this for capacity issues and explained the program.

Senator Christmann handed out amendments 98013.0207 – see attached #2 and explained them as they related to child abuse investigations. He stated that a parent was accused by social services that his child had abused another child. Social Services ended up putting him on a child abuse & neglect registry. That meant no participation in coaching kids, etc. He appealed it and was denied, but ultimately got the court to overturn the ruling and get him off the registry. The interviews that took place apparently provided the evidence that placed him on the registry, but he could never see them because it was basically notes that someone had taken. He spent a year on the registry and as most of you know, in a small town, the word of things like that spread fast and then when you get taken off the registry, word of that, if it moves at all, moves slow. At best, people hear that there wasn't sufficient evidence. What I believe needs to happen here is when we interview these children in a situation where the interview might be used as evidence against someone, they ought to be taped so that someone can access that tape to provide for their own defense. That's basically what this does. Originally this would have required that the interview be video recorded, but if that wasn't possible to at least audio record it. After talking to some lawyers yesterday, the flaw is that a very good case against someone where something definitely happened, could be thrown out because the tape recorder malfunctioned. This amendment says they have to try to tape it whenever possible. I'm bringing this up with the department here because I respect their

views and they are professionals. They feel that taping could cause kids not to speak out. I respect that, but frankly I don't think there's that much difference in a child's view between being taped as opposed to having someone in the room taking good notes. What little chance there is for that to be an intimidating factor more so than the note taking I think is more than offset by the fact that we need to be able to let people defend themselves.

Senator Christmann moved do pass on amendment .0207.

V. Chair Bowman seconded.

Chairman Holmberg: What is "accordance with section 50-25.1-11"? What are the specifics of that?

Senator Warner: It's the privacy laws.

Chairman Holmberg: These things would be private. They would not be public record.

Senator Seymour: This scares me because it reminds me of the Nixon tapes. They're going to come back and haunt this child someday. In other words, we have this permanent record. I'm not worried about the person being accused. I'm worried about the child that 20 years later a movie shows up.

Senator Christmann: I'm worried about both of them. In this case, things were thrown out because there was insufficient evidence. There were no tapes. Imagine if it really happened and now the case was thrown out because there was insufficient evidence.

Voice vote – carried.

Senator Warner passed out amendment .0208 and explained it. This amendment takes 6-6 which was previously approved by the House and raises it to 7-7-$2. I'm asking this so there is a distinction between the Senate and the House versions. There are two changes in the bill as it stands and this amount would become an item of discussion. Perhaps the 7-7+$2 would be

considered an extravagance, but at least it's a distinction between what the House passed and it would become an item to debate between the conference committees.

Senator Mathern: Remind everyone that the 7-7 increase is the executive budget and I think we should go to that as we go to conference.

Senator Kilzer: A lot of economic changes have occurred since the budget was put together last fall. 7-7-2 may be needed but it's out of line with economic times.

Senator Robinson: I'll support this, but we're turning down people in nursing homes because there is no staff. Not a good trend when we can't staff nursing homes.

Senator Mathern: We can add 7-7 and still, in the entire budget, would still be below the executive budget. The entire budget we're talking about is roughly $11 M from the executive budget and includes a $30 M turn back that we weren't expecting. We can do this and go to House and say our version of HB 1012 is less money than was recommended by the executive budget.

Senator Krauter: Page 2 of amendments. We're $11 M below where the House is at and we're probably about $41 M below the governor's budget. The dollars are there, the economic times may have changed, but when I look at the reduction of the permanent oil trust fund – almost 50%, we're still at a $500,000. The revenues are here to support the governor's budget to do the 7-7-$2. We can be conservative on our conservative numbers and still have positive numbers at the end of the day. I think there's dollars to do this.

Senator Lindaas: My district lies between large metropolitan areas and there are three nursing homes in the area. Nursing home administrators across the state say there are other employment opportunities and so people go from nursing homes to work elsewhere. The competition is pretty fierce. It's been a real struggle for staffing. Let's do this $2 increase and through and put this up where it should be.

Senator Fischer: I intend to resist motion. My emails say they are happy with 6-6-1. It's an increase from the 5-4. If they realize that dollar is $817,000. The concerns were lower rates.

Senator Warner: Economy changing and unavailability of labor – I think we've seen economy become so affluent that people are moving away from this type of work. Oil patch wages are higher, so it's hard to find staff.

Senator Kilzer: FMAP is extremely important and should be paid attention to. With stimulus package at $66 M that is available and will be used for the upcoming biennium. It's not going to be available for the 11-13 biennium, so we need to watch what we're doing here because if FMAP takes a double drop, we'll be in trouble down the road.

Senator Mathern: It's not clear. This budget does not take in an extra $66M in FMAP and say there's nothing available for next time. We're actually socking away a lot of money. The general fund will be going up because of what we have done in this department. The FMAP has been taken into this budget to replace what was anticipated to be general fund dollar use by that amount in section 2 & 3. That money that we thought we were going to spend is now set aside for this use in the future. This increase doesn't mean that we haven't thought of the future. Some think we should have spent that because it came in stimulus dollars. Every dollar that we thought the federal government would not object to us moving over, we actually spent this area of general fund and then moved the general fund dollars over to save.

Chairman Holmberg: Thank you very much. We have a motion and will call the roll on raising it to 7-7-$2 an hour.

A Roll Call vote was taken. Yea: 6 Nay: 8 Absent: 0

Amendment failed.

Senator Warner moved Do Pass as Amended on HB 1012.

Senator Kilzer seconded.

A Roll Call vote was taken. Yea: 14 Nay: 0 Absent: 0

Senator Kilzer will carry the bill.

Chairman Holmberg closed the hearing on HB 1012.

April 7, 2009 1

Mathern amendment

PROPOSED AMENDMENT TO HOUSE BILL NO. 1012

Page 1, line 2, after "sections" insert "23-04-05,"

Page 1, line 3, after "to" insert "requiring a screening prior to admission or readmission to the developmental center at westwood park, Grafton,"

Page 4, line 10, after the second period, insert:

"Section 23-04-05 of the North Dakota Century Code is amended and reenacted as follows:

25-04-05. Qualifications for admission to state facility - ~~Temporary~~ Screening required prior to admission or readmission - Educational or related services without charge for persons twenty-one years of age and under.

1. The superintendent may admit a person to the developmental center at westwood park, Grafton when all of the following conditions have been met:
   a. Application for admission has been made on behalf of the person by a parent or guardian or the person or agency having legal custody, or by the person seeking admission, in accordance with procedures established by the department of human services.
   b. A comprehensive evaluation of the person has been made within three months of the date of application, a report of which has been filed with the superintendent and which, together with such other information or reviews as the department of human services may require, indicates to the superintendent's satisfaction that the person is eligible for admission to the developmental center at westwood park, Grafton.
   c. The person may be admitted without exceeding the resident capacity of the facility as specified in the professional standards adopted by the department of human services.

2. ~~The superintendent~~ No person may ~~admit~~ be admitted or readmitted to the developmental center at westwood park, Grafton, ~~temporarily for the purposes of observation, without commitment,~~ unless that person has undergone a screening process at the developmental center to determine whether the admission or readmission is appropriate. Length of stay criteria may be established under rules ~~as~~ the department of human services may adopt~~, any~~. Any person who is suspected of being able to benefit from the services offered at the center, may be screened to ascertain whether or not that person is actually a proper case for care, treatment, and training ~~in~~ at the ~~state facility~~ developmental center. If in the opinion of the superintendent the person ~~temporarily admitted to the developmental center at westwood park, Grafton~~ screened under this subsection is a proper subject for institutional care, treatment, and training at the developmental center, that person may remain as a voluntary resident at ~~such~~ the center at the discretion of the superintendent if all other conditions for admission required by this section are met.

3. Notwithstanding any other provision of this chapter, no handicapped patient, twenty-one years of age or under, or the estate or the parent of such patient, may be charged for educational or related services provided at the developmental center at westwood park, Grafton. Except as provided in subsection 4, the department of human services has prior claim on all benefits accruing to such patients for medical and medically related services under entitlement from the federal government, medical or hospital insurance contracts, workforce safety and insurance, or medical care and disability programs. For purposes of this subsection, "related services" means transportation and such developmental, corrective, and other supportive services, as determined by the department of public instruction, as are required to assist a handicapped

patient to benefit from special education. The cost of related services other than medical and medically related services must be paid by the developmental center at westwood park, Grafton, the school district of residence of the handicapped child, and other appropriate state agencies and political subdivisions of this state. The department of public instruction, the department of human services, the school district of residence, and other appropriate state agencies and political subdivisions, as determined by the department of public instruction, shall determine and agree to that portion of related services, other than medical and medically related services, for which each agency and political subdivision is liable. The department of public instruction may adopt rules necessary to implement this section.

4. Parents of a handicapped patient, twenty-one years of age or under, are not required to file, assist in filing, agree to filing, or assign an insurance claim when filing the claim would pose a realistic threat that the parents would suffer a financial loss not incurred by similarly situated parents of nonhandicapped children. Financial losses do not include incidental costs such as the time needed to file or assist in filing an insurance claim or the postage needed to mail the claim. Financial losses include:
   a. A decrease in available lifetime coverage or any other benefit under an insurance policy.
   b. An increase in premiums or the discontinuation of a policy.
   c. An out-of-pocket expense such as the payment of a deductible amount incurred in filing a claim unless the developmental center pays or waives the out-of-pocket expense."

SECTION 6. AMENDMENT."

Page 5, line 1, replace "**6**" with "**7**"

Page 5, line 18, replace "**7**" with "**8**"

Renumber accordingly

25-04-05. Qualifications for admission to state facility - ~~Temporary~~ Screening required prior to admission or readmission - Educational or related services without charge for persons twenty-one years of age and under.

1. The superintendent may admit a person to the developmental center at westwood park, Grafton when all of the following conditions have been met:
   a. Application for admission has been made on behalf of the person by a parent or guardian or the person or agency having legal custody, or by the person seeking admission, in accordance with procedures established by the department of human services.
   b. A comprehensive evaluation of the person has been made within three months of the date of application, a report of which has been filed with the superintendent and which, together with such other information or reviews as the department of human services may require, indicates to the superintendent's satisfaction that the person is eligible for admission to the developmental center at westwood park, Grafton.
   c. The person may be admitted without exceeding the resident capacity of the facility as specified in the professional standards adopted by the department of human services.
2. ~~The superintendent~~ No person may ~~admit~~ be admitted or readmitted to the developmental center at westwood park, Grafton, ~~temporarily for the purposes of observation, without commitment,~~ unless it is first established that the person cannot be appropriately served through community-based programs and services in the person's home community, or as close to as possible. If admission is sought because programs or services are not available in the person's home community, the programs and services necessary to allow for education or related services to be provided in the student's home community must be identified and a plan to develop those programs and services shall be created and fully implemented by the appropriate agency no later than the next school year. Any person recommended for admission may not be admitted unless that person has undergone a screening process at the developmental center, with the involvement of local and regional staff, to determine whether the admission or readmission is appropriate. Length of stay criteria may be established under rules as the department of human services may adopt, ~~any~~ but no person may remain. Any person who is suspected of being able to benefit from the services offered at the center, to ascertain whether or not that person is actually a proper case for care, treatment, and training ~~in~~ at the ~~state facility~~ developmental center. If in the opinion of the ~~superintendent~~ interdisciplinary team, the person temporarily ~~admitted to the developmental center at westwood park, Grafton~~ screened under this subsection is a proper subject for institutional

care, treatment, and training at the developmental center, that person may remain as a voluntary resident at ~~such~~ the center at the discretion of the superintendent on a temporay basis only until the community based services required by this section are in place if all other conditions for admission required by this section are met.

3. Notwithstanding any other provision of this chapter, no handicapped patient, twenty-one years of age or under, or the estate or the parent of such patient, may be charged for educational or related services provided at the developmental center at westwood park, Grafton. Except as provided in subsection 4, the department of human services has prior claim on all benefits accruing to such patients for medical and medically related services under entitlement from the federal government, medical or hospital insurance contracts, workforce safety and insurance, or medical care and disability programs. For purposes of this subsection, "related services" means transportation and such developmental, corrective, and other supportive services, as determined by the department of public instruction, as are required to assist a handicapped patient to benefit from special education. The cost of related services other than medical and medically related services must be paid by the developmental center at westwood park, Grafton, the school district of residence of the handicapped child, and other appropriate state agencies and political subdivisions of this state. The department of public instruction, the department of human services, the school district of residence, and other appropriate state agencies and political subdivisions, as determined by the department of public instruction, shall determine and agree to that portion of related services, other than medical and medically related services, for which each agency and political subdivision is liable. The department of public instruction may adopt rules necessary to implement this section.
4. Parents of a handicapped patient, twenty-one years of age or under, are not required to file, assist in filing, agree to filing, or assign an insurance claim when filing the claim would pose a realistic threat that the parents would suffer a financial loss not incurred by similarly situated parents of nonhandicapped children. Financial losses do not include incidental costs such as the time needed to file or assist in filing an insurance claim or the postage needed to mail the claim. Financial losses include:
   a. A decrease in available lifetime coverage or any other benefit under an insurance policy.
   b. An increase in premiums or the discontinuation of a policy.
   c. An out-of-pocket expense such as the payment of a deductible amount incurred in filing a claim unless the developmental center pays or waives the out-of-pocket expense.

Page 3, after line 6, insert:

"**SECTION 2. APPROPRIATION - FEDERAL FISCAL STIMULUS FUNDS - ADDITIONAL FUNDING APPROVAL.** The funds provided in this section, or so much of the funds as may be necessary, are appropriated from federal funds made available to the state under the federal American Recovery and Reinvestment Act of 2009, not otherwise appropriated, to the department of human services for the period beginning with the effective date of this Act and ending June 30, 2011, as follows:

Federal medical assistance percentage	$66,500,000
Elderly nutrition services	485,000
Child support incentive matching funds	3,200,000
Rehabilitation services and disability assistance and independent living	2,043,000
Individuals with Disabilities Education Act - Part C	2,140,000
Supplemental nutrition assistance program benefits and administration	9,874,747
Senior employment program	143,288

Older blind	3,170
Total federal funds	$84,389,205

The department of human services may seek emergency commission and budget section approval under chapter 54-16 for authority to spend any additional federal funds received under the federal American Recovery and Reinvestment Act of 2009 in excess of the amounts appropriated in this section for the period beginning with the effective date of this Act and ending June 30, 2011.

Any federal funds appropriated under this section, except for the funding of $66,500,000 relating to the federal medical assistance percentage and funding of $2,763,082 of child support incentive matching funds, are not a part of the agency's 2011-13 base budget. Any program expenditures made with these funds will not be replaced with state funds after the federal American Recovery and Reinvestment Act funds are no longer available.

SECTION 3. GENERAL FUND TRANSFER TO BUDGET STABILIZATION FUND - EXCEPTION - USE OF GENERAL FUND AMOUNTS. Notwithstanding section 54-27.2-02, the state treasurer and the office of management and budget may not include in the amount used to determine general fund transfers to the budget stabilization fund at the end of the 2007-09 biennium under chapter 54-27.2 any general fund amounts resulting from the increased federal share of medical assistance payments resulting from federal medical assistance percentage changes under the federal American Recovery and Reinvestment Act of 2009. The state treasurer and the office of management and budget shall separately account for these amounts and 2009-11 biennium general fund amounts resulting from federal medical assistance percentage changes under the federal American Recovery and Reinvestment Act of 2009 and use these amounts to defray the expenses of continuing program costs of the department of human services from the general fund for the biennium beginning July 1, 2009, and ending June 30, 2011, as follows:

Inflationary increases for human service providers	$32,564,450
Rate increases for selected medicaid services due to rebasing	21,788,982
Rate increases for nursing homes due to property limit changes	3,000,000
Wage increases for employees of nursing homes, basic care, and developmental disabilities services providers and qualified service providers	15,867,327
Global behavioral health initiative	4,088,873
Salary increases for department of human services employees	18,949,591
Total	$96,259,223

SECTION 4. CONTINGENT APPROPRIATION. If section 23 of this Act becomes effective, there is appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, the sum of $964,031, or so much of the sum as may be necessary, and from special funds derived from federal funds, the sum of $1,582,480, or so much of the sum as may be necessary, to the department of human services for the purpose of defraying the expenses of implementing the expansion of medical assistance benefits for pregnant women as provided for in section 23 of this Act for the biennium beginning July 1, 2009, and ending June 30, 2011."

Page 3, line 19, replace "2,793,692" with "3,943,692"

Page 3, line 21, replace "3,146,298" with "4,296,298"

Page 4, remove lines 22 through 29

Page 5, line 1, replace "$14,739,128" with "$22,576,412" and replace "$4,950,451" with "$7,927,252"

Page 5, line 2, replace "$8,788,677" with "$13,649,160"

Page 5, line 4, replace "each employee earning a salary that is less than the eightieth" with "employees beginning July 1, 2009. Basic care and skilled nursing care facilities may not use the money received under this section for providing salary and benefit enhancements to administrators or directors of nursing."

Page 5, remove lines 5 and 6

Page 5, line 9, replace "$18,929,151" with "$21,639,106" and replace "$7,000,000" with "$7,086,807"

Page 5, line 10, replace "$11,929,151" with "$14,552,299"

Page 5, line 11, replace "each employee earning a" with "employees beginning July 1, 2009. Developmental disabilities service providers may not use the money received under this section for providing salary and benefit enhancements to administrators."

Page 5, replace lines 12 and 13 with:

"**SECTION 12. LEGISLATIVE INTENT - MEDICAID PROVIDER PAYMENTS.** It is the intent of the legislative assembly that the department of human services establish a goal to set medicaid payments for hospitals, physicians, chiropractors, and ambulances at 100 percent of cost.

SECTION 13. SUPPLEMENTAL PAYMENT - CRITICAL ACCESS HOSPITALS. The grants - medical assistance line item in subdivision 2 of section 1 of this Act includes the sum of $400,000 from the general fund that the department of human services shall use for providing a supplemental payment to eligible critical access hospitals. A critical access hospital is eligible for a payment under this section only if its percentage of medical payments exceeds 25 percent of its total annual revenue in its most recent audited financial statements and is located in a city with a population that does not exceed 1,450. The department shall seek federal medicaid funding to provide a portion of the $400,000 supplement payment. If federal medicaid funding is not available for a portion of the payment, the department may spend the $400,000 from the general fund for making the supplemental payment only if the action will not result in a reduction in federal medicaid funding to the state.

SECTION 14. LEGISLATIVE INTENT - DEVELOPMENTAL DISABILITIES MEDICALLY FRAGILE. It is the intent of the sixty-first legislative assembly that the additional funding for severely medically fragile and behaviorally challenged individuals be provided to the Anne Carlsen Center and other similar private providers serving individuals with developmental disabilities in proportion to the respective severity of the critical medical and behavioral needs of each individual served by these providers. The funding is to become part of each provider's annual base budget and is not to reduce each provider's entitlement to additional critical needs staffing in future ratesetting by the department.

SECTION 15. LEGISLATIVE INTENT - DEMENTIA CARE SERVICES. It is the intent of the sixty-first legislative assembly that the department of human services integrate the dementia care services program established in House Bill No. 1043 with the home and community-based care services programs of the department.

SECTION 16. LEGISLATIVE COUNCIL STUDY - RETURNING VETERANS AND THEIR FAMILIES. During the 2009-11 interim, the legislative council shall consider studying the impact of veterans who are returning from wars and their families on the state's human services system. The study must include an analysis of the

estimated cost of providing human service-related services to the returning veterans and their families, including treatment for traumatic brain injury and mental illness. The legislative council shall report its findings and recommendations, together with any legislation required to implement the recommendations, to the sixty-second legislative assembly.

SECTION 17. LEGISLATIVE INTENT - HOME TELEMONITORING SERVICES. It is the intent of the sixty-first legislative assembly that the department of human services consider the changes necessary to reimburse home telemonitoring services under the medicaid program at the same rate as skilled nursing visits provided in person.

SECTION 18. UNSPENT 2007-09 BIENNIUM - GENERAL FUND APPROPRIATIONS - EXCEPTION. The amount of $270,000 of the $3,100,000 for a sexual offender treatment addition at the state hospital appropriated in subdivision 3 of section 3 of 2007 Senate Bill No. 2012 is not subject to section 54-44.1-11 and may be spent during the 2009-11 biennium for completing roof repair at the state hospital."

Page 7, after line 21, insert:

"**SECTION 21. AMENDMENT.** Section 50-06-29 of the North Dakota Century Code is amended and reenacted as follows:

50-06-29. ~~Application for aging~~ Aging and disability resource ~~center funding~~ link - No wrong door model. ~~No later than December 31, 2007, the~~ The department of human services, within the limits of legislative appropriation, shall ~~seek federal funds for the planning~~ plan and ~~implementation of~~ implement an aging and disability resource ~~center for~~ link, "no wrong door" model, initially in up to two regions of the state. The department also may provide additional services or may provide services in multiple regions as required or allowed by any source providing funds for these purposes. The initial resource ~~center will be a single point of information program at the community level which~~ link model will help people residing in the state make informed decisions about the full range of long-term care service and support options, including both institutional and home and community-based care~~, and which~~. Participating access points will provide unbiased information and assistance to individuals needing either public or private resources, to professionals seeking assistance on behalf of their clients, and to individuals planning for their future long-term care needs. Upon receipt of ~~federal funds~~ funding, the department of human services may establish the initial aging and disability resource ~~center~~ link, "no wrong door" model, or it may request bids and award ~~a contract~~ contracts for ~~the provision of this service~~ training and coordination to implement the model utilizing existing community-based access points and for the provision of services. The ~~duties of the aging and disability resource center must include all duties~~ initial model and any subsequent model or variation of the model, as well as any additional locations will provide services consistent with those required ~~to receive federal funds, including~~ by the 2006 amendments to the Older Americans Act [Pub. L. 109-365; 120 Stat. 2522; 42 U.S.C. 3001 et seq.], providing information about the full range of long-term care service and support options available in the state to assure that consumers may make informed decisions about their care. The resource ~~center~~ link's participating access points must be free from a conflict of interest which would inappropriately influence or bias the actions of a contractor, staff member, board member, or volunteer of the ~~resource center~~ access points to limit the information given to a consumer to steer the consumer to services that may also be provided by the ~~resource center~~ access points.

SECTION 22. AMENDMENT. Section 50-24.1-02.6 of the North Dakota Century Code is amended and reenacted as follows:

~~50-24.1-02.6. (Contingent effective date - See note) Medical assistance benefits - Eligibility criteria.~~

~~1. The department shall provide medical assistance benefits to otherwise eligible persons who are:~~

~~a. Medically needy persons who have countable income that does not exceed an amount determined under subsection 2; and~~

~~b. Minors who have countable income that does not exceed an amount determined under subsection 3.~~

~~2. The department of human services shall establish an income level for medically needy persons at an amount, no less than required by federal law, that, consistent with the requirements of subsection 3, is the greatest income level achievable without exceeding legislative appropriations for that purpose.~~

~~3. The department of human services shall establish income levels for minors, based on the age of the minors, at amounts, no less than required by federal law, that provide an income level for all minors born before September 30, 1983, equal to one hundred percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined and that do not exceed legislative appropriations for that purpose.~~

~~4. The department of human services shall provide medical assistance benefits to children and families coverage groups and pregnant women without consideration of assets.~~

~~(Contingent effective date - See note)~~ Medical assistance benefits - Eligibility criteria.

1. The department shall provide medical assistance benefits to otherwise eligible persons who are:

   a. Medically needy persons who have countable income that does not exceed an amount determined under subsection 2; and

   b. Minors who have countable income that does not exceed an amount determined under subsection 3.

2. The department of human services shall establish an income level for medically needy persons at an amount, no less than required by federal law, that, consistent with the requirements of subsection 3, is the greatest income level achievable without exceeding legislative appropriations for that purpose.

3. The department of human services shall establish income levels for minors, based on the age of the minors, at amounts, no less than required by federal law~~, that provide an income level for all individuals from birth through age eighteen equal to one hundred thirty-three percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined~~.

4. The department of human services shall provide medical assistance benefits to children and families coverage groups and pregnant women without consideration of assets.

SECTION 23. AMENDMENT. Section 50-24.1-02.6 of the North Dakota Century Code is amended and reenacted as follows:

~~**50-24.1-02.6. (Contingent effective date - See note) Medical assistance benefits - Eligibility criteria.**~~

~~1. The department shall provide medical assistance benefits to otherwise eligible persons who are:~~

~~a. Medically needy persons who have countable income that does not exceed an amount determined under subsection 2; and~~

~~b. Minors who have countable income that does not exceed an amount determined under subsection 3.~~

~~2. The department of human services shall establish an income level for medically needy persons at an amount, no less than required by federal law, that, consistent with the requirements of subsection 3, is the greatest income level achievable without exceeding legislative appropriations for that purpose.~~

~~3. The department of human services shall establish income levels for minors, based on the age of the minors, at amounts, no less than required by federal law, that provide an income level for all minors born before September 30, 1983, equal to one hundred percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined and that do not exceed legislative appropriations for that purpose.~~

~~4. The department of human services shall provide medical assistance benefits to children and families coverage groups and pregnant women without consideration of assets.~~

~~(Contingent effective date - See note)~~ Medical assistance benefits - Eligibility criteria.

1. The department shall provide medical assistance benefits to otherwise eligible persons who are:

   a. Medically needy persons who have countable income that does not exceed an amount determined under subsection 2; and

   b. Minors who have countable income that does not exceed an amount determined under subsection 3.

2. The department of human services shall establish an income level for medically needy persons at an amount, no less than required by federal law, that, consistent with the requirements of ~~subsection~~ subsections 3 and 4, is the greatest income level achievable without exceeding legislative appropriations for that purpose.

3. The department of human services shall establish income levels for minors, based on the age of the minors, at amounts, no less than required by federal law~~, that provide an income level for all individuals from birth through age eighteen equal to one hundred thirty-three percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined~~.

4. The department of human services shall establish income levels for pregnant women at an amount, no less than required by federal law, equal

to one hundred sixty-five percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined.

5. The department of human services shall provide medical assistance benefits to children and families coverage groups and pregnant women without consideration of assets."

Page 8, after line 21, insert:

"**SECTION 26. REPEAL.** Section 4 of chapter 422 of the 2007 Session Laws is repealed.

SECTION 27. EFFECTIVE DATE. Section 23 of this Act becomes effective on the date the department of human services certifies to the legislative council that the department has received approval to claim federal financial participation to expand medical assistance benefits to pregnant women as provided for in section 1 of this Act, but may not become effective earlier than January 1, 2010.

SECTION 28. EMERGENCY. Sections 2 and 18 of this Act are declared to be an emergency measure."

Renumber accordingly

Page 3, after line 6, insert:

"**SECTION 2. APPROPRIATION - FEDERAL FISCAL STIMULUS FUNDS - ADDITIONAL FUNDING APPROVAL.** The funds provided in this section, or so much of the funds as may be necessary, are appropriated from federal funds made available to the state under the federal American Recovery and Reinvestment Act of 2009, not otherwise appropriated, to the department of human services for the period beginning with the effective date of this Act and ending June 30, 2011, as follows:

Federal medical assistance percentage	$66,500,000
Elderly nutrition services	485,000
Child support incentive matching funds	3,200,000
Rehabilitation services and disability assistance and independent living	2,043,000
Individuals With Disabilities Education Act - Part C	2,140,000
Supplemental nutrition assistance program benefits	9,874,747

and administration	
Senior employment program	143,288
Older blind	3,170
Total federal funds	$84,389,205

The department of human services may seek emergency commission and budget section approval under chapter 54-16 for authority to spend any additional federal funds received under the federal American Recovery and Reinvestment Act of 2009 in excess of the amounts appropriated in this section for the period beginning with the effective date of this Act and ending June 30, 2011.

Any federal funds appropriated under this section, except for the funding of $66,500,000 relating to the federal medical assistance percentage and funding of $2,763,082 of child support incentive matching funds, are not a part of the agency's 2011-13 base budget. Any program expenditures made with these funds will not be replaced with state funds after the federal American Recovery and Reinvestment Act funds are no longer available.

SECTION 3. GENERAL FUND TRANSFER TO BUDGET STABILIZATION FUND - EXCEPTION - USE OF GENERAL FUND AMOUNTS. Notwithstanding section 54-27.2-02, the state treasurer and the office of management and budget may not include in the amount used to determine general fund transfers to the budget stabilization fund at the end of the 2007-09 biennium under chapter 54-27.2 any general fund amounts resulting from the increased federal share of medical assistance payments resulting from federal medical assistance percentage changes under the federal American Recovery and Reinvestment Act of 2009. The state treasurer and the office of management and budget shall separately account for these amounts and 2009-11 biennium general fund amounts resulting from federal medical assistance percentage changes under the federal American Recovery and Reinvestment Act of 2009 and use these amounts to defray the expenses of continuing program costs of the department of human services from the general fund for the biennium beginning July 1, 2009, and ending June 30, 2011, as follows:

Inflationary increases for human service providers	$32,564,450
Rate increases for selected medicaid services due to rebasing	21,788,982
Rate increases for nursing homes due to property limit changes	3,000,000
Wage increases for employees of nursing homes, basic care, and developmental disabilities services providers and qualified service providers	15,867,327
Global behavioral health initiative	4,088,873
Salary increases for department of human services employees	18,949,591
Total	$96,259,223

SECTION 4. CONTINGENT APPROPRIATION. If section 23 of this Act becomes effective, there is appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, the sum of $964,031, or so much of the sum as may be necessary, and from special funds derived from federal funds, the sum of $1,582,480, or so much of the sum as may be necessary, to the department of human services for the purpose of defraying the expenses of implementing the expansion of medical assistance benefits for pregnant women as provided for in section 23 of this Act, for the biennium beginning July 1, 2009, and ending June 30, 2011."

Page 3, line 19, replace "2,793,692" with "3,943,692"

Page 3, line 21, replace "3,146,298" with "4,296,298"

Page 4, remove lines 22 through 29

Page 5, line 1, replace "$14,739,128" with "$22,576,412" and replace "$4,950,451" with "$7,927,252"

Page 5, line 2, replace "$8,788,677" with "$13,649,160"

Page 5, line 4, replace "each employee earning a salary that is less than the eightieth" with "employees beginning July 1, 2009. Basic care and skilled nursing care facilities may not use the money received under this section for providing salary and benefit enhancements to administrators or directors of nursing."

Page 5, remove lines 5 and 6

Page 5, line 9, replace "$18,929,151" with "$21,639,106" and replace "$7,000,000" with "$7,086,807"

Page 5, line 10, replace "$11,929,151" with "$14,552,299"

Page 5, line 11, replace "each employee earning a" with "employees beginning July 1, 2009. Developmental disabilities service providers may not use the money received under this section for providing salary and benefit enhancements to administrators."

Page 5, replace lines 12 and 13 with:

"**SECTION 12. LEGISLATIVE INTENT - MEDICAID PROVIDER PAYMENTS.** It is the intent of the legislative assembly that the department of human services establish a goal to set medicaid payments for hospitals, physicians, chiropractors, and ambulances at 100 percent of cost.

SECTION 13. SUPPLEMENTAL PAYMENT - CRITICAL ACCESS HOSPITALS. The grants - medical assistance line item in subdivision 2 of section 1 of this Act includes the sum of $400,000 from the general fund that the department of human services shall use for providing a supplemental payment to eligible critical access hospitals. A critical access hospital is eligible for a payment under this section only if its percentage of medical payments exceeds 25 percent of its total annual revenue in its most recent audited financial statements and is located in a city with a population that does not exceed 1,450. The department shall seek federal medicaid funding to provide a portion of the $400,000 supplement payment. If federal medicaid funding is not available for a portion of the payment, the department may spend the $400,000 from the general fund for making the supplemental payment only if the action will not result in a reduction in federal medicaid funding to the state.

SECTION 14. LEGISLATIVE INTENT - DEVELOPMENTAL DISABILITIES MEDICALLY FRAGILE. It is the intent of the sixty-first legislative assembly that the additional funding for severely medically fragile and behaviorally challenged individuals be provided to the Anne Carlsen center and other similar private providers serving individuals with developmental disabilities in proportion to the respective severity of the critical medical and behavioral needs of each individual served by these providers. The funding is to become part of each provider's annual base budget and is not to reduce each provider's entitlement to additional critical needs staffing in future ratesetting by the department.

SECTION 15. LEGISLATIVE INTENT - DEMENTIA CARE SERVICES. It is the intent of the sixty-first legislative assembly that the department of human services integrate the dementia care services program established in House Bill No. 1043 with the home and community-based care services programs of the department.

SECTION 16. LEGISLATIVE COUNCIL STUDY - RETURNING VETERANS AND THEIR FAMILIES. During the 2009-11 interim, the legislative council shall

consider studying the impact of veterans who are returning from wars and their families on the state's human services system. The study must include an analysis of the estimated cost of providing human service-related services to the returning veterans and their families, including treatment for traumatic brain injury and mental illness. The legislative council shall report its findings and recommendations, together with any legislation required to implement the recommendations, to the sixty-second legislative assembly.

SECTION 17. LEGISLATIVE INTENT - HOME TELEMONITORING SERVICES. It is the intent of the sixty-first legislative assembly that the department of human services consider the changes necessary to reimburse home telemonitoring services under the medicaid program at the same rate as skilled nursing visits provided in person.

SECTION 18. UNSPENT 2007-09 BIENNIUM - GENERAL FUND APPROPRIATIONS - EXCEPTION. The amount of $270,000 of the $3,100,000 for a sexual offender treatment addition at the state hospital appropriated in subdivision 3 of section 3 of 2007 Senate Bill No. 2012 is not subject to section 54-44.1-11 and may be spent during the 2009-11 biennium for completing roof repair at the state hospital."

Page 7, after line 21, insert:

"**SECTION 20. AMENDMENT.** Section 50-06-29 of the North Dakota Century Code is amended and reenacted as follows:

50-06-29. ~~Application for aging~~ Aging and disability resource ~~center funding~~ link - No wrong door model. ~~No later than December 31, 2007, the~~ The department of human services, within the limits of legislative appropriation, shall ~~seek federal funds for the planning~~ plan and ~~implementation of~~ implement an aging and disability resource ~~center for~~ link, "no wrong door" model, initially in up to two regions of the state. The department also may provide additional services or may provide services in multiple regions as required or allowed by any source providing funds for these purposes. The initial resource ~~center will be a single point of information program at the community level which~~ link model will help people residing in the state make informed decisions about the full range of long-term care service and support options, including both institutional and home and community-based care~~, and which~~. Participating access points will provide unbiased information and assistance to individuals needing either public or private resources, to professionals seeking assistance on behalf of their clients, and to individuals planning for their future long-term care needs. Upon receipt of ~~federal funds~~ funding, the department of human services may establish the initial aging and disability resource ~~center~~ link, "no wrong door" model, or it may request bids and award ~~a contract~~ contracts for ~~the provision of this service~~ training and coordination to implement the model utilizing existing community-based access points and for the provision of services. The ~~duties of the aging and disability resource center must include all duties~~ initial model and any subsequent model or variation of the model, as well as any additional locations will provide services consistent with those required ~~to receive federal funds, including~~ by the 2006 amendments to the Older Americans Act [Pub. L. 109-365; 120 Stat. 2522; 42 U.S.C. 3001 et seq.], providing information about the full range of long-term care service and support options available in the state to assure that consumers may make informed decisions about their care. The resource ~~center~~ link's participating access points must be free from a conflict of interest which would inappropriately influence or bias the actions of a contractor, staff member, board member, or volunteer of the ~~resource center~~ access points to limit the information given to a consumer to steer the consumer to services that may also be provided by the ~~resource center~~ access points.

SECTION 21. AMENDMENT. Section 50-24.1-02.6 of the North Dakota Century Code is amended and reenacted as follows:

~~50-24.1-02.6. (Contingent effective date - See note) Medical assistance benefits - Eligibility criteria.~~

~~1. The department shall provide medical assistance benefits to otherwise eligible persons who are:~~

~~a. Medically needy persons who have countable income that does not exceed an amount determined under subsection 2; and~~

~~b. Minors who have countable income that does not exceed an amount determined under subsection 3.~~

~~2. The department of human services shall establish an income level for medically needy persons at an amount, no less than required by federal law, that, consistent with the requirements of subsection 3, is the greatest income level achievable without exceeding legislative appropriations for that purpose.~~

~~3. The department of human services shall establish income levels for minors, based on the age of the minors, at amounts, no less than required by federal law, that provide an income level for all minors born before September 30, 1983, equal to one hundred percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined and that do not exceed legislative appropriations for that purpose.~~

~~4. The department of human services shall provide medical assistance benefits to children and families coverage groups and pregnant women without consideration of assets.~~

~~(Contingent effective date - See note)~~ Medical assistance benefits - Eligibility criteria.

1. The department shall provide medical assistance benefits to otherwise eligible persons who are:

   a. Medically needy persons who have countable income that does not exceed an amount determined under subsection 2; and

   b. Minors who have countable income that does not exceed an amount determined under subsection 3.

2. The department of human services shall establish an income level for medically needy persons at an amount, no less than required by federal law, that, consistent with the requirements of subsection 3, is the greatest income level achievable without exceeding legislative appropriations for that purpose.

3. The department of human services shall establish income levels for minors, based on the age of the minors, at amounts, no less than required by federal law~~, that provide an income level for all individuals from birth through age eighteen equal to one hundred thirty-three percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined~~.

4. The department of human services shall provide medical assistance benefits to children and families coverage groups and pregnant women without consideration of assets.

SECTION 22. AMENDMENT. Section 50-24.1-02.6 of the North Dakota Century Code is amended and reenacted as follows:

~~**50-24.1-02.6. (Contingent effective date - See note) Medical assistance benefits - Eligibility criteria.**~~

~~1. The department shall provide medical assistance benefits to otherwise eligible persons who are:~~

~~a. Medically needy persons who have countable income that does not exceed an amount determined under subsection 2; and~~

~~b. Minors who have countable income that does not exceed an amount determined under subsection 3.~~

~~2. The department of human services shall establish an income level for medically needy persons at an amount, no less than required by federal law, that, consistent with the requirements of subsection 3, is the greatest income level achievable without exceeding legislative appropriations for that purpose.~~

~~3. The department of human services shall establish income levels for minors, based on the age of the minors, at amounts, no less than required by federal law, that provide an income level for all minors born before September 30, 1983, equal to one hundred percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined and that do not exceed legislative appropriations for that purpose.~~

~~4. The department of human services shall provide medical assistance benefits to children and families coverage groups and pregnant women without consideration of assets.~~

~~(Contingent effective date - See note)~~ Medical assistance benefits - Eligibility criteria.

1. The department shall provide medical assistance benefits to otherwise eligible persons who are:

   a. Medically needy persons who have countable income that does not exceed an amount determined under subsection 2; and

   b. Minors who have countable income that does not exceed an amount determined under subsection 3.

2. The department of human services shall establish an income level for medically needy persons at an amount, no less than required by federal law, that, consistent with the requirements of ~~subsection~~ subsections 3 and 4, is the greatest income level achievable without exceeding legislative appropriations for that purpose.

3. The department of human services shall establish income levels for minors, based on the age of the minors, at amounts, no less than required by federal law~~, that provide an income level for all individuals from birth through age eighteen equal to one hundred thirty-three percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined~~.

4. The department of human services shall establish income levels for pregnant women at an amount, no less than required by federal law, equal

to one hundred sixty-five percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined.

5. The department of human services shall provide medical assistance benefits to children and families coverage groups and pregnant women without consideration of assets."

Page 7, after line 29, insert:

"**SECTION 24.** A new subsection to section 50-25.1-05 of the North Dakota Century Code is created and enacted as follows:

The department shall adopt rules that require all interviews of the alleged abused or neglected child conducted under this section to be audio-recorded or video-recorded, when possible. The rules must provide that a recording may not be disclosed except in accordance with section 50-25.1-11."

Page 8, after line 21, insert:

"**SECTION 26. REPEAL.** Section 4 of chapter 422 of the 2007 Session Laws is repealed.

SECTION 27. EFFECTIVE DATE. Section 23 of this Act becomes effective on the date the department of human services certifies to the legislative council that the department has received approval to claim federal financial participation to expand medical assistance benefits to pregnant women as provided for in section 1 of this Act, but may not become effective earlier than January 1, 2010.

SECTION 28. EMERGENCY. Sections 2 and 18 of this Act are declared to be an emergency measure."

Renumber accordingly

STATEMENT OF PURPOSE OF AMENDMENT - LC 98013.0209 FN 4

A copy of the statement of purpose of amendment is attached.

STATEMENT OF PURPOSE OF AMENDMENT:

House Bill No. 1012 - Summary of Senate Action

Page 3, after line 6, insert:

"**SECTION 2. APPROPRIATION - FEDERAL FISCAL STIMULUS FUNDS - ADDITIONAL FUNDING APPROVAL.** The funds provided in this section, or so much of the funds as may be necessary, are appropriated from federal funds made available to the state under the federal American Recovery and Reinvestment Act of 2009, not otherwise appropriated, to the department of human services for the period beginning with the effective date of this Act and ending June 30, 2011, as follows:

Federal medical assistance percentage	$66,500,000
Elderly nutrition services	485,000

Child support incentive matching funds	3,200,000
Rehabilitation services and disability assistance and independent living	2,043,000
Individuals With Disabilities Education Act - Part C	2,140,000
Supplemental nutrition assistance program benefits and administration	9,874,747
Senior employment program	143,288
Older blind	3,170
Total federal funds	$84,389,205

The department of human services may seek emergency commission and budget section approval under chapter 54-16 for authority to spend any additional federal funds received under the federal American Recovery and Reinvestment Act of 2009 in excess of the amounts appropriated in this section for the period beginning with the effective date of this Act and ending June 30, 2011.

Any federal funds appropriated under this section, except for the funding of $66,500,000 relating to the federal medical assistance percentage and funding of $2,763,082 of child support incentive matching funds, are not a part of the agency's 2011-13 base budget. Any program expenditures made with these funds will not be replaced with state funds after the federal American Recovery and Reinvestment Act funds are no longer available.

SECTION 3. GENERAL FUND TRANSFER TO BUDGET STABILIZATION FUND - EXCEPTION - USE OF GENERAL FUND AMOUNTS. Notwithstanding section 54-27.2-02, the state treasurer and the office of management and budget may not include in the amount used to determine general fund transfers to the budget stabilization fund at the end of the 2007-09 biennium under chapter 54-27.2 any general fund amounts resulting from the increased federal share of medical assistance payments resulting from federal medical assistance percentage changes under the federal American Recovery and Reinvestment Act of 2009. The state treasurer and the office of management and budget shall separately account for these amounts and 2009-11 biennium general fund amounts resulting from federal medical assistance percentage changes under the federal American Recovery and Reinvestment Act of 2009 and use these amounts to defray the expenses of continuing program costs of the department of human services from the general fund for the biennium beginning July 1, 2009, and ending June 30, 2011, as follows:

Inflationary increases for human service providers	$32,564,450
Rate increases for selected medicaid services due to rebasing	21,788,982
Rate increases for nursing homes due to property limit changes	3,000,000
Wage increases for employees of nursing homes, basic care, and developmental disabilities services providers and qualified service providers	15,867,327
Global behavioral health initiative	4,088,873
Salary increases for department of human services employees	18,949,591
Total	$96,259,223

SECTION 4. CONTINGENT APPROPRIATION. If section 23 of this Act becomes effective, there is appropriated out of any moneys in the general fund in the state treasury, not otherwise appropriated, the sum of $964,031, or so much of the sum as may be necessary, and from special funds derived from federal funds, the sum of $1,582,480, or so much of the sum as may be necessary, to the department of human services for the purpose of defraying the expenses of implementing the expansion of medical assistance benefits for pregnant women as provided for in section 23 of this Act, for the biennium beginning July 1, 2009, and ending June 30, 2011."

Page 3, line 19, replace "2,793,692" with "3,943,692"

Page 3, line 21, replace "3,146,298" with "4,296,298"

Page 4, remove lines 22 through 29

Page 5, line 1, replace "$14,739,128" with "$22,576,412" and replace "$4,950,451" with "$7,927,252"

Page 5, line 2, replace "$8,788,677" with "$13,649,160"

Page 5, line 4, replace "each employee earning a salary that is less than the eightieth" with "employees beginning July 1, 2009. Basic care and skilled nursing care facilities may not use the money received under this section for providing salary and benefit enhancements to administrators or directors of nursing."

Page 5, remove lines 5 and 6

Page 5, line 9, replace "$18,929,151" with "$21,639,106" and replace "$7,000,000" with "$7,086,807"

Page 5, line 10, replace "$11,929,151" with "$14,552,299"

Page 5, line 11, replace "each employee earning a" with "employees beginning July 1, 2009. Developmental disabilities service providers may not use the money received under this section for providing salary and benefit enhancements to administrators."

Page 5, replace lines 12 and 13 with:

"**SECTION 12. LEGISLATIVE INTENT - MEDICAID PROVIDER PAYMENTS.** It is the intent of the legislative assembly that the department of human services establish a goal to set medicaid payments for hospitals, physicians, chiropractors, and ambulances at 100 percent of cost.

SECTION 13. SUPPLEMENTAL PAYMENT - CRITICAL ACCESS HOSPITALS. The grants - medical assistance line item in subdivision 2 of section 1 of this Act includes the sum of $400,000 from the general fund that the department of human services shall use for providing a supplemental payment to eligible critical access hospitals. A critical access hospital is eligible for a payment under this section only if its percentage of medical payments exceeds 25 percent of its total annual revenue in its most recent audited financial statements and is located in a city with a population that does not exceed 1,450. The department shall seek federal medicaid funding to provide a portion of the $400,000 supplement payment. If federal medicaid funding is not available for a portion of the payment, the department may spend the $400,000 from the general fund for making the supplemental payment only if the action will not result in a reduction in federal medicaid funding to the state.

SECTION 14. LEGISLATIVE INTENT - DEVELOPMENTAL DISABILITIES MEDICALLY FRAGILE. It is the intent of the sixty-first legislative assembly that the additional funding for severely medically fragile and behaviorally challenged individuals be provided to the Anne Carlsen center and other similar private providers serving individuals with developmental disabilities in proportion to the respective severity of the critical medical and behavioral needs of each individual served by these providers. The funding is to become part of each provider's annual base budget and is not to reduce each provider's entitlement to additional critical needs staffing in future ratesetting by the department.

SECTION 15. LEGISLATIVE INTENT - DEMENTIA CARE SERVICES. It is the intent of the sixty-first legislative assembly that the department of human services integrate the dementia care services program established in House Bill No. 1043 with the home and community-based care services programs of the department.

SECTION 16. LEGISLATIVE COUNCIL STUDY - RETURNING VETERANS AND THEIR FAMILIES. During the 2009-11 interim, the legislative council shall consider studying the impact of veterans who are returning from wars and their families on the state's human services system. The study must include an analysis of the estimated cost of providing human service-related services to the returning veterans and their families, including treatment for traumatic brain injury and mental illness. The legislative council shall report its findings and recommendations, together with any legislation required to implement the recommendations, to the sixty-second legislative assembly.

SECTION 17. LEGISLATIVE INTENT - HOME TELEMONITORING SERVICES. It is the intent of the sixty-first legislative assembly that the department of human services consider the changes necessary to reimburse home telemonitoring services under the medicaid program at the same rate as skilled nursing visits provided in person.

SECTION 18. UNSPENT 2007-09 BIENNIUM - GENERAL FUND APPROPRIATIONS - EXCEPTION. The amount of $270,000 of the $3,100,000 for a sexual offender treatment addition at the state hospital appropriated in subdivision 3 of section 3 of 2007 Senate Bill No. 2012 is not subject to section 54-44.1-11 and may be spent during the 2009-11 biennium for completing roof repair at the state hospital."

Page 7, after line 21, insert:

"**SECTION 20. AMENDMENT.** Section 50-06-29 of the North Dakota Century Code is amended and reenacted as follows:

50-06-29. ~~Application for aging~~ Aging and disability resource ~~center funding~~ link - No wrong door model. ~~No later than December 31, 2007, the~~ The department of human services, within the limits of legislative appropriation, shall ~~seek federal funds for the planning~~ plan and ~~implementation of~~ implement an aging and disability resource ~~center for~~ link, "no wrong door" model, initially in up to two regions of the state. The department also may provide additional services or may provide services in multiple regions as required or allowed by any source providing funds for these purposes. The initial resource ~~center will be a single point of information program at the community level which~~ link model will help people residing in the state make informed decisions about the full range of long-term care service and support options, including both institutional and home and community-based care~~, and which~~. Participating access points will provide unbiased information and assistance to individuals needing either public or private resources, to professionals seeking assistance on behalf of their clients, and to individuals planning for their future long-term care needs. Upon receipt of ~~federal funds~~ funding, the department of human services may establish the initial aging and disability resource ~~center~~ link, "no wrong door" model, or it may request bids and award ~~a contract~~ contracts for ~~the provision of this service~~ training and coordination to implement the model utilizing existing community-based access points and for the provision of services. The ~~duties of the aging and disability resource center must include all duties~~ initial model and any subsequent model or variation of the model, as well as any additional locations will provide services consistent with those required ~~to receive federal funds, including~~ by the 2006 amendments to the Older Americans Act [Pub. L. 109-365; 120 Stat. 2522; 42 U.S.C. 3001 et seq.], providing information about the full range of long-term care service and support options available in the state to assure that consumers may make

informed decisions about their care. The resource ~~center~~ link's participating access points must be free from a conflict of interest which would inappropriately influence or bias the actions of a contractor, staff member, board member, or volunteer of the ~~resource center~~ access points to limit the information given to a consumer to steer the consumer to services that may also be provided by the ~~resource center~~ access points.

SECTION 21. AMENDMENT. Section 50-24.1-02.6 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-02.6. ~~(Contingent effective date - See note) Medical assistance benefits - Eligibility criteria.~~

~~1. The department shall provide medical assistance benefits to otherwise eligible persons who are:~~

~~a. Medically needy persons who have countable income that does not exceed an amount determined under subsection 2; and~~

~~b. Minors who have countable income that does not exceed an amount determined under subsection 3.~~

~~2. The department of human services shall establish an income level for medically needy persons at an amount, no less than required by federal law, that, consistent with the requirements of subsection 3, is the greatest income level achievable without exceeding legislative appropriations for that purpose.~~

~~3. The department of human services shall establish income levels for minors, based on the age of the minors, at amounts, no less than required by federal law, that provide an income level for all minors born before September 30, 1983, equal to one hundred percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined and that do not exceed legislative appropriations for that purpose.~~

~~4. The department of human services shall provide medical assistance benefits to children and families coverage groups and pregnant women without consideration of assets.~~

~~(Contingent effective date - See note)~~ Medical assistance benefits - Eligibility criteria.

1. The department shall provide medical assistance benefits to otherwise eligible persons who are:

   a. Medically needy persons who have countable income that does not exceed an amount determined under subsection 2; and

   b. Minors who have countable income that does not exceed an amount determined under subsection 3.

2. The department of human services shall establish an income level for medically needy persons at an amount, no less than required by federal law, that, consistent with the requirements of subsection 3, is the greatest income level achievable without exceeding legislative appropriations for that purpose.

3. The department of human services shall establish income levels for minors, based on the age of the minors, at amounts, no less than required by federal law~~, that provide an income level for all individuals from birth through age eighteen equal to one hundred thirty-three percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined~~.

4. The department of human services shall provide medical assistance benefits to children and families coverage groups and pregnant women without consideration of assets.

SECTION 22. AMENDMENT. Section 50-24.1-02.6 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-02.6. ~~(Contingent effective date - See note) Medical assistance benefits - Eligibility criteria.~~

~~1. The department shall provide medical assistance benefits to otherwise eligible persons who are:~~

~~a. Medically needy persons who have countable income that does not exceed an amount determined under subsection 2; and~~

~~b. Minors who have countable income that does not exceed an amount determined under subsection 3.~~

~~2. The department of human services shall establish an income level for medically needy persons at an amount, no less than required by federal law, that, consistent with the requirements of subsection 3, is the greatest income level achievable without exceeding legislative appropriations for that purpose.~~

~~3. The department of human services shall establish income levels for minors, based on the age of the minors, at amounts, no less than required by federal law, that provide an income level for all minors born before September 30, 1983, equal to one hundred percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined and that do not exceed legislative appropriations for that purpose.~~

~~4. The department of human services shall provide medical assistance benefits to children and families coverage groups and pregnant women without consideration of assets.~~

~~(Contingent effective date - See note)~~ Medical assistance benefits - Eligibility criteria.

1. The department shall provide medical assistance benefits to otherwise eligible persons who are:

   a. Medically needy persons who have countable income that does not exceed an amount determined under subsection 2; and

   b. Minors who have countable income that does not exceed an amount determined under subsection 3.

2. The department of human services shall establish an income level for medically needy persons at an amount, no less than required by federal law, that, consistent with the requirements of ~~subsection~~ subsections 3 and 4, is the greatest income level achievable without exceeding legislative appropriations for that purpose.

3. The department of human services shall establish income levels for minors, based on the age of the minors, at amounts, no less than required by federal law~~, that provide an income level for all individuals from birth through age eighteen equal to one hundred thirty-three percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined~~.

4. The department of human services shall establish income levels for pregnant women at an amount, no less than required by federal law, equal to one hundred sixty-five percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined.

5. The department of human services shall provide medical assistance benefits to children and families coverage groups and pregnant women without consideration of assets."

Page 7, after line 29, insert:

"**SECTION 24.** A new subsection to section 50-25.1-05 of the North Dakota Century Code is created and enacted as follows:

The department shall adopt rules that require all interviews of the alleged abused or neglected child conducted under this section to be audio-recorded or video-recorded, when possible. The rules must provide that a recording may not be disclosed except in accordance with section 50-25.1-11."

Page 8, after line 21, insert:

"**SECTION 26. REPEAL.** Section 4 of chapter 422 of the 2007 Session Laws is repealed.

SECTION 27. EFFECTIVE DATE. Section 23 of this Act becomes effective on the date the department of human services certifies to the legislative council that the department has received approval to claim federal financial participation to expand medical assistance benefits to pregnant women as provided for in section 1 of this Act, but may not become effective earlier than January 1, 2010.

SECTION 28. EMERGENCY. Sections 2 and 18 of this Act are declared to be an emergency measure."

Renumber accordingly

Hearing Date: 4/21/09

Recorder Job Number: 12036

Committee Clerk Signature Mary Ann Rehwaldt

Minutes:

Chairman Pollert: Called the meeting to order and took roll call. We will start discussions on HB 1012. If I could ask for someone to go through amendments? How would you like to do this?

Senator Kilzer: The way I carried it on the floor is that I followed the amendments .0209. It did take me an hour to do it. You are quite knowledgeable and you went through the bill as you did. There are some parts I can skip over or omit. If you do have questions ask them right away. If we can start on the fiscal part of .0209. I took the sections and when we come to that part we can have our discussion as we go through them. If we start on page 3 of the fiscal note, what we did was to restore salaries for funding and wages for anticipated savings from vacant positions and employee turnover. What we did was put the vacancies and turnovers back in. This amounted to a general fund of about $2 million and a total put back of about $6 million. The same thing for the child support program and also for the medical services program. The next one was the travel part. I know you on the house side had removed half of the travel. What we did was to restore half of what you removed. The thinking there was while gas prices have gone down to $4 a gallon to over $2 there was airline factors and others that have not went down. We felt that part of that should be restored.

Representative Bellew: We just removed half of the increase not half of the travel.

Senator Kilzer: The next part was restoring funding of the medically needy to reflect needs of 83% which you had taken down to 75%. On checking with the department we felt that it was best to restore that back up to the executive budget level and that is what you did. The next item is the increase funding of rebasing physician payment rates. I can take a moment to talk about what we felt about rebasing. As you know during the last interim the department did spend a lot of energy and time on rebasing hospitals, physicians, chiropractors, ambulance. The studies that were done were reviewed and placed in the executive budget where there were certain rates. Their rebased value positions were placed at 25% and others at various percentages. The rebasing wasn't calculated in the end on actual costs back. In some cases they had done surveys. In the case of ambulances they had gone at the Medicare level and dentists ended up at 75% of average bill charges. In the end I think they came pretty close or as close as they could be. In the area of physicians prior to the rebasing they were being reimbursed at 51% of the actual costs. The Governor's executive budget in reality by going to 25% of the rebased costs had raised that to about 64% of the actual costs. The house in reducing it to 20% of the rebased actually made it at 60% of the actual cost. They reduced it to 20% of the rebased which made it at 60% of the actual cost. Like I mentioned before, the actual payment was 51% executive budget would have brought it to 64%. There is not a direct parallel of rebased percentages and actual costs. The Senate changed the physician reimbursement to bring it up to 75% of the rebased cost. That actually puts it at about 88 or 89% of the actual cost.

Chairman Pollert: In y our discussions about the 75% of the physicians were there any discussions about staying close to the Governor's budget as far as lowering the rebasing to hospitals to fund the $10.8 million that 75% rebasing does. Did you look at it all as far as going

to equal it out?

Senator Kilzer: We did look at that in detail. What we determined was that in some providers like hospitals had been rebased more frequently than others. Some of those hadn't been rebased in about 17 years. The intent is another paragraph here is to eventually get this up to 100% of rebase. It is rather discouraging from the providers to have them fill this with more and more patients and to expect the providers to provide the service at a loss. The intent is to eventually get all of the providers up to 100% of the rebase. There was discussion on having it 75-80% across the board. It would have been very shocking to the required dollars to do that. This is why we attempted to put most providers at 75% and to keep hospitals at 100%. That takes me to the next page.

Chairman Pollert: On the rebasing of ambulances the governor's budget was at 75%. Did you put that at 100% of cost reports?

Senator Warner: As I recall the ambulance rate was 100% of Medicare. The Medicare rate was what it was targeted to.

Roxanne Woeste: The executive budget did rebase the ambulance rates to Meritcare rates. The house action was to provide 75% of that amount. The senate amendments returned back to the governor's budget.

Senator Kilzer: On the top of page 4 the first full item there is the Rolla situation. Rolla hospital is on the verge of closing. They have a Medicaid percentage of 31% of their revenues. The next is 16%. Rolla is the only one that has 25% of its revenues that comes from Medicaid. The federal law says they can't be reimbursed for outpatient lab and anesthesia services. That puts them $400,000 in the hole. We are putting $400,000 to keep their doors open. They are a critical access hospital.

Representative Bellew: Is this going to be an ongoing thing? Is this just a mandate approach? I'm assuming by what you just described that the $400,000 is going to happen almost every biennium.

Senator Kilzer: That was one of my concerns also. I am reassured that it won't be at temporary solution. They are going to be asking for continuing appropriation. In the past there has been discretionary payments made to hospitals, probably not in this situation. They do have this necessity to cost shift. Other third party payers are also wanting to be cost shifted to. The state becomes the last resort to keep it open.

Chairman Pollert: Wasn't there $1 million that was put to the rural hospitals. This is a furtherance that we are having with Rolla. If Rolla has a problem it would shift over to Devils Lake. We didn't have the discussion in the house but I thought it would happen in the Senate. I knew there was talk about it.

Senator Kilzer: The next item is to bring up funding for the state children's health insurance program to reflect utilization reprojections and a revised premium amount. The revised premium amount meant that when the budget was put together it was anticipated that it would cost $243.93 per child. Later revisions by Blue Cross Blue Shield which successfully bid for the CHIPS program placed it at $228.71. That is a little over $15 a month difference. This brings up the number of added kids at 200% of poverty to 158.

Senator Fischer: Not other than the fact that we can go to 200% for the same amount of money or less before the reprojections as well as the premium increase. At the percent of the money it was in at the house at 160.

Chairman Pollert: Could we get a spreadsheet as far as the number of enrollees and how that came about.

Senator Fischer: You certainly can. That is addressed in the other house bill.

Chairman Pollert: In other words did the policy change happen in the other house bill that came forward? Did HB 1478 change as well?

Senator Fischer: They changed the policy and the reflections were made in that bill as well as the budget.

Chairman Pollert: So if we could get the numbers that would be great.

Senator Kilzer: The next item is the increase funding for the state children's health insurance program funding to increase eligibility from 160 to 200%. The next item is restoring funding and remove for the house grants medical assistance line item for medical services projected case load utilization reports. The house had taken out the general fund money for that.

Chairman Pollert: On the case loads for the 3 figures that the house did and you restored, we will go through on how you got those numbers. That can be a discussion for a future meeting.

Senator Kilzer: The total on this had been $132.2 million in general funds. The house had reduced $9.6 million out of that. The next fund is a contingent appropriation to expand medical assistance benefits for pregnant women if approved by the federal government. This is to increase the poverty line of 133 to 165% of poverty. If I recall that would have made 387 more women eligible a year.

Chairman Pollert: That was defeated on the house side so the Senate just added it into the DHS budget?

Senator Kilzer: That is correct. The next one is to provide funding for the medical assistance percentage for the last 7 months of the 2009 -11 biennium. As you recall the stimulus package and the FMAP component to that is $66.5 million but it expires at the end of the calendar year 2010. There will be the first six months of the year 2011 that the FMAP will revert back down so the state will have to kick in the $9.5 million.

Chairman Pollert: I would suspect that you would have language in here about the federal stimulus dollars because there is $30 some million that will come from the AARA.

Senator Kilzer: Yes we do. The FMAP is $66.5 million designated for that. The next item is starting in the long term care program restoring funding added in the executive budget and the removal of the house for the addition of a third tier personal care which would allow units of 1,200 units of care per month. That is the increase of personal care per day from 8-10 hours. The idea there is that if you have personal care you can get both morning and evening so the patient can stay in their own home longer. We put that back in. The next one is add funding of $7.1 million of which $2.8 million is from the general fund of the amounts provided to the house to provide total funding of $22.5 million of which $7.9 is from general fund, $1 million from health care trust fund and $13.6 is from federal funds to provide a $1 salary benefit to all employees employed by basic care and nursing facilities except for administrators and directors of nursing. The thing about that was the house had said if you are above the 80 or 90th percentile you didn't get it. This is restoring for all benefits for the workers below the 80 or 90 percentile.

Chairman Pollert: One if the issues was that there was $1 million in IGT funds that the house had allocated for this particular section which was taken out by the Senate. We will have a discussion as far as the amount of money the house had appropriated over was $2.9 million less. I think our ideas on the house side was that the discretion would go to giving authority between DHS and the administrators to go up to $1 and I think you guys are going to make sure everyone gets that. We have a language difference and dollars amounts to talk about.

Senator Kilzer: That paragraph was related to the IGT funds and the people who work in long term care nursing homes. The next is that the DD providers at the 90th percentile and the one line was the QSP's. The next one is adding funding and grants to the medical assistance line

item for development disabilities providers who are serving medically fragile and behaviorally challenged. When you see that phrase you immediately think of the Anne Carlsen Center.

Chairman Pollert: Can I back you up. The $1 increase for the QSP's, I take it that was done to get them in line with the dollar for long term care and DD providers. Was that a figure provided to you by DHS? Does that include the QSP's in the agencies, there are two different categories.

Senator Kilzer: The next one is to restore funding removed by the house and grants medical assistance line item for long term care projected case load utilization rates. This is for long term care nursing homes and home and community based services. The executive budget it was $194.8 million and the house they removed $5.6. These are general funds and we restored that. The last item is to restore funding removed by the house in then grants medical assistance line item for developmental disabilities grants projected case load utilization. That is for DD's only. The executive budget would be $118.9 million. The house had taken out $2.4 million. We restored that. That brings us to aging services.

Chairman Pollert: With that we will go for an hour next time and be in recess until tomorrow.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☒ Check here for Conference Committee

Hearing Date: 4/22/09

Recorder Job Number: 12103

Committee Clerk Signature

Minutes:

Chairman Pollert: Called the meeting to order and verified that every member was present.

Senator Kilzer: We were going through the amendments that the Senate had made to HB 1012. I was at the bottom of page 4 to the attachment of .0209 on the fiscal part where it said aging services. I have talked about the travel and the vacant positions on the beginning. I haven't gone through each one. That takes us over to the next page 5. The next item is providing funding for the aging and disability resource link. The house had removed $600,000 of that and this had also been in HB 1476 which had been killed. I think we put back $300,000 or half of that as I remember.

Chairman Pollert: The idea of the $300,000, what was that? Were you going to let DHS bring forward a plan? What was the idea?

Senator Kilzer: It was to have 2 of the pilot projects and we thought that one would be appropriate to start with. The next item is to provide funding for the community care program of $120,000. This was not in the executive budget or house budget, it was put in the Senate. This was to have a community care program based out of the nursing home in Arthur, ND. It involves the word as it is described where you have more volunteers and more people involved with outside services to allow people to not have to go to a nursing home at an early stage.

This would have very good benefits not only for the welfare of the patients but also for the expenses.

Chairman Pollert: The $120,000 was that in the house or Senate bill?? I don't remember anything about that. Was it something that just came in on the Senate side during the second half? Is this kind of like a similar program to the pilot project that was put back in with the $300,000?

Senator Fischer: It is much like the one above it. It's a program that has been ongoing or started. I don't think it was that many years ago. They would like to expand it to supplement or replace the pilot aging disability. It is for the same thing. As far is it being alike there are some things in both proposals that are unique. However they do have the same overall purpose. That is to assist aging population in providing the right services, getting people information or services. I think one of the two is going to have a distinct change in funding because it will keep people out of nursing homes prematurely.

Chairman Pollert: I can't speak for the whole house but I will speak for our side of the HR section, two years ago there was testimony to have this in 53 counties. We had trouble with that with the one stop centers. The one in Arthur, is it one of the deals where you see it spreading through the whole state? What would the plan be if that was accepted the $120,000.

Senator Fischer: I don't see it as a state wide program now. Whether they decide to expand that would be. Right now I'm sure it's regional. We talked to them about what the cost would be to expand it to a region. Right now this is just a regional program. They didn't talk anything about expanding it.

Chairman Pollert: We on the house side are having considerable discussions that appropriations is getting into policy. This looks like one of them. I know we have to look at that. For myself I would like to see more information on community care like who they have

employed and what they are doing. That is why I want some more information to say we can know what is going on.

Senator Fischer: I would be more than happy. There are those of us who don't agree that social services is doing a good job. The fact is that over the years I have heard from constituents and others that the problem with getting information on programs that aren't necessarily in social services is a telephone call and it ends there. The idea is to supply information to constituents on where they actually do go and we don't provide the services.

Representative Bellew: I think most of the questions were answered but mine was who was going to get the money and how was it going to be spent? You have $120,000 in there, what is that for?

Senator Fischer: We will get all of that to break it down.

Representative Bellew: Is there a specific organization that this is directed to?

Representative Ekstrom: I have always been a fan of single point of entry. I think it's an important program. I don't' know if we really have a decent model yet as to what this would look like. In terms of where I might sit in terms of this particular item, I was really bothered and would like to see the funding going to getting the meals out there, getting them dealt with, transportation issues, things like that. I really do believe that the legislature needs to address the single point of entry notion. I haven't seen a model yet that lets me do this. You have this long term care that is already in there. We have this in terms of meals and transportation would be my priority at the moment until I saw a model.

Senator Kilzer: The next item under children and family services programs was to increase funding for health families by $200,000 from the general fund. Going up from $300,000 to $500,000. Then the last one under children and family services is the village family services of $1.2 million. The Governor had $250,000. The house did not change that. The question is on

the amount of federal funds that would be available for that. It is a very large expansion on an excellent program.

Chairman Pollert: You are on the add funding for family group counseling right?

Senator Kilzer: Yes.

Chairman Pollert: You mentioned something about the village. Is that what you are talking about? What is family group conferencing? We had the one Senate bill that had health families in it, part of this family and group conferencing. Are you saying that you are just picking out one particular item or is this kind of all encompassing of SB 2396? If it is you are adding more money because there was health families included in that original SB 2396.

Senator Kilzer: I'm not sure on this. I don't call exactly why.

Chairman Pollert: What we could do is get the old 2396 but I remember there were 4 items in there. One was family resource centers which is through the NDSU extension service which was $250,000. Once SB 2396 was killed on the house floor the house appropriations education and environment section put $125,000 in it. I'm wondering how much of a double up we are going to have. Wasn't there something on family group conferencing.

Senator Fischer: This is to help families resolve issues as they end up in foster care. They have been doing this for quite some time.

Representative Ekstrom: Is this related to the project at all in terms of the model they might be using? A group of folks from here went out to Pennsylvania and saw how they were handling foster care. Is that SB 2396?

Chairman Pollert: SB 2396 was an abbreviated form of the project when it came forward it wasn't an OAR. That is what it was. It is being pieced back together by amendments. Maybe what we will have to do when we get to this point is add the question and bring someone from DHS to talk about the family group conferencing.

Senator Kilzer: The next is compulsive gambling. This puts $400,000 from the lottery into this program. The executive budget added $300,000 for a total of $700,000. The house reduced $150,000. That was down to $550,000. It came to us in the Senate and we added $100,000 to bring it back to $650,000.

Chairman Pollert: It's a net reduction of $50,000?

Senator Kilzer: The next is to restore funding in the grants line item for the Governor's prevention and advisory council on grants. This is mainly for students against bad decisions and underage drinking and things like that. There was $100,000 in the present biennium for the community health trust fund. There was $200,000 in the executive budget. The house removed all of that and the Senate restored the $200,000. That is where it stands at the moment.

Chairman Pollert: The net amount into prevention and advisory grants is not the $100,000 from last biennium. It's actually $100,000 increase from last biennium.

Senator Kilzer: Correct it would be doubled. The next one is to provide additional funding for the peer support program.

Representative Ekstrom: On the OAR sheet for the peer support there were federal dollars available. On OAR it was $2.3 million general funds. Is there any federal funds that would come from that if we put that money in? I

Senator Kilzer: The Senate had put in $300,000 for that program and you will see it won't be in the executive or house version.

Chairman Pollert: It was an OAR.

Senator Kilzer: Federal stimulus funding is all federal funds. The first one is the SNAP program which is the old food stamp program of $9.8 million of all federal money. There are $31,000 people in ND receiving that benefit. The next one is the child support enforcement

activities. As you noticed it is $2.7 million with parentheses around it with a general fund of $33.2 million federal funds. There is the fact that there is $400,000 in the current budget that can't be replaced with the new stimulus. That is why it's listed there. $3.2 is the maximum available for federal funds. The biggest one of all is the FMAP. I'm sure you are all familiar with what that is. The FMAP is reduced down to $60 something from 63 from the period of October 2008 through the end of December 2010. In the first quarter of the next biennium the FMAP again reverts back so the state has to pay a higher percentage again and that amounts to $9.6 million that you will have to pay out of general funds to make up for the ending of the FMAP. The elderly nutrition services is $495,000 which is over and above the regular amount and I don't have that in front of me. The senior employment program is $143,000. There is $3,000 for older services and there is something like $480,000 in their account which I'm not sure is the present biennium. They do have an account and this would add to that. The developmentally delayed infant's age 0-3 is part of the disability education act part C.

Representative Bellew: Would that include kids who can't hear?

Senator Kilzer: I think part C is a category by itself and I'm not too sure what is all included in that. The disability certainly does include infants who have hearing problems. There is a total of $4.1 million all federal funds in this biennium already. This would be adding to that amount. The increased funding for centers for independent living $243,000. Their basic amount is $2.1 million. The house had $400,000 and the Senate had restored $150,000 of that other. That is basically a 1.85 million prior to the stimulus money.

Chairman Pollert: Could I look at it another way. The original budget request was for $800,000 and the house had taken out $400,000. You added back in $150,000 plus the $243,000 which gets you close to $800,000. Could you look at it that way as well? Is that your thought process?

Senator Kilzer: Yes. That is if you put it together with the next thing which is location rehabilitation services.

Chairman Pollert: Was this listing of the federal stimulus money exactly the same as it came in the Legislative Council sheets? Is that a correct assumption. I know in the health department and all of that we just had lists in there saying the AAR funds.

Roxanne Woeste: It is very close. I think there was one number that the department was able to give us an updated number. I think it was the elderly nutrition services perhaps in their earlier memo completed by our office was at the $500,000. That has been reduced to $485,000 with the new estimate that has been received.

Senator Kilzer: I will move on to page 7. The talk about some of the things on the state hospital. There had been the 5 FTE's for the global health initiative that were in the executive budget that had been removed by the house. Six of the departments said they can get along without the sixth one. They need to find a pharmacy person for the DOCR unit at the state hospital. That was restored on page 7.

Chairman Pollert: Then you put back the $1 million that the house had reduced. We had asked for a priority list from the state hospital. Then we took up that list and came up with the $1 million. It was items 15 or less on their priority list and you restored all of the extraordinary repairs they had requested.

Senator Kilzer: We had a list but I don't recall that the roof was on there at that time. On the next page, page 8 in addition to the vacant positions with employee turnover and travel. There was 150,000 dollars on the developmental center. There was a lot of $10,000 on that list also that should have attention so we put that in. On page 9 it talks about the global health initiatives. There is really 2 situations there that are involved on the next page and that page.

Chairman Pollert: Global health initiative, I know DHS and I can see what they are thinking. I didn't like that. Do you have your hands around what that means? Should have it been a statewide health initiative. Should it be something else that should be friendlier? Did you get a good idea of what you thought global health was?

Senator Kilzer: I had the advantage of talking to Brenda 1 on 1. I can give you my perception that I was left with after talking to her. There is two components. There is the inpatient and outpatient. Inpatient means you are institutionalized in the hospital. The state hospital has been more than full at times. The overload goes to the 5 hospitals in the state that take inpatient psychiatric patients. That is one of the components of the expenses of global health initiative. The other one is mostly on the outpatient part where it is talking about the human health service centers and the person that is outpatient. The main item there is the case management load. The Feds are saying the case managers are spread too thin and we should have more of them. That is the other part of the global health initiate that we feel needs addressing. That is what it amounts to.

Chairman Pollert: The inpatient is kind of a rebasing of the hospital contracts, is that what that is? It must be negotiated rates with Trinity, St. A's, Medcenter One, etc. There has been renegotiated contracts and those contracts have gone up. I probably have that information somewhere.

Senator Kilzer: That is most of it. One part is to bring the non Medicaid patient reimbursement up to the Medicaid reimbursement levels. There is a difference there. That is one problem that is being addressed here.

Chairman Pollert: I'd like to see what that rebasing cost was. It's simpler because I have this organized. We have the figures for the state hospital for their employees plus what you want for the human service center.

Senator Kilzer: At the state hospital they do staff at 85% of capacity. When they get to be over 100% they are really quite understaffed. That is one of the reasons they have to send out patients when they are full.

Chairman Pollert: What I struggle with is in the DOCR budget and how you continue the DOCR system is full. Yet they want more employees. I could sit and say the same thing for the state hospital. They are full but we are going to add more employees. I just struggle with that. I know it is a simple statement and I know it's a complex situation. I just struggle with that.

Representative Ekstrom: Can the department provide us with a handout in terms of the individuals coming to both the human service centers as well as to the state hospitals, how many are more severely ill than what we have seen in the past. That was my rational for saying we did need to expand and get more employees. They are handling more difficult cases. It's very much like administrative segregation that we have at DOCR. We are expanding that and having a much more difficult type of prisoner. If they could provide us with a handout in terms of the case load as well as how severally ill these people are. We saw that with the human service centers particularly. They have tough characters to deal with.

Senator Kilzer: I have covered the field overall.

Chairman Pollert: Did we put back in some at risk programs? I have a little handout that says human service centers have funding for young adult transition services.

Senator Warner: That is originally the 2 centers if I recall one in Fargo and Bismarck. They had people transitioning out of them. It is targeted at younger age homeless. There were people transitioning out of foster care. They need more structure. We funded 1 of those centers at the discretion of the agencies to determine which city would receive the center. They require 24/7 presence of staff.

Chairman Pollert: I would ask that we have the total amount of rebasing contracts on global health and I don't want to add up all the service centers for global health if I could get that as one figure. I don't want to add it all up when I'm going through this. Was there any amendments done as far as studies? Maybe we didn't discuss this but I know there were some amendments passed on the Senate floor. Could you discuss them?

Senator Kilzer: There were 2 floor amendments that were offered and passed. One had to do with the raising to $95 the personal care allowances. I think it is presently at $60 a month. We raised it to $75. There was a floor amendment on the Senate floor that raised it up to $95 a month. It does have a fiscal affect. The other floor amendment was on the salary for DD providers QSP's and nursing home personnel raising the 6,6 and 1 up to 7&7 and 1.

Representative Bellew: Explain the 7,7,and 1.

Senator Warner: The 7&7 relates to the rate of inflation that was built into the structure. It is an overall cost of which salaries are only a part. It's part of the overall inflation.

Representative Bellew: What is the 1?

Senator Warner: The $1 an hour salary increase of employees at the local level of administration. That was on the house side as well.

Chairman Pollert: You are talking about the $1 an hour for long term care, the DD providers. And you also added the $1 for QSP's. So the 7&7 is department wide for hospitals, etc.?

Senator Warner: Just those 3 categories of long term care, DD, and QSP's. The other providers are handled separately at 6%. Some of them are rebased to 100% of the recommended rebase rate.

Roxanne Woeste: The amendment that passed on the floor is the 7&7 for everyone. I believe the rebased services would be 0&7. All other services would be a 7% annual increased.

Chairman Pollert: So it is departmental wide?

Roxanne Woeste: Right. It returns to the Governor's budget.

Chairman Pollert: Could we go if there was any language added on the Senate side as far as sections to 1012?

Representative Bellew: I would like to discuss the 75 and 95 personal need allowance.

Chairman Pollert: was the 75 added as an extra by the house or was that going to the Governor's level? Was the amendment made in the HR section? Was the Governor's budget at 65 and we added that to it?

Roxanne Woeste: I believe the Governor's budget was at 60. The house increased it to 75% and the Senate increased it to 95%.

Representative Bellew: I have a couple questions on the dollars. On page 2 of the breakout of the dollar amount it says the total general fund reduction of $10,456,000. I would like to know how that figure was derived. I can get it later.

Chairman Pollert: I will go one step further it seems to me that we have taken federal stimulus dollars that are one time funding and are funding them on ongoing programs. I would like to have Legislative Council or someone from DHS tell me how much the dollar figures are. I have concerns about funding ongoing programs with one time funding. I would like to have that prepared for us too.

Roxanne Woeste: We can put something together. I think the largest is the FMAP. They are going to get additional funding source dollars and it is going to decrease the amount of general fund dollars we will need to make for the FMAP related expenditures.

Chairman Pollert: I understand that. Maybe we need a better breakout.

Roxanne Woeste: There are only two areas in this budget where we are replacing stimulus for general fund dollars. The one area is the FMAP and the other area is the child support.

Chairman Pollert: Somewhere in the budget I am going to use approximate numbers here of $29 million off the DHS budget. The federal stimulus dollars came in and those were roughly $30 million and some odd dollars for the 07-09 biennium which will go back as general fund turn back with the other $20 million. My guess is that DHS is going to have a $50 million general turn back in 07-09. Then in 09-11 there is $66 million. Of the $66 million on the Senate side it was added that the approximate is $58 million. The $58 million, it means there is roughly a $29 million increase over the Governor's budget. Somewhere in there it is either federal stimulus dollars or one time funding or ongoing through general funds. Somehow I want to get a hand on that. I want some more accurate figures.

Roxanne Woeste: That is correct. The Senators provided you with those increases. Those are the increases we just mentioned in all of these amendments. We are going off of HB .0500.

Senator Kilzer: I'm still a strong supporter on .0209 is showing the changes if you want the bill as it is now you go to .0500.

Chairman Pollert: We will go through .0209.

Senator Kilzer: Section 2 on page 2 does talk about the stimulus funds. The next page talks about some of the rebasing and some of the property limit changes and the wage increases that were in the bill, and also the global health initiative. Going over to page 4 number 12 it is the intent of the legislative assembly that the human services department establish a goal to set Medicaid payments for hospitals, physicians, chiropractors at 100% of cost. It doesn't say when but that is the reason.

Representative Bellew: Is that of cost of Medicare or Medicaid?

Senator Kilzer: It is rebasing that is not on Medicare or anything else except the actual cost to provide the service. That is what rebasing means. It's not bill charges or the Medicare feel schedule. It's the actual cost of providing the services. Sometimes as was done in this case

you can't determine the costs precisely. They do regional surveys and things like that. They go to Medicare as the last resort. The definition is to come up with the actual cost.

Chairman Pollert: So it could be looked at both from the house and senate as far as the rebasing that is being done in HB 1012 is one step towards that. You are going another level higher most definitely.

Senator Kilzer: They did the rebasing during the interim. That is all done already. The next thing to do is to apply it. This is why you do the study, to reach 100%. Section 13 is the Rolla situation. This is what was being done in K-12 education. 14 is the Ann Carlsen Center. It is the severely challenged children.

Chairman Pollert: In the numbers you provided there is $400,000 some thousand in general funds. Plus the study of what you had in Section 16. You enhanced it more than what the houses 2 options were. Does anyone in the house side remember? Was there a third level or did they do it at the second level? We can get that answered next time.

Representative Ekstrom: I know this is after the fact but we moved a number of people to other facilities. There is additional cost incurred by the facilities to receive these people. How are we going to get reimbursed for the additional cost?

Senator Kilzer: I have not heard the answer to that question. It's a little more widespread. We also have the same problem with the Veteran's Hospital. I have not heard. Moving on with section15 concerns HB 1043. That was the dementia services particularly providing that were borderline that need to be institutionalized .The reason it is close to home and community based services is because the institutions have a good network of social workers and people like that to assist people. It is the ones that are receiving home and community based care services or aren't receiving any services that should be soon. Number 16 is to have a study

about returning veteran's from the current war that have traumatic brain injury and mental illness to kind of get an idea of what the severity of the problem holds.

Chairman Pollert: SB 2198 deals with TBI. Part of that bill is a little discussion on how the veterans would be impacted on SB 2198. Should this be a little more broader to talk about TBI for veterans. SB 2198, I have some questions on as far as how much that funding should be. It's currently at 40 and that is a high figure.

Senator Fischer: SB 2198 is TBI alone. It doesn't necessarily tell you veterans.

Chairman Pollert: Correct but it might. I'm trying to find out that information too.

Senator Fischer: Maybe it should be included?

Chairman Pollert: That is what I'm wondering. I'm not talking all of SB 2198 it's a matter of should the funding be in there as well or through here and have the study broader?

Senator Kilzer: Section 17 is home tele-monitoring. That section wants to consider changes to reimburse home tele-monitoring services at the same level of skilled nursing. This is becoming a very widely accepted type of medical follow up. I think it certainly has its place. Section 18 refers to the fact that the fifth unit at the state hospital for dangerous sexual offender treatment was not built. The last ones I didn't make good notes on.

Chairman Pollert: What we will do is stop here. We will continue when we are rescheduled.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☒ Check here for Conference Committee

Hearing Date: 4/23/09

Recorder Job Number: 12177

Committee Clerk Signature

Minutes:

Chairman Pollert: Called the meeting to order. Let the record show all members are present. We will only be able to go until about five to five. I will tell you really quick that we will meet between 9 and 10 and go through the case load utilization and Saturday morning between 8 and 9. Because of our time table is short I asked for information on the project because the Senate added in health steps. I asked if Tara could come down and give us a quick rundown that the committee would like as far as SB 2396 and see if there are questions on the Senate amendments.

Tara Lea Muhlhauser: I am the director of children and family services division. My understanding is you wanted me to address SB 2396 as some have been referring to as the Allegheny county bill. Senator Lee was the sponsor. There was a study group that went to Allegheny county Pennsylvania to look at improvements they have made in their system specifically improvements that were in regard to preventing placement of children and foster care and other kind of what we call front end programs or projects to keep them out of the formal child welfare system. The end result of this was SB 2396 that had 4 funding components in it. If you would like to run through the 4 components I can do that and talk

about the various ways. We believe that most of them have been in fact funded in other budget amendments or proposals. If you want me to walk through all four of those I could.

Chairman Pollert: If you could do that in a condensed form.

Tara Lea Muhlhauser: Parent resource centers were placed in SB 2396 for a cost of $250,000. I could tell you that the department has been supporting parent resource centers through some community based child abuse and neglect federal money for the last biennium. . We have increased our amount of funding in the proposed CFS budget for about $100,000. We are about $150,000 under what was requested in SB 2396.

Chairman Pollert: If you increase it $100, 000 the Senate added back in $125,000.

Tara Lea Muhlhauser: That was an additional amount over and above their appropriation last biennium.

Chairman Pollert: After the defeat of SB 2396. The education put that in the bill. So you are saying that the CFS had an extra $100,000 put in it.

Tara Lea Muhlhauser: Yes. Healthy Families program expansion you will see it reads here $385,000. That was an early amount that you heard testimony from people saying they no longer needed $385,000 because the Minot expansion project was not going to happen this biennium. They lowered their request $200,000 to allow for the expansion of Burleigh/Morton County. You have included that within the amendments for the current budget. We also have $300,000 included for the Grand Forks site. The family team decision making pilot programs Senator Lee and I talked about having some opportunity to have a slightly different model of family group decision making. I can tell you in the CFS budget now we have about $1.7 million in there.

Chairman Pollert: What was that on?

Tara Lea Muhlhauser: The family team decision making pilot programs. The short answer for

us is that we also believe that it is funded. We have an already existing amount of $1.7 million, in the CFS budget part of which goes to in home family services. Part of that is going to fund 3 family group decision making positions in the village. I also understand with the Senate amendment there was some additional money that was added into family group decision making.

Chairman Pollert: So the family group decision making, is that the $1.2 million. That is the family group conferencing?

Tara Lea Muhlhauser: Yes.

Chairman Pollert: Can we get a worksheet on what you are telling us about?

Tara Lea Muhlhauser: The thing to remember about the $1.7 is that it actually divided between intensive in home that the family offers and intensive family group decision making. We do it as part of one RFP because for folks that are cross trained. In that $1.7 there are 3.37 FTE's dedicated to family group decision making. The last amount was a safety and permanent funds enhancement. These are dollars that counties have access to provide flexible funds for families to prevent the removal of children for the placement of children and foster care. Our CFS budget for the next biennium has a fund of $100,000 for those funds. We feel this has essentially been funded as well.

Chairman Pollert: You are saying between the 07-09 budget that it was an enhancement of $100,000?

Tara Lea Muhlhauser; Correct. My offer to you today is that we have really essentially funded the items in SB 2396. At your request I can put the detail in a worksheet form.

Chairman Pollert: As far as the amendments we are still through the discovery phase. Then we will start hopefully making decisions unless we agree with the Senate. On the $1.2 that the Senate put in, is that the exact same thing as family team decision making?

Tara Lea Muhlhauser: Essentially it is. There are a couple different models out there. I think we have been a little lacks about using the terms interchangeably. Family group decision making is usually a shorter process that happens early on in the case. Family group conferencing typically is a longer more involved process that brings more people together and later in a case. From our terms family group conferencing is sometimes a greater cost than family team decision making per meeting. The village uses both models although the majority of their work is falling in the family group conferencing area. There are similar concepts and results that they can offer.

Chairman Pollert: I take it these go out in grants to the Village?

Tara Lea Muhlhauser: Correct. They go out in FTE form and people do the work.

Chairman Pollert: Any questions? I had asked for information on the community of care. If something is added into the budget I need to know what it is about.

Jane Strummen: Thank you for allowing me to be here for a few minutes so I can briefly explain the work of community of care. Community of care is a new member based nonprofit organization. It began as a pilot project of a Good Samaritan society based out of the nursing home in Arthur. It has a mission of assuring older adults have access to health, human, and spiritual services essential to their well being, particularly in rural Cass County as a service area. It was really created to address the significant challenges that rural communities have experienced over the past decades and the negative impact on older adults. The idea of the pilot project was conceived by the former good Samaritan society doctor Judy Ryan, Dr. Klayton Jenson, Shelly Peterson, and myself. Since it initiated it has evolved into an independent 501c3 nonprofit organization. It is governed by a 10 member board of directors, it has 200 plus members, and a number of services have been developed based on needs that have been identified in rural Cass County. Some include information referral assistance, care

giver support and education, state health insurance counseling, a volunteer program, health promotion, and education and aging issues. Last year we served 600 unduplicated persons and that number has been increasing each year. We partnered with 40 plus trained community volunteers, parish nurses, civic service clubs, area use, and other service providers. The formal inter agency agreement with the major service providers in the Fargo metro area. The purpose is to streamline access for those individuals needing some assistance. We are trying to make the process as simple as possible. Community of care is really working to improve the long term care system in incremental, practical, common sense ways. At the same time it will perhaps develop a model that other rural communities can use. The handout that you have talks about some of the benefits on the first side. We are hoping by adding more resources in our local community that it will help delay institutional care and provide the most use of cost effective services. We have a strong volunteer component that is part of our program that has been key by providing knowledge and education. It is helping people access the current services that are available. I think the key for us is that we haven't duplicated any services, we have just addressed the gaps we have maybe identified and brought more resources to a rural area. Community of care has a budget of $175,000. Currently about 1/3 of it comes from foundation grants, 1/3 from charitable contributions, and a remainder from government contracts, a grant, and united way allocation. We are requesting $120,000 during the next biennium so that we can use our experience and knowledge that we have leered to fully develop this model and we can conduct an evaluation whether this is a cost effective model that would be appropriate for the rural communities. On the back side I have given more detail on the pilot project and the outcome objectives that we hope to accomplish.

Chairman Pollert: For the $120,000 that the Senate added into 1012 are you looking to outreach from Cass County and what is the difference between your project and the one stop centers that the DHS has been advocating for.

Jane Strummen: Your second question, community of care is a local project. We have developed services which is the difference in the ADRC. We have filled in the gaps and developed resources we need in our rural communities. I think that is a key difference. We do provide information and education. We also provide the services that are lacking in that area.

Chairman Pollert: What do you mean services that are lacking?

Jane Strummen: Transportation is a critical one. Our residents need to go into Fargo for the most part for their medical services. Transportation is a key that we have been providing. If people don't have transportation access to health care it is difficult for them to remain in our rural communities. That is just one of the services we are providing.

Representative Ekstrom: Have you got a geographic boundary you are working with?

Jane Strummen: Yes. It is rural Cass County. It is a large geographic area. Our program is still new. We are still evolving and serving more people. We would like to have more of a presence in some of our outlying communities like Kindred and Buffalo. We have offices located in Casselton and Arthur. As of any new program it takes awhile for people to understand what we do and what we provide. We are making roads to letting people know more about our services. We are still evolving and growing.

Representative Ekstrom: This $120,000 you would be doing an expansion. This would be in addition to the $175,000 budget that you now have or would we be replacing some of those funds?

Jane Strummen: It is our budget for 2009. Part of that includes grants we are participating. That also includes charitable donations that we have raised and we do fundraising events on a

regular basis. The $175,000 is what we need. We have work to do to get that before the end of the year.

Chairman Pollert: I am going to run out of time. This is almost like one of the bill that is put in with an amendment we don't know anything about. I would ask you get your testimony distributed to the members of the conference committee. The discussion with some of us on the house side has been that it seems like the services are available and are already being offered. Is there a different way of doing it? You are bringing that forward through a Senate amendments and the bill had failed in the house side for the one stop centers. Whatever information you can provide, we have a couple more minutes unless someone has more questions. These normally aren't time for testimony.

Representative Ekstrom: Your program is the pilot we have been talking about in terms of how that one stop might work. I think if you could provide the committee information about the step by step process and what kind of outcome you have had. Give us some data that says this individual came to us, and were on the verge of going to a nursing facility. By doing this we managed to keep that individual in the community at a lesser cost.

Jane Strummen: I could give you one good example. He is my age, severely diabetic and on dialysis four times a week. Before we were serving him he was in and out of the hospital for months on end. We have provided him with transportation 4 days a week at 6 hours a day for the volunteer to take him to and back to his home. We have worked very closely with Cass County social services because he is on Medicaid. We have worked with public health because he needs a care coordination because of his cognitive issues. He needs a caring network to be able to keep him in his home. I know that if he didn't have that caring network he would have to be in supportive environment. Being in a rural community with dialysis is very difficult to stay in your home.

Chairman Pollert: Did you have this form of a bill or anything in the house or senate this session?

Jane Strummen: I didn't. We really were following the ADRC legislation on the house side to see where that evolved to see if community of care might be appropriate to be a Pilot project even though we are different and very distinct. We are doing some of those functions by providing the education and information to individuals. We didn't have a separate bill.

Chairman Pollert: I would appreciate that when you give us that information that you give us the difference between your plan and what the DHS is. What I'm going to do tomorrow is give DHS an opportunity to share their $300,000 plan because I have to be fair to them as well. We will be in recess until tomorrow morning at 9.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☑ Check here for Conference Committee

Hearing Date: 4/24/09

Recorder Job Number: 12187

Committee Clerk Signature Morgan Pearce

Minutes:

Chairman Pollert: Called the conference committee to order and let the record show that all members are present. With that we will start from where we left off. My plan is for this hour to have the department come up and talk about the one stop centers. Then I will ask Brenda to come forward to distribute out the information. I asked for some information on the global health. Then we will get into the case load utilizations that the house did and see how we got into those calculations. Hopefully that gets us there.

Carol Olson: The department is here this morning to give its support over to the community of care and support their efforts in continuing their no wrong door approach. They have proven to be successful in their efforts and we feel there is no reason to continue a whole different system in state government. We would like to support what they have in place right now. We would like to make it easier for everyone concerned and to go back to where we originally started would take me a half hour to explain. They were originally in our plan to begin with when they started with the house. We got derailed and took a different approach. They support the community of care. I just wanted to let you know that.

Representative Ekstrom: One of the things I would like to see the department develop with the community of care are benchmarks so we have the ability to look at this pilot program in

two years and see how they are doing. You have established benchmarks as far as numbers of people served. We would like to see the care they are providing and see what you all think in terms of anything we can do to tighten it up and make sure as we take this model forward we can see progress.

Carol Olson: We see this as really the beginning of a very beneficial public partnership. Like I said before this is something we had envisioned with community of care. They are very worthy. They do have a record and we support it. We will be working with them there is no question about it. We will be working with them in the future for years to come.

Chairman Pollert: I would ask that either through Jane and the department that we get information. There are probably still two of us who aren't quite there yet. Some of us are slow learners. I'm not saying who the two are but there are two are. I think there might be two. Whatever information you or Jane can give us, I would appreciate. We do listen to the Senate intently.

Brenda Weisz: Attachment A. When Tara Muhlhauser talked about that yesterday the request was made if we could put it in a worksheet as to how much is in the budget now, what is in the Governor's budget, where we are today with the funding for the four services and a definition of the four services. This is a one page cheat sheet for you to define what parent resources and health family group conferencing decision making and a safety permanent fund. It will also show you what is in your current budget we are wrapping up right now, any bills or amendments added to those amounts. The only reason I asked that is because it doesn't relate to our bill. I figured that could be filled in later but I didn't know at this time. This is the funding that is included as it relates to the services outlined in SB 2396

Chairman Pollert: Maybe I should ask Roxanne or Lori if either of you do extension. I know it was in there before it went into conference committee for $125,000 for the parent resource centers.

Representative Bellew: Is this all general fund money?

Brenda Weisz: No there is a blend of money in that.

Representative Bellew: Do you have a breakout or approximation?

Brenda Weisz: Yes. I know some but not all of it.

Senator Kilzer: Are they face to face meetings in all of these?

Brenda Weisz: On the family group conferencing? I don't know the answer for sure.

Lori Laschkewitsch: It's not on that topic but the $125,000 for the parent resource center is still in that budget. It hasn't been dissolved yet.

Chairman Pollert: Did that answer your question?

Senator Fischer: Yes.

Chairman Pollert: That has been a topic of what they have been putting in that budget.

Brenda Weisz: We can only put general funds and I will give that to the clerk tomorrow morning. Handout testimony (Attachment B). You had asked for a one pager. As far as addressing these issues with two things in mind, inpatient and outpatient, the front lays out by center so you can identify by region what you have included in the budget. The first one is north central.

Representative Ekstrom: Before we start I have another paper on this that would tie in the numbers. (Attachment C)

Brenda Weisz: If you want to put these side by side the numbers detail by region what we are really trying to accomplish with this funding. The white paper talks about the community capacity issues. I mentioned the two components. First the inpatient component relates to the

state hospital and how we had them staffed at 85% occupancy. That is how the budget has always been prepared. Our occupancy has averaged 90-100%. To deal with that issue part of handling the community capacity issues, part of this funding relates to 5 FTE's at the hospital. When you look at the number sheet that is the very last item before the total where we have right now in the budget before you 5 of the 6 initially requested positions. Secondly another important component of the capacity issues on the inpatient side is we do have clients at the human service center that sometimes do need inpatient hospitalization for short term stabilization. You will find that the hospitals included in receiving that rate increase that nears the rate increase that is reflected in the Medicaid budget that is approved at 100% rebasing. This takes the non Medicaid client at the human service center that will go to the same hospital and ensure that it is provided the same rate of reimbursement. The hospitals affected are Trinity, Altru, Meritcare, Medcenter One, and St. A's . That is the other inpatient component of this. When you go through and look at the outpatient component it deals with the capacity issues of trying to keep people in the community so they aren't institutionalized. To reach that goal we included two residential facilities. One of them is in Minot. Minot is the only region of our large centers that does not have a crisis residential unit. This would put an 8 bed unit there. In Dickinson this would include a 16 bed residential facility. A lot of that is tied to the fact that St. Joe's closed down the behavioral health unit on their hospital. This would help in that regard. Finally there is enhancing the existing community support in Grand Forks. That is to increase their social detox program and also a contract that we have with an entity providing case aid. Collectively that is the breakout. On the one page sheet the front is by region. The first part is increasing the hospital contract at Trinity so that the payment we made to them will work with the payment received from Medicaid at the rebased amount. There is the 8 bed transitional facility and the cost for that. The Altru contract increase is first reflected. What I first

mentioned about strengthening the supports. At southeast increasing the inpatient contract and that would be to Meritcare. This would be to reflect what we pay on the Medicaid side. It also adds staff to Southeast. This is due to Cooperhouse. These are staff that are going to be needed at the human service center which is 4 FTE. Southcentral has the addition of 1 FTE as an addiction services case aid. West central, the cost you see there is to reflect the newly rebased rates so that the non Medicaid client that goes into the hospital will be reimbursed at the hospital at the same rate as Medicaid. At badlands we decreased the contract amount there and put the payment for both Medcenter One and St. A.'s in the west central region. The 16 bed residential facility that I mentioned earlier.

Senator Warner: First of all could you describe a little better, the FTE's, and the level of profession that we are talking about.

Brenda Weisz: Yes. 1 is an RN.

Senator Warner: Is the case manager a social worker.

Brenda Weisz: Yes.

Senator Warner: Is the 16 bed residential treatment in Dickinson the old psychiatric unit?

Brenda Weisz: It's not the old psychiatric unit. It's a residential facility in the community. It would have 16 beds for those individuals that are bouncing in and out of the community. It would allow stabilization for them in the community to remain in the community.

Senator Warner: The Dickinson and Minot facility are contracting with providers, is that how it is done?

Brenda Weisz: We will not be building buildings. If everything remains in the budget we will do it and select a private provider that would have space that could provide the services .

Representative Ekstrom: Typical stay at these residential facilities is longer than a 72 hour home?

Brenda Weisz: It's not beyond a few months but a few days to a week coming out of the hospital.

Senator Warner: Elsewhere in this budget I seem to recall discussion about the peer group. Is that part of the global?

Brenda Weisz: Although there is capacity issues and different initiatives that are included in OAR's in our budget this was one specific general area that we noticed there was some community capacity issues related to behavioral health that was impacting both the regions and the state hospital. Peer support is an initiative different from this.

Senator Warner: But it does relate to behavioral health?

Brenda Weisz: That is correct. On the backside what we did was provided a description by category. So if you wanted to know the amount of this funding area that is attributed to the hospital contracts so that the payment they receive from a non Medicaid client will equal that of the rebased amount of Medicaid. The cost of that is $1.3 million. The residential facilities, the cost of that is $1.6 million. The community supports at Northeast $207,000 and the staffing is broken out for you independently as well, along with the state hospital staff. It gives it to you by region on the front and by category on the back.

Chairman Pollert: What is peer support?

Brenda Weisz: An OAR that had been submitted by the department. What was added on the Senate side was $300,000 of general fund.

Chairman Pollert: You said it was behavioral?

Brenda Weisz: It is. It is SMI for the seriously mentally ill.

Chairman Pollert: I noticed something on non global health behavioral that the Cooper house is always in there.

Brenda Weisz: That is what you left in there for the house side.

Chairman Pollert: Any other questions?

Senator Fischer: Cooper House, could you give me a description of it? Is it residential treatment.

Chairman Pollert: We did the contracted program assistant to have someone man the door at Cooper house. We man the door but we need the 4 FTE's to manage the occupants?

Brenda Weisz: They will actually be staff of the human service center. For those who will need the services with medication monitoring, that is what the FTE's are for.

Chairman Pollert: I understand that. We have the Cooperhouse there and we have people to man the door. So what do we do to the people that we are manning the door with? That is kind of what is happening here with the four FTE's. I will have one more question about the state hospital too.

Nancy McKenzie: With the other 4 FTE's are about that are related to Cooper?

Chairman Pollert: We are going to have the cooper house and have someone man the door. What are we going to do with the occupants of the cooper house?

Nancy McKenzie: As I mentioned before in testimony we know these individuals tend to be folks with trouble with chronic homelessness or at risk of homeless. They tend to be folks that have a lot of trouble with mental illness and substance abuse. Each of the human service centers for example right now has a homeless case manager. They are out in shelters and under the bridge and everywhere trying to hook people up when they need services. The housing first will get people into housing. Research has shown that if we get them there we have a better chance of keeping services wrapped around them and keeping them more stable and not in and out of the state hospital. I think they explained it really well when we were doing the budget and they explained that the addition to the Cooperhouse and that 41 units and people that live there and increased expectations on Southeast for an already high demand

area. It tips it over the edge with that we would definitely have to add a nurse and do a little more case management. We already have wait times on case management and southeast and other regions don't have. It tips it to normal capacity. It's not that the 4 FTE's. They will be working with anyone that comes to the door. The four positions are the case manager, my case aid, a nurse, and an addiction counselor. They are all professional level positions but not psychiatry and psychology.

Chairman Pollert: Just so we don't get it confused because these four are different than the other 4 case DD management positions in northcentral, northeast, and southeast.

Nancy McKenzie: Yes.

Chairman Pollert: One more question I have. With the state hospital you mentioned in your testimony that 90-100%. What was your occupancy per percentage last biennium?

Alex Schweitzer: The last two biennium's the occupancy has been running 90-100%. Prior to that we were always staffed at 85 because we didn't reach anything above that level. Within the last 4 years is when we started seeing the increase in occupancy at the state hospital. In the last biennium we actually added beds at the hospital because of the increased occupancy but did not add staff. That is why we are coming forward now. Plus in the mean time acuity has gone up. Individuals coming in are much sicker, multiple psychiatric diagnosis, multiple medical diagnosis.

Chairman Pollert: So you are telling me that the severity of the cases have gotten worse in the last 5 years.

Alex Schweitzer: People coming in are a lot sicker than they are in the past. They are being managed pretty much in certain residential sites..They require an inpatient setting. We are seeing an increase in acuity. Our data we benchmark for the region shows that.

Chairman Pollert: One question brings up another. You mentioned that they have been in a residency program somewhere else and then they come here?

Alex Schweitzer: They are in residential settings either in their home or a residential program we talked about today at the human service centers that a provider that serves that. At times they made an inpatient setting. When we are seeing them they are ill. They would maintain them in the community. They are not sent to us unless they actually need a hospitalization. What we are seeing is people coming in with multiple diagnosis. If you look at the hospital now compared to 5-10 years ago you can really see the difference between elderly people and people in wheelchairs. Acuity is increasing, occupancy is increasing and when that happens we have held off for a few biennium's in terms of increasing staff. We decreased that over the years. We now feel a need to be able to deal with this problem. That is the reason for that.

Chairman Pollert: That brings up another question. If they have been in a residential setting or in a peer group setting, wouldn't the dollar's drop as savings if they are coming into the state hospital but we don't see that?

Alex Schweitzer: I can't answer the question in terms of community. I can tell you what is going on with the state hospital.

Chairman Pollert: Any other questions?

Senator Fischer: At the present time, what is the rate of intake and releases from the hospital and not from the severely mentally ill but for the people coming in and moving out over a period of time.

Alex Schweitzer: We are seeing an increased average population and increased admissions with the hospital. We are seeing an increased length of stay because they are more ill. We are probably, if you look at the inpatient unit, there is a time when we were running 5 years ago, about 5-600 admissions . We are looking at about 800 with probably as many discharges.

Senator Fischer: Are you finding that across the board?

Alex Schweitzer: Yes. In 2008 40% of our admissions were first time admissions and we have never seen them before. Some of that is dealt with the issue of drugs, meth, and that is a significant number. Those individuals that come in have demonstrated that a lot of them are first identified and diagnosed with a severe mental illness. The acuity levels are up. They are difficult to deal with.

Senator Fischer: How close do you think you are with today's problems with today's solutions with the hospital?

Alex Schweitzer: I'm not sure.

Senator Fischer: You have seen things change over the years. You have seen severe mental illness. Are you able to keep the problems at your door?

Alex Schweitzer: I think we are. It is important to remember that the hospital is smaller than it was back then. We aren't seeing as many inpatients because of Tompkins. If you look at our costs over the 12 year period it hasn't increased much. We have a small core group of mentally ill individuals that are requiring a lot more intense care. Between working with the human service centers, we are dealing with their illness and return them to productive. This shows we are doing very well.

Chairman Pollert: Let's move to case load utilization. I would like to start with the 9.6 and go down the line to the 5.6 and the 2.476. What you are going to have to have is the utilization numbers. Representative Bellew I'm going to let you take over.

Representative Bellew: We are on traditional medical services on inpatient hospital. Just so the Senators know we disagree with the utilization rates the department has submitted. That is how we got our figures. As you can see the department budget has 662 units at 887 per month for the inpatient hospital . When we did our calculations it was from March 08-November 08. It

was the last 10 months and we thought it would be a good trend line. There was November 07-June 08 and they skipped February 08 because it was a low month

Chairman Pollert: If you see the shaded area it is what they used for case load utilization. Our average was $54.60.

Representative Bellew: We thought that was too high and 54.60 was too low. We split the difference and put 6,000 units in there. If you multiply that out, that is 682 less units times 887.70 times 24 months times the general fund amount of .37 which is the general fund amount that we have to pay. It comes to $5.367 million on that one.

Chairman Pollert: You could look at the numbers and get a different number every time.

Representative Bellew: These are arbitrary numbers we picked. We tried to split the differences and we don't think the growth is going to be as great as the department said it is. That is where we come up with these figures. The last five months shows an average of $87,283 units. The bottom figures is $5.376 million. The department used the stuff in the gray. The trend line looked like it was going down on us. Basically they used $137,000 to figure their budget. We reduced that by about 8,000 units. If you take 8201 times 1924 times 24 months times .37 it is $1.4 million.

Chairman Pollert: I have kind of a column there. If we used November 07, skipped May of 08, and through November of 08. I show $129,200 so that gets us pretty close to the number you were using.

Senator Warner : Why did you exclude outliers but include the little ones?

Chairman Pollert: We took out the high outlier just like the department of human services did on May of 08. We use November of 07 at the $158,771 and we use all the gray. If I'm correct we didn't use May of 2008 but we used October and November of 2008. In that case we took out the high.

Representative Ekstrom: If I remember correctly the department swayed the highs and lows. Things came in the following month. That is why we took those out.

Representative Bellew: The next one is physicians. The department used 167,000 units. We used $165,000. That is a difference of 11,059 units times 1761 times 24 times .37 which equals $1.7 million.

Chairman Pollert: If I'm correct I thought we used November of 07 which is in the gray area and went through November of 08, excluding January of 08.

Representative Bellew: That is correct.

Chairman Pollert: Just so you know that Representative Ekstrom and her group went through these. It wasn't just Representative Bellew and myself that went through this. It was the 5 on our side of the aisle. It wasn't us two only.

Senator Kilzer: When you were looking at these did you make sure they were the same? Inaudible.

Chairman Pollert: I can agree with you on that. If you want to get that information you can ask the department. I sure don't want to open this up. This took us just a day or two of going through the numbers. If you want to get them, we did this last year. We did not hit it as hard as the numbers. We used the numbers but did not agree with them completely. As an example the $17.61, we used different numbers last year as far as the cost. We did not do that this time. We accepted the cost of what DHS told us. I thought our numbers came out fairly well. If you take a look of the numbers of what they had we would see they are fair and we would see a deficiency appropriation if they were way off.

Senator Fischer: Let's for the moment presume that these are on the button as far as the figuring is concerned. As I said last session and I was wrong or partially wrong. The thing I was

concerned with was all of the things we went through is that trend lines are exactly that. This in the past, how do we know what we are facing with in the future. If the numbers come out we can take a look at hose. I have no doubt that Representative Bellew has the numbers close to the methodologies to do this. My question of this is how do we provide for the dollars to continue services if the trend line goes up and we have a larger case load?

Representative Bellew: The department does have the ability to move funds within their budget to cover if something happens they also have a general fund turn back of over $20 million. There is money in the budget to service the people in the state. We need to make sure we aren't short changing the citizens of the state one bit.

Chairman Pollert: We could be right and we could be wrong.

Senator Fischer: The only concern I have is the change in the world around us. If these people have nowhere else to go how do we deal with this as legislators. There is always the unknown

Chairman Pollert: It was a very uncomfortable feeling for us last session because this was about the first time that the HR section ever really did it this way. We were nervous too but we took some bad heat because of what we did and we were right. I have a lot of faith in DHS.

Senator Fisher: I'm not asking you to put the money back in. We came over to have this dialogue.

Chairman Pollert: Yes you and I had the discussion and I knew you were going to do that and I had no problem with it. At that time I said we will gladly show you what we did with that. Representative Bellew will gladly go through more. You can see how we did it. That is the biggest hit.

Representative Ekstrom: We have a pretty health budget as far as DHS goes. My concern right now after sitting through SB 2012 last night on the DOT is that you and I both know what

happens is this budget takes a hit. I would like to see a little insulation on this budget because of the competing interest across the board with all the budgets. Within the conversation that means that we are going to really have to go out and find this money. That concerns me. We did as good of a job as we could but we don't know.

Senator Warner: I have a question on the cost per unit. Is this a rebased plus 6 or 7?

Representative Bellew: It is a rebase plus 7. When we did the budget it was a rebased plus 7.

Chairman Pollert: You were right but when we did the amendments to go to 6 then we would have adjusted for the 6. The amendments to go to 6 would have been a dollar value off the bottom line when we did the 7.

Representative Bellew: The figures that the DHS gave us were the rebasing plus 7.

Chairman Pollert: We are using the costs of the $87.70 and those were using the 7&7. When we would have gotten done and adopted the 6&6 the department or Legislative Council would have came forward with the dollars amounts of what the 6&6 does. That is when it would have shown up. We originally did use the 7&7.

Representative Bellew: The next one is premiums. PRTF is psychiatric residential treatment facilities of . The next one is dental services that I have is.

Chairman Pollert: What number did you use?

Representative Bellew: 11.641 units. We rounded it up to 9.6.

Chairman Pollert: We are going to recess until tomorrow morning at 8:00. We could start going through the bill on our own.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☑ Check here for Conference Committee

Hearing Date: 4/25/09

Recorder Job Number: 12245

Committee Clerk Signature

Minutes:

Chairman Pollert: Called the meeting to order. Let the record show that all conference committee members are present. First thing I would like to say is have an addition to what was said yesterday. Senator Fischer and I talked about case load utilizations and we talked about the last biennium. Then you had said something to the effect that maybe we might have been a little right. We were also a little wrong. We were wrong on the costs of what we did last biennium. I thought we were fairly right on the case loads. We were wrong on them. We aren't always right. Do you want any further discussion on case load utilization? Or do you want time to swallow that for another day? Would you rather have Representative Bellew give you the numbers? He can give you the totals for the traditional medical services. That was by far the biggest with the $9.6 million. We still have the $5.6 million under long term care and the $2.476 under DD's. That is up to you if you want those numbers.

Senator Warner: I don't think we need to get that deep into the detail at this point.

Chairman Pollert: Once we start that, I would hope that what we could do is as an example go through the condensed version on what was done on the Senate side and go down the list. We don't know how the Senate does it but as an example we would look at the equity. Instead of having paper with the motion we would just vote on it like we do in our section. The easier

one is to restore the salary equity funding. I would ask that be stricken from the bill. Instead of getting it in paper copy I would ask for a voice vote. If we get two on your side and two on our side. If you want it all on paper we could. If I get people to say that from our side to take out the salary equity then I would just do that.

Senator Fischer: The way we have gone through it is to accede from the house amendment that takes it out.

Chairman Pollert: Yeah but do you want to make the motion right away?

Senator Fischer: I don't know.

Chairman Pollert: After we get some point on Tuesday or Wednesday we would ask for that official motion about receding from the amendments and further amend. Then we would have Legislative Council have everything in front of us as a final for what we have done. Is that ok from the Senate side? Is that ok for the conference committee? I know we could take what we have done. I understand we have to have 2 votes for that. I had asked for this information from Jane Strummen. The other information coming around was the general funds on the SB 2396 the Allegheny project. If there is any discussion on that particular one now is the time. Handout Attachment A, B. With that I would like to take us to discussion on vacant FTE's. The house side had removed $2 million on the vacant FTE's. The Senate had restored it. I would just like to have a little discussion on that this morning.

Senator Kilzer: My memory says 58 FTE's for 24 months?

Chairman Pollert: At the very beginning like page 2 of the amendments on .0209 the statement of purpose, about halfway in they are going to be scattered through the budget from anticipated savings from vacant FTE's and employee turnover. That particular one for administrative support is $131,000. The house had taken out $2 million of general funds and there were federal funds in there. This also might relate to SB 2311. I don't know if the Senate

has worked on that bill or not. There were amendments coming out of the house about the roll up of vacant FTE's. I understand that it might see its demise on the Senate side. If it does we have to have the discussion as far as FTE's. Basically what the house did was ask and we had gotten list of the vacant FTE's at the beginning of the session. At that time and I may have to ask Brenda to come up, there were 114 vacant FTE's at the beginning of the biennium. Then on January 20th, there were 40 taken off or filled but there were still 74 unfilled positions. Our side looked at the average numbers. I will give you how we came up with this. What was done on the house side was a $6.1 million general fund. We just took that $6.1 divided by the $114.33 and took that number times the 74 unfilled FTE's. They come up with a number of $2.136 million. With 74 unfilled that left open up $3.987 million if I'm correct. On the house side we took half of those dollars. That is how the $2 million came up. I have a form from here dated 2/27 vacant positions. At that point there are 91.68 vacant FTE's. Out of that it comes out of $5.13 million. Where are your vacant FTE's at now do you have an idea? This report was handed out at the end of February 2009.

Brenda Weisz: No I'm not sure where we are at with our vacant FTE's. We have others who vacate at the same time. If you compare the December to February some will be the same because we do have trouble filling some of them. You will also find some that are gone, and we will have people leave. I'm not sure where we are at right now. The thing that we did, it doesn't take into account what the state hospital came up with for the same vacancies. In a way that was doubled up. The first vacancy list has all the state hospital vacancies in it.

Chairman Pollert: Let's say that at the beginning of the biennium at 91, as of January 20th for 74, we use that figure and come out with that. We got to the $4 million and took half of that. Could it not be said that the $5.3 million. If you take away the $1.3 million from the state

hospital that leaves $1.3 on the table. Still leaving you half of the vacant FTE dollars if you understand my math.

Brenda Weisz: You are looking at $1.3 million instead of $2 million.

Chairman Pollert: Do you understand how I'm coming up with that number?

Senator Warner: When you are over the agency budgets that the unfilled FTE funding is the funding that is used for retirements and the severance package, is that relevant to this discussion?

Brenda Weisz: When we prepare our budget there will be retirements and people that leave that you don't plan for. You can't build that in as a separate line item. You have to pay that out. When a position vacates for that reason, let's take an accountant, agencies do have to leave that position for 2 more months to cover the payout of the annual leave. We don't have money elsewhere in the budget to do that. I believe there is only about $22,000. What you do is try to manage that. If you have planned retirements you try to propose that within your budget. Otherwise agencies do have to accommodate that within their salary dollars.

Chairman Pollert: Is there any other discussions before we start looking at the list of what we might agree on and what we won't? I'm looking at amendments .0209 and starting at the statement of purpose on page 2. When we go some of these are spread through the whole budget in the sections. Starting on page 2 it says restore the funding for salaries and wages for anticipated savings. I'm not ready to bring that forward I would like the Senate to think about that for the next couple of days and see if we can act on that Monday or Tuesday. The next one is to restore the funding for state employee salary equity adjustments of the $3.458 million. I would ask for discussion on that. I think everyone is aware of what is happening with that. Would it be appropriate that we have voice votes or roll call votes to see if we get the two on the house and senate sides, is that how you do it? That is how amendments get adopted.

Roxanne Woeste: That is correct. A roll call vote would be fine.

Chairman Pollert: Is there any discussions? I think the salary equity is supposed to go on the Office of Management and Budget. I would ask that this be the first one about pulling the equity on HB 1012. Took the roll call vote and we have two votes from each side. We are going to skip over some of these. The next one would be to provide funding for young adult transition residential services and the human services region. That is one of the facilities that the Senate added the amendment to do one of the adult transition facilities services if I'm correct.

Senator Warner: I would move that we accede to the Senate position and fund the one.

Chairman Pollert: Is there any discussion? I'm going to have Brenda or Maggie come up one more time to tell us what this youth transition center is once again.

Representative Ekstrom: What I'm remembering is that these are individuals that have aged out of the foster care system. They need a little bit more help to transition and being on their own. The alternative is that they are going to be homeless.

Chairman Pollert: What did they do before?

Representative Ekstrom: They were on their own and getting themselves into some trouble.

Senator Warner: This is a population that they weren't allowed to do anything. They weren't allowed to drive because the insurance between their foster parents wouldn't assume the responsibility for insuring a child that was not their own. Many of them haven't owned a car, many of them haven't worked. Many of them haven't had a checking account because they have had no income. Many of them haven't had discretionary income because they haven't managed a budget. I would love to see at least two of these and maybe more. I think the fact that we are releasing has to do with one of them. We are going to be turn an 8 bed unit 4 times in a biennium, maybe 32 kids.

Chairman Pollert: This discussion should be in the human service part of the budget and not here. I wonder why this is in this part of the section. It doesn't really matter.

Representative Bellew: This was an OAR I presume. There were 2 of them as OAR's. If I remember right it was $800,000 or two of them. The one OAR of young adult transition service south east. If you go to the OAR list it is $184,000 general funds and $213,000 federal. I would like the Senate to explain to me where the general/federal came in.

Chairman Pollert: Are these the transition services in Minot and one in badlands? This is different.

Senator Kilzer: In the executive budget it was $834,000 general funds. The house took it all out and in the Senate we felt that one unit or sight could be built with half of that. That is where the $417,000 comes from.

Representative Bellew: My point is that in the governor's budget there were $650 and $184 in the funds. That does leave $417,000. If it goes to southeast I think it is overly funded. If it goes to west central it might be under funded.

Senator Kilzer: We didn't make that decision as to which would receive and which would not.

Roxanne Woeste: I was going to try to clarify something. You see this in the division under management. That is where I put it at the time we were drafting amendments. They wanted the department to decide which human service center would be most appropriate. I didn't have an indication as to where the funding would go. That is why you see it here instead of under human service centers.

Senator Warner: Part of the discussion seems to be that is this an OAR or in the executive budget? Was this approved by the Governor?

Representative Bellew: Yes it was in the executive budget. But it was an OAR that was approved.

Chairman Pollert: You will see it. There are OAR's that the Senate put in as amendments that weren't approved in the Governor's budget and this is one of the OAR's that was submitted before. Did you get a list of the OAR on the senate side? We will call the roll. It fails to get 2 from each side. I would rather do this all at one for the travel expenses. The Senate added back half of the travel reduction passed by the house.

Senator Warner: It is the nature of the motion to deal with that all across the budget and not division by division.

Chairman Pollert: I'd rather have it done all as one. If it's ok with you instead of being formal we will just ask the clerk to call the roll to see if we get two from each side. Then we will ask for the official amendment at the end.

Senator Warner: That is ok I just wanted to be clear on what we were voting on.

Chairman Pollert: And I hope we don't have a problem voting on this as a whole instead of section by section. It will be as a whole of the department to accept the Senate's amendment about half of the travel reduction passed by the house. A lot of these amendments were done by Representative Bellew. Does that number look accurate?

Representative Bellew: Yes it does. If we do this would we be going $76,000 back? It removes $76,000 right?

Chairman Pollert: That is correct. This is what is happening.

Senator Kilzer: I would like to be clear that if we have a yes vote we are at the Senate version of adding half of that back.

Chairman Pollert: Took roll call and the motion passes. On page 2 of that report we are talking about the vacant positions so we won't have a discussion on that. I need to ask the question on the next one on the page which is the expand assistance for pregnant women in approved by the government.

Roxanne Woeste: There are two adjustments that deal with that. One is on page 2. The appropriation is split between benefits which is the amount listen on page 4 and the amount listed on page 2 of that is the amount needed to make the necessary IT changes. That is why you see two adjustments related to the same item.

Chairman Pollert: I know that is a bill that failed on the house side. I would ask anyone to speak up on that particular amendment that was added.

Senator Kilzer: The $85,000 of general funds was added back in because going up to 165% of the poverty level we will have an increased eligibility level and the IT system changes will have to be made in order to accommodate that change in eligibility and benefits.

Chairman Pollert: I would ask that the committee would look at this as a whole. On page 4 of the amendments about halfway down would have to be added on to the $85,756. We should talk about the two in conjunction together. It sounds like you can't do one without the other.

Senator Warner: This is one of the primary pro life initiatives in the Senate that was an effort to address prenatal needs for women. This would be for those whose incomes simply don't allow for the kind of prenatal care which the middle and upper classes take for granted. I think it is pro life and a proactive approach to for stalling future medical problems that would come from premature births. We would have to look at the Ann Carlsen center to see the devastating impact of premature birth and inadequate health care during that prenatal period. That was the primary prolife initiative. The Senate will defend this.

Representative Ekstrom: In terms of abortions as well, this enters the heart for people carrying healthy children to term and not being forced into a situation of saying I can't carry this baby to term because I can't access health care for myself. One of the heart burns I heard was this would extend medical insurance to an individual but it would include anything that would happen during the time of her pregnancy so if she would break her arm she would still have

access. I would really say that this is an alternative to abortion, it is pro life, and it is absolutely talking about the health of children who otherwise might wind up at Ann Carlsen.

Chairman Pollert: We can say that at about every segment of our population. I understand that and the Senate put it back in when it failed on the house side.

Representative Bellew: Aren't these ladies eligible for Medicaid?

Maggie Anderson: Today ND is at the federal minimum which is 133% of poverty for pregnant women. This amendment would take that to 165. The individuals between 133 and 165 are not currently eligible for Medicaid.

Senator Kilzer: My numbers as I recall is about 385 women per year.

Maggie Anderson: Yes that sounds right.

Senator Warner: When this bill was introduced the Senate was at 200% of poverty. The Senate reduced it to 165%.

Representative Ekstrom: The other aspect of this that I find stunning is there are very simple things that women can do in a very early part of their pregnancy like simply adding niacin at the very beginning of conception can avoid diseases.

Representative Bellew: I don't think anyone here can answer this question but are the records available to indicate how many women at this income level do have abortions? Basically how many of those 385 would carry them to full term and how many abort their baby.

Senator Warner: I think that is an unfortunate analogy. I don't think anyone in the Senate would say that unless they are aborted that it is irrelevant. There are obviously implications to the prenatal care like a simple vitamin. That would have a huge impact on the lives of these children. We would never make that kind of a determination as to well if it's going to be aborted than its ok.

Chairman Pollert: You will find that Representative Bellew is pretty strong prolife. We will stop there.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☒ Check here for Conference Committee

Hearing Date: 4/27/09

Recorder Job Number: 12279

Committee Clerk Signature Meagan Pearce

Minutes:

Chairman Pollert: Called the meeting to order and noted that every member was present. Handout A. I will give you a little protocol. At some point someone is going to have to bring forward the motion to have the Senate recede from their amendments. As we are going through the points of what was done at the Senate side if there is an item that we don't want to have discussed quite yet we have to make sure we make that apparent that it will get settled down the road. I did talk to Legislative Council about the procedure this morning and it is fine. If we would ask for a motion from the Senate to recede from their amendments they would be doing everything. We are basically going to pick at the bottom of the tree for awhile. That is what it means. I wanted to clarify that. Just so we work that way. I invited Representative Kreidt to sit in because there will be a point where he will be in on the conference committee. I would like for him to explain the house side as far as on the long term care salary and supplemental payments on the 80th percentile. If it's ok with the conference committee I would like to have him go through the version. He made the motion and is more familiar with the subject. If it's ok I will have him give us a brief description.

Representative Kreidt: If you can remember when 1012 came over to the Senate and the amendments that were included in there in regards to the dollar amount that would have

provided a pass through for nursing home employees and basic care employees we were using a percentile at that time. It came over with the 80th percentile and we did adjust that to a 90th. In visiting with the department we became aware that the percentage figure wasn't going to work. They just couldn't get the numbers to come out and get the correct amount of dollars to the facilities to do the pat through. We continued to talk about the dollar salary increase for those individuals. We did exclude the administrators and the directors of nursing and the upper category of staff at the facilities. The dollar mounts that did come out of the house over to the Senate did not include the dollar amount that everyone under the director of nursing and administrators would receive that. The amount was meant to go to the lower percent of the employees. The dollar amount there the administrator had the discretion of using those dollars for salary increases and fringe benefits. If the administrator went and felt that he had an employee that deserved more than $1 amount raise. If they wanted to go ahead and give them a 50 cent raise that would be appropriate. The concern I have now of using the $1 per hour and I see that with the amendment coming back from the Senate and I'm looking at two different numbers I have seen one is $2.9 and one is $2.8 million. I'm not quite sure if that is an error. I'm anticipating that the extra dollars that are included in that amount would bring the dollar amount up to what the senate anticipated and fully fund those individuals to $1 an hour. My concern is that using the dollar per hour figure I would just as soon see the dollar amount that is mentioned removed and just using the flat dollar amount through negotiations of conference committee. I feel that for facilities to have the advantage of using this money where they feel is most needed in regards to their employees and not tying them to the $1/hour. What usually happens is the staff out there is aware what is going on. When it comes to salaries and dollars they are pretty up to par. The administration of the facilities will keep them up to par with what is happening in regards to their salaries. We keep the dollar amount in there. The

staff come in and say that we passed it out and they want it. For some facilities it becomes a problem. They would like to be able to have the discretion and not be locked into that. They will survey the facilities and make the proper appropriation and dollars of not having it tied to the dollar per hour in each of the basic care family and nursing facilities in ND. That was the logic as it came from the house to the Senate. Hopefully conference committee could look at it favorably and move forward with that recommendation.

Chairman Pollert: Are there any questions?

Senator Warner: We talked briefly about the administrators and the directors of nursing. I understand that the dollar per hours don't come from that direction. Is it true that they will grant them money for the position? These people aren't cut out of raises but just aren't covered for that one dollar per hour. Is my understanding correct?

Representative Kreidt: That is correct. The last time back in 2001 if you remember there was a direct pass through going into facilities. There were some follow up by the department through the service process to see that the dollars were used for raises and benefits so they weren't spent on capital expenditures or supplies. These dollars will be going to employees and as I mentioned for giving administration and boards the prerogative for using the dollars and not locking them into the dollar and having the discretion for doing what is best for the employees. If you really have a problem to maintain the CNA staff and attracting new individuals and recruitment, they may plug in a considerable amount of money to staffing the facility. If you have a facility that has a 60-70% turnover they might want to use the majority of that money to maintain that. That is where the critical part of operation is with your hands on people and personal care. That would give them that flexibility.

Senator Kilzer: In your presentation right now you did not mention what I considered the greatest problem of all which is compression. Can you tell us how that was thought of when

you made the house amendments? Did you consider that problem at all?

Representative Kreidt: That discussion really wasn't discussed. Every facility out there is run and is operated under the case mix and equalization of rates. Compression and facilities when you are talking about that, is never discussed. I have never heard that discussion from the industry at any point that I can recall. That has never been a topic of discussion in the industry.

Senator Kilzer: Compression can get to be so bad that new hires receive more reimbursement than 10 year veteran employees. I'm very disappointed to hear that it wasn't discussed.

Representative Kreidt: I can only reference two facilities that I have been associated with. We have never experienced like we do with our state employees, a serious problem with compression.

Chairman Pollert: Are there any other questions? With that we will turn back to what we were working on here the other day. I have invited Representative Kreidt to be here but if he is going to come into this thing on Wednesday because I don't want to bring someone in here cold turkey. We were on the .0209 on page 3 of the statement of purpose. Like I said we are going to pick the lower apples and fruit on the tree that aren't quite as contentious. With that when we had stopped we were just getting to the point and we might want a little further discussion on the items. We were at the where the Senate restored the funding for the medically needy to reflect the income levels at 83% of the poverty level. We can sure have discussion on this part before we move to the next subject.

Senator Warner: The question is that my understanding is 83% of poverty is the threshold for SSI. If we were looking at the continuity of care and the state would pick it up, if we established it at a 75% we are maintaining a gap between the two, is that correct?

Maggie Anderson: The 83% was picked because it was the closest level to SSI. Individuals who receive SSI are considered categorically eligible for Medicaid with no recipient liability. These are individuals who are not receiving SSI.

Senator Warner: If we establish that we would cover the continuum without a gap?

Maggie Anderson: The coverage would be comparable. At 83% the individuals not receiving SSI would have little or no recipient liability comparable to the people who are categorically eligible and SSI with no recipient liability.

Chairman Pollert: On the house side, didn't we have a discussion on a family of 2 and the monthly rates that were fairly comparable with the 80% when we looked at the 75.

Senator Kilzer: At 75% one person could receive up to $650 a month and 2 people could receive up to $875 a month.

Representative Bellew: I would like a clarification on that. Maybe I'm wrong but my notes say $750 for one and $875 for two. If someone could clarify that it would be appreciated.

Maggie Anderson: At 83% of poverty a family of one is $720 and 2 is $969. At SSI it is $637 and $956. That comparison is most accurate and close between those two. I am looking for my additional thing we did on the Senate testimony. At 75% of poverty a family of 1 is $650 and 2 is $875.

Representative Ekstrom: Remind me when the last time we raised this was?

Maggie Anderson: January of 2003. It was frozen January of 2003.

Chairman Pollert: This takes 2 from both sides. Is there still concern? Do we need to have any discussion on the rebasing of the physician payments rate?

Representative Bellew: I would like to have the senate explain this to me. I think we need a discussion. This is one of the big things but not the low hanging apples.

Chairman Pollert: I think we need to have a little more discussion. I understand what the Governor did at 100% for hospitals. The physicians were at 25%. I'm not going to remember the other ones as well.

Senator Kilzer: The Senate did make major changes in the budget. We did a pretty thorough study before we received approval of the whole Senate on this. Rebasing in some areas is done very regularly every 4-5 years. In other areas it's not done for long periods of time like greater than 10 years. The biggest gap between what is reimbursed by Medicaid and the rebasing is in physician services. The department did have a major undertaking in the last interim. The projected rebasing was done up between June 30th of 2010. In some of the budgets you will see an increase above the amount. That is the explanation. If I could focus on hospitals and physicians, hospitals were put in the executive budget at 100% of the rebasing. That was kept in by the Senate. Physicians were completely changed. The physician's base was last done 17 years ago. The physician's reimbursement is 51% of actual cost. It has been chronically that way for a long time. To bring it up to 100% of actual cost would be quite expensive and therefore we kind of look at all of these outside hospitals to bringing them up to 75% of the rebased value. That doesn't mean it is 75% of costs. It means that it would bring it up to 75% of the rebased figure. The Governor had it at 25%. The house reduced it to 20%. In reality, previously they have been rebased at 515 of the actual cost. The Governor's budget would have brought it up to 64% of actual cost. The house takes it back to 60%. If we would go with what the Senate says at 75% of the rebased value that would bring it up to around 88 or 89% of actual cost. It is a parallel situation but not the exact situation when you talk about rebasing or just raw actual cost. That is the background of how and why the Senate went to the 75% of the rebased cost which would bring it up to 88 or 89% of the actual cost.

Chairman Pollert: Any comments or questions? I have one. It's not that I don't' agree with you because I can agree with you. My only concern is when you add another $10.7 million to the budget I have concerns about the cost to continue. I struggle with why the executive budget was 100% for hospitals and 25% for physicians. I have concerns as far as the costs to continue. Not saying that in future biennium's that this is a priority. There is no doubt about that. It is a small comment I have.

Senator Kilzer: I would respond with a reality treatment. Just because someone has been under funded for a long time doesn't meant they should continue that into the future. It looks like the legislature is not appreciative when they are getting all this free care under cost and they add additional people and patients to the whole situation. That is why the intent was put in the bill to work toward what they release. They spent a lot of money on and they spent a lot of money on the rebasing. If you aren't going to follow the results, why did you do the study? I think with those basic tenants that we should be working and have a true goal of getting up to what we discovered in the rebasing.

Chairman Pollert: Could it not be said that the executive budget was working in that direction. We could also say that physicians were put at 25%. I have no idea but couldn't you say we were working in that direction?

Senator Kilzer; I have inquired as to why there were such large discrepancies. It looked to me like there was a compromise on the budget. It would have been too expensive to put everyone up where they truly belong. They put up the less expensive categories. The more expensive ones, they left them in a chronic state of underfunding. That is my conclusion and only my conclusion. That is the best answer I could find after working with the various providers.

Chairman Pollert: That gets to my point that I understand from what the executive budget did and what the senate did. It is costly. I'm not saying it's not right. The $10.7 is a big arm to chew

as far as general funds. I don't know how we are going to resolve that. That is one issue we are going to have to talk about later down the road. This is a related. When you did a study related on the senate side about legislative intent language when we need to go to costs, there is a section or two added to 1012 about the legislative intent to get to cost. Could we have a discussion there? I don't' remember what sections it is.

Senator Kilzer: It is in this bill that the intention is to fully implement the results of the rebased studies. I mentioned before about increasing the eligibility so we will have more people on the wagon. If you are going to keep doing that you will certainly need the legislative intent. Otherwise we will slip back to the way we are right now.

Senator Fischer: I believe that amendment set a goal to 100% by making it very clear it was the first step to getting hospitals, physicians, dentists to getting them to the appropriate care. They spent a lot of time going through the rebasing. If we aren't going to use rebasing why spend the money to do it. Then we can offer them whatever they feel. How long are we going to have hospitals and how long are they going to stay? I believe that in the larger cities there are struggles with the Medicaid population and it is a lot less of the percentage of the total business they do. If we don't address this now when are we going to do it?

Chairman Pollert: I appreciate that and members from the Senate side but how big of steps do you take? It's not that we shouldn't have that as a goal. I just have concerns because every time we add a new program on to DHS that is a cause of concern.

Senator Fischer: When we add those programs they will be analyzed at the rates that we set now. Maybe some of those programs will have different eligibilities. We have gone over the programs that are in place now. You are absolutely right. The cost is going to be greater for the program because of what we do here. Do we keep throwing people in the wagon at this rate? You are going to have hospitals that won't survive.

Chairman Pollert: Could it be said that from your statement that with what we are doing with hospitals, would it be more of a concern that the physician's arena might have trouble surviving or are they correlated?

Senator Fischer: I didn't mean it that way. I'm surprised that some of the hospitals remaining open are open. They are having problems. Would we have the situation in Rolla if the reimbursement were higher? If we are paying the hospitals to survive rather than the reimbursing them at an appropriate rate, are they going to survive on their own?

Senator Kilzer: You kind of implied that the physician service and hospital service are inter-connected. That is not true. It is reimbursement and it should and hopefully does go based upon the services provided. The cost shifting that has gone on in the past, and I can remember when part of the negotiation of blue cross when they used to have that was how much free care was provided by the hospital. That would figure into the negotiation factors. In the modern days bill charges don't mean anything at all. Everything is based upon the fee schedule of the hospital. Third party payers, whether they are workers comp or commercial insurance, they all have their own fee schedules. There is no provisions for cost shifting for other third party payers like Medicaid that don't pay the necessary bottom to continue the service. That part has changed over the last decade, I would be glad to answer questions about that. I hope it's understood what we are talking about and how the third party payers pay off of their fee schedules.

Senator Warner: This is a small point and the distinction needs to be made. The hospitals under ND law can't turn anyone away. The physician's can and I don't think they will go away if we can't cover them at costs. We are going to have diminished access if we don't compensate physicians at the level that they deserve to be. We are going to start seeing the problem. I think we will see it in psychiatry as well. It will appear in the specialty fields before general

practice. It's an issue that needs to be addressed. If we don't do it now when we have the resources to do it I don't think we will make a strong effort in the future.

Chairman Pollert: I think we needed to have this discussion. We will go down to the next line. Basically the ambulances were put back to the executive budget and same way with dentists. Did the house side work or do anything on chiropractors. I might need an explanation about that. What was the Governor's budget?

Representative Bellew: I do have the amendments that we did pass out for chiropractors. It says the executive budget includes funding for $416,000 of which $153,000 is from the general fund. We are rebasing chiropractor payment rates at 100% of the costs. We amended that to reduce the funding for rebasing to 75% of the cost report.

Chairman Pollert: That wasn't addressed on the Senate amendments?

Representative Bellew: I didn't see that.

Chairman Pollert: I just wanted to make sure I didn't miss them.

Senator Kilzer: On the chiropractic issue and some of the smaller ones, is where I mentioned that he did not reduce the smaller items. You had put it at 75% and that is where we left it. We really chose to try to put all of the non hospital providers to 75%.

Chairman Pollert: And you changed the ambulances but ambulances were based off of Medicare rates. I am moving to page 4. At the top of that page it says provide funding in the grants medical assistance line item for supplemental payments of small rural critical access hospitals. I would suspect that there is probably language in one of the sections in HB 1012.

Roxanne Woeste: That is section 13 if you look in the legal version of the amendment .0209 on page 4. Section 13 refers to the supplemental payment to critical access hospitals.

Chairman Pollert: Does anyone here have an objection? Would you want to wait with this or rather have the discussion now?

Representative Bellew: Let's discuss this now.

Chairman Pollert: I will ask for a brief description.

Senator Kilzer: This is the Rolla hospital situation where they have 31% of their revenue coming from Medicaid. The next highest is 16% of revenue from Medicaid. This hospital was getting into trouble largely because Medicare and Medicaid was not allowing reimbursement for outpatient lab and anesthesia services. They had no alternative except to seriously thinking of closing their doors and come to the legislature to get funding. That is what this is.

Chairman Pollert: I will attempt one vote. That is agreed upon 6-0-0.

Senator Warner: We had some discussion on our committee that this is not to become a new budget line item but a onetime thing. It will be a temporary mandate with a more systematic solution. It is to give them breathing space and to stop that temporarily. It is understood and needs to be addressed.

Roxanne Woeste: I can clearly indicate that if you would so like me to do that the $400,000 is one time funding.

Chairman Pollert: On the Senate side do you think there will be a federal fix coming to this?

Senator Warner: We heard there was a dispute in the way they interpreted it. In some places in the country it is a covered service. In others it is not. It may be a small distinction. It may take something at the congressional level to address the issue.

Representative Bellew: Do we need an emergency clause?

Senator Fischer: We didn't hear any discussion. They are under an order to close if they haven't been able to resolve this. The fact that it has been addressed here will lift that. The other thing is that the 100% reimbursement they feel is that amount will help them with their financial situation if that happens.

Chairman Pollert: I know we are going back two years but I think we added $1 million to critical access hospitals last biennium. I think it was thought at that time it was going to help that situation. I take it that it didn't help them as much as they hoped. Does anyone recollect?

Senator Fischer: Their Medicaid population increased. The other thing is that the issue that Senator Warner addressed also is as big a problem.

Chairman Pollert: We are going to move on. We won't discuss the next two items and I don't have to explain why. It will come up on the house floor again today possibly.

Representative Ekstrom: I think if we wanted to that we could possibly discuss where we would like to see that bill in terms of number. I heard there was movement over the weekend.

Chairman Pollert: It is not for us to set policy. Let's see what happens before we go there.

Representative Ekstrom: The thought was that perhaps it would survive better on the floor in here than as a standalone. That is purely procedural.

Chairman Pollert: We decided to wait on the medical assistance for pregnant women which was killed on the house floor. Does anyone have what the vote was for that bill? We will move over to the long term care area. I would like a further explanation of the third tier personal care. I know what it does but is there savings to the state on that? If someone can't answer that I would ask DHS to come forward.

Representative Ekstrom: When I did the calculations on this there was an indication that some 200 people that came out, with the addition of the 2 extra hours, I took the average rate of nursing home care right now and over the biennium it saves about $ 1million.

Chairman Pollert: I'm trying to have you convince me about this. Why would be spend $2.7 million to save $ 1million. To me that sounds negative.

Representative Ekstrom: It goes on. We keep those folks out longer. Less people will go into long term care.

Maggie Anderson: I can't speak to all the spending and saving. We do know that for example about 10 of the clients we are working with would be able to move out of nursing facilities and back to the community if they would have that extra 2 hours a day of personal care. What this is about is providing a continuum of care that offers choice to clients about where they reside. If they find themselves in a situation where they meet nursing home level of care and want to remain in the community and receive the services to remain in the community, this is what this option is about is those individuals who can stay in the community with 8 hours of care but can't stay in the community if they need 8.5 or 10 hours. There only choice is to go to a situational setting. This is about consumer directed choices about long term care options. Long term, if you can keep those individuals in the community, first of all that is their choice. That is where they want to be. Second of all long term it will save dollars because community care is less expensive than institutional care.

Chairman Pollert: So this is not a onetime appropriation but an ongoing expenditure that we are going to have.

Maggie Anderson: That is correct. This would be a modification to our state plan service called personal care. It would revise our limits which would be revised to 10 hours of care versus the 8.

Chairman Pollert: There has to be savings somewhere.

Maggie Anderson: That is the savings that there is maybe 10 people out there. If you leave this in and we implement it there are 5 people that would otherwise go into a nursing home. Because they now can access 2 additional hours of care in their home every day they can stay in their home. Where you are going to see the savings is in fewer long term care expenditures.

Chairman Pollert: We will continue that discussion later. The house vote was 44-49 against. We will be in recess until tomorrow morning.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☒ Check here for Conference Committee

Hearing Date: 4/28/09

Recorder Job Number: 12322

Committee Clerk Signature Morgan Pettit

Minutes:

Chairman Pollert: Called the meeting to order and let the record show every member is present. It's going to be a short one this morning but we are lined up for an hour this afternoon. With that we left off yesterday on the third tier of personal care. Was there any further discussion on that?

Representative Bellew: I personally don't have a problem with the third tier level of care. I think there should be a rate of reduction for the nursing home budget. If this keeps people out of nursing homes there should be an offset somewhere.

Senator Warner: I sort of understood that there are people in nursing homes that could leave. I also assume there would be a population that could stay out of the nursing home all together for at least a longer period. That is the level of mathematics I never achieved. Did we address both sides of that equation before? I only recall the conversation of the 20 or so people that could leave the nursing homes and be able to live in their own homes. I don't recall the ones that could be remain in the communities longer if they had this third tier.

Chairman Pollert: Are you asking that someone come forward from DHS to clear your mind a little bit? It always clears mine.

Maggie Anderson: Specifically with the personal tier piece again it is about providing the

continuum of care for individuals that start out with basic care services in a basic care facility. It is a state funded SPED program. This third tier offers one more choice for clients to have so they can decide to remain in their home and receive the services in their home. It is about client choice and providing those choices. Institutional care is not the only alternative if they would need a bit more care in their home on a daily basis.

Chairman Pollert: What about Representative Bellew's question as far as the case load utilization for long term care drop?

Maggie Anderson: I think long term you will see decline in the utilization of nursing home facility beds. Are you going to see it one for one? Yesterday we talked about one of the services the department estimated for January 1, 2010 implementation date for. S assuming CMS approval we implement on January 1, we aren't going to have 30 clients on day 1 receiving personal care tier 3 and on that same day 30 clients who didn't go into the nursing home that come out of the nursing home. It's overtime where there is a client that is currently on the Medicaid state plan personal care who is getting along with 8 hours of care. Something is going to happen with their health/environmental condition in the next 3 months that they are going to need extra care. If this isn't in place or I choose to go into the nursing home. It's not a one for one. Some of the clients are already on the program and will need the additional hours as their health care needs increase. Others are in the nursing home that we have identified through our money follows the person project who we believe will come out. It's not a one for one exchange.

Representative Bellew: Did I hear you say that you have to get CMS approval for this so there is no guarantee of it?

Maggie Anderson: We do need CMS approval for this. Both appropriation committees have discussed that it will required CMS approval. We have what we call a state plan with them.

Many of the things that will be discussed and brought forward will need CMS approval. I don't expect any problems with that. Until we get into that process we aren't sure what het specific concerns might be.

Chairman Pollert: I want to wait on this. I might be looking for favorably but am not 100% there yet. We had a discussion from Representative Kreidt yesterday. I want to skip over that. What my intent would be is to look at the 7&7 that was put on the Senate floor and also this 2.9 I would want to take up all in one shot when we do that. I don't want to say that will happen tomorrow. We will have that discussion all at once. We know what the dollar does for the DD. Is there any discussion for the QSP's for the buck?

Representative Bellew: I see there is $853,000 but only $963,000 in federal. It seems it's not the 63 37 match. Could we have that explained?

Brenda Weisz: The reason we don't have as much federal funds is that the QSP's often serve the state only programs.

Chairman Pollert: I want to have a little discussion on the medically fragile and behaviorally challenged. I think the house side had $400,000 or some in there. We introduced the language from an independent firm. I want a little more discussion as far as why the Senate put in the 1.9 and 3.2 if someone could address that please. I'm probably wrong but I think we had 2 options in front of us. There was another one in there. I didn't think it was this high. I thought it was lower than that.

Representative Bellew: We had 2 proposals in that. The one was $1.168 million of general and $1.990 of federal. We called that alternate A. That one failed in our subcommittee. The one that passed was to increase payments by $538,900 of general funds and $747,957 of federal funds.

Chairman Pollert: Then I would ask the Senate how they came up with the $1.897 if those were the two unless that particular group of DD providers came to you with a different set of figures.

Senator Fischer: If I'm not mistaken there are two line items. There was $1,897,000.

Chairman Pollert: Was this on an OAR listing for the total dollar amounts? I'm wondering if that correlates out.

Roxanne Woeste: If you add the amount added by the Senate to the house, it equals what the OAR was.

Senator Fischer: One of them passed by the house was not an OAR? It was just combined?

Roxanne Woeste: I believe a good description would be that the house funded a portion of the OAR and the Senate funded the rest for a total.

Chairman Pollert: What I'm bringing up is just a curiosity sake why when we had an option a and b. I didn't know if you had that option. I don't know if that happened in y our discussions or not?

Senator Fischer: When we dealt with it, these apparently are together with the house and the difference of the OAR. That comes out to the total. That is the one that we support.

Chairman Pollert: And the study language was proposed in the house side? That is still probably 500? So you didn't play with the language on that?

Senator Fischer: Not that I recall, no.

Chairman Pollert: There is also a $100,000 fiscal note on that too.

Roxanne Woeste: I believe the study and the funding for the study was in HB 1556. That bill has been passed and signed.

Representative Bellew: If I have the right OAR on the back page of the OAR's it says DD staffing to meet critical needs, is that what we are talking about?

Roxanne Woeste: Yes I believe that is correct.

Chairman Pollert: If I was to vote on this today I wouldn't vote for the $1.897.

Senator Warner: Is there some other number that would be agreeable?

Chairman Pollert: There is and you will hear it later.

Senator Kilzer: May I ask why you wouldn't?

Chairman Pollert: We have a study coming in. I know there was an OAR out there. Why would we jump in with all feet when we don't know what the study is going to say? That is my opinion.

Representative Bellew: The Governor didn't fund this in his budget either. That is one of the things that I look upon. I would like to know that if the Governor didn't fund it and didn't think it was worthwhile?

Senator Kilzer: I would hope that each of us on the committee looks at the needs of whether or not it was funded in another budget. I pointed out to yesterday on the medical providers how terribly underfunded this had been for such a long time. I almost got the consensus that you think because something has been underfunded terribly for a long time that it shouldn't be properly funded. I hate to see that attitude.

Chairman Pollert: I understand your concerns and we struggle with this every biennium. We are also appropriators at the same time. We have people thinking we are funding too much. We struggle with that. I don't agree with that philosophy. That is my opinion. Going to page 5 of the amendments .0209 we already know about the $300,000. Does anyone want to discuss the healthy families? If I'm correct SB 2396 which is the Allegheny project, I think they were trying to get $350,000 some thousand. The Senate added $200,000 that had failed on the

house side. I want to look at that $200,000 in conjunction with. I will give you my personal opinion. The $200,000 I'm kind of nodding. The $1.2 is too hefty.

Representative Ekstrom: How are you feeling about the Arthur project of community care? That is in conjunction with this as well.

Chairman Pollert: It is related but it's not related. I look at that $120,000 of community of care. That is more of an all encompassing. That's not just the Allegheny project.

Representative Ekstrom: What I'm suggesting is that it might give us direction. We could let the $1.2 go at the moment. I think the Arthur project and some of the other programs will give us a better direction of where we are going with foster care. Foster Care is getting to be a pretty hefty expense.

Chairman Pollert: We will have a discussion on the community of care. We will take some votes on that and healthy families. Id' like to have the Senate give some thought on where they might be. With that there is a few of us that have meetings. We will be in recess until 3 this afternoon.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☒ Check here for Conference Committee

Hearing Date: 4/28/09

Recorder Job Number: 12350

Committee Clerk Signature

Minutes:

Chairman Pollert: Called the meeting back to order and let the record show that all conference committee members are present. We are on page 5 of the amendments .0209 on the statements of purpose. On that we were talking about healthy families in conjunction with the Allegheny project and also the family group counseling. So I'd like to have a little discussion to see if we have any common ground on what we might like to do. Healthy families and family group conferencing, I'd like to have a discussion. I myself am uncomfortable with the $1.2 million. I would like to have a little discussion about that.

Representative Ekstrom: Do you have a number in mind?

Chairman Pollert: Would you like to hear what I would like to bring forward? If you remember SB 2396 which is the Allegheny project, that bill was defeated in the house. There are certain items that I wouldn't mind seeing. I would look favorably upon healthy families for $200,000. I have a little pain in my side about the $1.2 million. I would be tempted to have a discussion about on the $1.2, remembering there is $125,000 in the NDSU extension budget for the parent resource center. If you remember SB 2396 there are four areas, parent resource areas, healthy families, and family team decision making pilot programs, and a safety and permanency funds enhancement. What I would like to see is to fund the $200,000 in healthy

families. I would like to see the $1.2 drop down to $200,000 and put $100,000 in the safety and permanency funds. I would be open to discussion on if you would like to keep the family group conferencing for 100 or put it in the family decision pilot programs or are those one in the same?

Representative Ekstrom: If counsel or Office of Management and Budget could tell us if we reduced that to $200,000 what would the federal match be at that point? We have $256,000 as the federal funds.

Chairman Pollert: When I look at SB 2396 it is all general funds.

Representative Ekstrom: on page 5 to add funding for family group conferencing.

Brenda Weisz: The federal funds were added when we did the Senate amendment. Since that time we have found out that there shouldn't be federal funds with that. The OAR had federal funds. It contained two types of services. Upon further review and having information it's not available for group conferencing there are only general funds available for that. If one of our grants would go up we would tap the federal funds if available. At this point there are no federal funds to go along with it.

Chairman Pollert: If you remember SB 2396 the family team decision making, is that the same thing or something different?

Brenda Weisz: It's the same thing.

Chairman Pollert: I would have to make it two different motions because the $200,000 is separate from the $1.2. We would have to break that out to $100,000 for the safety and permanency funds. What are safety and permanency funds?

Brenda Weisz: Payments we make out to the counties to assist families to keep their child at home, keep them out of placement, and do things for them to be able to keep them at home.

Chairman Pollert: Let's try a roll call on dropping the $1.2 million down to $200,000 with the $100,000 to the family group conferencing and $100,000 to the safety and permanency funds enhancement. It passes 6-0-0.

Representative Bellew: Give me a brief explanation on healthy families again? Is that foster care too?

Chairman Pollert: I would probably want to have someone talk on that. I think that it is when they would try to recognize or target families that would be having trouble. They would try to counsel them to keep them in the family. That was a project started in Grand Forks County and I think they got a grant for Burleigh and Morton. Now they are trying to go into Ward.

Brenda Weisz: It's parent support early intervention, a national model. They have expanded into Bismarck and Mandan and they want to in Minot. They got their start in Grand Forks.

Chairman Pollert: Any other discussion? I am in support of this amendment. We will take the roll. That is 6-0-0. I would like a little discussion on the providing funding for the grant for the community care program. Any discussion?

Representative Ekstrom: As I said the other day, this could serve as a pilot for us with the single point of entry. That is a goal in terms of getting people to access care and the levels of care and not be put through a lot of bureaucracy. This is a small step to get us some data. I know with the folks with Alzheimer's need this.

Chairman Pollert: We will see what happens with the $120,000 for the community of care. We would have to have a vote on the $300,000 for the next one above.

Senator Kilzer: This community of care is what is being done in Arthur, ND. I'm not sure what Representative Ekstrom was talking about? Were you talking about the example in Arthur?

Representative Ekstrom: I think that the Arthur program isn't the wrong door. Some of the things they are doing would give us data and let us see how they are getting people get

hooked up with services. It is really good information. It's not precisely where I want to go with the aging and disability resource list. I always wanted that. This is a setup that is already run and already has the boots on the ground. They provide us with a good model.

Senator Kilzer: I agree with that. The community of care is just that. It's involvement with the whole community. It's not just making sure that the person on SPED or some other program. This community of care is just as Representative Ekstrom pointed out, to be helpful to keep that person at the best level of activity in their own location of choice. I certainly do support the model.

Chairman Pollert: Any other discussion?

Senator Fischer: To get the ball rolling I would make a motion to eliminate the $300,000 to provide funding for a pilot aging and disability resource link.

Senator Kilzer: I second that.

Chairman Pollert: That would be throwing $300,000 out of that program.

Senator Warner: Would we be open to some consideration to have the same organization initiate the second pilot in the west?

Chairman Pollert: My input on that is that it is a pilot project. The house side has had some real reluctance about the one stop centers. I would like to see how this goes. If it's true that there are savings, I would like to see that before we go anymore. That is my impression. That passes 6-0-0. Now I want to bring up discussion for the community of care program.

Senator Warner: I would move that we fund that with $120,000.

Senator Fischer: I second that.

Representative Ekstrom: I would like to further amend. I would like to put an additional $10,000 to allow them to study the opportunity. What would it take to expand into another location? That is just purely pulled out of air. We asked for accountability on this one. We

wanted to see the same benchmarks and to hear from you if it was working. Just one more step further to talk about what a statewide system would look like. Just a little money to get that started.

Senator Warner: I second that.

Chairman Pollert: So this would be $130,000? Any discussion? What are you hoping to have accomplished?

Representative Ekstrom: Perhaps I have looked at the ADRC. One of the reasons that I had some misgivings was that we didn't really know what it was going to look like. We know what the Community of Care looks like. All I'm saying is that giving it to the dept. with the notion that it would start working out to get this done everywhere without duplication of services. The ultimate goal is to keep people in their homes and communities.

Chairman Pollert: Are you saying it would be for them to come back with accountability and what the savings might be with the programs. The $120,000 is going to go to the community of care program. Do you want $10,000 more to see what they bring forward?

Carol Olson: You aren't going to hear me say this very often but I'm not so sure we need an appropriation to do such a thing as this. The department's goal in this is to work with the community of care and follow what they do with their expansion and take their results and work with them to come up with the data. Jane already has data. We can report on that and work with them and move it forward. We can come back in the next legislative session and maybe during the interim and bring some information forth. I don't feel we would need an appropriation to pass along the information.

Chairman Pollert: We agreed on almost everything 100%. I would just ask if there is anyone that would want to recede from their motions.

Representative Ekstrom: I will recede from my motion.

Senator Warner: As will I.

Chairman Pollert: Any other discussion? That passes 6-0-0. Let's go down a little further. I think we went from the top of page 5. We will talk about the vacant FTE's later. We will move on to gambling. I have to remind myself what we did with that. The original recommendation from the executive budget was $300,000. The Senate adds another $100,000 to get it to $650,000. There is $400,000 from the Attorney General. Do we want any discussion on that? What the house did was an increase of $300,000. The house cut that down by half to $150,000. The Senate restored $100,000.

Senator Fischer: What is the source of the funds?

Chairman Pollert: The funds are general. Currently of the $250,000 that was added in, those are general funds.

Representative Ekstrom: I'm looking at our original sheet of amendments that we had. What I'm seeing is a decrease of $200,000. It looks like what the Senate did was put half of that back.

Senator Kilzer: In statute $400,000 comes from the attorney general's lottery fund. The Governor added $300,000 in the executive budget which made a total of $700,000. Was it $150,000 that was reduced by the house? One of the other things was to check how much tribes or reservation gambling is contributing to this compulsive gambling. It doesn't amount to very much. This is the major funding source for compulsive gambling.

Representative Bellew: My understanding is that the extra $100,000 the Senate put in would be for an advertising campaign so people know the programs are available and try to get them in treatment.

Senator Warner: Why doesn't all of this come out of the lottery proceeds? They are general fund rather than letting it get into the general fund to change its identity. It is all the same.

Chairman Pollert: It's a general fund appropriation out of the Attorney General's office as it was a general fund appropriation out of ours. It's not coming from the lottery proceeds because the lottery proceeds are those general funds.

Lori Laschkewitsch: The lottery proceeds are transferred to the general funds. If you are taking the money out of the lottery proceeds it will be transferred to the general funds.

Chairman Pollert: Indirectly it is a general fund. It's just a one stop spot before it gets there. You could say that in the health department budget about the EMS grants. The EMS grants are taken out of the insurance tax distribution fund or the insurance distribution fund. It is a similar way as they do the lottery compulsive gambling. It's the same way. It's a step before the general fund but it is a general fund direct effect. Is the other $150,000 for services or marketing? I don't have a problem if it's services but I do start having one if it is marketing. On compulsive gambling, the $400,000 comes from where? Is it going directly to services? You could tell me if it's for services or marketing?

JoeAnne Hoesel: It's for treatment. We had it allocated $450,000 for treatment. We had a small amount for travel and some for media. I'm not sure how it was reflected with all the changes that had gone on. We know there is a need for increased treatment. We also know if we don't do media that treatment is available. We certainly have a goal of increasing treatment so people know where to find that. We know when we run the media campaigns that our calls to the treatment center do increase. There is a balance with that.

Chairman Pollert: The original recommendation of the $300,000 do you have an idea how much is going to be program and how much is going to be marketing?

JoeAnne Hoesel: I can tell you of the $700,000 that $450,000 was treatment.

Chairman Pollert: So what you are telling me is that it was a proposal to spend $250,000 on marketing. Of the $700,000 after the Senate amendments that would be $650,000 total dollars

of which $450,000 would be for treatment which means if we take off the $150,000 for house. Here is my question. I have a problem with marketing. That is $200,000 for marketing. I have a problem with that. I'm just wondering if there is some kind of ground here or other. Of the $450,000 what are you doing for marketing now? It was originally $400,000 before this budget.

JoeAnne Hoesel: We did a small media campaign in 2007. We haven't done any of that since. I can get you the amount. What we have found is that if we don't do any marketing which is a website and radio spots, people don't' know how to access it. I will offer to you that it's a matter of putting it into grants and operating. I believe we do need to have some media to do this so people know how to access that. Certainly there is flexibility in terms of how that money is split into the allocation. We would abide with the wishes of the community.

Senator Warner: How would you anticipate the funding stream being used? Obviously the more you spend on marketing, the higher interest so it will eventually balance out. You anticipate the gross amount that will balance both sides of the equation.

Al Stenehjem: I do serve on the advisory committee with the Department of Human Services and the compulsive gambling group. I am involved in some of that discussion. It has always been our goal to make sure those services from gambling addiction are throughout the state. The funding we have put in place covers most of that when we have people that aren't working full time because the funding isn't available. We are looking to increasing that to full time for some of the people in Fargo and Grand Forks. The problem is that we can have all of the infrastructure and services available but if people do not know that they are available and the treatment is effective we just spend that money for nothing. I don't like to say its marketing. It's more of education, letting people know what is available if they have a problem with gambling so there is treatment available and in most cases it is successful. We need to get that message out and as we have done that we spent $60,000 last biennium just on education. It's

not very much money. We had to focus it in a 3-4 month period so we could utilize those dollars. What we are looking for is a little more comprehensive.

Senator Warner: Is there a number smaller than $700,000 that you think would do that job?

Al Stenejhem: When we first looked at it we were looking at $1.2 million. We put the services needed together and the education, training, and the marketing. We are down to $700,000. I think about $200,000 throughout the biennium is for marketing. The rest will go for services.

JoeAnne Hoesel: If I can clarify and give you more details. It was $534,000 for treatment. It was $160,000 for awareness outcomes and media, $820 for travel, and $5,180 for resource material. That totals $700,000.

Chairman Pollert: So currently the Senate version is at $650,000? What do you want to do committee?

Senator Warner: I would move that the conference adopt the Senate position on this at $650,000. We see this problem pop up all over the place. In the rural areas it seems to be the number 1 reason for embezzlement for our financial institutions. It seems to be linked to several cases that I know of for embezzlement for school boards, business managers, it's not just the down and out to get caught up with this. Quite frankly it seems the most people are women given the relatively small number of women who commit other types of crime. The number of women who commit crimes of this nature seem to be proportionally large. They are sweet little old ladies but the money still disappears. I think in the long run we would be better off putting it in this position. The Senate's number is pretty close to the number which had been approved.

Representative Ekstrom: I second that.

Chairman Pollert: When was the $400,000 first instituted?

Brenda Weisz: When the lottery went through there was $350,000 put in for treatment. I believe the last year Delzer was on the committee. It has stayed at $400,000.

Chairman Pollert: We will call the roll. The next one down the list is when the Senate added in $200,000 dollars. That is stated wrong. The Senate amendments restored the $200,000 that the house had taken out. The executive budget was at $200,000. The history on that was the last biennium there was $100,000 given. This is what it's about. This would be an increase of $100,000.

Representative Bellew: If the committee remembers that money comes from the community health trust fund. This is all general fund money.

Senator Kilzer: This is one of the focuses of the present governor and first lady. ND really has the worst problem in the nation with underage drinking. This needs to be continued with additional attention. That is why we want to get a better handle on the problem and not give us the dishonor of being the worst state in the nation in this category.

Chairman Pollert: I would be in support of $100,000 of what we did last biennium. I don't know about $200,000. That is just my position right now. Should we just wait for a later date?

Senator Kilzer: I appreciate your comment and I to fret a little that the community health trust fund is being used the way it is. When you look at the list of the good projects that it funded and how it can no longer fund the projects. It is going to be difficult. We may end up doing not as the Senate wanted to do.

Representative Ekstrom: Fargo has the worst record of all in terms of binge drinking. I would like to have the $200,000 I think they have to have some level of funding. If we can get it back to the $100,000, I'm not thrilled, but we may need to go there.

Senator Kilzer: I am suggesting and requesting to go to $100,000 in recognition of the problems of the community health trust fund.

Chairman Pollert: If I understand the discussion it would be to have $100,000 go into the governor's advisory council and $100,000 would be reduced but there would be $100,000 in the program. Any other discussion?

Senator Kilzer: Because of the community trust fund I have to make the motion that we put $100,000 into the biennium for this.

Representative Ekstrom: I second that.

Chairman Pollert: I have the same worries as well as far as what is going on. It has been a real struggle for us as to trying to figure out and get more money into Women's Way, etc. Here on this conference committee we will be addressing this. This motion would reduce the Senate amendment by $100,000. This one passes 6-0-0. I want to have a little discussion but not vote on this, the peer support. I don't want to vote on this today. I would like to have someone step forward.

Representative Ekstrom: I'm sure most of the committee remember that peer support is coming out of the mental health community. It matches up people who have had severely mental illness. They have a buddy system. It allows them to buddy up with someone who is experiencing difficulty. We have heard testimony from people who have not been out of their houses. We want to get them up and out and back into the community again. We talked a long time about the difficulties we are having at the state hospital and the fact they are taking care of people with greater acuity and cases where they are certainly mentally ill. These folks are back but aren't doing so well. This one person keeps people from falling into the well and winding up at the state hospital. I would be willing to negotiate how much this would be but I do think some additional funding is really needed.

Representative Bellew: This is an OAR? There were also some federal funds with that. Could the department explain this?

Brenda Weisz: When we developed the OAR in the summer we did have a state plan with CMS to add peer support for a state plan. We were told subsequent to that to remove that from our state plan. There will be no Medicaid funds available. At the time the amendment passed it would be all general funds at this point.

Chairman Pollert: Can you give me a brief description on peer support.

JoeAnne Hoesel: Peer support is a program and there are different levels. Our initial OAR is a funnel service through Medicaid. However this amount that we are looking at right now of $300,000 represents a lower tiered peer support program for individuals that have a mental illness that are in recovery are trained to provide peer support. They are really an extension of case management. What they do provide to people currently in treatment and receiving services for their mental illness is hope. Hope we know by research and our day to day experience with service delivery is one of the major factors is the difference of someone maintaining and going in and out of hospitalization and having longer periods of recovery and stabilization. We have individuals are doing things that they never thought themselves to be able to do like have employment, own their own homes, go out of their homes, go to a church function. It is a difference between recovery that is minimal to recovery that is robust and brings them more in line and involved in their community.

Chairman Pollert: What was the budget the previous biennium on peer support?

JoeAnne Hoesel: There has been a small program pieced together through western sunrise and Northwest Human Service Center. Western Sunrise is a contract through that through their psycho social rehab center. It's an extension of that.

Chairman Pollert: Is it like 30,40,50,000?

JoeAnne Hoesel: What it does is it actually hires individuals that are having stable mental health recovery. They come in and match them with a person in treatment. It's all driven by a treatment plan and they are supervised to go towards the right direction.

Chairman Pollert: Handout A. This is a breakdown of the amount of money for the Centers of Independent Living. I asked the department for a current budget for grants to independent living. As you see the current budget in 07-09 is $1.344 million. You will see the general breakdown. The Governor's budget was for $800,000 of general funds. The house reduced that. What is in front of us today is we are going from a $530,958 general fund balance to $1.080. It's about 100% increase. Then the federal funds stay pretty steady the way this looks. With that, this will be coming up tomorrow so you had some information. We are lined up for 2 meetings tomorrow for an hour long each.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☒ Check here for Conference Committee

Hearing Date: 4/29/09

Recorder Job Number: 12371

Committee Clerk Signature

Minutes:

Chairman Pollert: Called the meeting to order and let the record show that every member was present and that Representative Bellew was replaced by Representative Kreidt. With that is going to be the long term care hour. When I say long term care if we go back to page 4 that is not what I'm talking about. I don't want to discuss the third tier personal care yet. I want to have a discussion on the 7&7 and the Senate floor amendments to move from 75 to 95 on the Senate floor. I want to talk about the funding for the long term care. I would like to talk about the dollar increase for the QSP's and also the dollar on the DD. With that I would start with a discussion of the Senate amendments on the floor. In your packets they are numbered the 02-11. Senator Warner I think that was your amendment .0213.

Senator Warner: This is a number that was bedded by the department of human service but by the executive branch with the recommendation coming out of the Governor's office. We felt that it was appropriate given the rate of inflation in years where it was below the rate of inflation. This was a good time to do the single one time catch up rate for those agencies affected by this.

Chairman Pollert: I never really did officially welcome you to the conference committee. Usually it was Senator Mathern. You might regret this move. Just to do that discussion back in

the first it was 7&7. It is easier to say the discretionary dollars. The amendments on the house side were to add the pass through money and that is why we went to the 6&6 because of the pass through of the dollars. You had mentioned the inflation. All I did was simple math. I'm able to hit a plus and minus. I had asked the department as far as the inflationary as compared to the consumer price index from the year 1997-2008. When we did that it was kind of interesting. It showed the legislature's average has been $2.075. The average for the CPI was $2.84. There was a gap there. What I did was I went and used the same numbers and did a 7&7 and also a 6&6. When I did a 5&5 the average comes out to $2.943. We had a number for CPI that was $2.1. That is a number I used for 09-10. That comes up to $2.49 basis a CPI of 2.735. When I did a 6&6 it came out to $2.63 for the 636 and it came out to a 2.735 again so within a tenth. When you do a 7&7 and the Legislature goes to 2.78 and the CPI is 2.735. When I did the averages I thought the 6&6 was a fair figure.

Representative Kreidt: On the house side when we started looking at the budget for 1012 the Governor had put in the 7&7. You have to remember there was an optional request and that was for a salary pass through that was not approved by the Governor. As we begin our discussion we did realize that there are some problems in facilities in turnovers and some nursing staff positions. We felt that a salary pass through and we had much discussion on that in regards to what we can use for a dollar amount. The final amount that we arrived at, we did use the health care trust fund. We did take $1 million out of there. The general fund of about $14 million to go forward with a pass through to the negotiations to secure that amount. We did reduce the 7 to 6. We felt that was a rather generous amount of dollars with the 6&6 and pass through because that pass through will go directly to staff members on July 1. They will receive that on January 1. This gives them some upfront money to make the salary adjustments. We did put in on the house side and came to you. That was a pretty good package in my eyes.

Having been involved for over 30 years with the long term care facilities, that is a pretty nice package.

Representative Ekstrom: In my research in terms of where this needs to go, we look at this budget in aggregate. I decided I'm going to go to the 5 corners of the state and see where individual numbers are going. I know we have to deal with this as an aggregate number. At valley elder care the food cost went up by 11.38% and the overall went up by 8.85%. It is sort of my center point. The homes in Fargo sent me numbers with regard to food. If you go to Valley City they have a turnover rate of 36%. They spent 35% more because of the turnover they have there. The St. Gerard's in Hankinson the turnover rate was only 25%. Blue Cross Blue Shield went up 12% in the 08-09 period. Advertising because of the high turnover rate spent 55% trying to refill the position. It's maybe easier to look at this in aggregate. These are substantial numbers.

Senator Kilzer: The Senate did with all due respect with Senator Warner a reasonably close vote to bring it to 7&7 and 1. I think a lot of us were satisfied with the 6&6 and 1 with 100% coverage for the workers in order to avoid the compression that I spoke about a couple of days ago. Things aren't as rosy as they were when the Governor put his budget together. I do have employees in my district outside of the medical field that frequently tell me they aren't getting any raise and don't anticipate a raise in the next couple of years. I still do favor the 6&6 and 1. I also would like the 1 to be a 1 for all of the non administrators even if they are already at the 80th percentile. It's a reasonable figure that might seem high to some folks. In some of the other areas it has been so low for so long. That is the way I would like to see this go.

Senator Warner: I think the will of the Senate favors the $1 pass through. That is where we would take our stand. I want to yield on the 7. I hope we do give some consideration for the money we would be saying to make some commitments. Our action of backing away to the

and back to the 6&6 plus 1 in exchange for the other programs, I would hope that it would be the honor of the committee to get into consideration of things as they do come up.

Representative Kreidt: Just to reiterate that when 1012 did come before our committee in the house, there was no pass through at all just the 7&7. We could have stated the 7&7 and not used any general fund money or used any money out of the health care trust fund to bring that forward. We did realize that we were having difficulties maintaining staff and securing staff and turnover that we felt it was a pretty fair amount of dollars. The federal dollars that are attracted by it. That is up for discussion. I personally felt that it was more than a fair amount of money the $15 million that we had applied. Would you consider a motion in regards to the 6&6?

Chairman Pollert: The amendment stressed the 7&7 in .0213. Would our action have to be to recede from the amendments in .0213? Would that be correct? Is that how we would have to do since it was off the Senate floor?

Roxanne Woeste: That would be fine if you wanted to state the Senate recedes from .0213

.**Chairman Pollert**: Dose the Senate have to make that motion?

Roxanne Woeste: It could come from any side.

Chairman Pollert: Before we make that motion.

Senator Warner: I would prefer to just consider this as part of the total package.

Chairman Pollert: Are you saying that you would just not like to take a vote right now.

As far as the $2.9 that is in the care portion of the statement of purpose. I still have repercussions about that. I'm in support of the house version. I don't want to be sitting here and making deals on the floor. You stated that. If my vote is reflective on going to the 6&6 that doesn't mean I'm in favor of the 2.9. I have some questions about that as well.

Senator Warner: I think the 2.9 is important. We need to make sure this was funded adequately and money is going to be there to flow through.

Representative Kreidt: With the dollar amount that the house appropriated the concern I have is with the amendment. I would prefer that we didn't use $1 an hour amount taking the dollar out and whatever appropriations we consider having the lump sum money going to the facility so we can appropriate those dollars in a way we see fit to the staff. It would be directed only to staff salaries and benefits. That way when you say $1 you are directing the facility to give each staff $1 an hour. If that dollar was gone, if they had a staff person that they felt needed more than $1 an hour they would have that prerogative to do that. If they felt they had a staff member that they felt only deserved 25 cents an hour then they could do that. If they had a particular department that change. Whatever amount we arrive at the facility would have the ability to use those dollars again for staff salaries and benefits.

Chairman Pollert: That is on another topic which we will try to go to next.

Senator Warner: Just for my own understanding the benefits package relative to this is calculated and shifts on its own relative to where we have set that. If we give them $1 raise the benefits package increases. The insurance portion would be fixed anyways.

Roxanne Woeste: The funding is strictly for $1 benefit. I don't' believe there is funding in there for the additional benefit. Perhaps the department could clarify. The funding is strictly for $1 an hour increase in compensation.

Chairman Pollert: We should go to the next question that she is probably going to ask with the DD as well.

Brenda Weisz: When we do the dollar increase there is FICA that will always increase. It has included the FICA increase. There are no other increases or benefits. FICA is incorporated in that number because those facilities will have to pay the increases. The number we provided to you gives you the number with the 7.65 on that dollar.

Senator Kilzer: I did have the privilege to have Brenda explain this to me previously. Suppose someone is making $10 an hour and they receive a 6&6 and 1. If they receive $10 at the present time the first thing they would get when this goes into effect would be the 6% increase. They would get a 60 cent increase. They would also get the $1 which would bring them up to $11.60. The next year of the biennium they would receive $11.60 plus a 6% increase of that amount. That is the way that these two figures are built together. I hope I got it right and I'm pretty sure I do.

Brenda Weisz: You said the inflation first and then the dollar for inflation? That is correct. For DD because they get paid on July 1. Their rates change in January the inflation comes in July.

Chairman Pollert: I think that would explain why the house version of the $4.9 million with the funds in it, why we aren't looking at the dollar for long term care because of the inflationary effects that it is going to have.

Representative Kreidt: In regards to nursing facility that 6%, the facility can do whatever option they want. They don't have to give a 6% salary increase with that amount of money. If they want to reflect that they can do it. They necessarily don't have to do that.

Brenda Weisz: That is right. It is set up differently because of the rate mechanism. They are budgeted because of rate setting. That is true with both sides of it.

Representative Kreidt: With the pass through if we remove the dollar there would be a formula put together where they would receive a lump sum money amount. If we said salaries or benefits and they wanted to do a $2 increase or they wanted to give them $1 towards retirement or health insurance they could do that.

Brenda Weisz: That is correct. It is the language.

Chairman Pollert: Coming up from the pass through for DD on the amendment for the $86,000 how is that different than the language for their proposal? Is the DD language for the dollar pass through different?

Brenda Weisz: My understanding for the amendment is that the dollar would then be added to the positions in DD. The rate setting is a bit different than DD so they budget based on FTE's and that is the amount of money that the facilities receive for their budget. As it stands right now for the Senate version with the dollar version the budgeted FTE's are allotted to the DD providers with the increase by that dollar.

Chairman Pollert: Could it be said that the benefit package to DD was attractive with the package offered by nursing homes? That is on another topic which we will try to go to next.

Representative Kreidt: Just catching up with the committee here, if I understand the amendment for the DD dollar increase, the 90% has been removed. They are just looking at a flat $1 and that would cover everyone?

Brenda Weisz: That is correct. The amendment was to provide $1 to the nursing facilities and $1 to DD and to QSP whether it was to the individual or the agency.

Chairman Pollert: Yes and that is a separate amendment. You are saying the 6&6 is going to inflationary increases are to go to their benefits package. Could they transfer the dollar to go to the benefit package instead or is this language pretty well stretching that it will be $1.

Roxanne Woeste: Sometimes we do not get paid by line item or the budgets of the DD. We set the budgets and the rate setting mechanism. We put the money in. They set the mechanism and manage the money. We do not ask for reports back.

Chairman Pollert: So its $1 based on the FTE's but it's up to that DD provider if they want to have a discretion if it's going to be wage or benefits or what they want to do.

Senator Warner: So we really have two issues here. I am less concerned about which individual employee gets which part of this. I don't want the agencies to be transferring money out of that. We have it dedicated towards increased compensation. Can they transfer it to any of the lines?

Brenda Weisz: We don't ask for information back and we don't manage by line item but I can tell you that those facilities know where the trouble lies. When it is legislative intent to do something to benefit their employees they look forward to doing that, they have in the past. Some intent language, they do try to follow through and extend those increases to the employees.

Senator Warner: The 7&7 was much more inclusive then the providers we have been talking about. The 7&7 affects the positions of everyone.

Brenda Weisz: Right. The 7&7 in the Governor's budget as well as the 6&6 was changed on the Senate floor amendment does provide inflation to all provider groups. For a couple of biennium's now we have treated them equally. Your Medicaid and CFS providers are at that.

Senator Warner: Dentists were rebased differently? The intent in the Governor's budget was whatever the inflator was. Any of them get rebased. The inflator is in the second year of the biennium, but the dentists are different?

Brenda Weisz: This is how the budget came forward from the Executive office. The dentists were part of the group we looked at for rebasing. There was no mechanism in which to develop that report. Since there was no rebasing report that came forward from that group, the other groups we have rebasing reports and those rebasing reports they brought the costs forward with the inflator to 2010. That is why there is 0 percent inflation for those rebased providers the first year. They come off of the rebasing report. That is included in the dentists for 75%.

Senator Warner: So that one provider needs to have an inflator for both years of the biennium?

Chairman Pollert: We will have a discussion on that one. The dentists are based off of bill charges. They aren't based off costs. That is a drastic difference.

Senator Kilzer: I think my question was partial answered by this last question. On the other providers though, as I recall, the rebasing is projected through June 30, 2010. That is the reason for the inflator only being applied in the second year of the biennium.

Brenda Weisz: Correct.

Representative Kreidt: This is probably in regards to some checks and balances. They do a cost report on an annual basis that is reviewed by the department. If that money wasn't going into the salary line item they would think that facilities are manipulating that money.

Brenda Weisz: That is very true. The cost report does reflect that. The only thing we don't have by authority or statute is to tell them where to spend the money. DD has a cost report that we see where their costs are.

Chairman Pollert: Any more questions?

Representative Kreidt: The Senate had proposed the 7&7

Just for my own understanding the benefits package relative to this is calculated and shifts on its own relative to where we have set that. If we give them $1 raise the benefits package increases. The insurance portion would be fixed anyways.

Roxanne Woeste: The funding is strictly for $1 benefit. I don't' believe there is funding in there for the additional benefit. Perhaps the department could clarify. The funding is strictly for $1 an hour increase in compensation.

Chairman Pollert: We should go to the next question that she is probably going to ask with the DD as well.

Brenda Weisz: When we do the dollar increase there is FICA that will always increase. It has included the FICA increase. There are no other increases or benefits. FICA is incorporated in that number because those facilities will have to pay that.

Senator Kilzer: I did have the privilege to have Brenda explain this to me previously. Suppose someone is making $10 an hour and they receive a 6&6 and 1. If they receive $10 at the present time the first thing they would get when this goes into effect would be the increase. They would get a 60 cent increase to be

Chairman Pollert: Any questions? Any motions?

Representative Kreidt: The Senate had proposed the 7&7% increase for the inflators and I would move we go back to the 6&6 that the House had proposed in their amendments.

Chairman Pollert: I will second that.

Senator Kilzer: On the motion that is before us on the 6&6 what about the 1 or the 2?

Chairman Pollert: That would be discussed down further because you have that as a separate amendment. The 7&7 in .0123 is a separate amendment than the dollar pass through that we are talking about on page 4 of the statement of purpose for the 2.96 million. That would be a separate discussion.

Senator Kilzer: Is the 6&6 for long term care, the DD providers?

Chairman Pollert: Department wide for everybody. We treat them all the same.

Representative Kreidt: That is the way that it automatically happens. The percentage increases.

Senator Kilzer: Hospitals would be at the 6&6 as well.

Chairman Pollert: It would be after 2010 because it is cost based. Hospitals, physicians, chiropractors, and ambulances would be at 0&6.

Senator Kilzer: I just wanted to make sure.

Chairman Pollert: Yes it would be department wide. I'm getting a lot of good signs.

Senator Warner: One part on the ambulance they were only rebased in the first year with Medicaid. If only they are rebased in the first year and they have to go back to the normal inflator.

Chairman Pollert: We will call the roll to go down to the 6&6. It passes 6-0-0. That motion passed. We are going to stay on long term care. That is going to take longer. I'm going to go to the amendment that was passed on the Senate floor .021. I'm coming back to that and it is going to take longer than 10-12 minutes to have that discussion. I don't want to short change that. Will you give us a history on .0211, since you know the long term care? It came from the executive budget at $60 and the house raised it to 75. Sen. Mathern had the amendment passed on the Senate floor that had it from 75-79. The fiscal note is around $200,000.

Representative Kreidt: For personal needs allowance this is for individuals. I see an FMR out of that. This is money that if someone wants to buy some personal items like better soap or hairspray. We felt that $75 a month is a fair amount of money. You have a lot of residents that weren't even spending the $60 but banking that. $75 a month for those special items that the resident would like to purchase we felt was a reasonable bond to be able to do that. We did go from the $60-75. The industry felt that it was a reasonable amount. That is where we arrived at that.

Senator Warner: Can Roxanne explain the language for basic care facilities and intermediate care for the mentally retarded. Those are the only two groups that were elevated to the $95? This does not include billed care?

Roxanne Woeste: That is correct. It does not include billed care.

Senator Warner: So it would not include anyone that is bedridden? That would be the distinction?

Chairman Pollert; We will get someone from DHS up here to get a better explanation.

Maggie Anderson: The amendment and provisions are for individuals in basic care not nursing homes and then the intermediate care facilities. The distinction there was during the last session there was an amendment brought forward to increase the ICFMR's. Those two items were coupled together. We worked with the long term care association and with CMS to decouple those. There was one desire to move the nursing home to a higher level. There was a desire to move the clients and an ICFMR to a higher level. There was no interest from the long term care association. There was for basic care and for the ICFMR's.

Senator Warner: I kind of understand that they normally pay the premiums out of this money. Is that correct?

Maggie Anderson: Individuals in the intermediate care facilities are Medicaid eligible so they will qualify for the long term subsidy for part D.

Senator Warner: Do you know what the average monthly charge would be?

Maggie Anderson: The average monthly charge could vary a lot. The cheapest premium is around 5-6 dollars and it goes up to several hundred, depending on which plan they use.

Senator Warner: It would be significant in our discussion.

Maggie Anderson: Well it depends on the prescription drugs you need and what plan it is to have them covered by your plan.

Senator Warner: So this would include all non prescription drugs?

Maggie Anderson: All of your over the counter drugs for your basic care.

Representative Ekstrom: I worked out the numbers and at the $95 a month rate you are at $1,140. I hope I don't find myself in a facility like that but that's not a lot of money. To be

serious, these people go to church and give to their church. They count this down to the last penny and by the time they got to the end of the month they have 28 cents left. This would be a good thing to do for the folks.

Chairman Pollert: Any other discussion? We have to have an acceptance or rejection of the amendment because there was a change. We can wait and have this discussion when we come back.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☒ Check here for Conference Committee

Hearing Date: 4/29/09

Recorder Job Number: 12387

Committee Clerk Signature

Minutes:

Chairman Pollert: Called the conference meeting together and let the record show that all committee members are present. With this I would like to bring up a couple of issues to see where we go. Case load utilization, does anyone want to bring that up?

Senator Fischer: I think we might as well talk about it. To get the ball rolling is what are we going to do about it? There are three categories. Long term care is one of them. For long term care the projected case load utilization rates the discussion has been when we talked about it has been if we leave this in or take it out, one thing I would like to see is some verbage that guarantees the department that if these estimates of utilization rates are wrong, it doesn't take them 10 minutes to get money. So they would get the authorization to spend the money if there was a deficit spending. I would like it recorded somehow that we are ok with that provided their matches go away or come to some point. Otherwise I can't support that. I'm not willing to take the chance. The bottom line of this is that what happens is you hurt people. I understand if you think there is going to be a fall off with economy or utilization but what we have seen happen in 5 months, what is going to happen in reality. I am very nervous about that.

Chairman Pollert: Who knows if the numbers are right or wrong? We did calculations last biennium on the case load utilizations and we were right. We were wrong on the costs. When I have these discussions with the leadership on my side, it's not my intention with the case load utilizations to increase. What we have done here creates a problem. It wouldn't be my intention that the provider rates are dropped services. I was quite frank with that by saying if they have to come forward for a deficiency appropriation that is what they have to do. If that happens and I am proven wrong they can put me in that section or into another policy committee. That is what I told them. We shouldn't reduce services or provider rates. To come forward with the deficiency appropriation, that is what they have to do. The discussion happened with the majority leader and the chairman of house appropriations. I didn't talk to anyone on your side because I wouldn't do that.

Representative Ekstrom: I have 2 amendments I would like to pass out. (Handout A) Amendment .0214. What this does is put specific language in there that says if the department of human services expenditures exceed fund levels due to cost and case load utilization programs exceeding the level anticipated by us that they can deficit spend. We may add more language that says they have to come to us for deficiency appropriation or they can borrow from the bank. That has been done in the past. I would like to move that amendment.

Senator Warner: I second that.

Chairman Pollert: When we did the calculations on our side of the aisle we did not change the costs that they gave us. When I read this amendment I can say that the department of human services is due to cost and case load utilization. That is like we are doing the cost. We never did play with that

Representative Ekstrom: We can change the wording to get it what I'm trying to do. I don't have trouble putting the language in there.

Chairman Pollert: What you are saying is what I stated on the record.

Senator Kilzer: Do they really need this authorization? Isn't this what they do anyway?

Representative Ekstrom: This was requested by the department. They asked me to put this forward.

Senator Fischer: I support this and the reason is because they have been put in the situation so many times in the past where they deficit spend and then they get all beat up because they are being accused of not controlling their budget. Whether that is true or not, every year this is controlled. The words can be changed as long as it's not completely changed. I have had a real fun experience with lobbyists. The thing is that it is the reason why I like it.

Representative Ekstrom: I think we would have more agreement on the first than of the next. Amendment B .0215. After the wording biennium we would take costs and "and" out. I think that takes care of your cost trouble.

Chairman Pollert: It would be different if we didn't play with the costs. We kept the numbers when we did it. We looked at the detail.

Representative Ekstrom: I will move the amendment to the amendment.

Senator Warner: I second that.

Chairman Pollert: Any further discussion?

Senator Fischer: I don't support this for the simple reasons with the dollars.

Chairman Pollert: We are on .0214. The only change is the language.

Senator Kilzer: Which one are we working off of?

Chairman Pollert: Amendment .0214. The substitute motion that was moved first for the whole amendment and the second and the substitute was to delete out the costs. When you look at the paragraph when it says section 10. We are working off the .0500 engrossment.

Roxanne Woeste: For the ease of discussion and going through the amendment, just think of this amendment as adding sections to that. At this time we aren't working with the engrossed bill but we are going to add the section to the bill and this is the section.

Chairman Pollert: So it might not be section 10 but section 18. We will call the roll. That passes 6-0-0.

Representative Ekstrom: I do know where this is going but I felt the need to bring it forward because we did have a disagreement with the Senate. What .0215 does is takes our cut and cuts it in half. We are the other way around. We add back half or delete half of what we put back in. I would move that amendment.

Chairman Pollert: There is not a second. That motion fails. That is the motion on the language. We would have to have the discussion on the $9.6, the $5.6 in long term care talking case load utilization and the $2.476. I would want someone to correct my math. Are those the three areas of utilization? I will ask Legislative Council to verify the number I have stated. I would entertain a motion if anyone wants to?

Representative Kreidt: I would so move the amendment.

Chairman Pollert: The case load utilization of 9.6 under the medical services, the 5.6 under long term are and the 2.476 million under the DD case load utilization. That number is $17,676,000. Is there any discussion?

Senator Kilzer: My question would be a little bit of a further explanation on how each one of the figures fits into the big picture, the overall appropriation for each of the 3 items. For example, the $5.6 million long term care I have on my notes that the $5.6 million that had been removed by the house in the executive budget the total amount is $194.8 million. That is a note that I had made. I was just wondering about the other two and the amounts that have been removed by the house fits into the whole executive appropriation.

Chairman Pollert: I can't address the $198 million. What you would be voting on is the three case load utilizations that is on page 4. That is 6 lines from the bottom of page 4. Right above at the same time that would reduce the amount of federal dollars coming in as well. If they aren't used the federal dollars aren't matched either. The total amount would be the 16.35978 of federal dollars. Also included in that would be the 9.5433 down at the bottom and also the 4.25911 would also be included in that motion. The total between general and federal would be roughly $26 million above the $15 million and the $6.7. It is $48 million. If our projections are right, those funds wouldn't be allocated. I don't know where the 198 is coming from but that would be a reduction on the Governor's budget. All of those are general fund/federal fund matches. Any other discussion?

Senator Kilzer: That is with the extra motion in place if and when they run short. That is the deficiency appropriation. That is one of the things that the Senate wasn't very high on was the utilization. The math that was done in the house we can wait and see what happens. There is just as likely to be an increase as there was a decrease in trends. I can go along with this and we should not be surprised if this figure goes the other way.

Chairman Pollert: Maybe I will have to have someone from the department step forward but they also have the authority to float amongst their agencies as well. I would suspect that if they would come forward for the deficiency appropriations that it would already be expended and they don't have the authority so the money switch can't happen anymore. They already have that authority. I would have to ask for a re-vote. They have the authority to go from one fund to another. Your motion was to?

Representative Ekstrom: They would do what they normally do but in the event that the other options fail, they do have the authority to still vote. My understanding from the department is that these items represent a certain amount of money. They really wanted that specific

language in there. When this happens, let the Legislature knows that this is very likely going to happen and that is why they wanted the authority.

Chairman Pollert: I would have to believe that what the turnback is going to be, that is just general funds. Some of the dollars are dealing with case load utilization. If they didn't use the general fund portion of that if they had a $10 million general fund whatever $10 million is as a percentage, if there is $20 million the federal dollars weren't used as well. That coincides with what Senator Kilzer is saying. I have one question that I'm going to bring Brenda up for. My question would be that in the 09-11 biennium, let's say you have to come forward. Let's say you have to access money. Let's say you are short on general funds of $10 million. It would be a $3.7 million general fund and $6.3 million of federal. With this motion and the amendment, would you be coming forward still being able to access the federal dollars to continue the program? What I'm getting at is instead of asking for the $3.7 million are you going to be able to get the other $6.7 so instead of coming for a deficiency appropriation of the $3.7 you don't come in for $10 million because you can't get the federal dollars. Do you see where I'm going? If that's the case you have to talk about a line of credit so you can get the money.

Brenda Weisz: We will need to have federal authority to access the federal funds if we have the general funds put back. If you make the adjustment to the budget and take out the general funds and the federal funds we will not have enough authority and we will have to go to the emergency commission to get the authority to accept and expend the federal funds and have a deficiency of the general fund side.

Chairman Pollert: I see that not being a problem but that is what you would have to do?

Brenda Weisz: Technically that is what we would have to do. We would still have the ability if there is money to move around. The only problem is that this amount of money that this underfunding is, is 1/3 of our human service centers. The amount of underfunding that we

proposed to be taken out is the equivalent to the funding for 1/3 of our human service centers. Even though we have flexibility there isn't a lot of money left after this change.

Chairman Pollert: But you have to make sure you have the authority because it would not be in my direction that if you have a deficiency appropriation that instead of asking for the $3.7 million that you have to ask for all $10 million because that is not a good scenario. You have to make sure that you have the authorization to get the federal dollars.

Brenda Weisz: The federal government will give us the money. The authorization wouldn't be a problem there. The problem with the authorization would be the amount of appropriation authority that you have in our bill so you would have to go ask for that in addition to the deficiency.

Chairman Pollert: In other words you are saying that in case you go in front of the emergency commission and that would be reminded by the chairman of the house appropriations of what happened in the DHS budget with the conference talks and the amendment. I would have to get up on the budget section to clear your case?

Brenda Weisz: Right.

Senator Kilzer: While you are there I have another question and that is if we get into this deficit situation and it most likely will occur during the end of the biennium which would be the last quarter when the FMAP has again fallen down to 60 something and there is a few additional dollars that would be favorably affected by the motion right?

Brenda Weisz: I will say this politically correct. The change in FMAP will compound the situation that we have before us with the utilization change. It will be the last 2 quarters of the next biennium. It will drop in January after the stimulus money.

Chairman Pollert: How was that different than this time when we are having to fund the $9.5 million because of the lower drop in FMAP. That isn't any different than having to come in and

say you have another $9.5 million plus the $17.67 general fund. You can say I told you so. Really there isn't any difference if you look at it that way. If there is I want to know that. It would be a similar situation kind of a thing because we would have to fund the FMAP. We have never not funded that when the FMAP percentage has dropped.

Brenda Weisz: You have funded the FMAP in the executive budget. Sometimes we have changes that occur during the legislative session. Often times an adjustment is made. It is currently been funded by that 9.5

Chairman Pollert: Could it not be in a bill or emergency measure that you have the authorization to go after special or federal funds? The next session could do that.

Brenda Weisz: An emergency clause is not for this budget. Because the FMAP is going to impact the budget you are deciding on today. The federal authority will change and the general funding will be for the biennium coming up. Then when we come before you for 11-13 we will also see an FMAP impact in that budget that we present to you from the executive side which will be outside of this change that we are seeing.

Chairman Pollert: But the assembly could authorize the ability for you to increase your special funds authority?

Brenda Weisz: Correct. The FMAP drop is going to affect the budget you are deciding on today. It will impact the budget. We are trying to finalize that this session.

Carol Olson: There is a difference. It isn't a difference that you can put down on a piece of paper as opposed to the approach you are talking about here. The difference comes in to the Legislative recall and memory. What will be happening here this legislative session and how it will be remembered next session. The department has been here before when it was gone in the deficiency spending. The problem is that we are very concerned about the utilization rates and our estimates as to where they are going to go and the depth of the reduction that is being

talked about here. We will do whatever is decided here. Again, I just want to go on record to let you know how demoralizing it is to a state agency to have to stand in front of a full committee for over an hour and be accused of mismanaging money when that wasn't the case at all. I personally as the director don't want to be having to go through that and I don't want anyone on our staff having to go through that either. When you talk about differences and what that means, that's what it means. We work hard to portray the direction of where we are going in the next biennium. It's not something that can be foreseen in the future. I'm up here because I want to protect the department from ever having to suffer those consequences again. It was unbearable. With that you will have to make the decision based on what you think is right. We have given you the information on what we believe to be accurate. You will have to take the direction that you feel is right. I will go on record to saying that I will not subject any of the staff of the department to an hour of what happened in 03.

Chairman Pollert: Do you think I would look forward from getting up in the budget section saying that I was wrong? I have had to say that a number of times too. I would have to say that before you even got up there. That would not be a pleasing duty. You said the same thing and then you chastised us in our house appropriations last session because of what we did and we were right. Now we were lucky. I understand that. I was chastised a lot publicly and privately.

Carol Olson: Your form is different than ours. We have to take it publicly. I don't think anyone wins under those circumstances and I mean anyone. I don't want to see that happen again. It's tough to get certain things through in an emergency meeting and in a budget section. We will do it and whatever it is that is decided. I wouldn't feel that I was doing my job if I didn't say something.

Senator Kilzer: I have sat on this long enough to go through both ways. Neither one of them are very pleasant when it comes to a turn back or a deficit. I think if this budget was realistic

and it is almost a horse a piece as to whether or not to go along with the house reductions. The more I think about it, I think about this reversion of going back to the larger FMAP. I think I'd rather leave the money in it and hope for a turnback at the end and not get penalized in the last two quarters of the biennium. I would not favor taking the money out. I would prefer to leave it in and let the Senate restore that.

Representative Kreidt: Did we have a motion and a second on the floor? With our subsection and this particular budget, we sit down. We spent 3-4 days going through this case load utilization numbers. Last session we could have taken more out and we wouldn't have to carry over the turnback that we did. This session we sat down and went through those things with a fine tooth comb. We felt we came up with realistic numbers to what would be utilized in the next two years. We felt very comfortable with those numbers. I think what came over from the house was a fair caseload utilization as we went forward. I think maybe we are overreacting. We did support the amendment here. I can remember last time where it was DD and we authorized loans up to $3.4 million. They needed funding that never happened. I feel comfortable with these numbers as did our section. I think they are sound.

Senator Fischer: If that's the case you must think we are nuts. We restored what you put in for good reasons. Maybe we ought to look at the budget over a biennium instead of over 3 months. Maybe we ought to take the nursing homes apart and see what makes them tick and see if at $9,000 a month is a little high. You could get on a ship and cruise for eternity for less money. The bottom line is that we are over here with this budget. What happens if we don't spend Medicaid, they pack their bag? The money doesn't go anywhere. It's not a premium that is being paid. It's very little part of service and yet you have people in your house that buck at repaying hospitals, doctors, ambulances at a lower rate than cost. I don't see anyone else doing that. I sure as hell don't. All this talk about who did what to whom, nobody did anything to

anybody. This could all be left at the Governor's budget and we could walk out the door. We just might feel as important.

Representative Kreidt: We didn't call you nuts. We wouldn't do that. You mentioned nursing homes. Last session we did look at nursing homes. We could have taken more out of nursing homes last time. I was willing to do that. We could have cut the utilization further we could have probably out another 90 beds. That is where the money came back. We would have been right on that. Say what you will we were pretty close.

Senator Fischer: What are we doing cutting children's health insurance? How does that make us look? Why don't we go beat up on kids while we are at it. The thing is that this whole discussion disgusts me. I don't have a dog in the fight but there are kids out there that would be a lot better citizens if they were healthy. Everyone wants to be the ultra conservative. You are saying that you can't do that because you will go home and not look conservative. Everyone wants to go home and get re-elected. If I don't do the right thing, either way I shouldn't be re-elected. So when we get into this Medicaid thing, why do they need an insurance policy? Fund them at an appropriate level that they have spent the better part of 2 years putting together. I don't think they are going to run out the door with cash under their arm. Spending all this time discussing this is ridiculous.

Chairman Pollert: I was hoping we would get to SCHIP today but I think we are too charged to make any kind of a vote right now. We will be in recess until tomorrow morning.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☒ Check here for Conference Committee

Hearing Date: 5/1/09 (AM)

Recorder Job Number: 12433

Committee Clerk Signature Marilyn Reinert

Minutes:

Chairman Pollert: Called the meeting to order and let the record show that every member is present. We didn't meet yesterday because I was getting amendments drafted which I will pass out now. Handout amendments (Attachment A). I know we looked through these a half hour ago or so. I'm going to start on page 2 of the statement of purpose. I will go back to the page to go through some sections. Where it says summary of conference committee actions, I will say this right off the bat so I don't have to discuss it through all the sections. The equity money was pulled out of 1012 and that will appear on Office of Management and Budget. The next item up is the salary under funding. You will see the amendment. If it's added up right it will be proposed at $1.4 million. There will be no federal funds on that like what happened in the house side. It is a general fund run through the department. The travel expense on the Senate side we had approved prior to the amendments. It should add up to what the Senate did. The FMAP of the $9.5 million that the Senate had to add in will be in here to lower the FMAP numbers or percentages for the $9.5 million. The travel and division information technology is part of the 1.4. The economic assistance is the same way. Child support is the same thing. Let's go to medical services and the first line item of salaries and wages. The one time funding and grants of medical assistance line item and supplemental payments is Rolla.

Everyone knows that that means. You will see the next line item of medically needy to reflect income levels of 83%. That is as the Senate had it. The house had the 75.

Representative Ekstrom: Just to freshen up my memory that is what was proposed in the Governor's budget correct.

Chairman Pollert: That is right. The next item on the bottom of page 3 is increased funding for the rebasing of the physician payment rates. The house had it at 20%. The Senate had risen it to 75%. The house agreed with that after much deliberation. What you will also see and it wasn't on the Senate amendment is that we agreed about the 100% of hospital rebasing that is also in there. We agreed with the Senate on the rebasing of the ambulance payment rates to the Medicare rates. They restored funding and grants the rebasing of dentist payment rates to the minimum of 75%. We agreed with the Senate on that.

Senator Warner: What is the discussion relative to that? This is rebased separately in a different way. This one was considered to be eligible for both years.

Chairman Pollert: This would be 75% of charges.

Senator Warner: What are the dollar amount if we were to do rebased and 6 plus 6 what would that dollar amount be?

Roxanne Woeste: I'm not sure you would have to ask the department.

Chairman Pollert: What you will see next is adjusting funding and language in the sections when you go through it. The funding for the state children's health insurance program to reflect utilization rates, if both sides remember the 200% has been defeated on the house side. What this amendment is going to reflect going to 160%. Then you will see the amendment down below you will see that currently if I'm correct the budget for ND cares there is $330,000. What we are seeing is adding funding for outreach for the SCHIP program of another $300,000. What we should see is language when we get back to the sections that says something to the

fact that it will be an outside third party. It won't be run through the ND cares. The department would be putting an FRP on that .My thoughts on this is that there is feelings on our side that they haven't been doing as good of a job as they should for outreach. It is my hope to bring more kids by doing this outreach program. It would be by doing this 200%. That is kind of my thought. That is where that is. You will see going to the next line item. You will also see that there is a backup to the backup. What I mean by that is there are 3 sections about the case load for $17 million. What we are saying is that we will see language that says to adds funding for a bank of ND line of credit if the department needs to access that for $8.5 million. If that has to be accessed they will have to come in front of the budget section. The language should be the same as last biennium on the $3.5 million that was done for the DD last biennium and session. That is why I said it is the backup to the backup because we accepted Representative Ekstrom's amendments on the deficiency payment. Going back to the long term care program we agreed with the Senate about the funding for third tier for the million dollars. That has not changed. That is what came in from the Governor's budget. That is in. The other funding we would have to have an explanation on.

Representative Kreidt: When the funding for the nursing home and basic care came out of the house we had taken the funding out of the health care trust fund. We reduced that by $200,000 and applied it to another bill in the house that was in regards to the situation in Steele for them to be able to go forward. There was a reduction of $200,000 off of the million that was originally in the house.

Chairman Pollert: If I have this correct the Senate had added $2.9 million of language in. This amendment pulls that off. The house side had a million out of the funds. That corrects it to $800,000. You will see that Representative Kreidt is going to bring forward an amendment dealing with that. Moving on down the line, $86,807 is the dollars for the DD providers. We did

not change that figure. The Senate added in QSP's for the dollar increase. That stays in. This is language for the medically fragile. It's the $1.1 million added in with the $400,000 that the house added in will get to $4.2 million total including federal and state funds. Going to aging services with salaries and wages that is about the travel and providing funding and grants. The no wrong doors was taken out for the $300,000. Prior to this we had done the $120,000 for the place at Arthur. Going on to children and family services it increases funding for the healthy families program. We had done that prior. We accepted that amendment from the Senate. We had done that amendment for adding funding for family group conferencing. We had taken $1 million off and it was $1.2. We put 100 in family counseling and the safety permanency fund. We have added funding for children's advocacy centers for $200,000. Going to mental health and what the first two items are about, the third item down is add funding and operating line to increase compulsive gambling. That was approved prior. We had also approved $100,000 for the Governor's prevention and advisory council. Going down to developmental disabilities is going to page 6. Those two items were all in one. Vocational Rehab is the same way. The travel is the same thing. The federal stimulus dollars, there will be language you will see in the sections when I go back to the front part of the amendments that deal with that. All the other $66,500,000 is dealing with the federal stimulus. All the remaining items are dealing with that. Going to the next page on the state hospital, the salaries and wages, travel the house had taken out $1 million out of the state hospital total. These amendments drop that figure to $500,000. The next page is the developmental center. In the wages and travel we restored the $150,000 for the onetime extraordinary repairs at Grafton. This would just be best if I say this all at once for the human services centers. The non global health initiative has been moved out of the amendments. Out of the amendments the young adult transition services is moved out. When I say the global behavioral health the FTE's are out of that. They have been taken out

for the DD case management. The peer support has been removed. That should be the human service centers. Before I go to the sections should we have a discussion? On page 2 section 2, this is dealing with the federal stimulus dollars. We have to have section 2 and 3 are related. The department has to be able to show that the federal stimulus dollars went for general fund expenditures. That is what sections 2 and 3 do so we don't have a problem.

Representative Ekstrom: What had been proposed originally when the federal stimulus dollars came in by the Governor is so we transition them in next biennium?

Chairman Pollert: What you may see happen in Section 3 is that the numbers in Section 3 may change a bit. That is what I'm being told.

Roxanne Woeste: That is correct. These were the numbers that were provided in the Senate appropriation by the department. Once the amendment is settled upon by the conference committee we may adjust these numbers to make sure they reflect appropriately what is.

Chairman Pollert: Whatever happens with the amendments DHS is going to have to get with Roxanne to get the accurate numbers before that. Section 4 is the bank of ND loan authorization. It's for $8.5 million. Is that the same wording we had last session for the DD grant part?

Roxanne Woeste: It is the same language however the language in the appropriation bill from last session. I have included that to make sure that this includes medical services, long term care, and DD. Those are the three areas where the case load utilization decreases were taken in. It's not verbatim but it is similar.

Chairman Pollert: Then section 5 is Representative Ekstrom's amendment. I am on the top of page 4. We can go through the line items there but there is the $400,000 with the numbers that I had discussed in the statement of purpose. The legislative intent is on the Senate side of section 13. We left that language there. Some of us had some heartburn over that but Senator

Kilzer was so persuasive to keep it in there. Critical access hospitals is language that needs to be in there for Rolla. Dementia care services is in section 15. Someone is going to have to remind me. That must have been language put in by the Senate.

Roxanne Woeste: It was drafted by the Senate.

Chairman Pollert: Section 16 is Legislative Council study on traumatic brain injury. That section also dealt with Veteran's. I think we added that so we could have more of an encompassing of other TBI plans or whatever you want to say.

Roxanne Woeste: That is correct. This language was originally included in the Senate version of the amendments. It would be more encompassing and emphasize more with traumatic brain injury individuals.

Chairman Pollert: Section 17 is the intent language for the outreach of the $300,000 to be a third party. Section 18 if I'm correct we have a roof leakage problem at the state hospital. That section was added by the Senate. That language would then stay in there. Section 20, I am going to need help on that.

Roxanne Woeste: Section 20 of the bill is the section relating to medical assistance. This is clean up language that the department brought into the Senate and the Senate did include that in your amendments and we have included that in the conference committee amendments. If the department members need more detail we will need to have them comment on that.

Maggie Anderson: It relates back to 2007 with HB 1453 when the bill authorized the department to increase the SCHIP income level to 150% of poverty when federal funds became available to do that. Those federal funds became available October 1, 2008 and the department increased that level. In the same bill the language was included to increase the Medicaid level for 6-19 year olds from 100% of poverty level to 133% of poverty should the federal law be changed to allow that. That federal law was not changed in the interim until the

SCHIP reauthorization was signed by the president in early February. At that time when we ran the information it was different because of the change of SCHIP and the declining enrollment and the increased enrollment in Medicaid. That was no longer the savings it was during the estimates provided in HB 1463. In addition to that it would remove about 2,400 from SCHIP and put them on Medicaid. While there are positives on the Medicaid side there may be some negative implications on the SCHIP side so that language removes that provision that was established.

Chairman Pollert: There was some discussion that there that we are at 140 at net but we are actually at 150 at net before these amendments, is that correct?

Maggie Anderson: Yes.

Chairman Pollert: Section 22 is Senator Fischer's amendment.

Senator Fischer: Yes it is. The only thing is that from the advice that I received from the doctor that runs an advocacy centers, I would like the department to comment on this. There has been some slight word changes. We should take a look at this to see. It is your amendment but there has been word changes.

Chairman Pollert: I know I was getting emails from social services saying they really didn't like the language and I don't know if that corrects that.

Senator Fischer: This is already corrected. This is from Dr. Norbert.

Chairman Pollert: Section 23 must be provided with part of the contracts with the insured.

Roxanne Woeste: Section 23 is a statutory change needed for SCHIP to go from 150-160. This would be to defeat HB 1478. That was the language for the SCHIP change. The funding is included in HB 1012 to go to 160.

Chairman Pollert: What is section 25 to repeal about?

Roxanne Woeste: That repeal was a section of century code relating to HB 1453. It goes along with section 20.

Chairman Pollert: And the emergency clause for section 2 and 18?

Roxanne Woeste: You are adding an emergency clause to the appropriation of the stimulus dollars and in section1 8 which allows the department to use that carry over until the Governor signs the bill.

Chairman Pollert: The only other thing I would say is on the next page is the dollar amount that shows how everything is affected. Could you give me those numbers?

Roxanne Woeste: On page 2 of the statement of purpose at the top of the page the numbers on the far right hand column is a comparison to the Senate version. The first number there should be $30,146,331. That is the Senate version of the estimated income. The bottom number is $30,799,102. You have to do the Senate version of that.

Chairman Pollert: I would rather get a total.

Senator Fischer: I have a couple of other things here. Dr. Norbert sent out to the department a final fiscal analysis. We had twice as much. You put $200,000 more in because of this. It is going to cost $100,000. The other thing is that this is a request for continuation of dental services we should include if the committee feels that way. It is a continuation of services provided by dentists at about a 5-1 match.

Chairman Pollert: So are you saying that at the bottom of the page when it says the ND dental association basically requests $50,000 to continue DD services in the 09-11 bienniums.

Senator Fischer: I don't know if a representative of the dental association is here how that works.

Chairman Pollert: We would let Roxanne figure that one out. Let me get this straight. You would like to have this language in and propose another $50,000 the way it looks?

Senator Fischer: That one is over funded.

Chairman Pollert: We will have that motion to reduce that to $100,000 but you need the language that is in yellow?

Senator Fischer: That is the language that would work best for the social services for the advocacy centers and the departments and kids.

Chairman Pollert: I really don't want to have a vote on that. We are going to have to come back to add some other stuff. Did you want Joe talk about this?

Joe Cichy: The dental services is a program that provides free dental care to the elderly and disabled that don't qualify for Medicaid insurance. They are the folks that fall through the cracks. This program started in 2003 and in 2001. It has provided over $1 million of care to these folks. It's a very good program. We have 160 dentists signed up for it. The money goes for administrative costs only. It doesn't go to the dentists. Many times it is 2-3 times. They may need general care or care from an oral surgeon and an orthodontist. The problem is that we haven't had enough money in the program. To provide as much care as we could and that is what this would allow.

Chairman Pollert: Has this been in the budget before?

Joe Cichy: It has been in the health department. They provided $36,000 a year and it came to a grant so this would be new.

Chairman Pollert: So you are saying that the grant got taken away? We felt that if we could do it this way. I have went through the amendments. Is there discussion about .0218 or any other addition? I don't like leaving something hanging. As much as I don't want to bring this up, if you take a look at the amendments from the Senate versions we did not have the language

in for the coverage of pregnant women at 165% of poverty. The reason that these aren't in the amendments is that it failed in the house. That is not it. We can accept motions. I will accept whatever amendments brought forward.

Representative Kreidt: This relates back to long term care on page 4 where we talked about the removal of the $200,000. I have a proposed amendment. (Attachment B). What this does is replaces the $200,000 out of the health care trust fund that was in the original house version that had a pass through of basic care and nursing homes of providing them a lump sum grant that would go from the facilities. This would be $200,000 with general fund plus $161,999. This would give them a little more of a cushion to bring it up to a figure that I would hope the industry would be very happy with. Again it still gives them the option to use the dollars for salaries or benefits. They can provide them in. If they want to give a dollar and a half raise to those individuals they can. I think this is a fair compromise. We did bring the DD within the $86,000 and 807 figure we did bring them to a figure that would make them whole. This would not quite do that but it is a realistic figure. Hopefully the committee can accept this amendment and allow a bit more money into going into a direct path. That is something they can start to do of putting them in the line items for the staff. The 6% is going to go into effect in January.

Chairman Pollert: Basically what you are trying to do is get from the $2.9 million and you are trying to restore $361,990. In the healthcare trust fund there is $800,000 and is all general funds?

Representative Kreidt: Yes.

Roxanne Woeste: I just want to make sure that is included in the health care trust fund.

Representative Kreidt: I would move the proposed amendment.

Representative Ekstrom: I will second that.

Chairman Pollert: Any discussion?

Senator Kilzer: Is this related to any other bill that is passed? It is compatible with other bills passed?

Representative Kreidt: Yes.

Chairman Pollert: Let's call the roll. This passes 6-0.

Senator Kilzer: I would move amendments .0218.

Representative Kreidt: I second that.

Chairman Pollert: Discussion?

Senator Warner: I would resist passing this. I was in understanding that other amendments were going to be forthcoming?

Chairman Pollert: I have the first and second and we can have discussion on further amendments. We have to look at these. What we have to do is come back in later in the day between 2-3 and that is what I would like to see us do anyway. What are your thoughts?

Senator Warner: Do we take voice amendments at that time or would you prefer them on paper?

Chairman Pollert: Rather on paper so we can get this pushed along. So if we vote on amendment .0218 or should we vote on it and have further amendments for discussions and we can vote.

Roxanne Woeste: We can vote on .0128 and then have motions to further amend.

Chairman Pollert: I'm open to that. I would like to get some part of that done. We will be back this afternoon so we can get these two drafted up. Is this included in the draft? We approved this but it wasn't put as a substitute motion to .0218.

Roxanne Woeste: I would include that in one draft. I would let you vote on that.

Chairman Pollert: Any other discussion? This motion passes 6-0-0.

Roxanne Woeste: This could be worked a couple different ways. We could rule that information in. If you would prefer to keep that separate until it's vote on that would be fine. I could to it either way.

Chairman Pollert: If there was a chance for us to finish up I would like to do that as long as we have that possibility. If Senator Fischer wants these two amendments put in we can do that or keep them separate.

Roxanne Woeste: How would you like to see it? We can draft them and it would just be those two sections. If they are approved we could mold them in.

Senator Fischer: I'm ok either way.

Chairman Pollert: We will be in recess until this afternoon.

2009 HOUSE STANDING COMMITTEE MINUTES

Bill/Resolution No. HB 1012

House Appropriations Committee
Human Resources Division

☒ Check here for Conference Committee

Hearing Date: 5/1/09 (PM)

Recorder Job Number: 12438

Committee Clerk Signature

Minutes:

Chairman Pollert: Called the meeting to order and noted that every member was present. I am going to handout a couple of items (Handout A).

Senator Fischer: This amendment is a result of the request that this piece be put in law in a different form. It has to do with who does interviews with the abused and neglected children. The original request had social workers or children protection advocates or anyone who talked to a child that may have been abused would have to audio or video record them. After visiting with Dr. Norberg from the advocacy center in Fargo this language was adopted in conjunction of the department. What the guidelines that she would like to see is some line drawn so that the advocacy centers because they have a background of doing these would set up guidelines for case referrals. They will draw the line of what a referral is. I would guess that an advocate for children of social services would see some indicators if they suspect a children has been abused a child will be brought into an advocacy center. There are centers in Fargo, Bismarck, Minot, and Dickinson. They will be interviewed at those centers. Part of the reason for that is not only is the interview being done by someone who is trained not to lead. They will do the medical and forensic interview. They keep the recordings. They may give copies to all parties especially if there is a court case. They keep one copy. The situation brought to the legislature

no one has the copy. It has caused quite a bit of trouble. When you stop and think about it maybe it should have been done when the advocacy centers were put together. It was always an intention of they could go there. In doing this, the advocacy centers are in the budget. The one in Fargo does 400 or more interviews a year. The one in Bismarck is about the same size. They are already in the budget. They would have to expand that by about $200,000 to cover the rest of the children. The advocacy centers out there already seek kids from all over. It's not just from Fargo. That is the reason and I move the amendment.

Senator Kilzer: I second that.

Chairman Pollert: A discussion really quick, the $200,000 was in amendments .0218.

Senator Fischer: Yes.

Senator Warner: I think this is a great idea. One small question, I always understood that the children's advocacy center had a level of dealing with lower level non criminal behavior. Are we elevating some non criminal behaviors where a simple intervention would be reprimanded?

Senator Fischer: That is the reason for the involvement of the local folks. They will make that decision when the guidelines are put together. We have child protection services and people that are qualified. They are the ones that have to make that call is this serious enough for those interview to be done? I think that is that we aren't elevating unless someone in a professional capacity feels that it is warranted.

Chairman Pollert: I will ask a roll. It passes 6-0-0. I have another amendment (Attachment B). This deals with the backup for the backup of the line of credit from the Bank of North Dakota. This would give the special fund authority in conjunction with the $8.5 million. We need to have this.

Representative Kreidt: I think we discussed that quite in depth. I would move the amendment.

Representative Ekstrom: I second that.

Chairman Pollert: Any discussion? It passes 6-0-0. This morning in drafting the amendments there was one thing left out and that was going from $75-90 in the personal care allowance. The house put it from $60-$75. The Senate put it from $75-$95.

Senator Warner: I think sometimes there has been a perception that because these people are so sedentary that they don't have need. We spoke of the issues of long term care. Those are the things we discussed earlier. It is specifically not for skilled nursing homes. It is for DD centers. Many of the DD people are out in the community and hold jobs. Some of them have special ends because of physical deformities. It's not uncommon for someone to have $150 shoes. These are people who have social lives and go out with friends. They would like to be able to go to a movie and pay their own way. Many of them have jobs where they make small amounts of money. Virtually all is clawed back. I really think the $95 is a fair reflection of a basic minimal standard of dignity and social presence in the community.

Chairman Pollert: If I can ask you, I was definitely in favor of the $15 increase. I don't know if I'm in favor of another $20. Would you be open to half of that amount that the Senate did at $85?

Senator Warner: I think we can sell that to the Senate. I am agreeing with your position.

Representative Kreidt: I guess I did feel that $75 was adequate. To show everyone I have a heart I will go with this.

Chairman Pollert: I will have to ask Roxanne. This would be half of that amount.

Roxanne Woeste: The change from $75-95 was 226. Before drafting my final set I will get the correct numbers.

Representative Kreidt: I will move that we use $85 for personal needs allowance in basic care and ICFMR's.

Representative Ekstrom: I second that.

Chairman Pollert: Any discussion? That motion is approved.

Senator Warner: I have 4 amendments. (Attachment C). I would like to move that increasing the health insurance children's program to 150 to 175% of poverty.

Representative Ekstrom: I second that.

Chairman Pollert: Any discussion?

Senator Kilzer: I would resist this motion because it is in direct conflict of the amendment we passed earlier today. If we are going to start picking away at the amendment we adopted this morning it's going to start to unravel unless it is a typo or a technical change. I'm not going to support that we start chipping away at the amendment.

Senator Warner: I did emphasize and state that I would be bringing in this amendment. One other thing is that Senator Kilzer has had concern in the past about adding people to programs. SCHIPS is a program of our large insurance company. It pays the same amount. It reimburses providers. I think this is a good program. It brings more people into a program that provides more satisfactory reimbursement rate for the providers.

Senator Fischer: I have a problem with it not because of it for reasons. Is there a change that can be made? I'm apprehensive about it. I will oppose the motion as well.

Senator Kilzer: I just want to point out and this may not pertain to the amendment as far as CHIPS is concerned I don't have a problem with reimbursement. This is just a disincentive for families to purchase private insurance. If a family goes without insurance for 6 months they have the ability to enroll their children. That is my only complaint. I don't have a problem with the reimbursement level for CHIPS.

Representative Kreidt: I would oppose this amendment too. I think we are headed down the right road with the proposed amendments that we have put into place. If we came back to the

house floor with 175% we would have difficulty including that. I wouldn't want to see that jeopardized.

Chairman Pollert: Senator Warner I applaud you for bringing this forward but we would be jeopardizing tier 3. We have had to do a sale on our side as far as some of the good programs it brought forward. Any other discussion? We will take a roll call. That motion fails.

Senator Warner: (Attachment D) I would like to move that the committee add a sum for a portion of the department of human services global health initiative. This would include funding only for the hospital contracts and the five full time equivalent positions of human service centers. This does not fund the FTE's at the state hospital.

Representative Ekstrom: I second that.

Chairman Pollert: Discussion?

Senator Warner: I've been pleased in the recent years to see a paradigm shift on how we treat those with mental illness. We need to keep funding that program.

Senator Kilzer: This is getting to be our own personal list. These are all excellent things but we do have to set our own priorities and be practical about it. This one in my mind is very worthy. Every nice thing that has been said about it is true. We have to have a line somewhere. We are higher than two years ago. This would be wonderful but we do have to draw a line somewhere.

Senator Warner: The bottom line is that this is a good way to save money. It will save money on the corrections side. By putting money up front we can do that. I honestly think it is a fiscally conservative approach.

Chairman Pollert: We will call the roll. This fails 2-4-0.

Representative Ekstrom: (Attachment E). This provides for folks who have had previously been mentally ill and have gotten somewhat better to provide mentoring and support for people

who aren't leaving their homes and have a tough time with their mental illness. The program has been incredibly supportive of this group of people. It has been very successful. It is less than what we had asked for originally. I would move this amendment.

Senator Warner: I second that.

Senator Kilzer: Specifically where does the money go? How is it channeled? Who makes out and receives the checks?

Representative Ekstrom: The way this money is used it goes through the service centers. They contract with these individuals to provide mentoring and support for other individuals who aren't doing as well as they are.

Senator Kilzer: So the money ends up in the hands of mentors?

Representative Ekstrom: Yes.

Chairman Pollert; The motion fails 2-4-0.

Senator Warner: (Attachment F). This is the major pro life initiative. This would increase the eligibility for Medicaid assistance benefits for pregnant women to $165% of poverty level.

Representative Ekstrom: I second that.

Senator Warner: At first I thought the results would be evident but they aren't. I do have to explain that the earlier we can get women into prenatal care the earlier we can get counseling and vitamins. We can start charting weight gain and advice on how to manage your diet. I think from the fiscally conservative standpoint we have seen the rewards of a normal healthy child being born. Two years ago I was in Denver for a conference. We had a public health official that says the cost of a 7 pound baby being born is around $1,000. A 3 pound baby would be $30,000. A 1.5 pound baby would be close to $1 million. The response that we get and the bang we get from our buck from doing early intervention would be an astonishing return. If we are going to do it from a fiscally conservative standpoint it is a wonderful investment.

Representative Ekstrom: One of the places that we have seen dramatic increases in costs it is to medical science. Once the child is not able to be in the home and we are sending them to Ann Carlsen. We know how much that costs. It is tremendously expensive. We are attempting to not have as many medically fragile children coming into the world.

Senator Kilzer: I don't want to take a lot of time because you have heard me talk about this before. That is about the increasing eligibility and putting more people in the wagon. That is what we are doing here. There are 387 additional cases per year. I don't think the answer is to do this. The answer is to encourage people to get in for early pre-natal care no matter what their third party payer happens to be. It's not just the Medicaid population that has difficulties. There are certain high risk groups whether it be a teenage mother or a lady in her 40's having her first child. These are ones that yield to low birth weight and premature children and the high risks of low birth weight. I don't think the best approach is to keep expanding the eligibility.

Chairman Pollert: Any other discussion? This had failed on the house by a vote of 40-49. That fails 2-4-0.

Senator Warner: (Attachment G). I have a self interest in this one. This would provide the dentists with a 6% inflationary increase. I am advocating on behalf of dentists everywhere.

Representative Ekstrom: I second that.

Senator Kilzer: I have a question and this may have to be answered by Brenda or Maggie. The rebasing that was done for the dentists was that projected to the end of the year 2010? Can you explain?

Brenda Weisz: No. We did a rebasing for the 4 provider groups that came forward with a report. The dentists didn't' have a rebasing report. That is why it included inflation in years 1 and 2.

Chairman Pollert: Any other discussion?

Senator Kilzer: I can yield some success to Senator Warner. I think we should pass this one. I believe Brenda.

Senator Fischer: I intend to support it.

Chairman Pollert: I don't want to rain on anyone's parade. When I look at our rebasing and I look at the hospitals not at 100% of the cost reports, the ambulances are at 75. The dentists are at 75% of bill charges. I know that is more than their costs. That is where I'm going to vote. Any other discussion? I think bill charges are more than cost. That motion fails.

Representative Ekstrom: One more thing is that I'd like to thank our chairman. It has been respectful. I do appreciate all the work that everyone has done on this.

Carol Olson: On behalf of the department. You have been an excellent chairman.

Representative Kreidt: I move that the Senate recede from the Senate amendments that 1012 be amended as follows.

Senator Fischer: I second that.

Chairman Pollert: We will take the roll call. It passes 6-0-0. I want to thank you for your time.

"**SECTION 2. APPROPRIATION - FEDERAL FISCAL STIMULUS FUNDS - ADDITIONAL FUNDING APPROVAL.** The funds provided in this section, or so much of the funds as may be necessary, are appropriated from federal funds made available to the state under the federal American Recovery and Reinvestment Act of 2009, not otherwise appropriated, to the department of human services for the period beginning with the effective date of this Act and ending June 30, 2011, as follows:

Federal medical assistance percentage	$66,500,000
Elderly nutrition services	485,000

Child support incentive matching funds	3,200,000
Rehabilitation services and disability assistance and independent living	2,043,000
Individuals With Disabilities Education Act - Part C	2,140,000
Supplemental nutrition assistance program benefits and administration	9,874,747
Senior employment program	143,288
Older blind	3,170
Total federal funds	$84,389,205

The department of human services may seek emergency commission and budget section approval under chapter 54-16 for authority to spend any additional federal funds received under the federal American Recovery and Reinvestment Act of 2009 in excess of the amounts appropriated in this section for the period beginning with the effective date of this Act and ending June 30, 2011.

Any federal funds appropriated under this section, except for the funding of $66,500,000 relating to the federal medical assistance percentage and funding of $2,763,082 of child support incentive matching funds, are not a part of the agency's 2011-13 base budget. Any program expenditures made with these funds will not be replaced with state funds after the federal American Recovery and Reinvestment Act of 2009 funds are no longer available.

SECTION 3. GENERAL FUND TRANSFER TO BUDGET STABILIZATION FUND - EXCEPTION - USE OF GENERAL FUND AMOUNTS. Notwithstanding section 54-27.2-02, the state treasurer and the office of management and budget may not include in the amount used to determine general fund transfers to the budget stabilization fund at the end of the 2007-09 biennium under chapter 54-27.2 any general fund amounts resulting from the increased federal share of medical assistance payments resulting from federal medical assistance percentage changes under the federal American Recovery and Reinvestment Act of 2009. The state treasurer and the office of management and budget shall separately account for these amounts and 2009-11 biennium general fund amounts resulting from federal medical assistance percentage changes under the federal American Recovery and Reinvestment Act of 2009 and use these amounts to defray the expenses of continuing program costs of the department of human services from the general fund for the biennium beginning July 1, 2009, and ending June 30, 2011, as follows:

Inflationary increases for human service providers	$32,564,450
Rate increases for selected medicaid services due to rebasing	21,788,982
Rate increases for nursing homes due to property limit changes	3,000,000
Wage increases for employees of nursing homes, basic care, and developmental disabilities services providers and qualified service providers	15,867,327
Salary increases for department of human services employees	18,949,591
Total	$92,170,350

SECTION 4. BANK OF NORTH DAKOTA LOAN AUTHORIZATION - BUDGET SECTION APPROVAL - CONTINGENT APPROPRIATION. If the caseload/utilization of medical services, long-term care, and developmental disabilities services is more than anticipated by the sixty-first legislative assembly, the department of human services, subject to budget section approval, may borrow the sum of $8,500,000, or so much of the sum as may be necessary, from the Bank of North Dakota, which is appropriated for the purpose of providing the state matching share of additional medical assistance grants for medical services, long-term care, and developmental disabilities services, for the biennium beginning July 1, 2009, and ending June 30, 2011. The department of human services shall request funding from the sixty-second legislative assembly to repay any loan obtained pursuant to provisions of this section, including accrued interest.

SECTION 5. 2009-11 SPENDING LEVEL - AUTHORIZATION. If department of human services expenditures exceed funding levels, including loan proceeds appropriated in section 4 of this Act, approved by the sixty-first legislative assembly during the 2009-11 biennium due to caseload/utilization of programs exceeding the level anticipated by the legislative assembly, the department may continue to spend at the increased level and may seek a deficiency appropriation from the sixty-second legislative assembly."

Page 3, after line 18, insert:

"Supplemental payment - Critical access hospitals	0	400,000"

Page 3, line 19, replace "2,793,692" with "3,443,692"

Page 3, line 21, replace "3,146,298" with "4,196,298"

Page 4, line 5, replace "$4,324,506" with "$4,124,506"

Page 4, remove lines 22 through 29

Page 5, line 1, replace "$4,950,451" with "$5,150,451"

Page 5, line 2, replace "$1,000,000" with "$800,000"

Page 5, line 4, replace "each employee earning a salary that is less than the eightieth" with "employees beginning July 1, 2009. Basic care and skilled nursing care facilities may not use the money received under this section for providing salary and benefit enhancements to administrators or directors of nursing."

Page 5, remove lines 5 and 6

Page 5, line 9, replace "$18,929,151" with "$21,639,106" and replace "$7,000,000" with "$7,086,807"

Page 5, line 10, replace "$11,929,151" with "$14,552,299"

Page 5, line 11, replace "each employee earning a" with "employees beginning July 1, 2009. Developmental disabilities service providers may not use the money received under this section for providing salary and benefit enhancements to administrators."

Page 5, replace lines 12 and 13 with:

"SECTION 13. LEGISLATIVE INTENT - MEDICAID PROVIDER PAYMENTS. It is the intent of the legislative assembly that the department of human services establish a goal to set medicaid payments for hospitals, physicians, chiropractors, and ambulances at 100 percent of cost.

SECTION 14. SUPPLEMENTAL PAYMENT - CRITICAL ACCESS HOSPITALS. The grants - medical assistance line item in subdivision 2 of section 1 of this Act includes the sum of $400,000 of one-time funding from the general fund that the department of human services shall use for providing a supplemental payment to eligible critical access hospitals. A critical access hospital is eligible for a payment under this section only if its percentage of medical payments exceeds 25 percent of its total annual revenue in its most recent audited financial statements and is located in a city with a population that does not exceed 1,450. The department shall seek federal

medicaid funding to provide a portion of the $400,000 supplemental payment. If federal medicaid funding is not available for a portion of the payment, the department may spend the $400,000 from the general fund for making the supplemental payment only if the action will not result in a reduction in federal medicaid funding to the state.

SECTION 15. LEGISLATIVE INTENT - DEMENTIA CARE SERVICES. It is the intent of the sixty-first legislative assembly that the department of human services integrate the dementia care services program established in House Bill No. 1043, as approved by the sixty-first legislative assembly, with the home and community-based care services programs of the department.

SECTION 16. LEGISLATIVE COUNCIL STUDY - TRAUMATIC BRAIN INJURY. During the 2009-11 interim, the legislative council shall consider studying the impact of individuals with traumatic brain injury, including veterans who are returning from wars, on the state's human services system. The study must include an analysis of the estimated cost of providing human service-related services to the individuals with traumatic brain injury. The legislative council shall report its findings and recommendations, together with any legislation required to implement the recommendations, to the sixty-second legislative assembly.

SECTION 17. LEGISLATIVE INTENT - CHILDREN'S HEALTH INSURANCE PROGRAM OUTREACH. It is the intent of the sixty-first legislative assembly that the department of human services award a contract for outreach services for the state children's health insurance program to an entity other than an insurance company, for the biennium beginning July 1, 2009, and ending June 30, 2011.

SECTION 18. UNSPENT 2007-09 BIENNIUM GENERAL FUND APPROPRIATIONS - EXCEPTION. The amount of $270,000 of the $3,100,000 for a sexual offender treatment addition at the state hospital appropriated in subdivision 3 of section 3 of 2007 Senate Bill No. 2012 is not subject to section 54-44.1-11 and may be spent during the 2009-11 biennium for completing roof repairs at the state hospital."

Page 7, after line 21, insert:

"**SECTION 20. AMENDMENT.** Section 50-24.1-02.6 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-02.6. ~~(Contingent effective date - See note) Medical assistance benefits - Eligibility criteria.~~

~~1. The department shall provide medical assistance benefits to otherwise eligible persons who are:~~

~~a. Medically needy persons who have countable income that does not exceed an amount determined under subsection 2; and~~

~~b. Minors who have countable income that does not exceed an amount determined under subsection 3.~~

~~2. The department of human services shall establish an income level for medically needy persons at an amount, no less than required by federal law, that, consistent with the requirements of subsection 3, is the greatest income level achievable without exceeding legislative appropriations for that purpose.~~

~~3. The department of human services shall establish income levels for minors, based on the age of the minors, at amounts, no less than required by federal law, that provide an income level for all minors born before~~

~~September 30, 1983, equal to one hundred percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined and that do not exceed legislative appropriations for that purpose.~~

~~4. The department of human services shall provide medical assistance benefits to children and families coverage groups and pregnant women without consideration of assets.~~

~~(Contingent effective date - See note)~~ **Medical assistance benefits - Eligibility criteria.**

1. The department shall provide medical assistance benefits to otherwise eligible persons who are:

   a. Medically needy persons who have countable income that does not exceed an amount determined under subsection 2; and

   b. Minors who have countable income that does not exceed an amount determined under subsection 3.

2. The department of human services shall establish an income level for medically needy persons at an amount, no less than required by federal law, that, consistent with the requirements of subsection 3, is the greatest income level achievable without exceeding legislative appropriations for that purpose.

3. The department of human services shall establish income levels for minors, based on the age of the minors, at amounts, no less than required by federal law~~, that provide an income level for all individuals from birth through age eighteen equal to one hundred thirty-three percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined~~.

4. The department of human services shall provide medical assistance benefits to children and families coverage groups and pregnant women without consideration of assets."

Page 7, after line 29, insert:

"**SECTION 22.** A new subsection to section 50-25.1-05 of the North Dakota Century Code is created and enacted as follows:

The department shall adopt rules that require all interviews of the alleged abused or neglected child conducted under this section to be audio-recorded or video-recorded, when possible. The rules must provide that a recording may not be disclosed except in accordance with section 50-25.1-11.

SECTION 23. AMENDMENT. Section 50-29-04 of the North Dakota Century Code is amended and reenacted as follows:

50-29-04. Plan requirements. The plan:

1. Must be provided through private contracts with insurance carriers;

2. Must allow conversion to another health insurance policy;

3. Must be based on an actuarial equivalent of a benchmark plan;

4. Must incorporate every state-required waiver approved by the federal government;

5. Must include community-based eligibility outreach services; and

6. Must provide:

   a. A net income eligibility limit of one hundred ~~fifty~~ sixty percent of the poverty line;

   b. A copayment requirement for each pharmaceutical prescription and for each emergency room visit;

   c. A deductible for each inpatient hospital visit;

   d. Coverage for:

      (1) Inpatient hospital, medical, and surgical services;

      (2) Outpatient hospital and medical services;

      (3) Psychiatric and substance abuse services;

      (4) Prescription medications;

      (5) Preventive screening services;

      (6) Preventive dental and vision services; and

      (7) Prenatal services; and

   e. A coverage effective date that is the first day of the month, following the date of application and determination of eligibility."

Page 8, after line 21, insert:

"**SECTION 25. REPEAL.** Section 4 of chapter 422 of the 2007 Session Laws is repealed.

SECTION 26. EMERGENCY. Sections 2 and 18 of this Act are declared to be an emergency measure."

Renumber accordingly

STATEMENT OF PURPOSE OF AMENDMENT - LC 98013.0218 FN 1

A copy of the statement of purpose of amendment is attached.

estore a portion of the House reduction for salaries and wages for anticipated savings from vacant positions and employee turnover (The Senate restored all funding relating to this House reduction.)		20,636	140,700	161,336
Medical Services Program				
Restore a portion of the House reduction for salaries and wages for anticipated savings from vacant positions and employee turnover (The Senate restored all funding relating to this House reduction.)		13,203	90,020	103,223
Restore a portion of the House reduction for department travel (This amendment was also made by the Senate.)		10,915	8,653	19,568
Provide one-time funding in the grants - medical assistance line item for supplemental payments to small, rural critical access hospitals (This funding was also provided by the Senate.)		400,000	0	400,000
Restore funding for medically needy to reflect income levels of 83 percent of the federal poverty level as provided for in the executive budget (The House decreased funding to reflect income levels of 75 percent of the federal poverty level, and the Senate restored funding to reflect income levels of 83 percent.)		376,947	642,379	1,019,326
Increase funding for rebasing physician payment rates (This amendment was also made by the Senate.) (This amendment provides $47,700,000, of which $17,639,460 is from the general fund, for rebasing rates to 75 percent of the amount needed to rebase to 100 percent of cost. The House version provided $10,600,000, of which $3,919,880 is from the general fund, for rebasing rates to 20 percent of the amount needed to rebase to 100 percent of cost. The executive budget included funding of $13,250,000, of which $4,899,850 is from		10,779,670	18,370,330	29,150,000

the general fund, for rebasing rates to 25 percent of the amount needed to rebase to 100 percent of cost.)			
Restore funding in the grants - medical assistance line item for rebasing ambulance payment rates to Medicare rates as provided for in the executive budget (This amendment was also made by the Senate. The House version provided $1,508,336, of which $557,783 is from the general fund, to provide funding equal to 75 percent of the funding provided in the executive budget.)	185,927	316,851	502,778
Restore funding in the grants - medical assistance line item for rebasing dentist payment rates to a minimum of 75 percent of average billed charges as provided for in the executive budget (This amendment was also made by the Senate. The House version provided for rebasing dentist payment rates to a minimum of 70 percent of average billed charges.)	278,333	474,445	752,778
Adjust funding for the state children's health insurance program to reflect utilization reprojections and a revised premium amount (This amendment was also made by the Senate.) (This amendment maintains program eligibility at 160 percent of the federal poverty level.)	(2,832,256)	(8,110,063)	(10,942,319)
Add funding for outreach for the state children's health insurance program	300,000	0	300,000
Provide funding for an estimated decrease in the state's federal medical assistance percentage (FMAP) for the last seven months of the 2009-11 biennium	9,500,000	(9,500,000)	0
Add funding for a Bank of North Dakota line of credit if caseload/utilization rates are greater than anticipated	0	8,500,000	8,500,000
Long-Term Care Program			
Restore funding added in the executive budget and removed by the House for the addition of a third tier of personal care that would allow a maximum of 1,200 units of care per month (This amendment was also made by the Senate.)	1,021,922	1,741,524	2,763,446
Adjust funding for a salary and benefit supplemental payment for individuals employed by basic care and nursing care facilities from $4,950,451 from the general fund, $1,000,000 from the health care trust fund, and $8,788,677 from federal funds as provided by the House to $5,150,451 from the general fund, $800,000 from the health care trust fund, and $8,788,677 from federal funds	200,000	(200,000)	0
Add funding of $2,709,955, of which $86,807 is from the general fund, to the amounts provided by the House to provide total funding of $21,639,106, of which $7,086,807 is from the general fund and $14,552,299 is from federal funds, to provide a salary and benefit supplemental payment for individuals employed by developmental disabilities providers, except for administrators (This amendment was also made by the Senate.)	86,807	2,623,148	2,709,955
Add funding to provide a $1 per hour increase for qualified service providers (This amendment was also made by the Senate.)	853,268	963,026	1,816,294
Add funding in the grants - medical assistance line item for developmental disabilities providers who are serving severely medically fragile and behaviorally challenged individuals in addition to the funding of $1,186,857, of which $438,900 is from the general fund, added by the House (The Senate added funding of $5,131,059, of which $1,897,465 was from the general fund,	1,114,260	1,898,883	3,013,143

for providers who are serving severely medically fragile individuals.)			
Aging Services Program			
Restore a portion of the House reduction for salaries and wages for anticipated savings from vacant positions and employee turnover (The Senate restored all funding relating to this House reduction.)	1,005	6,852	7,857
Restore a portion of the House reduction for department travel (This amendment was also made by the Senate.)	1,753	5,232	6,985
Provide funding for a grant for the community of care program (This funding was also provided by the Senate.)	120,000	0	120,000
Children and Family Services Program			
Restore a portion of the House reduction for salaries and wages for anticipated savings from vacant positions and employee turnover (The Senate restored all funding relating to this House reduction.)	2,326	15,860	18,186
Restore a portion of the House reduction for department travel (This adjustment was also made by the Senate.)	527	1,326	1,853
Increase funding for the Healthy Families program by $200,000 from the general fund, from $300,000 from the general fund as provided for the 2007-09 biennium to $500,00 from the general fund for the 2009-11 biennium	200,000	0	200,000
Add funding for family group conferencing ($100,000) and for safety and permanency funds ($100,000) (The Senate added funding of $1,456,372, of which $1,200,000 was from the general fund, for family group conferencing.)	200,000	0	200,000
Add funding for children's advocacy centers	200,000	0	200,000
Mental Health and Substance Abuse Program			
Restore a portion of the House reduction for salaries and wages for anticipated savings from vacant positions and employee turnover (The Senate restored all funding relating to this House reduction.)	2,382	16,241	18,623
Restore a portion of the House reduction for department travel (This adjustment was also made by the Senate.)	7,921	22,858	30,779
Add funding in the operating expenses line item to increase compulsive gambling services to $650,000, of which $250,000 is from the general fund and $400,000 is from lottery proceeds. This is the same level as provided by the Senate. The House version provided funding of $550,000, of which $150,000 is from the general fund, and the executive budget recommended funding of $700,000, of which $300,000 is from the general fund and $400,000 is from lottery proceeds.	100,000	0	100,000
Restore funding in the grants line item for the Governor's Prevention and Advisory Council grants. The House version removed funding for the Governor's Prevention and Advisory Council grants. The executive budget and the Senate version provide funding of $200,000 from the general fund for the Governor's Prevention and Advisory Council grants.	100,000	0	100,000
Developmental Disabilities Council			
Restore a portion of the House reduction for department travel (This adjustment was also made by the Senate.)	0	2,223	2,223

Developmental Disabilities Division				
Restore a portion of the House reduction for salaries and wages for anticipated savings from vacant positions and employee turnover (The Senate restored all funding relating to this House reduction.)		1,036	7,067	8,103
Restore a portion of the House reduction for department travel (This adjustment was also made by the Senate.)		3,768	16,488	20,256
Vocational Rehabilitation				
Restore a portion of the House reduction for salaries and wages for anticipated savings from vacant positions and employee turnover (The Senate restored all funding relating to this House reduction.)		800	5,453	6,253
Restore a portion of the House reduction for department travel (This adjustment was also made by the Senate.)		8,548	28,121	36,669
Federal Stimulus Funding				
Provide for increased funding for supplemental nutrition assistance program benefits and related additional administrative expenses		0	9,874,747	9,874,747
Change the funding source and provide additional funding for child support enforcement activities		(2,763,082)	3,200,000	436,918
Change the funding source for Medicaid, foster care, and adoption payments due to the enhanced FMAP included in the American Recovery and Reinvestment Act of 2009		(66,500,000)	66,500,000	0

Page 3, after line 6, insert:

"**SECTION 2. APPROPRIATION - FEDERAL FISCAL STIMULUS FUNDS - ADDITIONAL FUNDING APPROVAL.** The funds provided in this section, or so much of the funds as may be necessary, are appropriated from federal funds made available to the state under the federal American Recovery and Reinvestment Act of 2009, not otherwise appropriated, to the department of human services, for the period beginning with the effective date of this Act and ending June 30, 2011, as follows:

Federal medical assistance percentage	$66,500,000
Elderly nutrition services	485,000

Child support incentive matching funds	3,200,000
Rehabilitation services and disability assistance and independent living	2,043,000
Individuals With Disabilities Education Act - Part C	2,140,000
Supplemental nutrition assistance program benefits and administration	9,874,747
Senior employment program	143,288
Older blind	3,170
Total federal funds	$84,389,205

The department of human services may seek emergency commission and budget section approval under chapter 54-16 for authority to spend any additional federal funds received under the federal American Recovery and Reinvestment Act of 2009 in excess of the amounts appropriated in this section, for the period beginning with the effective date of this Act and ending June 30, 2011.

Any federal funds appropriated under this section, except for the funding of $66,500,000 relating to the federal medical assistance percentage and funding of $2,763,082 of child support incentive matching funds, are not a part of the agency's 2011-13 base budget. Any program expenditures made with these funds will not be replaced with state funds after the federal American Recovery and Reinvestment Act of 2009 funds are no longer available.

SECTION 3. GENERAL FUND TRANSFER TO BUDGET STABILIZATION FUND - EXCEPTION - USE OF GENERAL FUND AMOUNTS. Notwithstanding section 54-27.2-02, the state treasurer and the office of management and budget may not include in the amount used to determine general fund transfers to the budget stabilization fund at the end of the 2007-09 biennium under chapter 54-27.2 any general fund amounts resulting from the increased federal share of medical assistance payments resulting from federal medical assistance percentage changes under the federal American Recovery and Reinvestment Act of 2009. The state treasurer and the office of management and budget shall separately account for these amounts and 2009-11 biennium general fund amounts resulting from federal medical assistance percentage changes under the federal American Recovery and Reinvestment Act of 2009 and use these amounts to defray the expenses of continuing program costs of the department of human services from the general fund, for the biennium beginning July 1, 2009, and ending June 30, 2011, as follows:

Inflationary increases for human service providers	$27,345,292
Rate increases for selected medicaid services due to rebasing	21,788,982
Rate increases for nursing homes due to property limit changes and other nursing home increases	7,788,572
Wage increases for employees of nursing homes, basic care, and developmental disabilities services providers and qualified service providers	16,229,317
Salary increases for department of human services employees	14,293,872
Total	$87,446,035

SECTION 4. BANK OF NORTH DAKOTA LOAN AUTHORIZATION - BUDGET SECTION APPROVAL - CONTINGENT APPROPRIATION. If the caseload/utilization of medical services, long-term care, and developmental disabilities services is more than anticipated by the sixty-first legislative assembly, the department of human services, subject to budget section approval, may borrow the sum of $8,500,000, or so much of the sum as may be necessary, from the Bank of North Dakota, which is appropriated for the purpose of providing the state matching share of additional medical assistance grants for medical services, long-term care, and developmental disabilities services, for the biennium beginning July 1, 2009, and ending June 30, 2011. The department of human services shall request funding from the sixty-second legislative assembly to repay any loan obtained pursuant to provisions of this section, including accrued interest.

SECTION 5. 2009-11 SPENDING LEVEL - AUTHORIZATION. If department of human services expenditures exceed funding levels, including loan proceeds appropriated in section 4 of this Act, approved by the sixty-first legislative assembly during the 2009-11 biennium due to caseload/utilization of programs exceeding the level anticipated by the legislative assembly, the department may continue to spend at the increased level and may seek a deficiency appropriation from the sixty-second legislative assembly."

Page 3, after line 18, insert:

"Supplemental payment - Critical access hospitals 0 400,000"

Page 3, line 19, replace "2,793,692" with "3,443,692"

Page 3, line 21, replace "3,146,298" with "4,196,298"

Page 4, line 5, replace "$4,324,506" with "$4,124,506"

Page 4, remove lines 22 through 29

Page 5, line 1, replace "$14,739,128" with "$17,977,513" and replace "$4,950,451" with "$5,512,441"

Page 5, line 2, replace "$1,000,000" with "$800,000" and replace "$8,788,677" with "$11,665,072"

Page 5, line 4, replace "each employee earning a salary that is less than the eightieth" with "employees beginning July 1, 2009. Basic care and skilled nursing care facilities may not use the money received under this section for providing salary and benefit enhancements to administrators or directors of nursing."

Page 5, remove lines 5 and 6

Page 5, line 9, replace "$18,929,151" with "$21,639,106" and replace "$7,000,000" with "$7,086,807"

Page 5, line 10, replace "$11,929,151" with "$14,552,299"

Page 5, line 11, replace "each employee earning a" with "employees beginning July 1, 2009. Developmental disabilities service providers may not use the money received under this section for providing salary and benefit enhancements to administrators."

Page 5, replace lines 12 and 13 with:

"**SECTION 13. LEGISLATIVE INTENT - MEDICAID PROVIDER PAYMENTS.** It is the intent of the legislative assembly that the department of human services establish a goal to set medicaid payments for hospitals, physicians, chiropractors, and ambulances at 100 percent of cost.

SECTION 14. SUPPLEMENTAL PAYMENT - CRITICAL ACCESS HOSPITALS. The grants - medical assistance line item in subdivision 2 of section 1 of this Act includes the sum of $400,000 of one-time funding from the general fund that the department of human services shall use for providing a supplemental payment to eligible critical access hospitals. A critical access hospital is eligible for a payment under this section only if its percentage of medical payments exceeds 25 percent of its total annual revenue in its most recent audited financial statements and is located in a

city with a population that does not exceed 1,450. The department shall seek federal medicaid funding to provide a portion of the $400,000 supplemental payment. If federal medicaid funding is not available for a portion of the payment, the department may spend the $400,000 from the general fund for making the supplemental payment only if the action will not result in a reduction in federal medicaid funding to the state.

SECTION 15. LEGISLATIVE INTENT - DEMENTIA CARE SERVICES. It is the intent of the sixty-first legislative assembly that the department of human services integrate the dementia care services program established in House Bill No. 1043, as approved by the sixty-first legislative assembly, with the home and community-based care services programs of the department.

SECTION 16. LEGISLATIVE COUNCIL STUDY - TRAUMATIC BRAIN INJURY. During the 2009-11 interim, the legislative council shall consider studying the impact of individuals with traumatic brain injury, including veterans who are returning from wars, on the state's human services system. The study must include an analysis of the estimated cost of providing human service-related services to the individuals with traumatic brain injury. The legislative council shall report its findings and recommendations, together with any legislation required to implement the recommendations, to the sixty-second legislative assembly.

SECTION 17. LEGISLATIVE INTENT - CHILDREN'S HEALTH INSURANCE PROGRAM OUTREACH. It is the intent of the sixty-first legislative assembly that the department of human services award a contract for outreach services for the state children's health insurance program to an entity other than an insurance company, for the biennium beginning July 1, 2009, and ending June 30, 2011.

SECTION 18. UNSPENT 2007-09 BIENNIUM GENERAL FUND APPROPRIATIONS - EXCEPTION. The amount of $270,000 of the $3,100,000 for a sexual offender treatment addition at the state hospital appropriated in subdivision 3 of section 3 of 2007 Senate Bill No. 2012 is not subject to section 54-44.1-11 and may be spent during the 2009-11 biennium for completing roof repairs at the state hospital."

Page 7, after line 21, insert:

"**SECTION 20. AMENDMENT.** Section 50-24.1-02.6 of the North Dakota Century Code is amended and reenacted as follows:

50-24.1-02.6. ~~(Contingent effective date - See note) Medical assistance benefits - Eligibility criteria.~~

1. ~~The department shall provide medical assistance benefits to otherwise eligible persons who are:~~

   a. ~~Medically needy persons who have countable income that does not exceed an amount determined under subsection 2; and~~

   b. ~~Minors who have countable income that does not exceed an amount determined under subsection 3.~~

2. ~~The department of human services shall establish an income level for medically needy persons at an amount, no less than required by federal law, that, consistent with the requirements of subsection 3, is the greatest income level achievable without exceeding legislative appropriations for that purpose.~~

3. ~~The department of human services shall establish income levels for minors, based on the age of the minors, at amounts, no less than required by~~

~~federal law, that provide an income level for all minors born before September 30, 1983, equal to one hundred percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined and that do not exceed legislative appropriations for that purpose.~~

~~4. The department of human services shall provide medical assistance benefits to children and families coverage groups and pregnant women without consideration of assets.~~

~~(Contingent effective date - See note)~~ **Medical assistance benefits - Eligibility criteria.**

1. The department shall provide medical assistance benefits to otherwise eligible persons who are:

   a. Medically needy persons who have countable income that does not exceed an amount determined under subsection 2; and

   b. Minors who have countable income that does not exceed an amount determined under subsection 3.

2. The department of human services shall establish an income level for medically needy persons at an amount, no less than required by federal law, that, consistent with the requirements of subsection 3, is the greatest income level achievable without exceeding legislative appropriations for that purpose.

3. The department of human services shall establish income levels for minors, based on the age of the minors, at amounts, no less than required by federal law~~, that provide an income level for all individuals from birth through age eighteen equal to one hundred thirty-three percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined~~.

4. The department of human services shall provide medical assistance benefits to children and families coverage groups and pregnant women without consideration of assets."

Page 7, after line 29, insert:

"**SECTION 22.** A new subsection to section 50-25.1-05 of the North Dakota Century Code is created and enacted as follows:

The department shall adopt guidelines for case referrals to a children's advocacy center. When cases are referred to a children's advocacy center, all interviews of the alleged abused or neglected child conducted at the children's advocacy center under this section shall be audio-recorded or video-recorded.

SECTION 23. AMENDMENT. Section 50-29-04 of the North Dakota Century Code is amended and reenacted as follows:

50-29-04. Plan requirements. The plan:

1. Must be provided through private contracts with insurance carriers;

2. Must allow conversion to another health insurance policy;

3. Must be based on an actuarial equivalent of a benchmark plan;

4. Must incorporate every state-required waiver approved by the federal government;

5. Must include community-based eligibility outreach services; and

6. Must provide:

   a. A net income eligibility limit of one hundred ~~fifty~~ sixty percent of the poverty line;

   b. A copayment requirement for each pharmaceutical prescription and for each emergency room visit;

   c. A deductible for each inpatient hospital visit;

   d. Coverage for:

      (1) Inpatient hospital, medical, and surgical services;

      (2) Outpatient hospital and medical services;

      (3) Psychiatric and substance abuse services;

      (4) Prescription medications;

      (5) Preventive screening services;

      (6) Preventive dental and vision services; and

      (7) Prenatal services; and

   e. A coverage effective date that is the first day of the month, following the date of application and determination of eligibility."

Page 8, after line 21, insert:

"**SECTION 25. REPEAL.** Section 4 of chapter 422 of the 2007 Session Laws is repealed.

SECTION 26. EMERGENCY. Sections 2 and 18 of this Act are declared to be an emergency measure."

Renumber accordingly

Program and Policy - Conference committee changes:	FTE	General Fund	Other Funds	Total
Economic Assistance Policy Program				
Restore a portion of the House reduction for salaries and wages for anticipated savings from vacant positions and employee turnover (The Senate restored all funding relating to this House reduction.)		$14,539	$99,126	$113,665
Child Support Program				
Restore a portion of the House reduction for salaries and wages for anticipated savings from vacant positions and employee turnover (The Senate restored all funding relating to this House reduction.)		20,636	140,700	161,336
Medical Services Program				
Restore a portion of the House reduction for salaries and wages for anticipated savings from vacant positions and employee turnover (The Senate restored all funding relating to this House reduction.)		13,203	90,020	103,223
Restore a portion of the House reduction for department travel (This amendment was also made by the Senate.)		10,915	8,653	19,568
Provide one-time funding in the grants - medical assistance line item for supplemental payments to small, rural critical access hospitals (This funding was also provided by the Senate.)		400,000	0	400,000
Restore funding for medically needy to reflect income levels of 83 percent of the federal poverty level as provided for in the executive budget (The House decreased funding to reflect income levels of 75 percent of the federal poverty level, and the Senate restored funding to reflect income levels of 83 percent.)		376,947	642,379	1,019,326
Increase funding for rebasing physician payment rates (This amendment was also made by the Senate.) (This amendment provides $47,700,000, of which		10,779,670	18,370,330	29,150,000

$17,639,460 is from the general fund, for rebasing rates to 75 percent of the amount needed to rebase to 100 percent of cost. The House version provided $10,600,000, of which $3,919,880 is from the general fund, for rebasing rates to 20 percent of the amount needed to rebase to 100 percent of cost. The executive budget included funding of $13,250,000, of which $4,899,850 is from the general fund, for rebasing rates to 25 percent of the amount needed to rebase to 100 percent of cost.)			
Restore funding in the grants - medical assistance line item for rebasing ambulance payment rates to Medicare rates as provided for in the executive budget (This amendment was also made by the Senate. The House version provided $1,508,336, of which $557,783 is from the general fund, to provide funding equal to 75 percent of the funding provided in the executive budget.)	185,927	316,851	502,778
Restore funding in the grants - medical assistance line item for rebasing dentist payment rates to a minimum of 75 percent of average billed charges as provided for in the executive budget (This amendment was also made by the Senate. The House version provided for rebasing dentist payment rates to a minimum of 70 percent of average billed charges.)	278,333	474,445	752,778
Adjust funding for the state children's health insurance program to reflect utilization reprojections and a revised premium amount (This amendment was also made by the Senate.) (This amendment maintains program eligibility at 160 percent of the federal poverty level.)	(2,832,256)	(8,110,063)	(10,942,319)
Add funding for outreach for the state children's health insurance program	300,000	0	300,000
Provide funding for an estimated decrease in the state's federal medical assistance percentage (FMAP) for the last seven months of the 2009-11 biennium	9,500,000	(9,500,000)	0
Add funding for a Bank of North Dakota line of credit ($8,500,000) if caseload/utilization rates are greater than anticipated, including $14,485,398 of special funds for the related federal funding share	0	22,985,398	22,985,398
Long-Term Care Program			
Restore funding added in the executive budget and removed by the House for the addition of a third tier of personal care that would allow a maximum of 1,200 units of care per month (This amendment was also made by the Senate.)	1,021,922	1,741,524	2,763,446
Add funding of $3,238,385, of which $561,990 is from the general fund, to the amounts provided by the House to provide total funding of $17,977,513, of which $5,512,441 is from the general fund, $800,000 is from the health care trust fund, and $11,665,027 is from federal funds, to provide a salary and benefit supplemental payment for individuals employed by basic care and nursing care facilities except for administrators and contract nursing (The Senate added funding of $7,837,284, of which $2,976,801 was from the general fund, for a salary and benefit supplemental payment for individuals employed by basic care and nursing care facilities.)	561,990	2,676,395	3,238,385
Add funding of $2,709,955, of which $86,807 is from the general fund, to the amounts provided by the House to provide total funding of $21,639,106, of which $7,086,807 is from the general fund and $14,552,299 is from federal funds, to provide a salary and benefit supplemental payment for individuals employed by developmental disabilities providers, except for administrators (This amendment was also made by the Senate.)	86,807	2,623,148	2,709,955

Add funding to provide a $1 per hour increase for qualified service providers (This amendment was also made by the Senate.)	853,268	963,026	1,816,294
Add funding in the grants - medical assistance line item for developmental disabilities providers who are serving severely medically fragile and behaviorally challenged individuals in addition to the funding of $1,186,857, of which $438,900 is from the general fund, added by the House (The Senate added funding of $5,131,059, of which $1,897,465 was from the general fund, for providers who are serving severely medically fragile individuals.)	1,114,260	1,898,883	3,013,143
Add funding of $178,560, of which $113,221 is from the general fund, to increase the personal needs allowance for individuals in basic care facilities and ICR/MR facilities from $75 per month as provided by the House to $85 per month (The Senate added funding of $357,120, of which $226,442 was from the general fund, to increase the personal needs allowance from $75 to $95 per month.)	113,221	65,339	178,560
Aging Services Program			
Restore a portion of the House reduction for salaries and wages for anticipated savings from vacant positions and employee turnover (The Senate restored all funding relating to this House reduction.)	1,005	6,852	7,857
Restore a portion of the House reduction for department travel (This amendment was also made by the Senate.)	1,753	5,232	6,985
Provide funding for a grant for the community of care program (This funding was also provided by the Senate.)	120,000	0	120,000
Children and Family Services Program			
Restore a portion of the House reduction for salaries and wages for anticipated savings from vacant positions and employee turnover (The Senate restored all funding relating to this House reduction.)	2,326	15,860	18,186
Restore a portion of the House reduction for department travel (This adjustment was also made by the Senate.)	527	1,326	1,853
Increase funding for the Healthy Families program by $200,000 from the general fund, from $300,000 from the general fund as provided for the 2007-09 biennium to $500,00 from the general fund for the 2009-11 biennium	200,000	0	200,000
Add funding for family group conferencing ($100,000) and for safety and permanency funds ($100,000) (The Senate added funding of $1,456,372, of which $1,200,000 was from the general fund, for family group conferencing.)	200,000	0	200,000
Add funding for children's advocacy centers	200,000	0	200,000
Mental Health and Substance Abuse Program			
Restore a portion of the House reduction for salaries and wages for anticipated savings from vacant positions and employee turnover (The Senate restored all funding relating to this House reduction.)	2,382	16,241	18,623
Restore a portion of the House reduction for department travel (This adjustment was also made by the Senate.)	7,921	22,858	30,779
Add funding in the operating expenses line item to increase compulsive gambling	100,000	0	100,000

services to $650,000, of which $250,000 is from the general fund and $400,000 is from lottery proceeds. This is the same level as provided by the Senate. The House version provided funding of $550,000, of which $150,000 is from the general fund, and the executive budget recommended funding of $700,000, of which $300,000 is from the general fund and $400,000 is from lottery proceeds.			
Restore funding in the grants line item for the Governor's Prevention and Advisory Council grants. The House version removed funding for the Governor's Prevention and Advisory Council grants. The executive budget and the Senate version provide funding of $200,000 from the general fund for the Governor's Prevention and Advisory Council grants.	100,000	0	100,000
Developmental Disabilities Council			
Restore a portion of the House reduction for department travel (This adjustment was also made by the Senate.)	0	2,223	2,223
Developmental Disabilities Division			
Restore a portion of the House reduction for salaries and wages for anticipated savings from vacant positions and employee turnover (The Senate restored all funding relating to this House reduction.)	1,036	7,067	8,103
Restore a portion of the House reduction for department travel (This adjustment was also made by the Senate.)	3,768	16,488	20,256
Vocational Rehabilitation			
Restore a portion of the House reduction for salaries and wages for anticipated savings from vacant positions and employee turnover (The Senate restored all funding relating to this House reduction.)	800	5,453	6,253
Restore a portion of the House reduction for department travel (This adjustment was also made by the Senate.)	8,548	28,121	36,669
Federal Stimulus Funding			
Provide for increased funding for supplemental nutrition assistance program benefits and related additional administrative expenses	0	9,874,747	9,874,747
Change the funding source and provide additional funding for child support enforcement activities	(2,763,082)	3,200,000	436,918
Change the funding source for Medicaid, foster care, and adoption payments due to the enhanced FMAP included in the American Recovery and Reinvestment Act of 2009	(66,500,000)	66,500,000	0
Provide funding for elderly nutrition services	0	485,000	485,000
Provide funding for the senior employment program	0	143,288	143,288
Provide funding for older blind services	0	3,170	3,170
Provide for increased funding for developmentally delayed infants aged 0 to 3 to	0	2,140,000	2,140,000

reflect federal funds received for Individuals With Disabilities Education Act - Part C				
Provide for increased funding for centers for independent living		0	243,000	243,000
Provide for increased funding for vocational rehabilitation services		0	1,800,000	1,800,000
Total conference committee changes - Program and Policy	0.00	($45,531,634)	$102,003,080	$74,489,446

Other changes affecting Program and Policy programs:

Adds a section of legislative intent providing that the department may exceed funding levels approved by the 2009 Legislative Assembly due to caseload/utilization of programs exceeding the level anticipated by the 2009 Legislative Assembly and may seek a deficiency appropriation from the 2011 Legislative Assembly.

Adds a section of legislative intent regarding Medicaid reimbursement for hospitals, physicians, chiropractors, and ambulances (This section was also added by the Senate.)

Adds a section of legislative intent regarding dementia care services provided for in 2009 House Bill No. 1043 (This section was also added by the Senate.)

Adds a section to provide for a Legislative Council study of individuals with traumatic brain injury (The Senate had added a section to provide for a Legislative Council study of returning veterans and their families.)

Adds a section of legislative intent regarding state children's health insurance program outreach

Amends North Dakota Century Code (NDCC) Section 50-24.1-02.6 relating to medical assistance eligibility (This section was also added by the Senate.)

Creates a new subsection to NDCC Section 50-25.1-05 relating to the adoption of rules regarding the recording of interviews in child abuse or neglect cases (This section was also added by the Senate.)

Repeals Section 4 of Chapter 422 of the 2007 Session Laws relating to the effective date of the expansion of medical assistance benefits

Recognizes an additional estimated general fund turnback of $30.3 million from the 2007-09 biennium

Page 3, after line 6, insert:

"**SECTION 2. APPROPRIATION - FEDERAL FISCAL STIMULUS FUNDS - ADDITIONAL FUNDING APPROVAL.** The funds provided in this section, or so much of the funds as may be necessary, are appropriated from federal funds made available to the state under the federal American Recovery and Reinvestment Act of 2009, not otherwise appropriated, to the department of human services, for the period beginning with the effective date of this Act and ending June 30, 2011, as follows:

Federal medical assistance percentage	$66,500,000

Elderly nutrition services	485,000
Child support incentive matching funds	3,200,000
Rehabilitation services and disability assistance and independent living	2,043,000
Individuals With Disabilities Education Act - Part C	2,140,000
Supplemental nutrition assistance program benefits and administration	9,874,747
Senior employment program	143,288
Older blind	3,170
Total federal funds	$84,389,205

The department of human services may seek emergency commission and budget section approval under chapter 54-16 for authority to spend any additional federal funds received under the federal American Recovery and Reinvestment Act of 2009 in excess of the amounts appropriated in this section, for the period beginning with the effective date of this Act and ending June 30, 2011.

Any federal funds appropriated under this section, except for the funding of $66,500,000 relating to the federal medical assistance percentage and funding of $2,763,082 of child support incentive matching funds, are not a part of the agency's 2011-13 base budget. Any program expenditures made with these funds will not be replaced with state funds after the federal American Recovery and Reinvestment Act of 2009 funds are no longer available.

SECTION 3. GENERAL FUND TRANSFER TO BUDGET STABILIZATION FUND - EXCEPTION - USE OF GENERAL FUND AMOUNTS. Notwithstanding section 54-27.2-02, the state treasurer and the office of management and budget may not include in the amount used to determine general fund transfers to the budget stabilization fund at the end of the 2007-09 biennium under chapter 54-27.2 any general fund amounts resulting from the increased federal share of medical assistance payments resulting from federal medical assistance percentage changes under the federal American Recovery and Reinvestment Act of 2009. The state treasurer and the office of management and budget shall separately account for these amounts and 2009-11 biennium general fund amounts resulting from federal medical assistance percentage changes under the federal American Recovery and Reinvestment Act of 2009 and use these amounts to defray the expenses of continuing program costs of the department of human services from the general fund, for the biennium beginning July 1, 2009, and ending June 30, 2011, as follows:

Inflationary increases for human service providers	$27,345,292
Rate increases for selected medicaid services due to rebasing	21,788,982
Rate increases for nursing homes due to property limit changes and other nursing home increases	7,788,572
Wage increases for employees of nursing homes, basic care, and developmental disabilities services providers and qualified service providers	16,229,317
Salary increases for department of human services employees	14,293,872
Total	$87,446,035

SECTION 4. BANK OF NORTH DAKOTA LOAN AUTHORIZATION - BUDGET SECTION APPROVAL - CONTINGENT APPROPRIATION. If the caseload/utilization of medical services, long-term care, and developmental disabilities services is more than anticipated by the sixty-first legislative assembly, the department of human services, subject to budget section approval, may borrow the sum of $8,500,000, or so much of the sum as may be necessary, from the Bank of North Dakota, which is appropriated for the purpose of providing the state matching share of additional medical assistance grants for medical services, long-term care, and

developmental disabilities services, for the biennium beginning July 1, 2009, and ending June 30, 2011. The department of human services shall request funding from the sixty-second legislative assembly to repay any loan obtained pursuant to provisions of this section, including accrued interest.

SECTION 5. 2009-11 SPENDING LEVEL - AUTHORIZATION. If department of human services expenditures exceed funding levels, including loan proceeds appropriated in section 4 of this Act, approved by the sixty-first legislative assembly during the 2009-11 biennium due to caseload/utilization of programs exceeding the level anticipated by the legislative assembly, the department may continue to spend at the increased level and may seek a deficiency appropriation from the sixty-second legislative assembly."

Page 3, after line 18, insert:
"Supplemental payment - Critical access hospitals 0 400,000"

Page 3, line 19, replace "2,793,692" with "3,443,692"

Page 3, line 21, replace "3,146,298" with "4,196,298"

Page 4, line 5, replace "$4,324,506" with "$4,124,506"

Page 4, remove lines 22 through 29

Page 5, line 1, replace "$14,739,128" with "$17,977,513" and replace "$4,950,451" with "$5,512,441"

Page 5, line 2, replace "$1,000,000" with "$800,000" and replace "$8,788,677" with "$11,665,072"

Page 5, line 4, replace "each employee earning a salary that is less than the eightieth" with "employees beginning July 1, 2009. Basic care and skilled nursing care facilities may not use the money received under this section for providing salary and benefit enhancements to administrators or directors of nursing."

Page 5, remove lines 5 and 6

Page 5, line 9, replace "$18,929,151" with "$21,639,106" and replace "$7,000,000" with "$7,086,807"

Page 5, line 10, replace "$11,929,151" with "$14,552,299"

Page 5, line 11, replace "each employee earning a" with "employees beginning July 1, 2009. Developmental disabilities service providers may not use the money received under this section for providing salary and benefit enhancements to administrators."

Page 5, replace lines 12 and 13 with:

"**SECTION 13. LEGISLATIVE INTENT - MEDICAID PROVIDER PAYMENTS.** It is the intent of the legislative assembly that the department of human services establish a goal to set medicaid payments for hospitals, physicians, chiropractors, and ambulances at 100 percent of cost.

SECTION 14. SUPPLEMENTAL PAYMENT - CRITICAL ACCESS HOSPITALS. The grants - medical assistance line item in subdivision 2 of section 1 of this Act includes the sum of $400,000 of one-time funding from the general fund that the department of human services shall use for providing a supplemental payment to

eligible critical access hospitals. A critical access hospital is eligible for a payment under this section only if its percentage of medical payments exceeds 25 percent of its total annual revenue in its most recent audited financial statements and is located in a city with a population that does not exceed 1,450. The department shall seek federal medicaid funding to provide a portion of the $400,000 supplemental payment. If federal medicaid funding is not available for a portion of the payment, the department may spend the $400,000 from the general fund for making the supplemental payment only if the action will not result in a reduction in federal medicaid funding to the state.

SECTION 15. LEGISLATIVE INTENT - DEMENTIA CARE SERVICES. It is the intent of the sixty-first legislative assembly that the department of human services integrate the dementia care services program established in House Bill No. 1043, as approved by the sixty-first legislative assembly, with the home and community-based care services programs of the department.

SECTION 16. LEGISLATIVE COUNCIL STUDY - TRAUMATIC BRAIN INJURY. During the 2009-11 interim, the legislative council shall consider studying the impact of individuals with traumatic brain injury, including veterans who are returning from wars, on the state's human services system. The study must include an analysis of the estimated cost of providing human service-related services to the individuals with traumatic brain injury. The legislative council shall report its findings and recommendations, together with any legislation required to implement the recommendations, to the sixty-second legislative assembly.

SECTION 17. LEGISLATIVE INTENT - CHILDREN'S HEALTH INSURANCE PROGRAM OUTREACH. It is the intent of the sixty-first legislative assembly that the department of human services award a contract for outreach services for the state children's health insurance program to an entity other than an insurance company, for the biennium beginning July 1, 2009, and ending June 30, 2011.

SECTION 18. UNSPENT 2007-09 BIENNIUM GENERAL FUND APPROPRIATIONS - EXCEPTION. The amount of $270,000 of the $3,100,000 for a sexual offender treatment addition at the state hospital appropriated in subdivision 3 of section 3 of 2007 Senate Bill No. 2012 is not subject to section 54-44.1-11 and may be spent during the 2009-11 biennium for completing roof repairs at the state hospital."

"**SECTION 20. AMENDMENT.** Section 50-24.1-02.6 of the North Dakota Century Code is amended and reenacted as follows:

~~50-24.1-02.6. (Contingent effective date - See note) Medical assistance benefits - Eligibility criteria.~~

~~1. The department shall provide medical assistance benefits to otherwise eligible persons who are:~~

~~a. Medically needy persons who have countable income that does not exceed an amount determined under subsection 2; and~~

~~b. Minors who have countable income that does not exceed an amount determined under subsection 3.~~

~~2. The department of human services shall establish an income level for medically needy persons at an amount, no less than required by federal law, that, consistent with the requirements of subsection 3, is the greatest~~

~~income level achievable without exceeding legislative appropriations for that purpose.~~

~~3. The department of human services shall establish income levels for minors, based on the age of the minors, at amounts, no less than required by federal law, that provide an income level for all minors born before September 30, 1983, equal to one hundred percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined and that do not exceed legislative appropriations for that purpose.~~

~~4. The department of human services shall provide medical assistance benefits to children and families coverage groups and pregnant women without consideration of assets.~~

~~(Contingent effective date -- See note)~~ **Medical assistance benefits - Eligibility criteria.**

1. The department shall provide medical assistance benefits to otherwise eligible persons who are:

   a. Medically needy persons who have countable income that does not exceed an amount determined under subsection 2; and

   b. Minors who have countable income that does not exceed an amount determined under subsection 3.

2. The department of human services shall establish an income level for medically needy persons at an amount, no less than required by federal law, that, consistent with the requirements of subsection 3, is the greatest income level achievable without exceeding legislative appropriations for that purpose.

3. The department of human services shall establish income levels for minors, based on the age of the minors, at amounts, no less than required by federal law~~, that provide an income level for all individuals from birth through age eighteen equal to one hundred thirty-three percent of the federal poverty level in the month for which eligibility for medical assistance benefits is being determined~~.

4. The department of human services shall provide medical assistance benefits to children and families coverage groups and pregnant women without consideration of assets."

Page 7, after line 29, insert:

"**SECTION 22.** A new subsection to section 50-25.1-05 of the North Dakota Century Code is created and enacted as follows:

The department shall adopt guidelines for case referrals to a children's advocacy center. When cases are referred to a children's advocacy center, all interviews of the alleged abused or neglected child conducted at the children's advocacy center under this section shall be audio-recorded or video-recorded.

SECTION 23. AMENDMENT. Section 50-29-04 of the North Dakota Century Code is amended and reenacted as follows:

50-29-04. Plan requirements. The plan:

1. Must be provided through private contracts with insurance carriers;
2. Must allow conversion to another health insurance policy;
3. Must be based on an actuarial equivalent of a benchmark plan;
4. Must incorporate every state-required waiver approved by the federal government;
5. Must include community-based eligibility outreach services; and
6. Must provide:
   a. A net income eligibility limit of one hundred ~~fifty~~ sixty percent of the poverty line;
   b. A copayment requirement for each pharmaceutical prescription and for each emergency room visit;
   c. A deductible for each inpatient hospital visit;
   d. Coverage for:
      (1) Inpatient hospital, medical, and surgical services;
      (2) Outpatient hospital and medical services;
      (3) Psychiatric and substance abuse services;
      (4) Prescription medications;
      (5) Preventive screening services;
      (6) Preventive dental and vision services; and
      (7) Prenatal services; and
   e. A coverage effective date that is the first day of the month, following the date of application and determination of eligibility."

Page 8, after line 21, insert:

"**SECTION 25. REPEAL.** Section 4 of chapter 422 of the 2007 Session Laws is repealed.

SECTION 26. EMERGENCY. Sections 2 and 18 of this Act are declared to be an emergency measure."

Renumber accordingly

STATEMENT OF PURPOSE OF AMENDMENT - LC 98013.0219 FN 2

A copy of the statement of purpose of amendment is on file in the Legislative Council Office.

Engrossed HB 1012 was placed on the Seventh order of business on the calendar.

2009 TESTIMONY

HB 1012

4-7-09

Prepared by the North Dakota Legislative Council staff for Senate Appropriations
March 4, 2009

2

Department 325 - Department of Human Services
House Bill No. 1012

	FTE Positions	General Fund	Other Funds	Total
2009-11 Executive Budget	2,237.38	$721,512,545	$1,540,574,416	$2,262,086,961
2007-09 Legislative Appropriations	2,223.38	593,916,230	1,290,890,297	1,884,806,527[1]
Increase (Decrease)	14.00	$127,596,315	$249,684,119	$377,280,434

[1]The 2007-09 appropriation amounts include $2,759,109, $1,953,442 of which is from the general fund, for the agency's share of the $10 million funding pool appropriated to the Office of Management and Budget for special market equity adjustments for classified employees. The 2007-09 appropriation amounts do not include $1,820,303 of general fund and $22,670,431 of special funds carryover from the 2005-07 biennium.

Agency Funding

2009-11 Executive Budget	$717,216,247	$4,296,298	$721,512,545
2007-09 Legislative Appropriations	582,028,966	11,887,264	593,916,230
Increase (Decrease)	$135,187,281	($7,590,966)	$127,596,315

First House Action

Attached is a summary of first house changes.

Executive Budget Highlights
(With First House Changes in Bold)

	General Fund	Other Funds	Total
Departmentwide			
1. Reflects the additional state matching funds required due to changes in the state's federal medical assistance percentage (FMAP). The FMAP determines the federal and state share of Medicaid, foster care, and other program expenditures. North Dakota's FMAP is decreasing from 63.15 percent in federal fiscal year 2009 to 63.01 percent in federal fiscal year 2010. The department anticipates North Dakota's FMAP to remain at 63.01 percent for federal fiscal year 2011. These changes are also reflected in selected program amounts below.	$10,177,538	($10,202,442)	($24,904)
Increases support from the health care trust fund from $525,597 in the 2007-09 biennium to $3,000,000 for the 2009-11 biennium. This change is also reflected in selected program amounts below.	$0	$2,474,403	$2,474,403

3. Provides a 7 percent **inflationary increase** in the second year of the biennium for rebased services (hospitals, physicians, chiropractors, and ambulances) and a 7 percent per year inflationary increase to providers of other services. The 2007 Legislative Assembly provided a 4 percent inflationary increase for the first year of the 2007-09 biennium and a 5 percent inflationary increase for the second year. These increases are also reflected in selected program amounts below. **The House decreased funding for inflationary increases for rebased services to 6 percent for the second year and to 6 percent per year for all other services.**	$37,156,758	$57,582,866	$94,739,624
4. Provides funding of $5,033,569 to address **salary equity** issues, including funding of $277,790 for the related second-year salary increase. **The House removed this funding.**	$3,458,505	$1,575,064	$5,033,569
5. Reduces funding for salaries and wages by $1 million from the general fund in anticipation of savings resulting from employee turnover and position vacancies. **The House reduced funding for salaries and wages by an additional $6,090,893, of which $2,000,000 was from the general fund, in anticipation of savings resulting from employee turnover and position vacancies.**	($1,000,000)	$0	($1,000,000)
6. Includes funding for paying accrued leave and sick leave of employees anticipated to retire during the 2009-11 biennium	$113,998	$277,948	$391,946
Management			
1. Adds 1 FTE position to perform additional duties required by Statement on Auditing Standards No. 112 regarding communicating internal control matters, including $126,265 for salaries and wages and $2,790 for related operating expenses. **The House removed the FTE position and the related funding.**	$56,724	$72,331	$129,055
2. Removes one-time funding provided for the 2007-09 biennium for the Medicaid management information system replacement project	($3,643,133)		($3,643,133)
Program and Policy			
1. Provides $3,374,210, of which $1,409,603 is from the general fund and $1,964,607 is from retained funds, for **Indian county payments**. The grants are provided at 100 percent of the excess costs calculated, pursuant to North Dakota Century Code (NDCC) Section 50-01.2-03.2(3).	$454,479	$0	$454,479
2. Reduces funding for temporary assistance for needy families (**TANF**) to $23,477,922, of which $5,531,958 is from the general fund and $6,174,667 is from retained funds. The funding level is anticipated to provide services for an average monthly caseload of 2,851 and to provide an average monthly payment of $343.12 per case.	$1,217,016	($3,124,633)	($1,907,617)
3. Provides $22,359,834, of which $350,197 is from the general fund and $6,263,361 is from retained funds and the remainder from federal funds, for **child care grants**. The change reflects an increase of $350,197 from the general fund, an increase of $1,037,542 in retained funds, and an increase of $1,241,647 in federal funds.	$350,197	$2,279,189	$2,629,386
4. Increases federal funding for **food stamps** to provide a total of $204,336,375 of federal funds	$0	$97,318,383	$97,318,383
5. Increases federal funding for the low-income home energy assistance program (**LIHEAP**) to provide a total of $52,562,722 of federal funds	$0	$12,022,292	$12,022,292
6. Provides $482,133,759, of which $138,162,168 is from the general fund, for **medical assistance grants** in the medical services program compared to $394,784,291 provided for the 2007-09 biennium, of which $112,382,988 was from the general fund. Major components of the additional funding are listed below:			

Adds funding for cost and caseload/utilization changes for medical assistance grants in the medical services program, including the cost of continuing the July 2008 inflationary increase for providers of 4 percent for the first year of the 2007-09 biennium and 5 percent for the second year. **The House decreased funding for medical assistance by $25,959,978, of which $9,600,000 is from the general fund, to reduce projected caseload/utilization rates.**	$10,123,581	$43,040,717	$53,164,298
Adds additional general fund support for medical assistance grants in the medical services program as a result of FMAP changes	$3,197,129	($3,197,129)	$0
Adds funding to rebase payment rates for the following services:			
Hospitals	$8,140,450	$13,872,664	$22,013,114
Physicians - **The House decreased funding to 20 percent of the amount needed to rebase to 100 percent of cost.**	4,899,850	8,350,150	13,250,000
Chiropractors - **The House decreased funding to 75 percent of the cost report.**	153,836	262,164	416,000
Ambulances - **The House decreased funding to provide funding equal to 75 percent of the funding provided in the executive budget.**	743,710	1,267,404	2,011,114
Total	$13,937,846	$23,752,382	$37,690,228
Provides for inflationary increases of 7 percent for the second year of the biennium for the rebased services and 7 percent per year for all other services. **The House decreased funding for inflationary increases for rebased services to 6 percent for the second year and to 6 percent per year for all other services.**	$6,734,524	$14,301,146	$21,035,670
Adds funding for increasing medical services dental payments to a minimum of an average of 75 percent of billed charges. **The House decreased funding by $1,955,935, of which $722,547 is from the general fund, to provide a minimum of 70 percent of average billed charges with inflation increases of 0 percent the first year and 7 percent the second year. The House also decreased funding for inflationary increases to 6 percent for the second year.**	$904,167	$1,540,971	$2,445,138
Adds funding to increase medically needy income levels to 83 percent of the federal poverty level. **The House decreased funding by $1,019,326, of which $376,947 is from the general fund, to increase medically needy levels to 75 percent of the federal poverty level.**	$2,041,614	$3,479,245	$5,520,859
7. Increases funding for **Healthy Steps** (children's health insurance program) to provide a total of $35,248,129, of which $9,122,897 is from the general fund, to provide health insurance coverage for an average of 6,021 children at a monthly premium of $243.93. The executive budget recommends raising eligibility requirements for the program to 200 percent of the federal poverty level. As of October 1, 2008, the Healthy Steps income level is 150 percent of the federal poverty level (includes the addition of 1.5 FTE positions). **The House removed the 1.5 new FTE positions and decreased funding to increase the program's eligibility from 150 percent to 160 percent of the federal poverty level.**	$4,473,765	$10,569,618	$15,043,383
8. Includes $19,416,262, of which $18,624,262 is from the general fund and $792,000 is from estate collections, for making Medicare Part D prescription drug **"clawback" payments** to the federal government for the estimated prescription drug costs paid by Medicare for individuals eligible for both Medicare and Medicaid. The amount provided is an increase of $266,647 from the 2007-09 biennium appropriation of $19,149,615 from the general fund.	($525,353)	$792,000	$266,647

9. Provides $422,244,637, of which $153,236,194 is from the general fund, for **nursing facility care** under the long-term care program compared to $370,080,827, of which $132,817,907 was from the general fund, provided for the 2007-09 biennium. Major components of the additional funding are listed below:			
Adds funding for cost and caseload/utilization changes for nursing homes, including the cost of continuing the July 2008 inflationary increase of 5 percent for both years of the 2009-11 biennium. **The House decreased funding for long-term care by $15,143,320, of which $5,000,000 is from the general fund, to reduce projected caseload/utilization rates.**	$9,061,002	$16,095,248	$25,156,250
Adds general fund support for nursing homes as a result of FMAP changes	$3,748,295	($3,748,295)	$0
Provides for an inflationary increase of 7 percent for each year of the 2009-11 biennium for nursing homes, including an increase in funding from the health care trust fund from $525,597 for 2007-09 to $3 million for 2009-11. **The House decreased funding for inflationary increases for nursing homes to 6 percent per year.**	$9,935,325	$16,924,167	$26,859,492
Adds funding to increase the personal needs allowance from $30 to $50 per month for individuals in an institutional setting who are "SSI only" and receive their personal needs allowance from Social Security (funding is based on a January 1, 2010, start date)	$148,068	$0	$148,068
10. Provides $17,070,865, of which $7,859,036 is from the general fund, for **basic care services** compared to $14,083,121, of which $6,097,305 was from the general fund, for the 2007-09 biennium. Major components of the additional funding are listed below:			
Adds funding for cost and caseload/utilization changes for basic care, including the cost of continuing the July 2008 inflationary increase of 5 percent for both years of the 2009-11 biennium. **The House decreased funding for long-term care by $15,143,320, of which $5,600,000 is from the general fund, to reduce projected caseload/utilization rates.**	$199,962	$617,468	$817,430
Adds additional general fund support for basic care as a result of FMAP changes	$92,129	($92,129)	$0
Provides for inflationary increases of 7 percent for each year of the 2009-11 biennium for basic care facilities. **The House decreased funding for inflationary increases for basic care facilities to 6 percent per year.**	$1,469,640	$700,674	$2,170,314
11. Adds funding to increase the funeral set-aside for Medicaid recipients from $5,000 to $7,000. **The House decreased funding by $283,000, of which $103,922 is from the general fund, to provide for an increase in the funeral set-aside from $5,000 to $6,000.**	$208,571	$357,429	$566,000
12. Increases funding for service payments for elderly and disabled **(SPED) and expanded SPED** to $18,057,693, of which $17,190,678 is from the general fund, compared to the 2007-09 biennium appropriation of $12,708,265, of which $12,111,009 was from the general fund. Major changes include:			
Increases funding for cost and caseload/utilization changes for SPED and expanded SPED and includes the cost of continuing the July 2008 inflationary increase of 5 percent for both years of the 2009-11 biennium	$2,846,777	$156,058	$3,002,835
Provides for inflationary increases of 7 percent for each year of the 2009-11 biennium for SPED and expanded SPED providers. **The House decreased funding for inflationary increases to 6 percent per year.**	$1,628,744	$82,017	$1,710,761

Adds funding for revising the SPED fee schedule based on the actual cost-of-living adjustment through January 2008 and an estimated cost-of-living adjustment for January 2009 to allow individuals with higher income levels to receive SPED services without paying a fee	$571,472	$30,077	$601,549
13. Increases funding for the **home and community-based care waiver** to $9,607,825, of which $3,552,959 is from the general fund, compared to the 2007-09 biennium appropriation of $4,943,345, of which $1,855,465 was from the general fund. Major changes include:			
Increases funding for cost and caseload/utilization changes for the home and community-based care waiver and includes the cost of continuing the July 2008 inflationary increase of 5 percent for both years of the 2009-11 biennium	$962,033	$1,913,938	$2,875,971
Adds additional general fund support for the home and community-based care waiver as a result of FMAP changes	$74,048	($74,048)	$0
Provides for inflationary increases of 7 percent for each year of the 2009-11 biennium for home and community-based care waiver providers. **The House decreased funding for inflationary increases to 6 percent per year.**	$314,701	$536,242	$850,943
Adds funding for implementing a waiver for children's hospice services (funding is for the second year of the 2009-11 biennium)	$316,700	$539,710	$856,410
14. Increases funding for **targeted case management** to $1,985,916, of which $734,368 is from the general fund, compared to the 2007-09 biennium appropriation of $923,325, of which $332,692 was from the general fund. Major changes include:			
Increases funding for cost and caseload/utilization changes for targeted case management and includes the cost of continuing the July 2008 inflationary increase of 5 percent for both years of the 2009-11 biennium	$313,440	$556,467	$869,907
Adds additional general fund support for targeted case management as a result of FMAP changes	$16,972	($16,972)	$0
Provides for inflationary increases of 7 percent for each year of the 2009-11 biennium for targeted case management providers. **The House decreased funding for inflationary increases to 6 percent per year.**	$71,264	$121,420	$192,684
15. Increases funding for the **personal care option** to $23,919,788, of which $8,845,373 is from the general fund, compared to the 2007-09 biennium appropriation of $19,086,421, of which $6,876,755 was from the general fund. Major changes include:			
Increases funding for cost and caseload/utilization changes for the personal care option and includes the cost of continuing the July 2008 inflationary increase of 5 percent for both years of the 2009-11 biennium	$247,518	$438,335	$685,853
Adds additional general fund support for the personal care option as a result of FMAP changes	$187,359	($187,359)	$0
Provides for inflationary increases of 7 percent for each year of the 2009-11 biennium for personal care option providers	$511,819	$872,249	$1,384,068
Adds funding for the addition of a third tier of personal care that would allow a maximum of 1,200 units of care per month (Funding is based on a January 1, 2010, start date. Currently, the maximum number of units of care available is 960 units per month.)	$1,021,922	$1,741,524	$2,763,446
16. Provides $323,056,043, of which $118,885,733 is from the general fund, for **developmental disabilities services** under the long-term care program compared to $274,423,470, of which $95,952,600 was from the general fund, provided for the 2007-09 biennium. Major components of the additional funding are:			

Adds funding for cost and caseload/utilization changes for developmental disabilities services, including the cost of continuing the July 2008 inflationary increase of 5 percent for both years of the 2009-11 biennium. **The House decreased funding for developmental disabilities grants by $6,695,511, of which $2,476,000 is from the general fund, to reduce projected caseload/utilization rates.**	$6,371,084	$11,099,000	$17,470,084
Adds general fund support for developmental disabilities services as a result of FMAP changes and the removal of funding from Bank of North Dakota loan proceeds	$5,073,875	($5,098,779)	($24,904)
Provides for inflationary increases of 7 percent for each year of the 2009-11 biennium for developmental disabilities services providers. **The House decreased funding for inflationary increases to 6 percent per year.**	$10,508,471	$18,028,646	$28,538,117
Adds general fund support to continue developmental disabilities grants funded with Bank of North Dakota loan proceeds in the 2007-09 biennium	$3,500,000	($3,500,000)	$0
Adds funding for developmental disabilities services to compensate families at the same level as ICF/MR providers serving children with similar intense medical needs	$238,274	$406,056	$644,330
Adds funding to compensate developmental disabilities services providers serving adults at the same level as ICF/MR providers serving adults with similar intense medical needs	$297,842	$507,570	$805,412
Adds funding to increase the personal needs allowance for individuals in an ICF/MR facility from $50 to $60 per month	$38,341	$65,339	$103,680
Adds funding to implement a home and community-based care waiver to provide intensive support for young children who have a diagnosis of autism spectrum disorder (funding is for the second year of the 2009-11 biennium) (includes the addition of 1 new FTE position). **The House removed the new FTE position.**	$450,724	$721,019	$1,171,743
17. Reduces funding for foster care to $58,900,156, of which $8,207,265 is from the general fund, for **foster care services** compared to the 2007-09 biennium appropriation of $60,897,869, of which $8,335,697 is from the general fund. Major components of the additional funding are:			
Adds funding for cost and caseload/utilization changes for foster care services, including the cost of continuing the July 2008 inflationary increase of 5 percent for both years of the 2009-11 biennium	($1,315,147)	($6,250,955)	($7,566,102)
Adds general fund support for foster care services as a result of FMAP changes	$146,163	($146,163)	$0
Provides for inflationary increases of 7 percent for each year of the 2009-11 biennium for foster care providers. **The House decreased funding for inflationary increases to 6 percent per year.**	$1,764,636	$5,573,792	$7,338,428
18. Provides $18,104,961, of which $7,407,980 is from the general fund, for **subsidized adoption** compared to the 2007-09 biennium appropriation of $13,894,075, of which $5,738,361 was from the general fund	$1,669,619	$2,541,267	$4,210,886
19. Adds funding to establish a pilot **aging and disability resource center. The House removed this funding.**	$600,000	$0	$600,000
20. Increases funding for **family preservation services** with Native American tribes (Currently, the department contracts with the Three Affiliated Tribes - Mandan, Hidatsa, and Arikara Nation and the Turtle Mountain Band of Chippewa Indians to deliver family preservation services. The additional funding would extend the contracts to the Standing Rock Sioux Tribe and the Spirit Lake Nation.)	$300,000	$0	$300,000

21. Increases funding for **centers of independent living** from $1,344,539, of which $530,958 is from the general fund, to $2,144,539, of which $1,330,958 is from the general fund. **The House decreased funding by $400,000.**	$800,000	$0	$800,000
22. Provides funding for **senior service providers** to supplement Older Americans Act funds	$900,000	$0	$900,000
23. Provides funding and 1 FTE position for **background checks** for child care providers	$323,921	$0	$323,921
24. Adds funding for **Governor's Prevention and Advisory Council** grants. (For the 2007-09 biennium, funding of $100,000 from the community health trust fund was appropriated to the Governor's office for the grants.) **The House removed this funding.**	$200,000	$0	$200,000
25. Provides funding of $700,000, of which $300,000 is from the general fund, for **compulsive gambling services** compared to $400,000 of special funds from lottery proceeds provided for the 2007-09 biennium. **The House decreased funding from the general fund from $300,000 to $150,000.**	$300,000	$0	$300,000
26. Deletes 7.5 FTE positions in the child support enforcement program	($264,174)	($357,796)	($621,970)
State Hospital			
1. Removes one-time funding provided for the 2007-09 biennium ($3,100,000 for a sexual offender treatment addition, $3,062,757 for capital improvements, and $1,153,500 for extraordinary repairs)	($7,316,257)		($7,316,257)
2. Reduces funding for salaries and wages in anticipation of savings resulting from employee turnover and position vacancies	($917,041)	($439,733)	($1,356,774)
3. Adds funding and 6 FTE positions for a **global behavioral health initiative** to address the capacity issues at the community level by providing a consistent rate among all regions for behavioral services. **The House removed this funding.**	$516,815		$516,815
4. Adds general fund support as the result of FMAP changes	$61,040	($61,040)	$0
5. Provides **one-time funding** for extraordinary repairs. **The House decreased this funding by $1 million.**	$3,231,017		$3,231,017
6. Provides **one-time funding** for equipment over $5,000	$246,220		$246,220
Developmental Center			
1. Removes one-time funding provided for the 2007-09 biennium ($300,000 for capital improvements, $547,092 for extraordinary repairs, and $80,782 for equipment)	($972,874)		($972,874)
2. Adds general fund support as the result of FMAP changes	$471,861	($471,861)	$0
3. Provides **one-time funding** for extraordinary repairs. **The House decreased this funding by $150,000.**	$712,675		$712,675
4. Provides **one-time funding** for equipment over $5,000	$75,000		$75,000
Human Service Centers			
1. Adds general fund support as the result of FMAP changes	$439,838	($439,838)	$0
2. Adds funding and 5 FTE positions at the following human service centers for a **global behavioral health initiative** to address the capacity issues at the community level by providing a consistent rate among all regions for behavioral services:			
North Central - Grants	$1,358,307	$100,000	$1,458,307
Northeast - Grants	280,663	81,200	361,863
Southeast - 4 FTE positions ($406,535), operating expenses ($7,840), and grants ($959,495)	1,190,124	183,746	1,373,870
South Central - 1 FTE position ($113,079) and operating expenses ($14,590)	127,669		127,669
West Central - Grants	279,546		279,546

Badlands - Grants	665,000	140,000	805,000
Total - **The House removed all funding and FTE positions except for funding of $315,360, of which $236,520 is from the general fund, for contract staffing at the Cooper House through the Southeast Human Service Center.**	$3,901,309	$504,946	$4,406,255
3. Adds funding and 4 FTE positions at the following human service centers for providing additional **oversight** and **monitoring** of developmental disabilities cases as required by the Centers for Medicare and Medicaid Services:			
North Central - 1 FTE case manager position	$58,793	$52,354	$111,147
Northeast - 1 FTE case manager position	58,793	52,354	111,147
Southeast - 1 FTE case manager position	58,793	52,354	111,147
West Central - 1 FTE case manager position	58,793	52,354	111,147
Total - **The House removed all funding and FTE positions.**	$235,172	$209,416	$444,588
4. Adds funding and 1 FTE program coordinator position for the **partnership program** at the Southeast Human Service Center ($99,970 for salaries and wages and $1,960 for related operating expenses). **The House removed this funding and FTE position.**	$61,490	$40,440	$101,930
5. Provides funding for **young adult transition residential services** at the Southeast Human Service Center ($426,844) and the West Central Human Service Center ($750,000). **The House removed this funding.**	$834,622	$342,222	$1,176,844
6. Provides funding and 1 FTE MI case manager position to complete vulnerable adult protection services at the South Central Human Service Center ($58,020 for salaries and wages and $15,108 for related operating expenses). **The House removed this funding and FTE position.**	$73,128		$73,128
7. Provides for inflationary increases of 7 percent for each year of the 2009-11 biennium for providers of the human service centers as follows:			
Northwest	$193,462	$1,064	$194,526
North Central	387,170	21,789	408,959
Lake Region	208,670		208,670
Northeast	443,799	169,774	613,573
Southeast	405,117	1,172	406,289
South Central	325,991		325,991
West Central	490,149	6,751	496,900
Badlands		25,217	25,217
Total - **The House decreased funding for inflationary increases to 6 percent per year.**	$2,454,358	$225,767	$2,680,125
8. Provides **one-time funding** for equipment over $5,000	$26,966	$28,534	$55,500

Other Sections in Bill

Transfers - Section 3 provides that the Department of Human Services may transfer appropriation authority between line items within each subdivision and between subdivisions for the 2009-11 biennium. The department is to report to the Budget Section after June 30, 2010, any transfers made in excess of $50,000 and to the Appropriations Committees of the 62nd Legislative Assembly any transfers made.

Legislative Council study - Child support enforcement - Section 5 provides for a Legislative Council study of the Department of Human Services' child support enforcement program.

Legislative Council study - Long-term care - Section 6 provides for a Legislative Council study of long-term care services in the state.

Additional federal funds - American Recovery and Reinvestment Act - Section 7 provides that if the Department of Human Services receives federal funds made available to the state from the American Recovery and Reinvestment Act or other federal ac[t] stimulate the national economy or to address state fiscal recovery in excess of the federal funding appropriated by the [L]islative Assembly, the Department of Human Services may accept the additional funding but may not spend the funding u[n]propriated by the Legislative Assembly.

Supplemental payments - Basic care and nursing home facility salary and benefit increase - Section 8 provides that funding of $14,739,128, of which $4,950,451 is from the general fund, $1,000,000 is from the health care trust fund, and $8,788,677 is from

federal funds, is appropriated in Section 1 of the bill for providing supplemental payments to basic care and skilled nursing care facilities to allow for a salary and benefit increase for each employee earning a salary that is less than the 80th percentile of the salary range at ·ch facility.

·pplemental payments - Developmental disabilities providers salary and benefit increase - Section 9 provides that funding of .8,929,151, of which $7,000,000 is from the general fund and $11,929,151 is from federal funds, is appropriated in Section 1 of the bill for providing supplemental payments to developmental disabilities providers to allow for a salary and benefit increase for each employee earning a salary that is less than the 90th percentile of the salary range of each developmental disabilities provider.

Developmental Center admissions - Section 10 amends NDCC Section 25-04-05 regarding screenings required prior to admission or readmission to the Developmental Center.

Nursing care facility - Personal needs allowance - Section 11 amends NDCC Section 50-24.5-04 to increase the personal needs allowance for individuals in basic care facilities from $60 to $75 per month.

Health care trust fund - Section 12 amends NDCC Section 50-30-02 to provide that money in the health care trust fund may not be included in draft appropriation acts under Section 54-44.1-06.

Continuing Appropriations

Child support collection and disbursement - NDCC Section 14-09-25 - Allows the department to receive child support payments and provide the funds to the custodial parent or appropriate governmental entity for those custodial parents receiving governmental assistance.

Child support improvement account - NDCC Section 50-09-15.1 - Allows the department to receive federal child support incentive funds and spend the funds in accordance with its business plan to improve the child support collection process.

Major Related Legislation

House Bill No. 1043 - This bill directs the Department of Human Services to contract for a dementia care services program in each area of the state served by a regional human service center to provide personalized care consultation services, training, and education relating to dementia; provides a $1.2 million general fund appropriation for the program; and provides for a report to the Legislative Council regarding the outcomes of the program.

House Bill No. 1044 - This bill provides that the Department of Human Services develop, within current appropriations, a program for services to transition-aged youth at risk.
