PHOTOCOPY HISTORY

Before the 2007 legislative session, the contract for operation of the bill and journal room required the contractor to provide a copier and the contractor was allowed to retain the photocopying fees. During the 2005 legislative session the contract printer printed 325 copies of bills and resolutions and 750 copies of the daily journals. During the 2005-06 interim, the bill and journal room was reduced in size and the contract printer has printed fewer copies of bills and resolutions and journals each legislative session, in reliance on bill and journal room personnel printing copies as needed through a network-connected copier provided in the room. During the 2013 legislative session, the contract printer printed 165 copies of bills and resolutions and 150 copies of daily journals. The number of bills, resolutions, and journals printed by the contract printer has been reduced significantly over the years as the information is readily available on the legislative branch website.
