

## TUITION AND STATE APPROPRIATIONS DATA

This memorandum provides information regarding higher education revenues per full-time equivalent (FTE) student. The information is derived from State Higher Education Executive Officers Association data. The following table details information regarding North Dakota higher education funding compared to national averages.

| Higher Education Revenues Per FTE Student |                 |                  |                      |                  |              |                  |
|---|-----------------|------------------|----------------------|------------------|--------------|------------------|
| Year                                      | Tuition Revenue |                  | State Appropriations |                  | Total        |                  |
|   | North Dakota    | National Average | North Dakota         | National Average | North Dakota | National Average |
| <b>2000</b>                               | \$2,950         | \$3,788          | \$6,077              | \$8,978          | \$9,027      | \$12,766         |
| North Dakota Rank                         | 36              |                  | 45                   |                  | 46           |                  |
| <b>2005</b>                               | \$5,304         | \$4,383          | \$4,912              | \$7,636          | \$10,217     | \$12,019         |
| North Dakota Rank                         | 19              |                  | 44                   |                  | 34           |                  |
| <b>2010</b>                               | \$5,899         | \$4,991          | \$6,183              | \$7,200          | \$12,082     | \$12,190         |
| North Dakota Rank                         | 18              |                  | 27                   |                  | 21           |                  |
| <b>2015</b>                               | \$6,483         | \$6,207          | \$7,529              | \$6,895          | \$14,012     | \$13,102         |
| North Dakota Rank                         | 23              |                  | 7                    |                  | 9            |                  |
| <b>2016</b>                               | \$6,624         | \$6,321          | \$7,189              | \$7,116          | \$13,813     | \$13,437         |
| North Dakota Rank                         | 24              |                  | 10                   |                  | 12           |                  |

**NOTE:** Funding amounts have been adjusted for inflation, cost of living, and other factors. Also, Illinois was not included in rankings or the national average, as higher education funding data was unavailable for the state.
