Minutes: **Chairman Keiser** opened the hearing on HB 1382.

Rep. Johnson, District 37, introduced HB 1382 which relates to the direct deposit of wages.

Processing two sets of payroll checks (manual and automated) is onerous to employers.

Transaction accounts are available that have no minimum balance required and no upfront charges to open the account. Federal government Social Security checks are already directly deposited. If senior citizens are comfortable with this, why can't employees accept direct deposit?

Rep. Ekstrom: On line 11, by removing the language, "employer may not require", are we in fact, implying that an employer may require?

Rep. Johnson: That is what we are doing here. An employer can have all his employees be paid on one system.

Chairman Keiser: Will employers still provide a pay stub or a document with appropriate information?

The micrographic images on this film are accurate reproductions of records delivered to Modern Information Systems for microfilming and were filmed in the regular course of business. The photographic process meets standards of the American National Standards Institute (ANSI) for archival microfilm. Hearing Date 1/29/03

Rep. Johnson: Most systems do print out pay stubs to be handed to the employee or mailed.

Rep. Severson: How about employees without bank accounts? My concern is that this might be inappropriate for some employees.

Rep. Grosz, District 42: This bill is business friendly and can generate tremendous savings because of the reduction of manually administering payroll computations. Employees are paid sooner. Pay stubs don't require signatures, that's a further administrative cost savings.

For those people who need pay stubs for verifying information for social services etc, another statute under the aegis of the Labor Commissioner handles that. I don't know if this impacts agricultural employers.

Rep. Zaiser: What are the ramifications for employees who don't do banks?

Rep. Grosz: I guess they'd be forced to get an account if they want to be paid for their labor.

Jeff Swank, Vice-president, TMI Systems Design Corp. of Dickinson, appeared to testify in support of HB 1382. (See Attachment #1) We are not forcing employers to choose to use this. The single process can be beneficial for certain businesses.

Chairman Kelser: Does TMI or anybody else you know use an incentive to encourage employers to use direct deposit? Say \$10 a month or something?

Swank: 90% of our employees use direct deposit, we only do 6 manual payroll checks every other weeks. The systems generate detailed pay stubs for the direct deposits.

Brian McClure, Human Resources Manager, Midwest Coca Cola, testified in support of HB 1382. Our payroll department is located in Florida. Pay stubs are available either by mail or e-mail. We can also get our W-2 forms via the Internet.

Hearing Date 1/29/03

Dale Anderson, President of GNDA, appeared to enthusiastically testify in support of HB 1382.

Direct deposit is safe, convenient, confidential, fast and it saves money.

Steve Spilde, CEO of the ND Insurance Reserve Fund, appeared to testify in support of HB 1382. (See Attachment # 2) Direct deposit saves administrative staff time and energy if a business requires countersignatures. Employers have to make the call whether an employee who resists being paid electronically is worth keeping on staff if that employee impairs the employer's option to utilize direct deposit.

John Risch, representing United Transportation Union, appeared to testify in opposition to HB 1382. He stated that this allows employers to force employees to have direct deposit. Itinerant employees will be negatively impacted.

Rep. Ekstrom spoke on her concerns regarding garnishment of wages and how that might be impacted or handled with direct deposit.

Mark Bachmeler, Commissioner of Labor, took the podium to answer questions.

Rep. Zaiser: what options are available to employees who don't want direct deposit? What ramifications could come about if an employee doesn't opt to have direct deposit for his pay? Could an employee be dismissed?

Bachmeler: Under current law there is a degree of discretion on the part of the individual worker as to the form or manner of payment they receive for their labor. This legislation allows an employer to compel his employees to accept a certain mode of payment. What options available to an employee at that point would be at the discretion of the employer. And yes, in North Dakota, an employee could be dismissed, as employment in ND is at will. It would depend on how valuable that employee was to his employer.

Hearing Date 1/29/03

Rep. Ekstrom: How would wage disputes be handled?

Bachmeier: There might be better records of payments because the transaction is direct as opposed to whether a person received a check through the mail etc. There is availability of evidence here. Whether it's a direct deposit or a paper check the pay stub or pay voucher requirement exists.

Rep. Ruby: Do you foresee an increase of complaints filed with your office if this legislation passes?

Bachmeier: Potentially. This issue already comes to my office several times a month. Not a lot of formal disputes, but clarification of issues and inquiries. At present, employers can't compel, if someone wants a paper check, you have to pay them that way. Certain employers could take advantage until statutory change.

Rep. Thorpe: Are there federal guidelines available pertaining to this?

Bachmeier: I don't believe so.

Rep. Nottestad: What about young people under the age of 18? This would require minors to have checking account.

Bachmeier: I believe that an employer could compel of a minor employee as well as adult employees.

Rep. Kasper: Could a direct deposit be defined as or be required to, for those employees who don't like a direct deposit going into a bank account, a wire transfer or money order or cashier check?

Bachmeier: That might meet the current law of not requiring direct deposit.

Rep. Zaiser: Do any other states have equivalent legislation?

The micrographic images on this film are accurate reproductions of records delivered to Modern Information Systems for microfilming and were filmed in the regular course of business. Hearing Date 1/29/03

Bachmeier: I don't have a good sense of how many states have laws like our current statutes or how many have laws compelling direct deposit. Some employers who have employees in other states have inquired if they can compel here.

Chairman Keiser: Do you think there is choice and accountability in this?

There isn't anything legally could prevent an employer from passing along additional costs except possibly the employee's morale and the relationship between employees and their employer. I'd rather see an incentive offer to accept direct deposit rather than punitive action for not concurring. Just getting paid sooner is an incentive.

As no one else was present to testify either in support or opposition to HB 1382, the hearing was closed.

Chairman Keiser called for committee work on HB 1382. **Rep. Klein** moved a Do Pass. **Rep.**

Johnson seconded the motion.

Rep. Severson: the only concern I have is that last line that takes away the option from employees who may want a paper check in their hand.

Rep. Thorpe: I'm going to oppose this bill. The concept is great but I'm from the old school. Do all the employees have to go to the same bank?

Chairman Keiser: No, there's a lot of leeway here for the employee. This sure solves the dilemma of what do you when you go on vacation!

Rep. Johnson: The employee has the option of choosing which financial institution the funds are directed to.

Rep. Kasper: Is my suggestion about wire transfers a no go?

Minutes:

Senator Mutch opens HB 1382. Senators Krebsbach, Every, and Heitkamp are absent.

Representative Nancy Johnson, sponsor of the bill (Testimony attached)

Senator Klein: The employee still gets a stub?

Johnson: Yes, there still is a form that the employee gets.

Dean Rummel, President TMI Systems Design Corporation, (Testimony attached)

Senator Klein: We are one of the only state's that does not allow this?

Rummel: Yes, a number of state's already allow the employer to make the decisions, I think as a matter of fact we are the only one that does not.

Representative Mike Grosz: This would save a lot of money for the State Department in processing payroll checks for the State employees.

Dana Bonn: ITD, We would like to see this on the technology of every place else. Please give it a Do Pass.

Dale Anderson, Greater North Dakota Association, President. In support of this bill.

It is put into record that Brian McClure sent his support from Coca Cola also.

Jon Reich: I personally support direct deposit but some of our members are against this. Some people don't have a bank account and this would force employees to get one. For example teenagers that are working for companies don't usually have bank accounts. Also, so people don't want their significant other to know what they are getting paid and don't want their checks direct deposited.

Senator Klein: With your group maybe that could be a corporation policy and not a state policy. I think this bill is looking at major corporations.

Senator Espegard: the majority of members don't want direct deposit. You don't know what that is?

Reich: Some people don't have accounts

Senator Espegard: They could just get a pass book account there.

Dave Kemnitz, President AFLCIO, in opposition. The question is choice not mandate. You sometimes have to pay a fee for withdrawals of ATM's.

Many companies have seasonal out of state employees that wouldn't have bank accounts also. Technology makes it easier for everybody not a road block for some.

Senator Espegard: You bring a payroll check in and you don't have an account there you get charged to cash it don't you?

Kemnitz: The grocery store doesn't charge you though.

Senator Klein: Federal checks are all direct deposited, how about unemployment.

Kemnitz: I don't know.

Testimony of Jeff Swank

TMI Systems Design Corporation Vice President

on HB 1382

January 29, 2003

Mr. Chairman and members of the House Industry, Business and Labor Committee:

My name is Jeff Swank and I am a Vice President at TMI Systems Design Corporation in Dickinson. It is a pleasure to be here today to testify in support of HB 1382.

Direct deposit has joined the ranks of cash, check and credit cards as acceptable forms of payment. The Social Security Administration requires the direct deposit for all retirement benefits. For over a year now, with mutual agreement with the Carpenter's Union, which represents our factory employees, TMI has used direct deposit to send the union dues each month. We have ninety-five percent of our employees currently using direct deposit. TMI does not limit the number of accounts or financial institutions an employee can use. My personal bank provides services that allow me to use direct deposit to pay my bills. My father, who is now semi-retired recalls the time that he was paid in cash, and as a store manager for Wards, paid his employees in cash. He told me that when the payroll was changed from cash to checks, he had a few that resisted and felt that the check was not going to work, change is difficult. When he received his first social security payment, it was via a paper check, and they needed to be home in order to deposit it. In 1998, after the SSA mandated the use of direct deposit, he saw the benefits of direct deposit and now has his pay from a part-time job deposited directly to his account. He concluded our conversation saying "I don't know why I did not use this years ago." It is time that the ND Century Code be updated to accept direct deposit as equal with cash and checks when businesses are paying their employees.

According to a study by NACHA (National Automatic Clearinghouse Association) the total direct and indirect cost to consumers of depositing a paper check instead of using direct deposit can exceed five dollars. The same study stated that "direct deposit can save you up to three work days per year by not having to go to the bank to deposit checks." The Federal Reserve estimates that society saves about \$1.62 per ACH transaction versus paper checks. In 2000 the US saved about \$8.4 billion using ACH. The cost of processing a paper check is

significantly higher than the cost of a direct deposit transaction, the convenience to the employee is greater with direct deposit. North Dakotans will benefit from the passage of this bill.

On the website, www.directdeposit.org I found the following "Top 10 Quick Facts about Direct Deposit"

1. Direct Deposit is the electronic transfer of a payment from a company or organization into an individual's checking or savings account.
2. Direct Deposit is a smart way to get paid. It is ideal for more than just payroll, including expense reimbursements, tax refunds, pensions, dividends and bonuses.
3. The benefits of Direct Deposit to both consumers and companies are numerous. This is why more than 80 percent of large companies (100+ employees) offer Direct Deposit, and it has become a staple in today's employee benefit packages.
4. Direct Deposit is safe, confidential, convenient and fast. Typically, employees who use Direct Deposit receive their pay in their bank accounts the evening before payday. For income tax refunds, the government often makes refunds via Direct Deposit within days of receiving returns. And there is no waiting for checks to clear.
5. Problems with Direct Deposit are very rare. The chance of having a problem with a check is 20 times greater than with Direct Deposit. And if a problem ever does occur, it is easy for a company to rectify. Consumers usually need only make a call to their company or financial institution.
6. Ninety-seven percent of those who use Direct Deposit are very satisfied with it.
7. Seventy-one percent of employees who have Direct Deposit available use it.
8. Companies can save up to \$1.25 per payment by using Direct Deposit instead of checks.
9. A company of any size can offer Direct Deposit to its employees. Many payroll software packages, as well as independent processors, provide a Direct Deposit formatting feature. There are also a number of reasonably priced PC software packages in the marketplace today.
10. Your financial institution is a great resource for more information on setting up and using Direct Deposit. Many financial institutions also offer free checking or reduced account fees to consumers who use Direct Deposit. Check with your financial institution to find out its policies.

I have included several pages from the Internet describing the ACH options available to business of all sizes. Also I included the web pages from the banks in Dickinson; each one offers an electronic bill payment process. HB 1382 is good for business, good for employees and good for North Dakota.

I thank you for your time, and strongly encourage you to support HB 1382.

Welcome to PayByCheck!

The leading provider of electronic check processing.

PayByCheck allows for the payment of goods and services by check over the Internet, fax, or **telephone** with real-time biometric authentication, validation and verification. For call-centers, order fulfillment companies, and other high-volumes clients, ITI can accept batch files (from legacy systems, csv, etc.) and process them as pre-authorized drafts or ACH settlements per NACHA rules.

Only the PayByCheck system includes fraud scrubbing, multiple negative and positive databases, our proprietary address verification system (**AVS**) and native support for real-time biometric authentication. PayByCheck systems meet all Federal Regulations and NACHA banking and security rules.

PayByCheck uses your existing FDIC insured bank account and banking relationships. We do not require that your customers register with us before they can pay you. We do not limit what products or services you can sell or the dollar amounts that you can charge. We charge a monthly fee and a low **flat fee** per transaction, not a percentage of your sale.

PayByCheck offers Electronic Check Processing (ECP) or Paper Drafts depending on your needs. ECP transactions are settled through the ACH network according to NACHA banking regulations. Paper Drafts are printed each day and sent to you via first class mail.

We offer two account types: **Basic** (for the small to medium-sized business) and **Professional** (designed for medium to large sized businesses). Both account types include access to our utilities portal where you can monitor, query and maintain your account in real-time.

The standard check interface is hosted on our secure servers. PayByCheck can also be seamlessly integrated into your current forms, templates, or web site by using our Information Service Manager (ISM) which uses an encrypted secure socket connection.

PayByCheck pioneered the Internet check industry and has been continuously processing real-time transactions since 1997. With thousands of merchants using our services we have the only proven platform that can securely, accurately, and reliably handle the volume of traffic that today's commercial sites generate.

Electronic Checks, Anytime-Anyplace-Anywhere

Web to Cash™ is a browser-based application developed by Ventanex, Ltd., a participating member of NACHA, that allows users to enter and track ACH transactions using a web browser and an Internet connection. With Web to Cash, companies can collect funds from customers and send money to vendors.

Standard benefits include:

- ▣ Faster check processing
- ▣ Reduced bank fees
- ▣ Reduced reconciliation costs
- ▣ Improved check recovery
- ▣ NSF checks discovered faster
- ▣ Electronic deposits. No more trips to the bank

▣ Animated ACH Demonstration

Advanced benefits include:

- ▣ Comprehensive, real-time, web-based reporting
- ▣ Lockbox/check scanning with image storage and retrieval
- ▣ Exception item and rules based return processing
- ▣ Cash management - supports multiple ACH payment origin types

▣ Benefits of Web to

Find out how Web to Cash can help your company

▣ Scan Checks

Check conversion storage

▣ Risk Assessment

Reduce your company's exposure to fraud and NSF checks.

BATCH PROCESS...
If your company already accepts online ACH payments, creates ACH items in a MOTO department, or converts paper checks in a lockbox environment to electronic files, ACH Direct can accept and process your batch ACH files via FTP transfer.

DIRECTBilling

Provides direct Customer Billing for your services and products on a scheduled basis. ACH debits the customer's account for the correct amount, transferring the funds in an immediate fashion to your account. This is a PC based software solution.

PAYMENTS GATEWAY PRODUCTS

VIRTUALTerminal

Our Next Generation web-based virtual terminal enables businesses and merchants to process both checks and credit cards from any computer in a secure, reliable, and cost effective fashion.

ON-LINE Check

Both small businesses and corporate A/P departments want to automate their purchasing. Also, consumers want other online payment options besides credit cards. The solution is ACH Direct's real-time, secure Internet checks, processed through the nation's Automated Clearing House (ACH) system.

SOFTTerm

Is a Windows based application that provides companies lightning fast transaction credit card processing capabilities through a secure Internet connection (SSL v3.0). By using a constant connection through the Internet, Soft Terminal is able to provide you lightning fast authorizations that could only previously be obtained by using expensive dedicated leased lines.

DIRECTRecovery

Electronic Check Recovery (RCK) is rapidly becoming the method of choice for bounced check recovery for virtually every company that accepts paper checks for payment.

We have two types of RCK service. Our Service Bureau program is perfect for merchant who wish to out-source the hassle of dealing with returned

checks. Our Internal RCK program is for merchants who have a significant volume of NSF checks and wish to process and recover funds "in-house", via RCK. To offer a complete collection program we also provide Traditional and Attorney assisted collection through one of the oldest and most respected collection agencies in the nation at NO charge. This is a first in the industry.

NSF checks received by you or your bank are sent to us for inclusion in our recovery database. Through ACH's automated inquiry systems, when ACH determines that the account against which the NSF check was drawn contains adequate funds, ACH debits the account for the full amount plus a transaction fee. ACH then transfers the check face amount to your account on an immediate basis. The transaction fee is retained by ACH.

VERIFICATION SERVICES

DIRECTVerify

Verify your customers and account numbers before you accept that check. ACH Direct's payments processing solution queries a database of 'known' bad check originators to safeguard your acceptance. Fast and immediate.

ATMVerify

This comprehensive service offers an ATM Network query on any personal check to certify the actual account and funds availability ensuring in the most secure terms, payment as offered.

TRANSPORTER

is an application tool appealing to the user or developer that requires an easy automation of batch file transfers. This allows the user to simply save or move batch transaction data into a file on their computer that has been configured to automatically send it for batch payment processing on preconfigured dates and times.

CREDIT CARD SERVICES

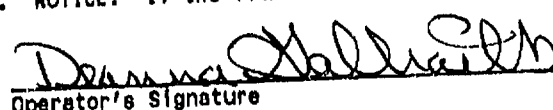

Cost-effective eCommerce payment options enables businesses to securely accept payments online and at the same time help increase business efficiencies. ACH Direct provides any business with the ability to accept Credit Cards online or at Point-of-Sale. Fast verification is a valuable tool of this efficient payments solution.

HOUSE BILL NO. 1382
HOUSE INDUSTRY, BUSINESS AND LABOR COMMITTEE
Testimony of Steve Spilde
January 29, 2003

Chairman Keiser and members of the House Industry, Business and Labor Committee, my name is Steve Spilde and I am the Chief Executive Officer of the North Dakota Insurance Reserve Fund.

I appear before the Committee today in support of House Bill 1382 and urge a "Do-Pass" recommendation.

Payroll direct deposit has been a successful and popular method of distributing employee compensation for our firm. Employees have a great deal of flexibility in choosing the institutions and accounts in which wages are deposited – indeed, all the flexibility anyone has requested.

The lone drawback to this method of distributing employee compensation, from our perspective, has been the necessity of maintaining a duplicate payroll distribution system so that nonparticipating employees (in our case, one person) can be issued a paper payroll check. House Bill 1382 removes that additional time and expense and is a step in the right direction – forward.

I would be pleased to respond to any questions Committee members may have.

Thank you.

HB 1382
Senate Industry, Business and Labor Committee
March 10, 2003

Chairman Mutch and members of the Senate Industry, Business and Labor Committee.
My name is Nancy Johnson, Representative from District 37, Dickinson.

I introduced this bill at the request of a business in Dickinson. It is a bill this committee has seen before. The problem HB 1382 tries to resolve is the requiring of a business to provide multiple systems for payroll. In the business that requested this legislation, payroll has to be run twice and a special check-writing machine used to provide the paper check, which the employee then takes to a bank to cash or deposit. This bill is enabling legislation and does not require any employer to change current practice.

Since the last time this bill was here, we've seen many more people accept using direct deposit. We all know the convenience and safety it offers. Some of us probably even use the Internet to do our banking.

I have visited with a couple of financial institutions in Dickinson to see if this would put an undue burden on an employee. I was able to find that there are transaction accounts available that have no charge to open and no minimum balance required. It would require the employee to go to the financial institution. However, he/she would have had to physically go there anyway to cash or deposit a paycheck so it does not add any extra trips

Almost all of the federal government's Social Security checks are now direct deposited. Senior citizens are able to handle having direct deposit and find security in knowing the money is in their account on a certain day and not lost or stolen from a mailbox. If the weather is nasty, they don't have to worry about getting to the bank. The money is already there.

With today's computer programs, the employee can request multiple places for his/her pay to go. It can be used for mortgage payments, rent, utilities, etc. It is less costly for the employer to send the money in an employee's pay to several places than it is to run the payroll twice.

The micrographic images on this film are accurate reproductions of records delivered to Modern Information Systems for microfilming and were filmed in the regular course of business. The photographic process meets standards of the American National Standards Institute (ANSI) for archival microfilm. NOTICE: If the filmed image above is less legible than this Notice, it is due to the quality of the document being filmed.

Dan Mutch
Operator's Signature

10/3/03
Date

The two most common reasons I heard for not wanting direct deposit are first to be able to hide the amount you make from your spouse and second, perhaps not being on good terms with your banker. With direct deposit you could put your pay into a different account at a different institution if you really want to hide it.

In discussion in the House IB&L committee, one of our members shared working payroll when the company went from a cash payroll to check. The employees then resisted the unknown change. This is similar except many, many employees today do receive their pay through direct deposit.

Chairman Mutch and Senators, I encourage you to give this bill a do pass recommendation and relieve a bit of the burden from employers without harming any employees. I also have others here who wish to testify. Thank you. I would be happy to respond to questions.

The micrographic images on this film are accurate reproductions of records delivered to Modern Information Systems for microfilming and were filmed in the regular course of business. Testimony of Dean Rummel, President

TMI Systems Design Corporation

On ~~February 10, 2003~~

March 10, 2003

Mr. Chairman and members of the Senate Industry, Business and Labor Committee:

My name is Dean Rummel and I am President of TMI Systems Design Corporation in Dickinson. It is a pleasure to be here today to testify in support of HB 1382.

Direct deposit is an option that is equal to or better than a payroll check. Those employers who have the option of direct deposit should be permitted to make payment in that manner.

Examples of how direct deposit is presently used include:

- The Social Security Administration requires all retirement benefits be direct deposited.
- TMI has direct deposited union dues to the Carpenter's Union each month for the past year. Direct deposit was mutually agreed upon by both the Union and TMI for convenience and for consistency.
- Many businesses direct deposit Federal Withholding and Social Security Taxes according to deposit rules.

At TMI we have ninety-five percent of our employees currently using direct deposit. TMI does not limit the number of accounts or financial institutions an employee can use. If you would like to see an example of a direct deposit summary I have several examples with me for your review. All the personal information has been removed from the actual payroll summaries.

According to a study by NACHA (National Automatic Clearinghouse Association) the total direct and indirect cost to consumers of depositing a paper check instead of using direct deposit can exceed five dollars. The same study stated that "direct deposit can save you up to three work days per year by not having to go to the bank to deposit checks." The Federal Reserve estimates that society saves about \$1.62 per ACH transaction versus paper checks. In 2000 the U.S. saved about \$8.4 billion using ACH. The cost of processing a paper check is significantly higher than the cost of a direct deposit transaction, the convenience to the employee is greater with direct deposit. North Dakotans will benefit from the passage of this bill.

On the website, www.directdeposit.org I found the following "Top 10 Quick Facts about Direct Deposit"

1. Direct Deposit is the electronic transfer of a payment from a company or organization into an individual's checking or savings account.
2. Direct Deposit is a smart way to get paid. It is ideal for more than just payroll, including expense reimbursements, tax refunds, pensions, dividends and bonuses.

TMI Systems Design Corp. Page 1

The micrographic images on this film are accurate reproductions of records delivered to Modern Information Systems for microfilming and were filmed in the regular course of business. NOTICE: If the filmed image above is less legible than this Notice, it is due to the quality of the document being filmed.

Dean Rummel
Operator's Signature

10/3/03
Date

3. The benefits of Direct Deposit to both consumers and companies are numerous. This is why more than 80 percent of large companies (100+ employees) offer Direct Deposit, and it has become a staple in today's employee benefit packages.
4. Direct Deposit is safe, confidential, convenient and fast. Typically, employees who use Direct Deposit receive their pay in their bank accounts the evening before payday. For income tax refunds, the government often makes refunds via Direct Deposit within days of receiving returns. And there is no waiting for checks to clear.
5. Problems with Direct Deposit are very rare. The chance of having a problem with a check is 20 times greater than with Direct Deposit. And if a problem ever does occur, it is easy for a company to rectify. Consumers usually need only make a call to their company or financial institution.
6. Ninety-seven percent of those who use Direct Deposit are very satisfied with it.
7. Seventy-one percent of employees who have Direct Deposit available use it.
8. Companies can save up to \$1.25 per payment by using Direct Deposit instead of checks.
9. A company of any size can offer Direct Deposit to its employees. Many payroll software packages, as well as independent processors, provide a Direct Deposit formatting feature. There are also a number of reasonably priced PC software packages in the marketplace today.
10. Your financial institution is a great resource for more information on setting up and using Direct Deposit. Many financial institutions also offer free checking or reduced account fees to consumers who use Direct Deposit. Check with your financial institution to find out its policies.

HB 1382 is good for business, good for employees and good for North Dakota. I thank you for your time, and strongly encourage you to support HB 1382.

FROM: CAROL TWO EAGLE

RE: HB1382

Chairman Natch & members of the Committee, for the record, my name is Carol Two Eagles. I wish to speak in opposition to HB1382. Whoever earns a check has the ultimate - indeed the only - right to say where it goes. If the check-earner does not wish to have a bank account, for whatever reason, that is her or his right - not privilege. Stalkers, for example, are not always street thugs. I have one - who is a policeman. I do not bank, as a result. I turned him in for theft, he openly threatened to kill me, he has tried 6 times (I've been lucky 6 times. But the law of averages is against me, you know.) And but I heard, he still was an officer. Even if he isn't, he still has connections. My situation is not unique.

Please Do Not Pass HB1382 -
Thank you for hearing me in a good way now.

Turned in
