2. Narrative: *Identify the aspects of the measure which cause fiscal impact and include any comments relevant to your analysis.*

This bill was studied during the interim and the actuary determined that the cost of the bill was .07% of payroll for the retirement plan to provide this benefit. Since the PERS fund has no margins to support benefit improvements new enhancements should be supported by an increase in employer contributions. This means to support this improvement the employer contribution for all participating employes should be increased from 4.12% to 4.19%. Secondly, the Mill & Elevator will need additional appropriation authority to pay the additional retirement contributions for the overtime. Lastly the bill provides an appropriation to PERS to make some administrative changes to implement the bill.

3. State fiscal effect detail: *For information shown under state fiscal effect in 1A, please:*

A. Revenues: *Explain the revenue amounts. Provide detail, when appropriate, for each revenue type and fund affected and any amounts included in the executive budget.*

B. Expenditures: *Explain the expenditure amounts. Provide detail, when appropriate, for each agency, line item, and fund affected and the number of FTE positions affected.*

The expenditures are for the additional retirement contributions by the Mill & Elevator (\$205,000), the additional retirement employer contribution for state employers (\$164,800 in general funds and \$242,800 in other funds) and \$7,300 is included for PERS administrative changes.

C. Appropriations: *Explain the appropriation amounts. Provide detail, when appropriate, of the effect on the biennial appropriation for each agency and fund affected and any amounts included in the executive budget. Indicate the relationship between the amounts shown for expenditures and appropriations.*

2. Narrative: *Identify the aspects of the measure which cause fiscal impact and include any comments relevant to your analysis.*

The PSA and fecal occult blood test screenings are already covered by the NDPERS benefit, so would not have an added cost to NDPERS.

The additional cost to NDPERS to cover the flexible sigmoidoscopy, colonoscopy, and double contrast barium enema as screenings is estimated at \$3.20 per contract per month (spread over ALL contracts) for the 7-03/6-05 biennium. This assumes that the colonoscopy would be allowed once every 10 years, beginning at age 50, as recommended by the AMA. The flexible sigmoidoscopy and double contrast barium enema would be allowed once every 5 years, beginning at age 50, as recommended by the AMA.
