### **P-16 Collaboration in the States**

Updated June 2006

Policymakers in the states are increasingly looking for ways to raise student achievement in kindergarten through high school, and improve college access and success. To do this, states and local communities are trying to create an integrated system of education in which all levels of education – pre-kindergarten through college – coordinate, communicate and educate as one system instead of several. These efforts have been named most commonly K-16, P-16 and P-20.

Although K-16, P-16 and P-20 are similar in nature, there are notable differences:

- A K-16 system integrates a student's education from kindergarten through a four-year college degree.
- A P-16 system integrates a student's education beginning in preschool (as early as 3-years-old), and ends with a four-year college degree.
- A P-20 system expands the P-16 system to include graduate school education.

Regardless of the type of system a state or local community chooses, it is important to note that the goal is the same: to create system of education which begins in early childhood and ends after college that promotes access, standards, accountability and life-long learning. Other common goals include smoothing the transition from high school to college, improving teaching quality, reducing remediation and raising student achievement across all educational levels. While there is a great deal of interest in P-16 in the states, funding remains an issue. Though some P-16 councils (Georgia, Maryland and Wisconsin) have sustained funding and dedicated staff, most do not. This lack of funding can limit the impact of a P-16 council and impede policy change.

Currently, 30 states are engaged in some kind of P-16 activity. While one state, Florida, enacted a governance change, most states have taken an incremental approach to implementing a P-16 system. Five states (Florida, Indiana, North Carolina, Ohio and Texas) have passed legislation to establish a P-16 council or initiative, but most are formed voluntarily or through executive order. A sixth state, Delaware, created its P-16 council through executive order, then enacted legislation to codify it into law. Most P-16 councils have business and community involvement. This is an important component as states increasingly seek to link education to economic development. While there are many K-16/P-16/P-20 efforts at the local level – such as the El Paso Collaborative for Academic Excellence in Texas or the Stark County P-16 Compact in Ohio – the purpose of this note is to highlight state efforts.

## KEY

**Program Information:** Was the P-16 initiative/council created by legislation, executive order or an agency? Who participates?

**Start Date:** When did the initiative/council begin?

**Type of System:** K-16, P-16 or P-20?

**Funding:** Federal, state or private?

**Goals:** What is the primary mission of the P-16 council/initiative?

**Early Learning Component:** Is there an explicit early learning focus to the work of the P-16 council/initiative?

**High School/Postsecondary Alignment Component:** Is there a high school-to-college alignment plan?

**Local councils/community outreach/business involvement component:** Does the state have local P-16 councils? Are business or community leaders involved in the work of the council/initiative?

**Progress:** What progress, if any, has been made?

State	Program Information	Start date	Type of system	Funding	Goals	Early learning component	High school /post-secondary alignment component	Local councils/ community outreach/ business involvement component	Progress
<b>Arizona</b>  The Governor's P-20 Council  <a href="http://www.governor.state.az.us/P20/">http://www.governor.state.az.us/P20/</a>	Executive Order Representation includes the governor, members of the legislature, the superintendent of public instruction, three college presidents, representatives from community colleges and the Board of Regents, as well as parent, community and business groups.	2005	P-20	No	Alignment of high school, college and work expectations to meet industry-specific skill sets; strengthening high school and postsecondary accountability systems; improving elementary and middle school standards, especially in the areas of math and science.	No	In process of developing policies.	Yes P-16 Council includes parent, business and community groups, as well as tribal and student representation.	Recently started publishing a P-16 newsletter, <i>CONTINUUM</i> , which will be published quarterly and provide updates on the Council's activities.  <a href="http://www.governor.state.az.us/P20/documents/041106_PDFP-20TheContinuum.pdf">http://www.governor.state.az.us/P20/documents/041106_PDFP-20TheContinuum.pdf</a>
<b>Arkansas</b>  The Arkansas P-16 Partnership	Agency initiated Partnership formed by the University of Central Arkansas, the Department of Workforce Education and the Arkansas	2003	P-16	Yes Arkansas Department of Education administers a federal "Teacher Quality	Improve student achievement and teaching quality in the state.	No	No	Yes P-16 Partnership brings state agencies and schools together with business groups in the state.	In the process of developing a five-year strategic P-16 plan for the state.

<b>Virginia</b>  Virginia's P-16 Council  <a href="http://www.education.virginia.gov/Initiatives/P-16Council/index.cfm">http://www.education.virginia.gov/Initiatives/P-16Council/index.cfm</a>	Executive Order  The Council consists of 19 members and is chaired by the Secretary of Education. Other members include representatives from the House and the Senate, as well as the Superintendent of Public Instruction, the Director of the State Council on Higher Education, the Chancellor of the Community College System, the President of the Board of Education and eight citizen members.	2005	P-16	Yes  A blend of federal, private and state funds will finance the Council's work. Estimated direct costs for the work of the Council are \$15,000.	Coordinate and serve as an oversight committee for education reform efforts, preschool through college; improve transitions from one level of education to the next; develop data systems that provide student information at all levels of education.	No	Yes  In process of developing policies.	Yes  There is business representation on the Council.	In the process of developing policies.
<b>Washington</b>  Advisory Council: <a href="http://www.hecb.wa.gov/about/advisory/advisoryindex.asp">http://www.hecb.wa.gov/about/advisory/advisoryindex.asp</a>  P-16 Research Page: <a href="http://www.hecb.wa.gov/research/issues/p16.asp">http://www.hecb.wa.gov/research/issues/p16.asp</a>	Agency Initiated  An Advisory Council includes members from K-12 and higher education and was established to help the Washington Higher Education Coordinating Board carry out its statutory duties. Members serve two year terms.  Washington also recently passed	2003	K-16	No	Increase access to postsecondary education to improve economic opportunities in the state; align early learning and kindergarten.	Yes  H.B. 2964 created the "Department of Early Learning" to improve linkages and smooth transitions between early learning and K-12 programs.	Yes  H.B. 2817 established state objectives for improving college access and degree completion in high demand fields, such as engineering, science and math.	Yes  Outreach efforts are part of the design of the Department of Early Learning.	The Higher Education Coordinating Board developed a strategic plan for higher education in the state that includes collaboration with K-12 and the workforce. The Legislature has also passed several bills related to early learning and student transitions.
