Hearing Date: 1/14/09

Recorder Job Number: 6949, 6951

Committee Clerk Signature

Minutes:

Chairman DeKrey: We will open the hearing on HB 1144.

Jennifer Witham, Director, Information Technology Services of Dept. of Human

Services: Sponsor (attachment).

Rep. Delmore: Who has access to this information.

Jennifer Witham: It is important to understand that this bill is only clarifying what already exists in Century Code. So if you look on line 12, it is saying that information is used in the administration of any such program. We are bound by our internal policies, by federal policies; this is only clarifying that we're now implementing an information system that allows for increased capability for better case management purposes, in the electronic areas. It doesn't change anything that exists now in the law.

Chairman DeKrey: Thank you. Further testimony in support. Testimony in opposition. We will close the hearing. What are the committee wishes in regard to HB 1144.

Rep. Delmore: I move a Do Pass.

Rep. Wolf: Second.

Hearing Date: 2/18/09

Recorder Job Number: 9653

Committee Clerk Signature

Minutes: **Senator Nething, Chairman**

Relating to confidentiality of information contained in records.

Jennifer Witham – Director of Information Technology Services of Dept. of Human Services

See written testimony.

Senator Nelson – Could you tell us something about the Master Client Index.?

Witham – Replies, it is a matching program where you have information about individuals that are involved in different programs they serve. They are contained in different applications and different data stores. If they look across different data stores it does a probability match based on some of their demographic information. They can do better cross program analysis. If they are registering a new client they can check to see if this is duplicating an existing client.

Senator Nething – This bill simply keeps that information confidential.

Witham – Said the language being proposed is only for clarification. The language that exists says there is a confidentiality requirement except for in the case of administering the programs. We're asking for a change in the language so it's clear and doesn't cause confusion as we're trying to implement the master client index.

Senator Nelson – Asks if it would be better to be exempt rather than confidential.

Senator Nething – In order to administer the program the sharing of that information and cross programs may be necessary for the administration of that program. So it wouldn't be increasing any exposure. Just creates a more mechanized ability to do that matching across the program.

Senator Olafson – States, the information is confidential except within the department as is necessary to administrate the programs you're administrating. No one on the outside can get that information.

Senator Schneider – This would provide confidentiality of records unless prohibited by Federal Law. Is there a particular Federal Law your concerned about?

Witham – This language does not change anything we're doing today. And it is demographic information not the whole record.

2009 TESTIMONY

HB 1144

*Same given
to Senate.*

Testimony
House Bill 1144 – Department of Human Services
House Judiciary Committee
Representative DeKrey, Chairman
January 14, 2009

Chairman DeKrey, members of the House Judiciary Committee, I am Jennifer Witham, Director of Information Technology Services of the Department of Human Services. I am here today to provide information on the change proposed to section 50-06-15 of the North Dakota Century Code, relating to information confidentiality.

The proposed North Dakota Century Code change regarding information confidentiality arose during the current implementation of the Master Client Index project. The Master Client Index stores client demographic information and resolves client identities across multiple data sources. Sharing client demographic information aids in the resolution of identities that will decrease duplicate case creation and aid in case management and client service. This technology will be used by Department of Human Services programs, including the Decision Support Services (research) team, and other state agencies.

This clarification to the Century Code would ensure appropriate use of client demographic information for participating programs and agencies contained in the Master Client Index.

This concludes my testimony. I would be happy to answer any questions.
