¹ E-learning categories are listed in more detail on Table 9A.

² Reflects enrollment in each distance education delivery method. If for example a student is taking both a correspondence course and an e-learning course, this same student would be reported twice in the duplicated enrollment total.

³ Reflects unduplicated headcount enrollment for total distance education. If for example a student is taking both a correspondence and e-learning course, this student would be counted only once in the unduplicated distance education total.

⁴ This is a conservative count of students known to be counted only once by a campus or the system for the system total. The actual unduplicated counts are probably higher for campuses with students with insufficient identification information. If for example, a student that is taking a correspondence course and a face to face on campus course, they would be counted only once when sufficient identification information is provided.

⁵ Enrollments are unduplicated at campus level but are duplicated at system level. Thus, a student who is taking courses simultaneously at two different campuses would be included in the NDUS total

¹ Collaborative: A student who enrolls in a course at a NDUS institution other than their home institution.

² Dual Credit: A high school student who enrolls in college classes and also earns high school credits (≥ 12 credit hours).

³ First-time freshmen: A student attending any institution full-time for the first time (IPEDS cohort).

⁴ Transfer: A student entering the reporting institution for the first time but known to have previously attended a postsecondary institution at the same level (e.g. undergraduate, graduates). The student may transfer with or without credit.

⁵ Beginning freshmen: A student attending any institution full-time or part-time for the first time.
