Taxation Committee Thursday, May 6, 2010

Provided by: Linda Svihovec, McKenzie County Treasurer

Chairman Cook and Committee Members, I am here to provide a brief and hopefully simple explanation of the Oil & Gas production tax distribution formula that was established under HB1304 in the last session and specifically show how those funds are distributed to counties, cities, schools, and when funds are distributed to an Infrastructure Fund for allocation to townships within the county and to schools for buses. Distributions to counties are based on the state's fiscal year and each July the distribution formula cycle starts over again. The first distribution of the fiscal year is based on July production, reported to the state in August and paid to cities and counties in September.

The oil and gas production tax is distributed the same in all counties other than an allowance for schools based on county population. The additional school allowance was intended to keep schools at the same funding level as under the old formula prior to HB1304. Cities are capped at \$750 per capita and once that limit is reached, the city's allocation under the formula stays with the county in its General Fund. Cities receive their portion of the tax directly from the state and the remaining tax is paid to the county for further distribution to schools and the infrastructure fund. A portion of the Infrastructure Fund is additionally distributed by the county to the General Fund and to Cities.

Under the HB1304 distribution formula, counties begin allocating a portion of their oil and gas production tax to an established Infrastructure Fund after the first \$1,000,000 of tax is distributed.

See Handouts A, B & C: Sample distributions for each of the three population levels: less than 3000; 3000-6000; and over 6000 - with additional allowances of \$490,000, \$560,000 and \$625,000 respectively.

Handouts D, E, F, G & H: McKenzie County's Oil & Gas Production Tax distributions for the months of September – December 2009 (the first 4 months of payments for the current fiscal year).

Handout I: McKenzie County's FY10 Year to Date distribution allocations. Note the various maximums that have to be tracked under the existing formula i.e. Schools \$1.435 Million; Cities \$1,317,750; County \$5.35 Million; State/County \$18 Million.

There are currently 18 counties and the Three Affilliated Tribes receiving oil & gas production tax distributions. 6 of those counties fall in the "over \$1 Million and under \$5 Million in tax" level, which means the schools in those counties are not receiving their full oil & gas production tax funding and won't unless their county exceeds \$5 million in tax revenue.

The current formula accomplishes many good things: additional revenue to larger producing counties, additional revenue to cities, and the establishment of a mechanism for which townships impacted by oil and gas development can access funds for road repairs and improvements. However, I think the formula could use some "tweaking" to assure that schools receive their full funding and also to simplify the formula and still accomplish the same outcome.

Counties whose schools are negatively impacted by the current O&G distribution formula: (8 months of FY10 production - Year to Date totals – includes April 2010 distribution)

Billings	\$3,774,411
Bottineau	2,851,249
Burke	2,550,996
Divide	2,675,312
Renville	1,276,559
Stark	2,035,671

Plus: Golden Valley County will be added to the list in May - \$911,797

### OIL & GAS PRODUCTION TAX - HB 1304 - \$490,000 School Allocation
