### Explanation or reason for introduction of bill/resolution:

A Bill relating to the county mill levy for comprehensive health care insurance employee benefit programs; and to provide an effective date.

### Minutes:

*See attached testimony #1.*

**Representative Jerry Kelsh:** Sponsor. Support. All this does is allow local subdivisions to levy 12 mills rather than 8 mills for comprehensive health care insurance employee benefit program. The reason for the bill, and I got this from PERS, is the health insurance costs for full coverage was \$469.78 for the 2009-11 biennium is was \$962.84. The counties have to pay a little higher and I called back to my home county, Dickey, where I served as County Commissioner for eight years, and their full coverage family plan is \$1026.62. They had tried to pay 70% of that coverage and that amounts to \$718.00 per family. The law also allows the 4 mills can come out of oasis. Dickey County has used the 4 out of oasis and is now at 7.9 from the comprehensive health care insurance. So even if one more person, a new employee, came on it would put us in a deficit of spending and if insurance continues to go up we would also be deficit. The money can come out of the general fund with the purpose so it wouldn't have to come out of the general fund. We want to continue to be able to provide our employees with a good health plan that is part of the ability to attract and keep employees on a county and city level. I would ask for your favorable consideration as far as from going from 8 mills to 12 mills on comprehensive health insurance employee benefit program.

**Terry Traynor, ND Association of Counties:** Support. Please refer to attached testimony #1.

**Representative Mark S. Owens:** The 12 that you show here that are also levying 4 mills from retirement levy, most are at 8 and one is above 8 so they levy 4 now so even if we raise it to 12 they are already at the limit, is this correct?

**Terry Traynor:** They would be and that would pre-up the mills in the social security levy which would still be available for them but the concern is with the increasing cost for PERS retirement. Those counties may have to use some of those mills to meet their retirement costs going forward as well.

**Representative Dave Weiler:** Representative Kaiser previously presented a bill that we heard testimony on probably the first week and we passed it out of committee and passed it on the house floor. How does that compare to this one, is it the same thing?

**Terry Traynor:** As introduced it was identical to this. The committee wanted to add a vote requirement to access the additional 4 mills and that's the way it was passed by the House.

**Vice Chairman Craig Headland:** You listed North Dakota PERS and then several counties have another deferred comp, can you give us an example of what something like that is?

**Terry Traynor:** The most common one is Nationwide Retirement Systems. It is basically a 401K but when you're in government I think it's called a 403B or something like that. It's a self directed defined contribution type option, similar to state employees where they have that option to either move their entire retirement there or use it as an additional retirement option.

**Vice Chairman Craig Headland:** So some of our counties are offering a fully defined benefits and a 401K on top of it?

**Terry Traynor:** That's what the survey results suggest. We haven't investigated it any further but that is what they report. Many of our counties do not pay 100% of the PERS as state employees do, they still have an employee/employer share as well.

**Representative Lonny B. Winrich:** In the situations where that is indicated where you have North Dakota PERS and one of these defined contribution plans that would normally be an option, would it not? You chose one or the other; you don't get both plans, correct?

**Terry Traynor:** That's a very good possibility. Our survey isn't that detailed. We just ask what retirement plans they provide.

**Sandy Clark, ND Farm Bureau:** Opposition. Our policy says no new taxes. We did appreciate the amendment that you put on the other bill that allowed for the vote.

**Chairman Wesley R. Belter:** No further testimony. Closed hearing on HB 1361.

## FISCAL NOTE STATEMENT

House Bill or Resolution No. 1361

This bill or resolution appears to affect revenues, expenditures, or fiscal liability of counties, cities, or school districts. However, no state agency has primary responsibility for compiling and maintaining the information necessary for the proper preparation of a fiscal note regarding this bill or resolution. Pursuant to Joint Rule 502, this statement meets the fiscal note requirement.

**Testimony To The  
HOUSE FINANCE & TAXATION COMMITTEE  
Prepared February 1, 2011, by  
Terry Traynor, Assistant Director  
North Dakota Association of Counties**

**REGARDING HOUSE BILL No. 1361**

Chairman Belter and members of the Committee, as with the previous bill addressing the county comprehensive employee health insurance levy, the Association of Counties is very appreciative of the sponsors' interest in getting the bill before you and obviously support this optional authority.

Health insurance and particularly health insurance costs have been unavoidable topics for the last several years. Like many business owners, county commissioners have struggled each year with the challenges of staying competitive for employees with limited resources for benefits. As illustrated by the chart, health insurance premium costs have been growing at a much faster rate than property values – the factor which drives a county's (most particularly a rural county's) ability to match inflationary increases of all costs.

As the text of the bill indicates, counties may levy up to 8 mills specifically for "comprehensive health care insurance employee benefit programs." As the attached table illustrates, this dedicated levy is used in 43 counties, of which 27 are at (or beyond) the statutory limit.

Additionally, counties are authorized to use up to 4 mills of their social security/retirement levy for health costs.

A quick survey of 19 of the counties currently at the 8-mill limit indicated that 16 of them are also using the retirement levy for this purpose – and 13 of those are using the entire 4

mills allowed. As the Committee can see from the county list, the problem is generally most significant in the smallest and most rural counties.

The table also provides information regarding the level of employer (county) support for employee health benefits.

The counties indicating they provide 39%-42% of the cost of a family health plan are those that limit the employer share to a single plan or the equivalent cost of a single plan. As you can see, only 14 counties support 100% of a family plan, and most of those are oil-resource counties that face tremendous competition for their heavy equipment operators as well as land record experts and most other skilled employees.

When discussing the similar previous bill, the committee requested and was provided additional information regarding the number of counties participating in the PERS health & retirement plans and those using general funds in addition to dedicated levies for health insurance. This information has been reproduced in the attached table for the Committee's information.

As this attachment indicates, the majority of counties (and virtually all small counties) purchase their health benefits through PERS. Most of the committee members are well aware of the cost increases that this plan has faced over the last decade. We are fortunate that the increases will not be as great in the coming biennium, but they will still exceed the revenue that most counties will be able to generate if they are already at the 8-mill and 4-mill limits.

This problem is complicated by the anticipated changes to the PERS retirement contributions. Almost all county employees are enrolled in the PERS retirement system, and the expected employer-share increase will require additional funds from the county retirement levy, further limiting some counties' ability to use that option for health benefits.

Mr. Chairman and committee members, I hope that this information adequately describes the situation faced by a large number of counties – most of which have few options for raising revenue.
