

Vision

The North Dakota Hospital Association will take an active leadership role in major Healthcare issues.

Mission

The North Dakota Hospital Association exists to advance the health status of persons served by the membership.

Health Services Committee September 26, 2012 Long Term Care Bed Capacity In North Dakota

Chairman Lee and members of the Health Services Committee; Good morning, I am Jerry Jurena, President of the North Dakota Hospital Association and Board Member of the State Health Council. I am before you today to share with you my testimony I presented on April 12, 2012; it is the State Health Council's recommendations on Long Term Care Bed Capacity in the state of North Dakota.

In the 2011 Legislative Session House Bill 1040 was passed directing the State Health Council to review the current bed limits and determine if there should be changes made to better serve the people of North Dakota. The State Health Council recommendations for health care beds were adopted January 18, 1994; they were:

No additional, nursing home, beds will be approved for licensure or certification unless the capacity within the affected planning region falls below 60 nursing facility beds per 1,000 population aged 65 and above.

In no case will the statewide, basic care, bed capacities exceed 15 basic care beds per 1,000 population aged 65 and above.

Based on our review; I have attached the information in summary that we received; the average monthly recipients in Nursing Facilities, skilled care, in 2004 was 3,589 and in 2011 it was 3,120, This fiscal year it is 3,078.

In Basic Care in 2004 there was an average recipient count of 468 and in 2011 it was 513. This fiscal year it is 566. This information is in Attachment A.

In Attachment B I would like to point out that the appropriations for Nursing Facilities in 1999-2001 was \$252.4 million and in fifteen years increased to \$458.6 million or an

increase of 81.7%. At this same time Home Community Based Services (HCBS) went from \$20.9 million to \$66.1 million or an increase of 215.7%. While both are increasing the utilization of HCBS is growing at a faster rate. This is also demonstrated in Attachment C where the average monthly recipient count has increased from 1,707 in 2004 to 2,371 in 2011. This fiscal year the average monthly recipient number is 2,333.

When we compared available nursing facility beds in North Dakota with other states; North Dakota ranks 2nd in the Nursing Home Beds per 1,000 population over the age of 65. The highest is at 74.4 beds per 1,000 population over the age of 65, North Dakota is at 68.5 and the average is 44.1. Attachment D.

The statistical data in Attachment E shows information by region and statewide totals in North Dakota in 2010. The bed count in 2010 was 57.10 beds per population over the age of 65 for Nursing Home beds. Again our current target was and is 60 beds per 1,000 population over the age of 65. In Basic care for 2010 we were at 16.49 beds per 1,000 population over the age of 65; if you exclude special care facilities we were at 15.53 beds per 1,000 population over the age of 65. Again our target was and is 15.

Based on the summary information that I have shared and the testimony we received from facilities providing long term care services our recommendations are:

 The moratorium on nursing facility and basic care beds in North Dakota should continue. (

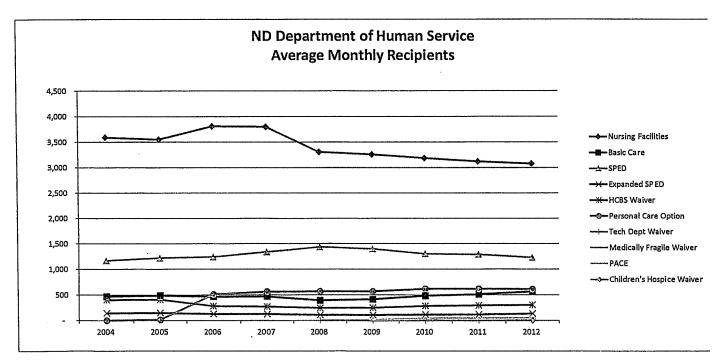

- The target for nursing facility beds in North Dakota will now be 55 nursing facility beds per 1,000 population aged 65 and above.
- The target for basic care facility beds in North Dakota will continue to be 15 beds per 1,000 population aged 65 and above.
- And, since we currently at 16.49 basic care beds/1,000 population aged 65 and above (15.53 basic care beds/1,000 population aged 65 and above excluding special care facilities), we recommend reconsideration of the provision to allow for new and additional basic care beds.

I have also attached a listing of Assisted Living Facilities by region, attachment F.
