ACS Health Enterprise Product Status

End-to-end testing improves – 1 defect (down from 4 mid-December)

New Hampshire Provider Enrollment (PE) went live on December 19, 2011

Third Party Assessment Status

- Code and Architecture Review

- Conducted by IBM
- Architecture assessed – **“we find the current architecture of Health Enterprise reasonable to suit the complex requirements. Health Enterprise has adhered very closely with recommended IBM architecture and golden physical topologies”**
- Code Assessment tool (CAST-AIP) rated code at **“Superior Quality”**

- Provider Enrollment Functional Review

- Conducted by State’s Independent Consultant, SLI
- SLI found the Provider Enrollment component as sound and ready to be expanded upon for North Dakota customization.

- Claims Functional Review

- Conducted by State’s Independent Consultant, SLI
- After a 4-week review, SLI concluded -- ***“The Core Claims Functionality has been observed to be operating with a full set of expected claim processing business rules. This functionality has been observed to be capable of entering, adjudicating, correcting, replacing and submitting Medicaid claims for final disposition. SLI observed no defects related to the Core Claims Functionality during Functional Test.”***

North Dakota Implementation Status
