

JOURNAL OF THE HOUSE

Sixty-third Legislative Assembly

* * * * *

POSTSESSION ACTIONS

MESSAGE TO THE HOUSE FROM THE SENATE (WILLIAM R. HORTON, SECRETARY)

MR. SPEAKER: The Senate has adopted the conference committee report, subsequently passed, and the emergency clause carried: HB 1015.

MESSAGE TO THE SENATE FROM THE HOUSE (BUELL J. REICH, CHIEF CLERK)

MR. PRESIDENT: Your signature is respectfully requested on: HB 1013, HB 1015.

MESSAGE TO THE HOUSE FROM THE SENATE (WILLIAM R. HORTON, SECRETARY)

MR. SPEAKER: The President has signed: HB 1013, HB 1015.

MESSAGE TO THE SENATE FROM THE HOUSE (BUELL J. REICH, CHIEF CLERK)

MR. PRESIDENT: The Speaker has signed: HB 1013, HB 1015.

DELIVERY OF ENROLLED BILLS AND RESOLUTIONS

The following bills were delivered to the Governor for approval on May 4, 2013: HB 1013, HB 1015.

COMMUNICATION FROM GOVERNOR JACK DALRYMPLE

This is to inform you that on May 3, 2013, I have signed the following: HB 1006, HB 1016, HB 1019, HB 1029, HB 1038, HB 1258, and HB 1358.

COMMUNICATION FROM GOVERNOR JACK DALRYMPLE

This is to inform you that on May 6, 2013, I have signed the following: HB 1003, HB 1198, and HB 1286.

COMMUNICATION FROM GOVERNOR JACK DALRYMPLE

This is to inform you that on May 14, 2013, I have signed the following: HB 1013.

VETO MEASURE

Pursuant to Article V, Section 9 of the North Dakota Constitution, I have vetoed items in Sections 13 and 14 and all of Sections 15 and 25 of House Bill 1015 and returned it to the House.

I have vetoed that portion of Section 13 in the second paragraph that reads "The office of management and budget, subject to budget section approval, may adjust the market policy point based on an estimated inflationary factor during the 2013-15 biennium." This sentence is vetoed because the budget section has no constitutional role in the administration and execution of the compensation plan as adopted by the legislative assembly. This responsibility is a purely executive function not appropriate for ratification by the budget section of the legislative assembly. See *City of Carrington v. Foster County*, 166 N.W.2d 377, 382 (N.D. 1969) ("[T]here is an implied exclusion of each branch from the exercise of the functions of the others."); NDAG 2007-L-08.

I have vetoed that portion of Section 14 beginning with "PILOT PROJECT" in the section title and continuing through the end of the second-to-last sentence, leaving only the last sentence of Section 14. This item is vetoed because it constitutes an unconstitutional insertion of the Emergency Commission into the management of the state's compensation program. The administration of salary dollars within the limits of legislative appropriations is properly reserved to the executive branch agency directors. The vetoed pilot program would grant the Emergency Commission, a majority of which are legislators, broad discretion to determine whether an agency had provided "documentation justifying the need" for the salary dollars in the accrued leave line. This broad, discretionary review and approval of a purely executive function violates the principle of constitutional separation of powers and is clearly impractical, considering the numerous Emergency Commission meetings that would be required to review and approve each agency's use of this last share of salary dollars. The

last sentence of Section 14, which is not vetoed, confirms that accrued leave is simply a type of salary to which state employees are entitled by virtue of their employment. As a result of this item veto, both the accrued leave and salary and wages lines remain available for payment of salaries by any agency. Although the proposed pilot project is eliminated by this item veto, my intention is to direct agencies to rely first and foremost on the salary line and not access the accrued leave line for salary until necessary.

Section 15 is vetoed because it directs the office of management and budget to transfer funds at the request of the Racing Commission from the breeders' fund to the purse fund and racing promotion fund in conflict with N.D.C.C. Section 53-06.2-11, which states: "The commission may not transfer money among the funds." This kind of policy change should be brought forward by the Racing Commission itself and have a full legislative hearing where those who rely on the breeders' fund have an opportunity to be heard. North Dakota's horse breeders rely on the breeders' fund and it should not be accessed for racing promotion or other purposes without full consideration of their objections.

Section 25 is vetoed because a limitation of 60 days on the permissible extension of the July 15th filing date does not provide adequate time to prepare a budget proposal for agencies that experience circumstances justifying a delayed filing schedule. Such circumstances include: uncertainty of federal funding; variability in case load numbers for human service programs; variability in trends of inmate headcounts; unpredictable approvals in federal transportation funding programs; the importance of having more current, accurate revenue projections for water project appropriations from the resources trust fund; availability of fall enrollment numbers for estimating the appropriation necessary to cover the per-student payments for the biennium; and other similar situations.

LIST OF CORRECTIONS AND REVISIONS OF THE HOUSE JOURNAL

Page 31, line 6, replace "12:30" with "12:00"

Page 31, delete line 8

Page 31, line 9, replace "Representative Zaiser" with "Representatives Amerman, Fehr, Karls, and Zaiser"

Page 31, delete line 27

Page 31, after line 29, insert "Lt. Governor Wrigley appointed Sen. Hogue and Rep. Koppelman to the committee."

Page 31, line 35, replace "Sen." with "Sens."

Page 31, after line 42, insert:

"OATH OF OFFICE TO ELECTED OFFICIALS

CHIEF JUSTICE VANDEWALLE ADMINISTERED the Oath of Office to the elected officials: Lt. Governor Drew Wrigley, Auditor Robert Peterson, Treasurer Kelly Schmidt, Commissioner of Insurance Adam Hamm, Public Service Commissioner Randy Christmann, Public Service Commissioner Julie Fedorchak, Superintendent of Public Instruction Kirsten Tschosik and Justice of the Supreme Court Daniel Crothers.

"SENATE AMENDMENTS TO ENGROSSED HOUSE BILL NO. 1234

Page 1, line 1, after "A BILL" replace the remainder of the bill with "for an Act to create and enact a new section to chapter 57-38 of the North Dakota Century Code, relating to income tax withholding for oil and gas royalties; to amend and reenact section 15-05-10, subsection 4 of section 38-08-04, sections 57-51.1-01 and 57-51.1-03, subsection 1 of section 57-51.1-03.1, and section 57-51.2-02 of the North Dakota Century Code, relating to oil extraction tax definitions and exemptions and the state-tribal oil tax agreement; and to provide an effective date.

BE IT ENACTED BY THE LEGISLATIVE ASSEMBLY OF NORTH DAKOTA:

SECTION 1. AMENDMENT. Section 15-05-10 of the North Dakota Century Code is amended and reenacted as follows:

15-05-10. Royalties from oil leases - Rents from other leases - Rules.

Oil leases must be made by the board of university and school lands at such annual minimum payments as are determined by the board, but the royalty shall be not less than twelve and one-half percent of the gross output of oil from the lands leased. Oil leases made by the board may authorize a royalty of less than twelve and one-half percent for production from stripper well properties or individual stripper wells and qualifying secondary recovery and qualifying tertiary recovery projects as defined in section 57-51.1-01. Leases for gas, coal, cement materials, sodium sulfate, sand and gravel, road material, building stone, chemical substances, metallic ores, or colloidal or other clays must be made by the board in such annual payments as are determined by the board. The board may adopt rules regarding annual payments and royalties under this section.

SECTION 2. AMENDMENT. Subsection 4 of section 38-08-04 of the North Dakota Century Code is amended and reenacted as follows:

4. To classify wells as oil or gas wells for purposes material to the interpretation or enforcement of this chapter, to classify and determine the status and depth of wells that are stripper well property as defined in subsection 8 of section 57-51.1-01, to certify to the tax commissioner which wells are stripper wells and the depth of those wells, to recertify stripper wells that are reentered and recompleted as horizontal wells, and to certify to the tax commissioner which wells involve secondary or tertiary recovery operations under section 57-51.1-01, and the date of qualification for the reduced rate of oil extraction tax for secondary and tertiary recovery operations.

SECTION 3. A new section to chapter 57-38 of the North Dakota Century Code is created and enacted as follows:

Withholding requirement for oil and gas royalty payments to nonresidents.

1. For purposes of this section:
 - a. "Publicly traded partnership" means a publicly traded partnership as defined in section 7704 of the Internal Revenue Code [26 U.S.C. 7704] which is not treated as a corporation.
 - b. "Remitter" means any person who distributes royalty payments to royalty owners.
 - c. "Royalty owner" means a person or entity entitled to receive periodic royalty payments for a nonworking interest in the production of oil or gas.
2. Except as provided in subsection 3, each remitter shall deduct and withhold from the net amount of the royalty payment made to each nonresident individual or business entity that does not have its commercial domicile in this state at the highest marginal rate provided in sections 57-38-30 and 57-38-30.3. Sections 57-38-59 and 57-38-60 apply to the filing of the returns and payment of the tax under this subsection.
3. This section does not apply to royalty payments made to a royalty owner if the royalty owner is:
 - a. The United States or an agency of the federal government, this state or a political subdivision of this state, or another state or a political subdivision of another state;

- b. A federally recognized Indian tribe with respect to on-reservation oil and gas production pursuant to a lease entered under the Indian Mineral Leasing Act of 1938 [25 U.S.C. 396a through 396g];
 - c. The United States as trustee for individual Indians;
 - d. A publicly traded partnership;
 - e. An organization that is exempt from the tax under this chapter; or
 - f. The same person or entity as the remitter.
4. a. This section does not apply to a remitter that produced less than three hundred fifty thousand barrels of oil or less than five hundred million cubic feet of gas in the preceding calendar year as certified to the tax commissioner in the manner and on forms prescribed by the tax commissioner.
- b. Each remitter that is exempt from withholding under this subsection shall make an annual return to report royalty payments that exceed the dollar amounts in subsection 6 and must be reported in the same manner as provided in section 57-38-60.
5. a. Each year, a publicly traded partnership that is exempt from withholding under subsection 3 shall transmit to the tax commissioner, in an electronic format approved by the tax commissioner, each partner's United States department of the treasury schedule K-1, form 1065, or form 1065-B, as applicable, filed electronically for the year with the United States internal revenue service.
- b. A royalty owner that is a publicly traded partnership, or an organization exempt from taxation under section 57-38-09, shall report to the remitter and tax commissioner under oath, on a form prescribed by the tax commissioner, all information necessary to establish that the remitter is not required under subsection 2 to withhold royalty payments made to the partnership or organization.
6. If the royalty payment made to a royalty owner under this section is less than six hundred dollars for the current withholding period, or is less than one thousand dollars if the payment is annualized, the tax commissioner may grant a remitter's request to forego withholding the tax from the royalty payment made to that royalty owner for the current withholding period or, if applicable, the royalty payments for the annual period.

SECTION 4. AMENDMENT. Section 57-51.1-01 of the North Dakota Century Code is amended and reenacted as follows:

57-51.1-01. Definitions for oil extraction tax.

For the purposes of the oil extraction tax law, the following words and terms shall have the meaning ascribed to them in this section~~this chapter~~:

1. "Average daily production" of a well means the qualified maximum total production of oil from the well during a calendar month period divided by the number of calendar days in that period, and "qualified maximum total production" of a well means that the well must have been maintained at the maximum efficient rate of production as defined and determined by rule adopted by the industrial commission in furtherance of its authority under chapter 38-08.
2. "Average price" of a barrel of crude oil means the monthly average of the daily closing price for a barrel of west Texas intermediate cushing crude oil, as those prices appear in the Wall Street Journal, midwest edition, minus two dollars and fifty cents. When computing the monthly average

price, the most recent previous daily closing price must be considered the daily closing price for the days on which the market is closed.

3. "Horizontal reentry well" means a well that was not initially drilled and completed as a horizontal well, including any well initially plugged and abandoned as a dry hole, which is reentered and recompleted as a horizontal well.
4. "Horizontal well" means a well with a horizontal displacement of the well bore drilled at an angle of at least eighty degrees within the productive formation of at least three hundred feet [91.44 meters].
5. "Oil" means petroleum, crude oil, mineral oil, casinghead gasoline, and all liquid hydrocarbons that are recovered from gas on the lease incidental to the production of the gas.
6. "Property" means the right which arises from a lease or fee interest, as a whole or any designated portion thereof, to produce oil. A producer shall treat as a separate property each separate and distinct producing reservoir subject to the same right to produce crude oil; provided, that such reservoir is recognized by the industrial commission as a producing formation that is separate and distinct from, and not in communication with, any other producing formation.
7. "Qualifying secondary recovery project" means a project employing water flooding. To be eligible for the tax reduction provided under section 57-51.1-02, a secondary recovery project must be certified as qualifying by the industrial commission and the project operator must have achieved for six consecutive months an average production level of at least twenty-five percent above the level that would have been recovered under normal recovery operations. To be eligible for the tax exemption provided under section 57-51.1-03 and subsequent thereto the rate reduction provided under section 57-51.1-02, a secondary recovery project must be certified as qualifying by the industrial commission and the project operator must have obtained incremental production as defined in subsection 5 of section 57-51.1-03.
8. "Qualifying tertiary recovery project" means a project for enhancing recovery of oil which meets the requirements of section 4993(c), Internal Revenue Code of 1954, as amended through December 31, 1986, and includes the following methods for recovery:
 - a. Miscible fluid displacement.
 - b. Steam drive injection.
 - c. Microemulsion.
 - d. In situ combustion.
 - e. Polymer augmented water flooding.
 - f. Cyclic steam injection.
 - g. Alkaline flooding.
 - h. Carbonated water flooding.
 - i. Immiscible carbon dioxide displacement.
 - j. New tertiary recovery methods certified by the industrial commission.

It does not include water flooding, unless the water flooding is used as an element of one of the qualifying tertiary recovery techniques described in this subsection, or immiscible natural gas injection. To be eligible for the

tax reduction provided under section 57-51.1-02, a tertiary recovery project must be certified as qualifying by the industrial commission, the project operator must continue to operate the unit as a qualifying tertiary recovery project, and the project operator must have achieved for at least one month a production level of at least fifteen percent above the level that would have been recovered under normal recovery operations. To be eligible for the tax exemption provided under section 57-51.1-03 and subsequent thereto the rate reduction provided under section 57-51.1-02, a tertiary recovery project must be certified as qualifying by the industrial commission, the project operator must continue to operate the unit as a qualifying tertiary recovery project, and the project operator must have obtained incremental production as defined in subsection 5 of section 57-51.1-03.

9. "Royalty owner" means an owner of what is commonly known as the royalty interest and shall not include the owner of any overriding royalty or other payment carved out of the working interest.
10. "Stripper well" means a well drilled and completed, or reentered and recompleted as a horizontal well, after June 30, 2013, whose average daily production of oil during any preceding consecutive twelve-month period, excluding condensate recovered in nonassociated production, per well did not exceed ten barrels per day for wells of a depth of six thousand feet [1828.80 meters] or less, fifteen barrels per day for wells of a depth of more than six thousand feet [1828.80 meters] but not more than ten thousand feet [3048 meters], and thirty barrels per day for wells of a depth of more than ten thousand feet [3048 meters] outside the Bakken and Three Forks formations, and forty barrels per day for wells of a depth of more than ten thousand feet [3048 meters] in the Bakken or Three Forks formation.
11. "Stripper well property" means wells drilled and completed, or a well reentered and recompleted as a horizontal well, before July 1, 2013, on a "property" whose average daily production of oil, excluding condensate recovered in nonassociated production, per well did not exceed ten barrels per day for wells of a depth of six thousand feet [1828.80 meters] or less, fifteen barrels per day for wells of a depth of more than six thousand feet [1828.80 meters] but not more than ten thousand feet [3048 meters], and thirty barrels per day for wells of a depth of more than ten thousand feet [3048 meters] during any preceding consecutive twelve-month period. Wells which did not actually yield or produce oil during the qualifying twelve-month period, including disposal wells, dry wells, spent wells, and shut-in wells, are not production wells for the purpose of determining whether the stripper well property exemption applies.
- ~~44-12.~~ "Trigger price" means thirty-five dollars and fifty cents, as indexed for inflation. By December thirty-first of each year, the tax commissioner shall compute an indexed trigger price by applying to the current trigger price the rate of change of the producer price index for industrial commodities as calculated and published by the United States department of labor, bureau of labor statistics, for the twelve months ending June thirtieth of that year and the indexed trigger price so determined is the trigger price for the following calendar year.
- ~~42-13.~~ "Two-year inactive well" means any well certified by the industrial commission that did not produce oil in more than one month in any consecutive twenty-four-month period before being recompleted or otherwise returned to production after July 31, 1995. A well that has never produced oil, a dry hole, and a plugged and abandoned well are eligible for status as a two-year inactive well.

SECTION 5. AMENDMENT. Section 57-51.1-03 of the North Dakota Century Code is amended and reenacted as follows:

57-51.1-03.-(Effective through June 30, 2013) Exemptions from oil extraction tax.

The following activities are specifically exempted from the oil extraction tax:

1. The activity of extracting from the earth any oil that is exempt from the gross production tax imposed by chapter 57-51.
2. The activity of extracting from the earth any oil from a stripper well property or individual stripper well.
3. For a well drilled and completed as a vertical well, the initial production of oil from the well is exempt from any taxes imposed under this chapter for a period of fifteen months, except that oil produced from any well drilled and completed as a horizontal well is exempt from any taxes imposed under this chapter for a period of twenty-four months. Oil recovered during testing prior to well completion is exempt from the oil extraction tax. The exemption under this subsection becomes ineffective if the average price of a barrel of crude oil exceeds the trigger price for each month in any consecutive five-month period. However, the exemption is reinstated if, after the trigger provision becomes effective, the average price of a barrel of crude oil is less than the trigger price for each month in any consecutive five-month period.
4. The production of oil from a qualifying well that was worked over is exempt from any taxes imposed under this chapter for a period of twelve months, beginning with the first day of the third calendar month after the completion of the work-over project. The exemption provided by this subsection is only effective if the well operator establishes to the satisfaction of the industrial commission upon completion of the project that the cost of the project exceeded sixty-five thousand dollars or production is increased at least fifty percent during the first two months after completion of the project. A qualifying well under this subsection is a well with an average daily production of no more than fifty barrels of oil during the latest six calendar months of continuous production. A work-over project under this subsection means the continuous employment of a work-over rig, including recompletions and reentries. The exemption provided by this subsection becomes ineffective if the average price of a barrel of crude oil exceeds the trigger price for each month in any consecutive five-month period. However, the exemption is reinstated if, after the trigger provision becomes effective, the average price of a barrel of crude oil is less than the trigger price for each month in any consecutive five-month period.
5.
 - a. The incremental production from a secondary recovery project which has been certified as a qualified project by the industrial commission after July 1, 1991, is exempt from any taxes imposed under this chapter for a period of five years from the date the incremental production begins.
 - b. The incremental production from a tertiary recovery project that does not use carbon dioxide and which has been certified as a qualified project by the industrial commission is exempt from any taxes imposed under this chapter for a period of ten years from the date the incremental production begins. Incremental production from a tertiary recovery project that uses carbon dioxide and which has been certified as a qualified project by the industrial commission is exempt from any taxes imposed under this chapter from the date the incremental production begins.
 - c. For purposes of this subsection, incremental production is defined in the following manner:
 - (1) For purposes of determining the exemption provided for in subdivision a and with respect to a unit where there has not

been a secondary recovery project, incremental production means the difference between the total amount of oil produced from the unit during the secondary recovery project and the amount of primary production from the unit. For purposes of this paragraph, primary production means the amount of oil which would have been produced from the unit if the secondary recovery project had not been commenced. The industrial commission shall determine the amount of primary production in a manner which conforms to the practice and procedure used by the commission at the time the project is certified.

- (2) For purposes of determining the exemption provided for in subdivision a and with respect to a unit where a secondary recovery project was in existence prior to July 1, 1991, and where the industrial commission cannot establish an accurate production decline curve, incremental production means the difference between the total amount of oil produced from the unit during a new secondary recovery project and the amount of production which would be equivalent to the average monthly production from the unit during the most recent twelve months of normal production reduced by a production decline rate of ten percent for each year. The industrial commission shall determine the average monthly production from the unit during the most recent twelve months of normal production and must upon request or upon its own motion hold a hearing to make this determination. For purposes of this paragraph, when determining the most recent twelve months of normal production the industrial commission is not required to use twelve consecutive months. In addition, the production decline rate of ten percent must be applied from the last month in the twelve-month period of time.
- (3) For purposes of determining the exemption provided for in subdivision a and with respect to a unit where a secondary recovery project was in existence before July 1, 1991, and where the industrial commission can establish an accurate production decline curve, incremental production means the difference between the total amount of oil produced from the unit during the new secondary recovery project and the total amount of oil that would have been produced from the unit if the new secondary recovery project had not been commenced. For purposes of this paragraph, the total amount of oil that would have been produced from the unit if the new secondary recovery project had not been commenced includes both primary production and production that occurred as a result of the secondary recovery project that was in existence before July 1, 1991. The industrial commission shall determine the amount of oil that would have been produced from the unit if the new secondary recovery project had not been commenced in a manner that conforms to the practice and procedure used by the commission at the time the new secondary recovery project is certified.
- (4) For purposes of determining the exemption provided for in subdivision b and with respect to a unit where there has not been a secondary recovery project, incremental production means the difference between the total amount of oil produced from the unit during the tertiary recovery project and the amount of primary production from the unit. For purposes of this paragraph, primary production means the amount of oil which would have been produced from the unit if the tertiary recovery project had not been commenced. The industrial commission shall determine the amount of primary production in a manner which conforms to the practice and procedure used by the commission at the time the project is certified.

- (5) For purposes of determining the exemption provided for in subdivision b and with respect to a unit where there is or has been a secondary recovery project, incremental production means the difference between the total amount of oil produced during the tertiary recovery project and the amount of production which would be equivalent to the average monthly production from the unit during the most recent twelve months of normal production reduced by a production decline rate of ten percent for each year. The industrial commission shall determine the average monthly production from the unit during the most recent twelve months of normal production and must upon request or upon its own motion hold a hearing to make this determination. For purposes of this paragraph, when determining the most recent twelve months of normal production the industrial commission is not required to use twelve consecutive months. In addition, the production decline rate of ten percent must be applied from the last month in the twelve-month period of time.
 - (6) For purposes of determining the exemption provided for in subdivision b and with respect to a unit where there is or has been a secondary recovery project and where the industrial commission can establish an accurate production decline curve, incremental production means the difference between the total amount of oil produced from the unit during the tertiary recovery project and the total amount of oil that would have been produced from the unit if the tertiary recovery project had not been commenced. For purposes of this paragraph, the total amount of oil that would have been produced from the unit if the tertiary recovery project had not been commenced includes both primary production and production that occurred as a result of any secondary recovery project. The industrial commission shall determine the amount of oil that would have been produced from the unit if the tertiary recovery project had not been commenced in a manner that conforms to the practice and procedure used by the commission at the time the tertiary recovery project is certified.
- d. The industrial commission shall adopt rules relating to this exemption that must include procedures for determining incremental production as defined in subdivision c.
6. The production of oil from a two-year inactive well, as determined by the industrial commission and certified to the state tax commissioner, for a period of ten years after the date of receipt of the certification. The exemption under this subsection becomes ineffective if the average price of a barrel of crude oil exceeds the trigger price for each month in any consecutive five-month period. However, the exemption is reinstated if, after the trigger provision becomes effective, the average price of a barrel of crude oil is less than the trigger price for each month in any consecutive five-month period.
7. The production of oil from a horizontal reentry well, as determined by the industrial commission and certified to the state tax commissioner, for a period of nine months after the date the well is completed as a horizontal well. The exemption under this subsection becomes ineffective if the average price of a barrel of crude oil exceeds the trigger price for each month in any consecutive five-month period. However, the exemption is reinstated if, after the trigger provision becomes effective, the average price of a barrel of crude oil is less than the trigger price for each month in any consecutive five-month period.
8. The initial production of oil from a well is exempt from any taxes imposed under this chapter for a period of sixty months if:

- a. The well is drilled and completed before July 1, 2013, on nontrust lands located within the boundaries of an Indian reservation;
 - b. The well is drilled and completed before July 1, 2013, on lands held in trust by the United States for an Indian tribe or individual Indian; or
 - c. The well is drilled and completed before July 1, 2013, on lands held by an Indian tribe if the interest is in existence on August 1, 1997.
9. The first seventy-five thousand barrels or the first four million five hundred thousand dollars of gross value at the well, whichever is less, of oil produced during the first eighteen months after completion, from a horizontal well drilled and completed after April 30, 2009, and before July 1, 2015, is subject to a reduced tax rate of two percent of the gross value at the well of the oil extracted under this chapter. A well eligible for a reduced tax rate under this subsection is eligible for the exemption for horizontal wells under subsection 3, if the exemption under subsection 3 is effective during all or part of the first twenty-four months after completion. The rate reduction under this subsection becomes effective on the first day of the month following a month for which the average price of a barrel of crude oil is less than fifty-five dollars. The rate reduction under this subsection becomes ineffective on the first day of the month following a month in which the average price of a barrel of crude oil exceeds seventy dollars. If the rate reduction under this subsection is effective on the date of completion of a well, the rate reduction applies to production from that well for up to eighteen months after completion, subject to the other limitations of this subsection. If the rate reduction under this subsection is ineffective on the date of completion of a well, the rate reduction under this subsection does not apply to production from that well at any time.
10. The first seventy-five thousand barrels of oil produced during the first eighteen months after completion, from a well drilled and completed outside the Bakken and Three Forks formations, is subject to a reduced tax rate of two percent of the gross value at the well of the oil extracted under this chapter. A well eligible for a reduced tax rate under this subsection is eligible for the exemption under subsection 3, if the exemption under subsection 3 is effective during all or part of the first twenty-four months after completion.

(Effective after June 30, 2013) Exemptions from oil extraction tax. The following activities are specifically exempted from the oil extraction tax:

1. ~~The activity of extracting from the earth any oil that is exempt from the gross production tax imposed by chapter 57-51.~~
2. ~~The activity of extracting from the earth any oil from a stripper well property.~~
3. ~~For a well drilled and completed as a vertical well, the initial production of oil from the well is exempt from any taxes imposed under this chapter for a period of fifteen months, except that oil produced from any well drilled and completed as a horizontal well is exempt from any taxes imposed under this chapter for a period of twenty-four months. Oil recovered during testing prior to well completion is exempt from the oil extraction tax. The exemption under this subsection becomes ineffective if the average price of a barrel of crude oil exceeds the trigger price for each month in any consecutive five-month period. However, the exemption is reinstated if, after the trigger provision becomes effective, the average price of a barrel of crude oil is less than the trigger price for each month in any consecutive five-month period.~~
4. ~~The production of oil from a qualifying well that was worked over is exempt from any taxes imposed under this chapter for a period of twelve months, beginning with the first day of the third calendar month after the~~

completion of the work-over project. The exemption provided by this subsection is only effective if the well operator establishes to the satisfaction of the industrial commission upon completion of the project that the cost of the project exceeded sixty-five thousand dollars or production is increased at least fifty percent during the first two months after completion of the project. A qualifying well under this subsection is a well with an average daily production of no more than fifty barrels of oil during the latest six calendar months of continuous production. A work-over project under this subsection means the continuous employment of a work-over rig, including recompletions and reentries. The exemption provided by this subsection becomes ineffective if the average price of a barrel of crude oil exceeds the trigger price for each month in any consecutive five-month period. However, the exemption is reinstated if, after the trigger provision becomes effective, the average price of a barrel of crude oil is less than the trigger price for each month in any consecutive five-month period.

5. a. The incremental production from a secondary recovery project which has been certified as a qualified project by the industrial commission after July 1, 1991, is exempt from any taxes imposed under this chapter for a period of five years from the date the incremental production begins.
- b. The incremental production from a tertiary recovery project that does not use carbon dioxide and which has been certified as a qualified project by the industrial commission is exempt from any taxes imposed under this chapter for a period of ten years from the date the incremental production begins. Incremental production from a tertiary recovery project that uses carbon dioxide and which has been certified as a qualified project by the industrial commission is exempt from any taxes imposed under this chapter from the date the incremental production begins.
- c. For purposes of this subsection, incremental production is defined in the following manner:
 - (1) For purposes of determining the exemption provided for in subdivision a and with respect to a unit where there has not been a secondary recovery project, incremental production means the difference between the total amount of oil produced from the unit during the secondary recovery project and the amount of primary production from the unit. For purposes of this paragraph, primary production means the amount of oil which would have been produced from the unit if the secondary recovery project had not been commenced. The industrial commission shall determine the amount of primary production in a manner which conforms to the practice and procedure used by the commission at the time the project is certified.
 - (2) For purposes of determining the exemption provided for in subdivision a and with respect to a unit where a secondary recovery project was in existence prior to July 1, 1991, and where the industrial commission cannot establish an accurate production decline curve, incremental production means the difference between the total amount of oil produced from the unit during a new secondary recovery project and the amount of production which would be equivalent to the average monthly production from the unit during the most recent twelve months of normal production reduced by a production decline rate of ten percent for each year. The industrial commission shall determine the average monthly production from the unit during the most recent twelve months of normal production and must upon request or upon its own motion hold a hearing to make this determination. For purposes of this paragraph, when determining the most recent twelve months of normal

production the industrial commission is not required to use twelve consecutive months. In addition, the production decline rate of ten percent must be applied from the last month in the twelve-month period of time.

- (3) For purposes of determining the exemption provided for in subdivision a and with respect to a unit where a secondary recovery project was in existence before July 1, 1991, and where the industrial commission can establish an accurate production decline curve, incremental production means the difference between the total amount of oil produced from the unit during the new secondary recovery project and the total amount of oil that would have been produced from the unit if the new secondary recovery project had not been commenced. For purposes of this paragraph, the total amount of oil that would have been produced from the unit if the new secondary recovery project had not been commenced includes both primary production and production that occurred as a result of the secondary recovery project that was in existence before July 1, 1991. The industrial commission shall determine the amount of oil that would have been produced from the unit if the new secondary recovery project had not been commenced in a manner that conforms to the practice and procedure used by the commission at the time the new secondary recovery project is certified.
- (4) For purposes of determining the exemption provided for in subdivision b and with respect to a unit where there has not been a secondary recovery project, incremental production means the difference between the total amount of oil produced from the unit during the tertiary recovery project and the amount of primary production from the unit. For purposes of this paragraph, primary production means the amount of oil which would have been produced from the unit if the tertiary recovery project had not been commenced. The industrial commission shall determine the amount of primary production in a manner which conforms to the practice and procedure used by the commission at the time the project is certified.
- (5) For purposes of determining the exemption provided for in subdivision b and with respect to a unit where there is or has been a secondary recovery project, incremental production means the difference between the total amount of oil produced during the tertiary recovery project and the amount of production which would be equivalent to the average monthly production from the unit during the most recent twelve months of normal production reduced by a production decline rate of ten percent for each year. The industrial commission shall determine the average monthly production from the unit during the most recent twelve months of normal production and must upon request or upon its own motion hold a hearing to make this determination. For purposes of this paragraph, when determining the most recent twelve months of normal production the industrial commission is not required to use twelve consecutive months. In addition, the production decline rate of ten percent must be applied from the last month in the twelve-month period of time.
- (6) For purposes of determining the exemption provided for in subdivision b and with respect to a unit where there is or has been a secondary recovery project and where the industrial commission can establish an accurate production decline curve, incremental production means the difference between the total amount of oil produced from the unit during the tertiary recovery project and the total amount of oil that would have

been produced from the unit if the tertiary recovery project had not been commenced. For purposes of this paragraph, the total amount of oil that would have been produced from the unit if the tertiary recovery project had not been commenced includes both primary production and production that occurred as a result of any secondary recovery project. The industrial commission shall determine the amount of oil that would have been produced from the unit if the tertiary recovery project had not been commenced in a manner that conforms to the practice and procedure used by the commission at the time the tertiary recovery project is certified.

- d. ~~The industrial commission shall adopt rules relating to this exemption that must include procedures for determining incremental production as defined in subdivision c.~~
- 6. ~~The production of oil from a two-year inactive well, as determined by the industrial commission and certified to the state tax commissioner, for a period of ten years after the date of receipt of the certification. The exemption under this subsection becomes ineffective if the average price of a barrel of crude oil exceeds the trigger price for each month in any consecutive five-month period. However, the exemption is reinstated if, after the trigger provision becomes effective, the average price of a barrel of crude oil is less than the trigger price for each month in any consecutive five-month period.~~
- 7. ~~The production of oil from a horizontal reentry well, as determined by the industrial commission and certified to the state tax commissioner, for a period of nine months after the date the well is completed as a horizontal well. The exemption under this subsection becomes ineffective if the average price of a barrel of crude oil exceeds the trigger price for each month in any consecutive five-month period. However, the exemption is reinstated if, after the trigger provision becomes effective, the average price of a barrel of crude oil is less than the trigger price for each month in any consecutive five-month period.~~
- 8. ~~The initial production of oil from a well is exempt from any taxes imposed under this chapter for a period of sixty months if:~~
 - a. ~~The well is located within the boundaries of an Indian reservation;~~
 - b. ~~The well is drilled and completed on lands held in trust by the United States for an Indian tribe or individual Indian; or~~
 - c. ~~The well is drilled and completed on lands held by an Indian tribe if the interest is in existence on August 1, 1997.~~
- 9. ~~The first seventy-five thousand barrels of oil produced during the first eighteen months after completion, from a horizontal well drilled and completed in the Bakken formation after June 30, 2007, and before July 1, 2008, is subject to a reduced tax rate of two percent of the gross value at the well of the oil extracted under this chapter. A well eligible for a reduced tax rate under this subsection is eligible for the exemption for horizontal wells under subsection 3, if the exemption under subsection 3 is effective during all or part of the first twenty-four months after completion.~~

SECTION 6. AMENDMENT. Subsection 1 of section 57-51.1-03.1 of the North Dakota Century Code is amended and reenacted as follows:

- 1. To receive, from the first day of eligibility, a tax exemption on production from a stripper well property or individual stripper well under subsection 2 of section 57-51.1-03, the industrial commission's certification must be submitted to the tax commissioner within eighteen months after the end of the stripper well property's or stripper well's qualification period.

SECTION 7. AMENDMENT. Section 57-51.2-02 of the North Dakota Century Code is amended and reenacted as follows:

57-51.2-02. Agreement requirements.

An agreement under this chapter is subject to the following:

1. The only taxes subject to agreement are the state's oil and gas gross production and oil extraction taxes attributable to production from wells located within the exterior boundaries of the Fort Berthold Reservation.
2. The state's oil and gas gross production tax under chapter 57-51 and oil extraction tax under chapter 57-51.1 must apply to all wells located within the Fort Berthold Reservation.
3. The state's oil extraction tax under chapter 57-51.1 as applied to oil and gas production ~~attributable to trust lands~~ on the Fort Berthold Reservation may not exceed six and one-half percent but may be reduced through negotiation between the governor and the Three Affiliated Tribes.
4. Any exemptions for oil and gas production from trust lands under chapters 57-51 and 57-51.1 do not apply to production within the boundaries of the Fort Berthold Reservation except as otherwise provided in the agreement.
5. The allocation of revenue from oil and gas production taxes on the Fort Berthold Reservation must be as follows:
 - a. Production attributable to trust lands. All revenues and exemptions from all oil and gas gross production and oil extraction taxes attributable to production from trust lands on the Fort Berthold Reservation must be evenly divided between the tribe and the state.
 - b. All other production. ~~The tribe must receive twenty percent of the total oil and gas gross production taxes collected from all production~~All revenues and exemptions from all oil and gas gross production and oil extraction taxes attributable to production from nontrust lands on the Fort Berthold Reservation must be evenly divided between the tribe and the state in lieu of the application of the Three Affiliated Tribes' fees and taxes related to production on such lands. ~~The state must receive the remainder.~~
 - c. The state's share of the revenue as divided in subdivisions a and b is subject to distribution among political subdivisions as provided in chapters 57-51 and 57-51.1.
6. An oil or gas well that is drilled and completed during the time of an agreement under this chapter must be subject to the terms of the agreement for the life of the well.
7. The Three Affiliated Tribes must agree not to impose a tribal tax or any fee on future production of oil and gas on the Fort Berthold Reservation during the term of the agreement.
8. To address situations in which the tax commissioner refunds taxes to a taxpayer, the agreement must allow the tax commissioner to offset future distributions to the tribe.
9. The tax commissioner must retain authority to administer and enforce chapters 57-51 and 57-51.1 as applied to wells subject to any agreement authorized by this chapter.
10. An oil or gas well that is drilled and completed during the time an agreement under this chapter is in effect is subject to state regulatory

provisions for the life of the well in addition to any other applicable regulatory provisions.

11. The federal district court for the western division of North Dakota is the venue for any dispute arising from a revenue-sharing agreement between the state and the Three Affiliated Tribes.

SECTION 8. EFFECTIVE DATE. Section 3 of this Act is effective for taxable years beginning after December 31, 2013, and the remainder of this Act is effective for taxable events occurring after June 30, 2013."

Renumber accordingly"

Page 1517, after line 25, insert:

"MESSAGE TO THE SENATE FROM THE HOUSE (BUELL J. REICH, CHIEF CLERK)
MR. PRESIDENT: The Speaker has signed: HB 1026, HB 1052, HB 1054, HB 1085, HB 1091, HB 1117, HB 1130, HB 1185, HB 1192, HB 1241, HB 1247, HB 1267."

Page 1557, line 5, replace "Marcellais" with "Nelson"

Page 1558, line 27, after the first comma insert "Fifth"

Page 1639, line 45, after "passed" insert "and the emergency clause carried"

Page 1711, line 12, replace "SB 2094" with "SB 2095"
