Dear Members of the House Government and Veterans Affairs Committee,

I am writing to urge a that this this HCR 3018 receives a DO NOT PASS recommendation.

Initiated measures and amendments to the North Dakota Constitution are a hallmark of our democracy. I'll say that again, initiated measures are an important part of the State of North Dakota's democracy. Session after session, I see the legislature trying to erode the rights of the citizen's ability to initiate measures and amendments. This has to stop.

Further, the way that this resolution is written is vague as far as what a "single topic" is. Do multiple aspects of a problem constitute multiple topics or what? I feel like this the way this is worded is very vague and subjective and means that many initiated measures will be discarded by courts rather than by the people.

Again, I am writing to urge that this commit recommend that this resolution receives a DO NOT PASS recommendation.

Sincerely,

Brian Glaeske
