Dear Human Services Committee Members,

I am writing to you today regarding HB 1468 Relating to informed consent and notice of risks associated with vaccines; and to provide a penalty. I am in FAVOR of this bill and am asking you to DO PASS this bill.

It is very important that patients, consumers of medical treatments and drugs, must be properly informed about all health risks related to a product before they accept that treatment, drug, medicine, vaccine, biologic, whatever it is. Informed consent is crucial for healthy people.

Again please DO Pass this bill HB 1468. Thank you for your time!
Lisa Pulkrabek
