

HB 1469 – HFND

STRONGLY OPPOSE – Please do NOT support this bill as it will force parents of school age children to take a ND Dept. of Health “Vaccination Education Module” before they are able to use a personal or religious exemption. As a parent, to make this choice comes with much personal research and is never done lightly. It is an educated health decision that parents are fully capable of doing on their own. To force or tie parents hands or make them jump through hoops to make a personal health decision for their family is wrong. Please oppose this bill.
