

Hello

My name is Marvin Lepp and I am writing to you today in regards to HB 1469 regarding re-education for vaccinations for school age children. I have dealt with the first hand pressure that is placed on individuals when it comes to vaccines and have dealt with the issues that arise after the fact.

My wife was convinced to receive the HPV vaccine in 2010 by her Doctor shortly before our marriage. It was when the vaccine first came out and she was told that it would help prevent all sorts of issues including cervical cancer and was pressured into taking the shots.

I cannot express how much I wish this never would have happened. What the vaccine actually did was make a very healthy young woman near infertile. We spent the better part of 6 years and thousands of dollars trying to conceive our little miracle. She developed Polycystic Ovary Syndrome, has had to endure surgeries for the pain related to it, and last emotional health issues as this "CURE" permanently damaged her body.

This same vaccine is now in our school systems and on the "required list".

Moving forward after we finally had our little miracle we dealt with a ton of pressure from our pediatrician, "the best in the state" Kathy Anderson. She was the same doctor who led the CHI dr. revolt and the one that has been spearheading all the letters to the Governor regarding masks and vaccines. The amount of pressure being pushed onto parents who only want the best for their children is alarming. The Doctors, their nurses, everyone pushes this issue and it disgusting the tactics that are currently taken to convince us for the "appropriate" vaccines.

Why do you think the only people in favor of this are doctors and members of the State Health Department. You know the same people who helped coordinate statewide lock downs, quarantine measures, and letters of encouragement to the governor.

This bill if passed will see more children withdrawn from school systems by parents in flocks. The State Health Department has already created enough issues in our schools with unelected officials dictating the lives of our children. As far as I am concerned the state health officer and the director of human service should be an elected position just like the state superintendent so that they are held accountable for their actions.

There is no liability for vaccine damage. If there was it would not be a multi-billion dollar industry.

Thank you for your time.
