

Good Morning Chairman Weisz and members of the House Human Services Committee. My name is Brianna Monahan and I am the Coordinator of the North Dakota Diabetes Prevention and Control Program with the North Dakota Department of Health. I do not have testimony for HCR 3030, directing the Legislative Management to consider studying metabolic syndrome, but want to let you know I am available virtually to answer questions, if needed.

For your awareness, the 2020 North Dakota Diabetes Report is linked below which includes relevant chronic disease data and proposed strategies to reduce chronic disease prevalence that would impact the prevalence of Metabolic Syndrome.
