

I am Chloe Howry, I am 8 years old, I live in New Town, North Dakota, and I am in support of this bill. I want to say that I learned in science that when we breathe out, we breathe out waste. Covid-19 attacks the lungs, so masks make you breathe back in that waste. So it could actually help Covid grow in the lungs. I feel like the people who work in businesses that are forced to wear masks, they work with people so if they have to wear a mask, then they could have problems. And we don't want that to happen. Some people don't even want to wear masks, and if they don't want to wear masks, and if masks could help Covid grow, then we should let them have their own choice. Thank you for reading.
