

Senator,

I move to amend this bill to defund the so called Ethics commission until it follows the peoples initiated mandate to investigate all complaints sent to them.

They currently have dismissed ALL complaints sent to them and it is clear they are a do nothing committee.

I have sent many complaints with the evidence and the laws that were broken and they will not send them to the AG or BCI for investigation and for charges.

This commission was set up so we the people did not have to spend our time and money in court filing charges for illegal activity in our government. We all know the courts just dismiss cases brought by citizens anyway!

This commission is already going to face legal charges due to its criminal behavior **NOT** to do its mandated job by the people!

Thank you,
